PHYSICAL REVIEW A **THIRD SERIES, VOLUME 78, NUMBER 3** **SEPTEMBER 2008**

Spin polarons and molecules in strongly interacting atomic Fermi gases *(4 pages)* . . . . . 031602(R)
P. Massignan, G. M. Bruun, and H. T. C. Stoof

Quantum optics, physics of lasers, nonlinear optics, classical optics

Observation of diffraction-managed discrete solitons in curved waveguide arrays *(4 pages)* . . . . . 031801(R)
Alexander Szameit, Ivan L. Garanovich, Matthias Heinrich, Alexander Minovich, Felix Dreisow, Andrey A. Sukhorukov, Thomas Pertsch, Dragomir N. Neshev, Stefan Nolte, Wieslaw Krolikowski, Andreas Tünnermann, Arnan Mitchell, and Yuri S. Kivshar

Random quasi-phase-matching in a nonlinear photonic crystal structure of strontium tetraborate *(4 pages)* . . . . 031802(R)
A. S. Aleksandrovsky, A. M. Vyunishev, I. E. Shakhura, A. I. Zaitsev, and A. V. Zamkov

Gap-soliton trapping in random one-dimensional gratings *(4 pages)* . . . . . 031803(R)
Eduard N. Tsoy, C. Martijn de Sterke, and Fatkhulla Kh. Abdullaev

ARTICLES

Fundamental concepts

Partial separability and entanglement criteria for multiqubit quantum states *(21 pages)* 032101
Michael Seevinck and Jos Uffink

Space and momentum representation analysis of Hartman's effect in wave packet transmission *(6 pages)* 032102
María F. González, Josep Maria Bofill, Xavier Giménez, and F. Borondo

$O(m\alpha^6)$ corrections to energy levels of positronium with nonvanishing orbital angular momentum *(22 pages)* 032103
Jacek Zatorski

Quaternions, octonions, and Bell-type inequalities *(5 pages)* 032104
E. Shchukin and W. Vogel

Quantum dynamics in nonequilibrium environments *(12 pages)* 032105
Clive Emary

Quantum limits of measurements induced by multiplicative conservation laws: Extension of the Wigner-Araki-Yanase theorem *(7 pages)* 032106
Gen Kimura, Bernhard K. Meister, and Masanao Ozawa

Bell inequalities for three particles *(7 pages)* 032107
Jing-Ling Chen, Chunfeng Wu, L. C. Kwek, and C. H. Oh

Dynamical Casimir-Polder force between an atom and a conducting wall *(4 pages)* 032108
R. Vasile and R. Passante

Measurements of the Casimir-Lifshitz force in fluids: The effect of electrostatic forces and Debye screening *(8 pages)* 032109
J. N. Munday, Federico Capasso, V. Adrian Parsegian, and Sergey M. Bezrukov

Singular inverse square potential in arbitrary dimensions with a minimal length: Application to the motion of a dipole in a cosmic string background *(8 pages)* 032110
Djamil Bouaziz and Michel Bawin

Beyond the simple proximity force approximation: Geometrical effects on the nonretarded Casimir interaction *(14 pages)* 032111
Bo E. Sernelius and C. E. Román-Velázquez
