THIRD SERIES, VOLUME 58, NUMBER 3
PARTS A AND B

CONTENTS

SEPTEMBER 1998

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R2673–3228, and Part B pages 3229–4052.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Influence of long-range interactions on the critical behavior of systems with a negative Fisher exponent R2673
H. K. Janssen

Rare events and breakdown of simple scaling in the Abelian sandpile model R2677
M. De Menech, A. L. Stella, and C. Tebaldi

Exactly solvable three-dimensional lattice model with attractive and repulsive interactions R2681
B. I. Lev

Diffusive persistence and the ''sign-time'' distribution R2685
T. J. Newman and Z. Toroczkai

Attraction and repulsion of spiral waves by localized inhomogeneities in excitable media R2689
Alberto P. Muñuzuri, Vicente Pérez-Muñuzuri, and Vicente Pérez-Villar

Chaos and nonlinear dynamical systems

Chaotic dynamics in billiards using Bohm's quantum mechanics R2693
O. F. de Alcantara Bonfim, J. Florencio, and F. C. Sá Barreto

Stochastic resonance in a chaotic laser R2697
A. N. Pisarchik and R. Corbalán

Periodic orbit theory for resonant tunneling diodes: Comparison with quantum and experimental results R2701
D. S. Saraga, T. S. Monteiro, and D. C. Rouben

Classical fluids

How important are shock waves to single-bubble sonoluminescence? R2705
H. Y. Cheng, M.-C. Chu, P. T. Leung, and L. Yuan

Compressible Alfven turbulence in one dimension R2709
J. Fleischer and P. H. Diamond

Measured pulse width of sonoluminescence flashes in the form of resonance radiation R2713
Asis Giri and Vijay H. Arakeri

Liquid crystals

Dynamic light scattering studies of cholesteric and polymer-stabilized cholesteric liquid crystals R2717
Redouane Borsali, Uwe P. Schroeder, Do Y. Yoon, and R. Pecora

Copyright 1998 by The American Physical Society

1063-651X(199809)58:3:A;1-2

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 3** **SEPTEMBER 1998**

Experimental characterization of layer thinning transitions R2721
S. Pankratz, P. M. Johnson, H. T. Nguyen, and C. C. Huang

Complex fluids, polymers, and granular materials

Dynamics of fractal sol-gel polymeric clusters R2725
A. G. Zilman and R. Granek

Theory of slow dynamics in highly charged colloidal suspensions R2729
Michio Tokuyama

Biological physics

''Sticky hard spheres'' model of proteins near crystallization: A test based on the osmotic compressibility of lysozyme solutions R2733
Roberto Piazza, Véronique Peyre, and Vittorio Degiorgio

Physics of beams

Diamagnetic fields due to finite-dimension intense beams in high-gain free-electron lasers R2737
J. B. Rosenzweig and P. Musumeci

Classical physics, including nonlinear media

Stability of compacton solutions R2741
Bishwajyoti Dey and Avinash Khare

Formation, motion, and decay of vectorial cavity solitons R2745
U. Peschel, D. Michaelis, C. Etrich, and F. Lederer

ARTICLES

General methods of statistical physics

Graphical representations and cluster algorithms for critical points with fields 2749
O. Redner, J. Machta, and L. F. Chayes

Phase transitions in the Potts spin-glass model 2753
Giancarlo Franzese and Antonio Coniglio

Transition caused by multiplicative noises for finite globally coupled oscillators 2760
J. H. Li and Z. Q. Huang

Phase separation and coarsening in one-dimensional driven diffusive systems: Local dynamics leading to long-range Hamiltonians 2764
M. R. Evans, Y. Kafri, H. M. Koduvely, and D. Mukamel

Determination of the Hurst exponent by use of wavelet transforms 2779
Ingve Simonsen, Alex Hansen, and Olav Magnar Nes

Biased random walk in energetically disordered lattices 2788
Issak Avramov, Andrey Milchev, Eleni Arapaki, and Panos Argyrakis

Accelerated, decelerated, and oscillating fronts in a globally coupled bistable semiconductor system 2796
M. Meixner, P. Rodin, and E. Schöll

Viscoelastic effects on the dynamic susceptibility of a Brownian particle in an external potential 2808
Jean-Louis Déjardin

Carnot's theorem as Noether's theorem for thermoacoustic engines 2818
Eric Smith

Brownian motion in short range random potentials 2833
A. H. Romero and J. M. Sancho

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 3** **SEPTEMBER 1998**

Nonequilibrium transitions for a stochastic globally coupled model 2838
J. H. Li, Z. Q. Huang, and D. Y. Xing
Analytical study of coupled two-state stochastic resonators 2843
Udo Siewert and Lutz Schimansky-Geier
Explicit time and space dependence of ballistic molecular heat pulses 2853
T. Paszkiewicz and M. Pruchnik
Accurate quantum and statistical mechanics from system-specific operator expansions 2859
Alexander N. Drozdov and J. Javier Brey
Theory of non-Markovian activated rate processes for an arbitrarily shaped potential barrier 2865
Alexander N. Drozdov
Analytical results for the steady state of traffic flow models with stochastic delay 2876
Bing-Hong Wang, Lei Wang, P. M. Hui, and Bambi Hu
Expansion and contraction of avalanches in the two-dimensional Abelian sandpile 2883
D. V. Ktitarev and V. B. Priezzhev
Distribution of avalanches in interfacial motion in a porous medium 2889
Andrew Dougherty and Nathan Carle
Collectivity, phase transitions, and exceptional points in open quantum systems 2894
W. D. Heiss, M. Müller, and I. Rotter
Effective potential, critical point scaling, and the renormalization group 2902
Joseph Rudnick, William Lay, and David Jasnow
Refraction of waves in excitable media 2910
Leonid Pechenik and Herbert Levine
Reaction zones and quenched charged-particle systems with long-range interactions 2918
A. D. Rutenberg
Rocked quantum periodic systems in the presence of coordinate-dependent friction 2931
J. D. Bao, Y. Abe, and Y. Z. Zhuo
Self-averaging, distribution of pseudocritical temperatures, and finite size scaling in critical disordered systems 2938
Shai Wiseman and Eytan Domany
Signal transmission in one-way coupled bistable systems: Noise effect 2952
Ying Zhang, Gang Hu, and Luca Gammaitoni
Logarithmic corrections of the avalanche distributions of sandpile models at the upper critical dimension 2957
S. Lübeck
Second quantization of open systems using quasinormal modes 2965
K. C. Ho, P. T. Leung, Alec Maassen van den Brink, and K. Young
First-order wetting of rough substrates and quantum unbinding 2979
Attilio L. Stella and Giovanni Sartoni

Chaos and nonlinear dynamical systems

Multiplicative semiclassical dynamics and the quantization time 2983
L. Kaplan
Polarization patterns in Kerr media 2992
Miguel Hoyuelos, Pere Colet, Maxi San Miguel, and Daniel Walgraef
Different routes to chaos via strange nonchaotic attractors in a quasiperiodically forced system 3008
A. Venkatesan and M. Lakshmanan
Synchronizing spatiotemporal chaos in coupled map lattices via active-passive decomposition 3017
Wang Jinlan, Chen Guangzhi, Qin Tuanfa, Ni Wansun, and Wang Xuming
Digital communication by active-passive-decomposition synchronization in hyperchaotic systems 3022
Yu Zhang, Ming Dai, Yiman Hua, Wansun Ni, and Gonghuan Du

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 3** **SEPTEMBER 1998**

Bifurcations and transitions to chaos in an inverted pendulum 3028
Sang-Yoon Kim and Bambi Hu
Noise-induced stabilization of one-dimensional discontinuous maps 3036
Renate Wackerbauer
Resonance energy transfers in the induction phenomenon in quartic Fermi-Pasta-Ulam chains 3045
G. Christie and B. I. Henry
Decentralized delayed-feedback control of a coupled map model for open flow 3055
Keiji Konishi, Michio Hirai, and Hideki Kokame
Basin bifurcation in quasiperiodically forced systems 3060
Ulrike Feudel, Annette Witt, Ying-Cheng Lai, and Celso Grebogi
Synchronization of coupled time-delay systems: Analytical estimations 3067
K. Pyragas

Classical fluids

Ergodic-nonergodic phase diagram for a concentrated suspension of charge-stabilized colloids: Rescaled mean spherical approximation 3072
S. K. Lai and G. F. Wang
Structural precursor to freezing in the hard-disk and hard-sphere systems 3083
Thomas M. Truskett, Salvatore Torquato, Srikanth Sastry, Pablo G. Debenedetti, and Frank H. Stillinger
Secondary instability mode of a roll pattern and transition to spatiotemporal chaos in the Taylor-Dean system . . . 3089
Patrick Bot, Olivier Cadot, and Innocent Mutabazi
Equivalence of energy, entropy, and thermodynamic potentials in relation to the thermodynamic equilibrium of multitemperature gas mixtures 3098
D. Giordano
Anomalous scalings for fluctuations of inertial particles concentration and large-scale dynamics 3113
Tov Elperin, Nathan Kleeorin, and Igor Rogachevskii
Fronts, domain growth, and dynamical scaling in a $d=1$ nonpotential system 3125
R. Gallego, M. San Miguel, and R. Toral
Freezing and clustering transitions for penetrable spheres 3135
C. N. Likos, M. Watzlawek, and H. Löwen
Resonant mode interactions in Rayleigh-Bénard convection 3145
Joana Prat, Isabel Mercader, and Edgar Knobloch
Dimers in nucleating vapors 3157
A. A. Lushnikov and M. Kulmala
Boundary limitation of wave numbers in Taylor-vortex flow 3168
Marcus Linek and Guenter Ahlers
Stability of the order-order critical points of Heisenberg and nematic model fluids 3175
J. M. Tavares, P. I. C. Teixeira, and M. M. Telo da Gama
Circulation statistics in three-dimensional turbulent flows 3187
L. Moriconi and F. I. Takakura
Hydrodynamic instabilities and Soret effect in an aqueous electrolyte 3202
J. Colombani, H. Dez, J. Bert, and J. Dupuy-Philon
Two kinetic temperature description for shock waves 3209
F. J. Uribe, R. M. Velasco, and L. S. García-Colín
Reactive turbulent flow in low-dimensional, disordered media 3223
Michael W. Deem and Jeong-Man Park

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 3** **SEPTEMBER 1998**

PART B

Note to Reader i

Liquid crystals

Bicritical points in a nematic rod-disk mixture 3229
Agnieszka Chrzanowska
Directional energy transfer in columnar liquid crystals: A computer-simulation study 3237
Corrado Bacchiocchi and Claudio Zannoni
Elastic constants in a pseudomolecular approach for a mixed Maier-Saupe and Nehring-Saupe interaction law . . . 3245
L. R. Evangelista, I. Hibler, and H. Mukai
Miesowicz viscosities study of a two-component thermotropic mixture 3251
Joanna Janik, Jozef K. Moscicki, Krzysztof Czuprynski, and Roman Dabrowski
Orientational capillary pressure on a nematic point defect 3259
G. Guidone Peroli, G. Hillig, A. Saupe, and E. G. Virga
Optic models for short-pitch cholesteric and chiral smectic liquid crystals 3264
Pascal Hubert, Pontus Jägemalm, Claudio Oldano, and Mauro Rajteri
Imprinting of nematic order at surfaces created by polymerization-induced phase separation 3273
Karl R. Amundson
Reorientation gratings in polymer dispersed liquid crystals 3280
L. Vicari
Computer simulation of an unconfined liquid crystal film 3284
Stuart J. Mills, Christopher M. Care, Maureen P. Neal, and Douglas J. Cleaver
Pretilt angle generation on photoreactive polymer films 3295
H. G. Galabova, D. W. Allender, and J. Chen

Complex fluids, polymers, and granular materials

Anisotropy-driven dynamics of cellular fronts in directional solidification in thin samples 3302
Silvère Akamatsu and Gabriel Faivre
Interfacial compositions of solid and liquid in a phase-field model with finite interface thickness for isothermal solidification in binary alloys 3316
Seong Gyoon Kim, Won Tae Kim, and Toshio Suzuki
Generalized model of irreversible multilayer deposition 3324
Shaoxiong Yang, Pascal Viot, and Paul R. Van Tassel
Analytical structure factors for colloidal fluids with size and interaction polydispersities 3329
M. Ginoza and M. Yasutomi
Numerical study of geometrical dispersion in self-affine rough fractures 3334
Franck Plouraboué, Jean-Pierre Hulin, Stéphane Roux, and Joel Koplik
Molecular dynamics study of the vulcanization transition 3347
Michael Plischke and Sandra J. Barsky
First-order versus second-order interface localization transition of thin Ising films with competing walls 3353
Alan M. Ferrenberg, D. P. Landau, and K. Binder
Dynamics of granular stratification 3357
Hernán A. Makse, Robin C. Ball, H. Eugene Stanley, and Stephen Warr
Mixed mobile ion effect: A numerical study on the basis of a modified two-spin facilitated kinetic Ising model 3368
Beatrix Schulz, Michael Schulz, and Steffen Trimper
Particle dynamics in magnetorheological suspensions using diffusing-wave spectroscopy 3372
Eric M. Furst and Alice P. Gast
Model of clustering in the string phase of a shearing hard sphere colloidal dispersion 3377
R. S. Farr

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 3** **SEPTEMBER 1998**

Asymptotic laws for tagged-particle motion in glassy systems 3384
M. Fuchs, W. Götze, and M. R. Mayr
Effect of confinement on charge-stabilized colloidal suspensions between two charged plates 3400
J. Chakrabarti and H. Löwen
Thermodynamic properties of a lattice model of aqueous mixtures 3405
Radhika Sharma and Deepak Kumar
Homogeneous cooling of rough, dissipative particles: Theory and simulations 3416
S. Luding, M. Huthmann, S. McNamara, and A. Zippelius
Liquid-solid transition of the ferromagnetic Heisenberg fluid: Simulation, density functional, and perturbation theories 3426
E. Lomba, J. J. Weis, and C. F. Tejero
Solute trapping and solute drag in a phase-field model of rapid solidification 3436
N. A. Ahmad, A. A. Wheeler, W. J. Boettinger, and G. B. McFadden
Development of a picture of the van der Waals interaction energy between clusters of nanometer-range particles 3451
V. Arunachalam, W. H. Marlow, and J. X. Lu
Stochastic geometry of polygonal networks: An alternative approach to the hexagon-square transition in Bénard convection 3458
Uwe Thiele and Kerstin Eckert
Onset of polymer entanglement 3469
Shirish M. Chitanvis
Integral equation and simulation studies of the Heisenberg spin fluid in an external magnetic field 3478
F. Lado, E. Lomba, and J. J. Weis
Sol-gel transition of reversible cluster-cluster aggregations 3490
Takamichi Terao and Tsuneyoshi Nakayama
Stability of cylindrical domains in phase-separating binary fluids in shear flow 3495
Amalie Frischknecht
Dynamics of highly supercooled liquids: Heterogeneity, rheology, and diffusion 3515
Ryoichi Yamamoto and Akira Onuki
Polydisperse adsorption: Pattern formation kinetics, fractal properties, and transition to order 3530
N. V. Brilliantov, Yu. A. Andrienko, P. L. Krapivsky, and J. Kurths

Biological physics

Kinetics of structural changes in superhelical DNA 3537
Gero Wedemann, Christian Münkel, Gunther Schöppe, and Jörg Langowski
Steady-state organization of binary mixtures by active impurities 3547
Mads C. Sabra, Henriette Gilhøj, and Ole G. Mouritsen
Effect of interaction energy fluctuation on the folding of a proteinlike model 3552
Zhongwen Xing, Jun Wang, and Wei Wang
Steady states and global dynamics of electrical activity in the cerebral cortex 3557
P. A. Robinson, C. J. Rennie, J. J. Wright, and P. D. Bourke
Mapping of mutation-sensitive sites in proteinlike chains 3572
M. Skorobogatiy and G. Tiana
Characterizing self-similarity in bacteria DNA sequences 3578
Xin Lu, Zhirong Sun, Huimin Chen, and Yanda Li
Experimental tests of the Peyrard-Bishop model applied to the melting of very short DNA chains 3585
Alessandro Campa and Andrea Giansanti
Coarse grained description of protein folding 3589
Marek Cieplak and Trinh Xuan Hoang

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 3** **SEPTEMBER 1998**

Spontaneous oscillations in a nonlinear delayed-feedback shunting model of the pupil light reflex 3597
P. C. Bressloff and C. V. Wood
Learnability of periodic activation functions: General results 3606
Michal Rosen-Zvi, Michael Biehl, and Ido Kanter
Noise-induced coherent oscillations in randomly connected neural networks 3610
J. Pham, K. Pakdaman, and J.-F. Vibert
Transient regime duration in continuous-time neural networks with delay 3623
K. Pakdaman, C. Grotta-Ragazzo, and C. P. Malta
Associative memory based on synchronized firing of spiking neurons with time-delayed interactions 3628
Masahiko Yoshioka and Masatoshi Shiino
Non-Gaussian statistics of anomalous diffusion: The DNA sequences of prokaryotes 3640
Paolo Allegrini, Marco Buiatti, Paolo Grigolini, and Bruce J. West
Pattern recognition in a neural network with chaos 3649
Z. Tan and M. K. Ali
Computer simulation of ion conductance in membrane channels 3654
Matthew Hoyles, Serdar Kuyucak, and Shin-Ho Chung
Ripple phase formation in phosphatidylcholine: Effect of acyl chain relative length, position, and unsaturation . . . 3662
Beth A. Cunningham, Ari-David Brown, David H. Wolfe, W. Patrick Williams, and Anthony Brain
Formation and dynamics of modules in a dual-tasking multilayer feed-forward neural network 3673
Chi-Hang Lam and F. G. Shin

Plasma physics

On-off intermittencies in gas discharge plasma 3678
D. L. Feng, C. X. Yu, J. L. Xie, and W. X. Ding
Stopping of charged particles in a magnetized classical plasma 3686
H. B. Nersisyan
Nonmodal energetics of resistive drift waves 3693
Suzana J. Camargo, Michael K. Tippett, and Iberê L. Caldas
Energy relaxation and the quasiequation of state of a dense two-temperature nonequilibrium plasma 3705
M. W. C. Dharma-wardana and François Perrot
Theory and simulation of the interaction of ultraintense laser pulses with electrons in vacuum 3719
Brice Quesnel and Patrick Mora
Instability due to the dust-particulate–phonon interaction 3733
Osamu Ishihara
Measurement of the expansion of an aluminum plasma heated by *M*-band x rays 3739
T. S. Perry, R. I. Klein, D. R. Bach, K. S. Budil, R. Cauble, H. N. Kornblum , Jr., R. J. Wallace, and R. W. Lee
Model of hydrodynamic perturbation growth in the start-up phase of laser implosion 3744
R. Ishizaki and K. Nishihara
Separatrix crossing and large scale diffusion in low-frequency three-wave systems 3768
B. Weyssow, J. D. Reuss, and J. Misguich
Electronic stopping power of plasma for heavy ions at low velocity 3777
Yuguang Mu, Ruijin Wang, Yueyuan Xia, Chunyu Tan, and Liangmo Mei
Hamiltonian nontwist map for magnetic field lines with locally reversed shear in toroidal geometry 3781
R. Balescu
Amplitude equation at ionization instability and the onset of turbulence in a neon glow discharge 3793
B. Bruhn, B.-P. Koch, and P. Jonas
Equation of state of a strongly magnetized hydrogen plasma 3806
M. Steinberg, J. Ortner, and W. Ebeling

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 3** **SEPTEMBER 1998**

Physics of beams

Theory of tapered cooling 3817
Hiromi Okamoto and Jie Wei
Ginzburg-Landau model for mode competition and single-mode operation of a free-electron laser 3826
C. S. Ng and A. Bhattacharjee

Classical physics, including nonlinear media

Solitons in anharmonic chains with power-law long-range interactions 3833
Serge F. Mingaleev, Yuri B. Gaididei, and Franz G. Mertens
Two-dimensional noise-sustained structures in optical parametric oscillators 3843
Marco Santagiustina, Pere Colet, Maxi San Miguel, and Daniel Walgraef
Strain solitary waves in an elastic rod embedded in another elastic external medium with sliding 3854
A. V. Porubov, A. M. Samsonov, M. G. Velarde, and A. V. Bukhanovsky
Autoresonant solutions of the nonlinear Schrödinger equation 3865
L. Friedland
Self-induced transparency solitary waves in a doped nonlinear photonic band gap material 3876
Neşet Aközbek and Sajeev John
Photonic band gap formation in certain self-organizing systems 3896
Kurt Busch and Sajeev John
Electromagnetic scattering in polarizable backgrounds 3909
Olivier J. F. Martin and Nicolas B. Piller
Dynamics of self-trapped beams with phase dislocation in saturable Kerr and quadratic nonlinear media 3916
Dmitry V. Skryabin and William J. Firth
Electromagnetic scattering by an aggregate of spheres: Theoretical and experimental study of the amplitude scattering matrix 3931
Yu-lin Xu and Ru T. Wang

Computational physics

Numerical self-consistent-field method to solve the Kohn-Sham equations in confined many-electron atoms 3949
Jorge Garza, Rubicelia Vargas, and Alberto Vela
Volumetric formulation of the lattice Boltzmann method for fluid dynamics: Basic concept 3955
Hudong Chen
Atomic beam slowing and cooling: Discrete velocity model 3964
C. Reitshammer, F. Schürrer, and A. Rossani
Critical exponents and universal amplitude ratios in lattice trees 3971
S. You and E. J. Janse van Rensburg
Introduction of the Liénard-Wiechert correction to the particle simulation of relativistic plasmas 3977
Luis Plaja and Enrique Conejero Jarque
Computing the Kubo formula for large systems 3984
Tsuneyoshi Nakayama and Hiroyuki Shima

BRIEF REPORTS

General methods of statistical physics

Power-law behavior in a nonextremal Bak-Sneppen model 3993
Raffaele Cafiero, Paolo De Los Rios, Frank-Michael Dittes, Angelo Valleriani, and José Luis Vega
Random-neighbor Olami-Feder-Christensen slip-stick model 3997
Osame Kinouchi, Suani T. R. Pinho, and Carmem P. C. Prado

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 58, NUMBER 3** **SEPTEMBER 1998**

Critical behavior of the chain-generating function of self-avoiding walks on the Sierpinski gasket family: The Euclidean limit 4001
R. Riera and F. A. C. C. Chalub
Short-term stability of patterns in intracavity vectorial second-harmonic generation 4005
C. Etrich, D. Michaelis, U. Peschel, and F. Lederer

Chaos and nonlinear dynamical systems

Interior crises in a dripping faucet experiment 4009
R. D. Pinto, W. M. Gonçalves, J. C. Sartorelli, I. L. Caldas, and M. S. Baptista

Classical fluids

Distribution of time-headways in a particle-hopping model of vehicular traffic 4012
Kingshuk Ghosh, Arnab Majumdar, and Debashish Chowdhury
Heat flux at the transition from harmonic to chaotic flow in thermal convection 4016
V. M. Castillo and Wm. G. Hoover
Evolution of a scalar gradient's probability density function in a random flow 4019
A. Fouxon

Complex fluids, polymers, and granular materials

Surface width scaling in noise reduced Eden clusters 4023
M. T. Batchelor, B. I. Henry, and S. D. Watt
Lamellae stability in confined systems with gravity 4027
M. Bahiana and W. A. M. Morgado

Plasma physics

Frequency mixing of high intensity laser light with stimulated Raman backscattered radiation in underdense plasmas 4030
K. Krushelnick, C. I. Moore, A. Ting, and H. R. Burris
Magnetic mirroring and cosmic ray pitch-angle diffusion 4033
Uwe Jaekel

Computational physics

Island size distributions in submonolayer growth with mobile islands and breakup 4037
I. Koponen, M. Rusanen, and J. Heinonen
