This paper was highlighted in the APS publication *Physics* (physics.aps.org).

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 113, NUMBER 5** **MAY 2026**

Charge transport and mode transition in dual-energy electron beam diodes *(6 pages)* L053203
Chubin Lin, Jiandong Chen, Huihui Wang, and Yangyang Fu

Computational Physics, Machine Learning, and Artificial Intelligence

Signature of glassy dynamics in dynamic mode decompositions *(7 pages)* L053301
Zachary G. Nicolaou, Hangjun Cho, Yuanzhao Zhang, J. Nathan Kutz, and Steven L. Brunton

Soft Matter including Polymers, Liquid Crystals, and Granular Materials

Shape dictates the motion of topological defects in active nematics *(7 pages)* L053401
Giacomo Marco La Montagna, Sumeja Bureković, Ananyo Maitra, and Cesare Nardini

Tuning the viscosity and jamming point in dense active non-Brownian suspensions *(7 pages)* L053402
Bhanu Prasad Bhowmik

Gravity-induced modulation of negative differential thermal resistance in fluids *(6 pages)* L053403
Qiyuan Zhang, Juncheng Guo, Juchang Zou, and Rongxiang Luo

Shape-induced translational mode transition and self-entrapment of self-propelled metallodielectric rods *(7 pages)* L053404
Yasutaka Iwashita and Yasuyuki Kimura

Mechanics, Interfaces, and Films

Tightening dynamics of wound rolls: The interplay of solid friction and interfacial compressibility *(5 pages)* L053501
M. Caelen, S. Moulinet, B. Andreotti, and F. Lechenault

Geometry of the vapor layer under a Leidenfrost hydrogel sphere *(5 pages)* L053502
Vicente L. Diaz-Melian, Isaac C. D. Lenton, Jack Binysh, Anton Souslov, and Scott R. Waitukaitis

ARTICLES

Statistical Physics

Short-time statistics of extinction and blowup in reaction kinetics *(9 pages)* 054101
Rotem Degany, Michael Assaf, and Baruch Meerson

Quantum evolution of mixed states and performance of quantum heat engines *(16 pages)* 054102
Anatoly A. Svidzinsky and Wenzhuo Zhang

Classical spin liquids from frustrated Ising models in hyperbolic space *(6 pages)* 054103
Fabian Köhler, Johanna Erdmenger, Roderich Moessner, and Matthias Vojta

Stochastic heat engine using a single Brownian ellipsoid *(19 pages)* 054104
Soham Dutta and Arnab Saha

Molecular communication in one-dimensional channels with active transport and crowding *(9 pages)* 054105
Phanindra Dewan and Sumantra Sarkar

Constraint effective action and critical correlation functions at fixed magnetization *(14 pages)* 054106
Félix Rose, Adam Rançon, and Ivan Balog

THIRD SERIES, VOLUME 113, NUMBER 5 PARTS A AND B | ***CONTENTS*** | **MAY 2026**

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages L052101–054317, and Part B pages 054401–059901(E).

PART A

LETTERS

Statistical Physics

Large deviations of current for the symmetric simple exclusion process on a semi-infinite line and on an infinite line with a slow bond *(8 pages)* L052101
Kapil Sharma, Soumyabrata Saha, Sandeep Jangid, and Tridib Sadhu

Operator-Weyl-symbol approach to eigenstate thermalization hypothesis *(6 pages)* L052102
Xiao Wang (王晓) and Wen-ge Wang (王文阁)

Nonlinear Dynamics and Chaos

Dynamics of reservoir computing for crises prediction *(5 pages)* L052201
Dishant Sisodia and Sarika Jalan

Resetting without resetting: An alternate strategy to experimentally verify optimal mean first passage time under stochastic resetting *(6 pages)* L052202
Abhishek Thakur, Shrutija Swain, Aarsh Chotalia, and P. Parmananda

Observing a focused weak shock wave perform a Hilbert transform *(6 pages)* L052203
Miguel A. Alonso and Pedro A. Quinto-Su

Entanglement production in the Sachdev-Ye-Kitaev model and its variants *(7 pages)* L052204
Tanay Pathak and Masaki Tezuka

Biological Physics

Compaction and swelling of single stretched DNAs driven by molecular crowding *(7 pages)* L052401
Paritosh Gupta, John F. Marko, and Vittore F. Scolari

Plasma Physics

Impact of fast ions on turbulent transport in high-β HL-2A tokomak scenarios *(7 pages)* L053201
Jingchun Li, Zhaoyang Lu, Jianqiang Xu, Wei Chen, Jiaqi Dong, Jingting Luo, and Yong Liu

Neural differential equations for the solar dynamo *(6 pages)* L053202
E. Illarionov, V. Kisielius, R. Stepanov, and K. M. Kuzanyan
