THIRD SERIES, VOLUME 58, NUMBER 2
PARTS A AND B

*CONTENTS*

AUGUST 1998

***The Table of Contents is a total listing of Parts A and B.***
***Part A consists of pages R1179–1954, and Part B pages 1955–2672.***

## PART A

Note to Reader . . . . . i

## RAPID COMMUNICATIONS

### General methods of statistical physics

Finite-size effects on critical diffusion and relaxation towards metastable equilibrium . . . . . R1179
W. Koch and V. Dohm

Percolation thresholds in chemical disordered excitable media . . . . . R1183
I. Sendiña-Nadal, D. Roncaglia, D. Vives, V. Pérez-Muñuzuri, M. Gómez-Gesteira, V. Pérez-Villar, J. Echave, J. Casademunt, L. Ramírez-Piscina, and F. Sagués

Determination of dynamical critical exponents from hysteresis scaling . . . . . R1187
G. P. Zheng and J. X. Zhang

### Chaos and nonlinear dynamical systems

Has chaos implied by macrovariable equations been justified? . . . . . R1191
Qianshu Li and Hongli Wang

Statistics of *S*-matrix poles for chaotic systems with broken time reversal invariance: A conjecture . . . . . R1195
Yan V. Fyodorov, Mikhail Titov, and Hans-Jürgen Sommers

### Classical fluids

Systematic drift experienced by a point vortex in two-dimensional turbulence . . . . . R1199
Pierre-Henri Chavanis

Gradient clogging in depth filtration . . . . . R1203
Somalee Datta and S. Redner

### Liquid crystals

High-resolution heat-capacity studies of the hexatic-*B*–smectic-*F* phase transition in liquid-crystal compounds . . . R1207
P. M. Johnson, C. C. Huang, E. Gorecka, and D. Pociecha

Liquid-crystal-anchoring transitions at surfaces created by polymerization-induced phase separation . . . . . R1211
Karl R. Amundson and Mohan Srinivasarao

Smectic-*A* Fréedericksz transition . . . . . R1215
Steve J. Elston

**Copyright 1998 by The American Physical Society**

*(Continued)*

1063-651X(199808)58:2:A;1-6

**PHYSICAL REVIEW E** **THIRD SERIES, VOLUME 58, NUMBER 2** **AUGUST 1998**

**Complex fluids, polymers, and granular materials**

Subharmonic motion of particles in a vibrating tube . . . . . R1218
Jysoo Lee
Topological effects on statics and dynamics of knotted polymers . . . . . R1222
Yu-Jane Sheng, Pik-Yin Lai, and Heng-Kwong Tsao
Relaxation dynamics in ultrathin polymer films . . . . . R1226
J. A. Forrest, C. Svanberg, K. Révész, M. Rodahl, L. M. Torell, and B. Kasemo
Real-time observation on deformation of bicontinuous phase under simple shear flow . . . . . R1230
Feng Qiu, Jiandong Ding, and Yuliang Yang
Enormous stress response of anisotropic solution of poly($\gamma$-benzyl-L-glutamate) to sinusoidal electric fields with low frequencies unexplained by the electrohydrodynamic instability . . . . . R1234
Katsufumi Tanaka, Akio Takahashi, and Ryuichi Akiyama
Viscoelasticity of tightly entangled solutions of semiflexible polymers . . . . . R1237
David C. Morse
Dynamic shear modulus of a semiflexible polymer network . . . . . R1241
F. Gittes and F. C. MacKintosh

**Plasma physics**

Magnetically induced optical transparency of overdense plasmas due to ultrafast ionization . . . . . R1245
D. Teychenné, A. Giulietti, D. Giulietti, and L. A. Gizzi
Interaction of femtosecond laser pulses with ultrathin foils . . . . . R1248
A. Forsman, A. Ng, G. Chiu, and R. M. More

**Classical physics, including nonlinear media**

Instabilities of higher-order parametric solitons: Filamentation versus coalescence . . . . . R1252
Dmitry V. Skryabin and William J. Firth
Breathing self-similar dynamics and oscillatory tails of the chirped dispersion-managed soliton . . . . . R1256
Sergei K. Turitsyn

## ARTICLES

**General methods of statistical physics**

Kinetics of a mixed Ising ferrimagnetic system . . . . . 1260
G. M. Buendía and E. Machado
Smoothing of sandpile surfaces after intermittent and continuous avalanches: Three models in search of an experiment . . . . . 1266
Parthapratim Biswas, Arnab Majumdar, Anita Mehta, and J. K. Bhattacharjee
Simplified cellular automaton model for city traffic . . . . . 1286
P. M. Simon and K. Nagel
Generalized Einstein relation: A stochastic modeling approach . . . . . 1296
E. Barkai and V. N. Fleurov
Traffic jams and hysteresis in driven one-dimensional systems . . . . . 1311
O. M. Braun, B. Hu, A. Filippov, and A. Zeltser
Noise-induced transport of Brownian particles with consideration for their mass . . . . . 1325
P. S. Landa
Resonance trapping and saturation of decay widths . . . . . 1334
E. Persson, T. Gorin, and I. Rotter
Connection between energy spectrum, self-similarity, and specific heat log-periodicity . . . . . 1346
Raúl O. Vallejos, Renio S. Mendes, Luciano R. da Silva, and Constantino Tsallis

*(Continued)*

**PHYSICAL REVIEW E** **THIRD SERIES, VOLUME 58, NUMBER 2** **AUGUST 1998**

Generic emergence of power law distributions and Lévy-Stable intermittent fluctuations in discrete logistic systems . . . . . 1352
Ofer Biham, Ofer Malcai, Moshe Levy, and Sorin Solomon
Self-similar exponential approximants . . . . . 1359
V. I. Yukalov and S. Gluzman
Non-Hermitian localization and population biology . . . . . 1383
David R. Nelson and Nadav M. Shnerb
Jamming transition in a homogeneous one-dimensional system: The bus route model . . . . . 1404
O. J. O'Loan, M. R. Evans, and M. E. Cates
Dynamics of a nonlinear oscillator which is coupled to various model heat baths . . . . . 1419
Donald P. Visco Jr. and Surajit Sen
Two-lane traffic rules for cellular automata: A systematic approach . . . . . 1425
Kai Nagel, Dietrich E. Wolf, Peter Wagner, and Patrice Simon
Evidence for self-organized criticality in the Bean critical state in superconductors . . . . . 1438
C. M. Aegerter
Generalized entropy-based criterion for consistent testing . . . . . 1442
Constantino Tsallis
Surface critical behavior of driven diffusive systems with open boundaries . . . . . 1446
K. Oerding and H. K. Janssen
Exact three-dimensional Casimir force amplitude, $C$ function, and Binder's cumulant ratio: Spherical model results . . . . . 1455
Daniel M. Danchev
Amplitude equations for extended discrete systems: A study of an antiferromagnetic spin chain . . . . . 1463
B. Rumpf and H. Sauermann
Phase behavior of a system of particles with core collapse . . . . . 1478
E. A. Jagla
Ionic reactions in two dimensions with disorder . . . . . 1487
Jeong-Man Park and Michael W. Deem
Gutenberg-Richter and characteristic earthquake behavior in simple mean-field models of heterogeneous faults . . . 1494
Karin Dahmen, Deniz Ertaş, and Yehuda Ben-Zion
Properties of the two-dimensional random-bond $\pm J$ Ising spin glass . . . . . 1502
J. A. Blackman, J. R. Gonçalves, and J. Poulter
Defect relaxation and coarsening exponents . . . . . 1508
A. J. Bray
Dynamics of driven interfaces near isotropic percolation transition . . . . . 1514
M.-P. Kuittu, M. Haataja, N. Provatas, and T. Ala-Nissila
Universal finite-size scaling functions for percolation on three-dimensional lattices . . . . . 1521
Chai-Yu Lin and Chin-Kun Hu
Probabilistic approach to time-dependent load-transfer models of fracture . . . . . 1528
J. B. Gómez, Y. Moreno, and A. F. Pacheco
Diffusion controlled initial recombination . . . . . 1533
T. Christen and M. Büttiker
Perturbation expansion in phase-ordering kinetics: I. Scalar order parameter . . . . . 1543
Gene F. Mazenko
Dynamic ductile to brittle transition in a one-dimensional model of viscoplasticity . . . . . 1568
Alexander E. Lobkovsky and J. S. Langer
From individual to collective pinning: Effect of long-range elastic interactions . . . . . 1577
Anne Tanguy, Matthieu Gounelle, and Stéphane Roux
Asymptotic power law of moments in a random multiplicative process with weak additive noise . . . . . 1591
Hiroya Nakao

*(Continued)*

**PHYSICAL REVIEW E** **THIRD SERIES, VOLUME 58, NUMBER 2** **AUGUST 1998**

Driven Frenkel-Kontorova model. I. Uniform sliding states and dynamical domains of different particle densities . . . . . 1601
Torsten Strunz and Franz-Josef Elmer
Driven Frenkel-Kontorova model. II. Chaotic sliding and nonequilibrium melting and freezing . . . . . 1612
Torsten Strunz and Franz-Josef Elmer
Anomalous transport in external fields: Continuous time random walks and fractional diffusion equations extended . . . . . 1621
Ralf Metzler, Joseph Klafter, and Igor M. Sokolov
Correlations in a confined gas of harmonically interacting spin-polarized fermions . . . . . 1634
F. Brosens, J. T. Devreese, and L. F. Lemmens
Exact correlation functions of Bethe lattice spin models in external magnetic fields . . . . . 1644
Chin-Kun Hu and N. Sh. Izmailian

**Chaos and nonlinear dynamical systems**

Interaction between Hopf and static instabilities in a pattern-forming optical system . . . . . 1654
Yu. A. Logvin and T. Ackemann
Synchronization of the mean velocity of a particle in stochastic ratchets with a running wave . . . . . 1662
D. E. Postnov, A. P. Nikitin, and V. S. Anishchenko
Driven maps and the emergence of ordered collective behavior in globally coupled maps . . . . . 1665
A. Parravano and M. G. Cosenza
Entropy balance in the presence of drift and diffusion currents: An elementary chaotic map approach . . . . . 1672
Jürgen Vollmer, Tamás Tél, and Wolfgang Breymann
Experimental control of a chaotic point process using interspike intervals . . . . . 1685
G. Martin Hall, Sonya Bahar, and Daniel J. Gauthier
Lévy flights in quenched random force fields . . . . . 1690
Hans C. Fogedby
High harmonic generation in systems with bounded chaos . . . . . 1713
W. Chism, T. Timberlake, and L. E. Reichl
Dynamics of coding in communicating with chaos . . . . . 1724
Erik Bollt and Ying-Cheng Lai
Mode fluctuation distribution for spectra of superconducting microwave billiards . . . . . 1737
H. Alt, A. Bäcker, C. Dembowski, H.-D. Gräf, R. Hofferbert, H. Rehfeld, and A. Richter
Squeezed state dynamics of kicked quantum systems . . . . . 1743
Bambi Hu, Baowen Li, Jie Liu, and Ji-Lin Zhou
Half-period delayed feedback control for dynamical systems with symmetries . . . . . 1757
Hiroyuki Nakajima and Yoshisuke Ueda
Pattern interaction and spiral waves in a two-layer system of excitable units . . . . . 1764
V. I. Nekorkin, V. B. Kazantsev, M. G.Velarde, and L. O. Chua
Chaos in trapped particle orbits . . . . . 1774
R. B. White
Free particle chaotic scattering off two oscillating disks . . . . . 1780
A. Antillón, Jorge V. José, and T. H. Seligman
Dynamics of nonlinear oscillators with random interactions . . . . . 1789
J. C. Stiller and G. Radons
Testing stationarity in time series . . . . . 1800
A. Witt, J. Kurths, and A. Pikovsky

*(Continued)*

**PHYSICAL REVIEW E** **THIRD SERIES, VOLUME 58, NUMBER 2** **AUGUST 1998**

**Classical fluids**

Improved shell model of turbulence . . . . . 1811
Victor S. L'vov, Evgenii Podivilov, Anna Pomyalov, Itamar Procaccia, and Damien Vandembroucq
Renormalization group, operator product expansion, and anomalous scaling in a model of advected passive scalar . . . . . 1823
Loran Ts. Adzhemyan, Nikolaj V. Antonov, and Alexander N. Vasil'ev
Nonlinear Couette flow in a dilute gas: Comparison between theory and molecular-dynamics simulation . . . . . 1836
J. M. Montanero and V. Garzó
Discretized integral hydrodynamics . . . . . 1843
Víctor Romero-Rochín and J. Miguel Rubí
Refined similarity hypothesis and asymmetry of turbulence . . . . . 1851
S. I. Vainshtein
Reference Soret coefficients of natural isotopes and diluted alloys of tin . . . . . 1866
S. Van Vaerenbergh, J. P. Garandet, J. P. Praizey, and J. C. Legros
Impulsive model for the Richtmyer-Meshkov instability . . . . . 1874
Marc Vandenboomgaerde, Claude Mügler, and Serge Gauthier
Dynamical control for capturing vortices near bluff bodies . . . . . 1883
Áron Péntek, James B. Kadtke, and Gianni Pedrizzetti
Electron-atom bremsstrahlung and the sonoluminescence of rare gas bubbles . . . . . 1899
Lothar Frommhold
Robust reduced-order controller of laminar boundary layer transitions . . . . . 1906
L. Cortelezzi and J. L. Speyer
Driven lattice gases with quenched disorder: Exact results and different macroscopic regimes . . . . . 1911
Goutam Tripathy and Mustansir Barma
Route to chaos for a two-dimensional externally driven flow . . . . . 1927
R. Braun, F. Feudel, and P. Guzdar
Direct correlation functions in two-dimensional anisotropic fluids . . . . . 1933
Antoine Chamoux and Aurelien Perera
Effects of a large-scale mean circulating flow on passive scalar statistics in a model of random advection . . . . . 1948
Emily S. C. Ching, C. S. Pang, and Gustavo Stolovitzky

**PART B**

Note to Reader . . . . . i

**Liquid crystals**

Viscous properties of nematic liquid crystals composed of biaxial molecules . . . . . 1955
Marcin Fiałkowski
Order distribution function of a linear polymerized photopolymer orienting a nematic liquid crystal . . . . . 1967
A. Th. Ionescu, R. Barberi, M. Giocondo, M. Iovane, and A. L. Alexe-Ionescu
Coupled complex Ginzburg-Landau equations for the weak electrolyte model of electroconvection . . . . . 1973
Martin Treiber and Lorenz Kramer
Dynamics of disordered patterns in electroconvection of homeotropically aligned nematic liquid crystals . . . . . 1983
P. Tóth, Á. Buka, J. Peinke, and L. Kramer
Capillary filling of nematic liquid crystals . . . . . 1992
Xiang-Dong Mi and Deng-Ke Yang
Dielectric spectroscopy of liquid crystals in smectic, nematic, and isotropic phases confined in random porous media . . . . . 2001
G. P. Sinha and F. M. Aliev

*(Continued)*

**PHYSICAL REVIEW E** **THIRD SERIES, VOLUME 58, NUMBER 2** **AUGUST 1998**

Fate of magnetic walls in nematic liquid crystals . . . . . 2011
M. Simões, A. J. Palangana, and F. C. Cardoso
Formation of chevrons in the dielectric regime of electroconvection in nematic liquid crystals . . . . . 2018
M. Scheuring, L. Kramer, and J. Peinke
Dynamic correlation functions for finite and infinite smectic-*A* systems: Theory and experiment . . . . . 2027
A. Poniewierski, R. Hołyst, A. C. Price, L. B. Sorensen, S. D. Kevan, and J. Toner
Orientational susceptibility and elastic constants near the nematic-isotropic phase transition for trimers with terminal-lateral-lateral-terminal connections . . . . . 2041
Daeseung Kang, Milind P. Mahajan, Rolfe G. Petschek, Charles Rosenblatt, Chaobin He, Puwei Liu, and A. C. Griffin
Electrohydrodynamic convection in liquid crystals driven by multiplicative noise: Sample stability . . . . . 2047
Ulrich Behn, Adrian Lange, and Thomas John

**Complex fluids, polymers, and granular materials**

Long-time limit of rotational segregation of granular media . . . . . 2061
Boris Levitan
Two-tier symmetry-breaking model of patterns on a catalytic surface . . . . . 2065
L. M. Pismen, R. Imbihl, B. Y. Rubinstein, and M. I. Monin
Interface dynamics, instabilities, and solute bands in rapid directional solidification . . . . . 2071
M. Conti
Exact calculation of force networks in granular piles . . . . . 2079
G. Oron and H. J. Herrmann
Macroscopic equations of motion for two-phase flow in porous media . . . . . 2090
R. Hilfer
Dynamics of foam drainage . . . . . 2097
S. A. Koehler, H. A. Stone, M. P. Brenner, and J. Eggers
Cluster model for compaction of vibrated granular materials . . . . . 2107
Konstantin L. Gavrilov
Bistability in non-Newtonian flow: Rheology of lyotropic liquid crystals . . . . . 2115
Daniel Bonn, Jacques Meunier, Olivier Greffier, Amer Al-Kahwaji, and Hamid Kellay
Statistical simulations of diffusional coarsening in finite clusters . . . . . 2119
H. Mandyam, M. E. Glicksman, J. Helsing, and S. P. Marsh
Test of mode coupling theory for a supercooled liquid of diatomic molecules. I. Translational degrees of freedom . . . . . 2131
Stefan Kämmerer, Walter Kob, and Rolf Schilling
Test of mode coupling theory for a supercooled liquid of diatomic molecules. II. $q$-dependent orientational correlators . . . . . 2141
Stefan Kämmerer, Walter Kob, and Rolf Schilling
Two-exponential correlation functions near the critical point of a micellar system . . . . . 2151
Ana Martín, Arturo G. Casielles, Mercedes G. Muñoz, Francisco Ortega, and Ramón G. Rubio
Time-resolved studies of stick-slip friction in sheared granular layers . . . . . 2161
S. Nasuno, A. Kudrolli, A. Bak, and J. P. Gollub
Effect of chiral interactions on the structure of Langmuir monolayers . . . . . 2172
E. Scalas, G. Brezesinski, V. M. Kaganer, and H. Möhwald
Fluctuation mechanism of the dielectric polarization of water-in-oil microemulsions with ionic surfactant . . . . . 2179
Nick Kozlovich, Alexander Puzenko, Yuriy Alexandrov, and Yuri Feldman
Crossover from Ising to mean-field critical behavior in an aqueous electrolyte solution . . . . . 2188
J. Jacob, A. Kumar, M. A. Anisimov, A. A. Povodyrev, and J. V. Sengers
Liquid-vapor phase behavior of a symmetrical binary fluid mixture . . . . . 2201
N. B. Wilding, F. Schmid, and P. Nielaba

*(Continued)*

**PHYSICAL REVIEW E** **THIRD SERIES, VOLUME 58, NUMBER 2** **AUGUST 1998**

Multifractal analysis of the spatial distribution of the film surfaces with different roughening mechanisms . . . . . 2213
J. G. Hou, Wang Yan, Xia Rui, Zhu Xiaoguang, Wang Haiqian, and Z. Q. Wu
Simulating temporal evolution of pressure in two-phase flow in porous media . . . . . 2217
Eyvind Aker, Knut Jørgen Måløy, and Alex Hansen
Nonlocal pseudopotential calculation for the electron-ion correlation in liquid metals . . . . . 2227
S. K. Lai, K. Horii, and M. Iwamatsu
Monte Carlo study of structural ordering in charged colloids using a long-range attractive interaction . . . . . 2237
B. V. R. Tata and Norio Ise
Energy nonequipartition in systems of inelastic, rough spheres . . . . . 2247
Sean McNamara and Stefan Luding
Equation of state for fluid mixtures of hard spheres and linear homonuclear fused hard spheres . . . . . 2251
J. Largo and J. R. Solana

**Biological physics**

Lipid bilayer dynamics from simultaneous analysis of orientation and frequency dependence of deuterium spin-lattice and quadrupolar order relaxation . . . . . 2259
Alexander A. Nevzorov, Theodore P. Trouard, and Michael F. Brown
Stochastic dynamics of the diffusive Haken model with subthreshold periodic forcing . . . . . 2282
Paul C. Bressloff and Peter Roper
Photon-density wave correlation spectroscopy detects large-scale fluctuations in turbid media . . . . . 2288
V. Toronov, M. Filiaci, S. Fantini, and E. Gratton
Multilayer perceptrons may learn simple rules quickly . . . . . 2298
R. Urbanczik
Mean-field theory of Boltzmann machine learning . . . . . 2302
Toshiyuki Tanaka
Fluid lipid bilayers: Intermonolayer coupling and its thermodynamic manifestations . . . . . 2311
Per Lyngs Hansen, Ling Miao, and John Hjort Ipsen
Temporal segmentation of the stochastic oscillator neural network . . . . . 2325
Seung Kee Han, Won Sup Kim, and Hyungtae Kook
On-line Gibbs learning. I. General theory . . . . . 2335
H. Sompolinsky and J. W. Kim
On-line Gibbs learning. II. Application to perceptron and multilayer networks . . . . . 2348
J. W. Kim and H. Sompolinsky
Electric field induced in cells in the human body when this is exposed to low-frequency electric fields . . . . . 2363
Ronold W. P. King and Tai Tsun Wu
Binding of the water of primary hydration to the sodium and cesium salts of deoxyribonucleic acid and potassium hyaluronate . . . . . 2370
K. B. Whitson, A. M. Lukan, R. L. Marlowe, S. A. Lee, L. Anthony, and A. Rupprecht
Learning in the hypercube: A stepping stone to the binary perceptron . . . . . 2378
M. Bouten, L. Reimers, and B. Van Rompaey
DNA strand separation studied by single molecule force measurements . . . . . 2386
U. Bockelmann, B. Essevaz-Roulet, and F. Heslot
Radiative transport in the diffusion approximation: An extension for highly absorbing media and small source-detector separations . . . . . 2395
V. Venugopalan, J. S. You, and B. J. Tromberg

**Plasma physics**

Electronic transmission properties in a mesoscopic necklace with nonlinear impurities . . . . . 2408
Zhiwen Pan, Shijie Xiong, and Changde Gong

*(Continued)*

**PHYSICAL REVIEW E** **THIRD SERIES, VOLUME 58, NUMBER 2** **AUGUST 1998**

Dissipative drift waves in partially ionized plasmas containing high-*Z* impurities or dust . . . . . 2415
S. V. Vladimirov and V. N. Tsytovich
Skin effect in strongly inhomogeneous laser plasmas with weakly anisotropic temperature distribution . . . . . 2424
A. A. Andreev, K. Yu. Platonov, and J.-C. Gauthier
Surface waves at the interface of a dusty plasma and a metallic wall . . . . . 2431
K. N. Ostrikov, M. Y. Yu, and N. A. Azarenkov
Generation of ultrashort light pulses by a rapidly ionizing thin foil . . . . . 2436
D. Bauer, R. R. E. Salomaa, and P. Mulser
Breakdown of the line-space concept in Stark broadening of spectral lines by plasmas . . . . . 2441
Richard W. Lee and Eugene Oks
Debye-Onsager relaxation effect in fully ionized plasmas . . . . . 2446
A. Esser and G. Röpke
Model for fast electrons in ultrashort-pulse laser interaction with solid targets . . . . . 2456
Wei Yu, M. Y. Yu, Z. M. Sheng, and J. Zhang
Analytical calculation of the amplification and angular divergence of the stimulated backscattered light from a Gaussian hot spot . . . . . 2461
Laurent Divol and Philippe Mounaix
Magnetic field in short-pulse high-intensity laser-solid experiments . . . . . 2471
A. R. Bell, J. R. Davies, and S. M. Guerin
Transverse quasilinear relaxation in an inhomogeneous magnetic field . . . . . 2474
Maxim Lyutikov

**Physics of beams**

Dispersive lattice functions in a six-dimensional pseudo-harmonic-oscillator . . . . . 2481
Étienne Forest
Growth rate of nonthermodynamic emittance of intense electron beams . . . . . 2489
Bruce E. Carlsten
Intensity effects on inverse-bremsstrahlung electron acceleration . . . . . 2501
R. Pakter

**Classical physics, including nonlinear media**

Experimental proof of standard electrodynamics by measuring the self-force on a part of a current loop . . . . . 2505
G. Cavalleri, G. Bettoni, E. Tonni, and G. Spavieri
Solutions to the optical cascading equations . . . . . 2518
S. Lafortune, P. Winternitz, and C. R. Menyuk
Linearizability of the perturbed Burgers equation . . . . . 2526
R. A. Kraenkel, J. G. Pereira, and E. C. de Rey Neto
Highly directive current distributions: General theory . . . . . 2531
Dionisios Margetis, George Fikioris, John M. Myers, and Tai Tsun Wu
Fast solitary waves against slow inertial instability in stimulated Raman scattering . . . . . 2548
Antonio Picozzi, Carlos Montes, and Eric Picholle
Breather scattering by impurities in the sine-Gordon model . . . . . 2558
Fei Zhang
Internal vibrations of a vector soliton in the coupled nonlinear Schrödinger equations . . . . . 2564
Boris A. Malomed and Richard S. Tasgal
Reconnection of vortex filaments in the complex Ginzburg-Landau equation . . . . . 2576
Michael Gabbay, Edward Ott, and Parvez N. Guzdar

*(Continued)*

**PHYSICAL REVIEW E** **THIRD SERIES, VOLUME 58, NUMBER 2** **AUGUST 1998**

Stability of spiral wave vortex filaments with phase twists . . . . . 2580
Keeyeol Nam, Edward Ott, Parvez N. Guzdar, and Michael Gabbay

**Computational physics**

Hurst's rescaled range statistical analysis for pseudorandom number generators used in physical simulations . . . . . 2586
B. M. Gammel

Efficient Monte Carlo methods for the simulation of catalytic surface reactions . . . . . 2598
J. J. Lukkien, J. P. L. Segers, P. A. J. Hilbers, R. J. Gelten, and A. P. J. Jansen

Algorithms for Brownian dynamics simulation . . . . . 2611
A. C. Brańka and D. M. Heyes

Monte Carlo studies of adsorbed monolayers: Lattice-gas models with translational degrees of freedom . . . . . 2616
M. Presber, B. Dünweg, and D. P. Landau

**BRIEF REPORTS**

**General methods of statistical physics**

The Kawasaki distribution function for nonautonomous systems . . . . . 2624
Janka Petravic and Denis J. Evans

Effective magnetic Hamiltonian and Ginzburg criterion for fluids . . . . . 2628
Nikolai V. Brilliantov

Dissipative quantum tunneling of two-level systems driven by dc-ac fields . . . . . 2632
Hao Wang, Valder N. Freire, and Xian-Geng Zhao

**Chaos and nonlinear dynamical systems**

Low-frequency fluctuations in semiconductor lasers with optical feedback are induced with noise . . . . . 2636
Manuel C. Eguia, G. B. Mindlin, and M. Giudici

State-space prediction model for chaotic time series . . . . . 2640
A. K. Alparslan, M. Sayar, and A. R. Atilgan

Superposition of chaotic processes with convergence to Lévy's stable law . . . . . 2644
Ken Umeno

**Classical fluids**

Long-range interactions in xenon . . . . . 2648
F. Formisano, F. Barocchi, and R. Magli

**Complex fluids, polymers, and granular materials**

Born-Green-Yvon approach to the local densities of a simple fluid in a slitlike pore filled with a quenched disordered matrix . . . . . 2652
Stefan Sokołowski and Orest Pizio

Topological correlations in soap froths . . . . . 2656
K. Y. Szeto, T. Aste, and W. Y. Tam

Multifractal expansions and kinetic surface roughening processes . . . . . 2660
A. Bershadskii

**PHYSICAL REVIEW E** **THIRD SERIES, VOLUME 58, NUMBER 2** **AUGUST 1998**

**Biological physics**

Finite-size scaling of the quasispecies model . . . . . 2664
P. R. A. Campos and J. F. Fontanari

**Cumulative Author Index** . . . . . 2668
