American Institute of Physics
500 Sunnyside Boulevard
Woodbury, NY 11797-2999

THIRD SERIES, VOLUME 59, NUMBER 1 *CONTENTS* **JANUARY 1999**

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R1–602, and Part B pages 603–1286.

PART A

Guidelines for PRE Section Selection iii
Physical Review E Editorial Policies and Practices iv
Physical Review E Information for Contributors viii
Guidelines for Estimating Length xii
Note to Reader xiii

RAPID COMMUNICATIONS

General methods of statistical physics

Heat conduction in the diatomic Toda lattice revisited R1
Takahiro Hatano
Definition of temperature in equilibrium and nonequilibrium systems R5
Gary P. Morriss and Lamberto Rondoni
Influence of a periodic field on two-level classical systems R9
V. Berdichevsky and M. Gitterman
Universality in sandpiles R12
Alessandro Chessa, H. Eugene Stanley, Alessandro Vespignani, and Stefano Zapperi
Two-dimensional self-avoiding walks on a cylinder R16
Helge Frauenkron, Maria Serena Causo, and Peter Grassberger
Statistics of persistent events: An exactly soluble model R20
A. Baldassarri, J. P. Bouchaud, I. Dornic, and C. Godrèche

Chaos and nonlinear dynamical systems

Quasipatterns in second-harmonic generation R24
Stefano Longhi
Globally coupled multiattractor maps: Mean field dynamics controlled by the number of elements R28
Imre M. Jánosi and Jason A. C. Gallas
Control of transients in ''lethargic'' systems R32
G. L. Lippi, P. A. Porta, L. M. Hoffer, and H. Grassi

Plasma physics

Steady magnetic field generation due to transient field ionization in ultrashort laser-solid interaction R36
Andrea Macchi, Enrique Conejero Jarque, Dieter Bauer, Fulvio Cornolti, and Luis Plaja

Copyright 1999 by The American Physical Society

1063-651X(199901)59:1:B;1-N

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 1 JANUARY 1999

Physics of beams

Nontrivial linear effects of dispersion at the interaction point R40
Stefania Petracca and Kohji Hirata

Computational physics

Molecular dynamics simulation with reversible heat addition R44
Nicolas G. Hadjiconstantinou

ARTICLES

General methods of statistical physics

Exponential multiplicity of inherent structures 48
Frank H. Stillinger
Symmetry breaking in ionization wave turbulence 52
S. Niedner, H.-G. Schuster, T. Klinger, and G. Bonhomme
Percolation transition and the onset of nonexponential relaxation in fully frustrated models 60
Annalisa Fierro, Giancarlo Franzese, Antonio de Candia, and Antonio Coniglio
Quantum vortex sheets 67
M. H. Chang, T. Chiueh, and C. R. Lo
Persistence of collective fluctuations in N-body metaequilibrium gravitating and plasma systems 73
J. L. Rouet and M. R. Feix
Scaling of stiffness energy for three-dimensional $\pm J$ Ising spin glasses 84
Alexander K. Hartmann
Maxwell model of traffic flows 88
E. Ben-Naim and P. L. Krapivsky
Noise-induced fronts 98
Miguel A. Santos and J. M. Sancho
Resonant diffusion in a linear network of fluctuating obstacles 103
Olivier Benichou, Bernard Gaveau, and Michel Moreau
Stochastic theory of freeway traffic 117
R. Mahnke and J. Kaupužs
Kinetics of ballistic annihilation and branching 126
Pierre-Antoine Rey, Michel Droz, and Jarosław Piasecki
Lobe dynamics and space charge distribution in nonsteady electroconvection 135
A. T. Pérez, R. Chicón, and A. Castellanos
Effect of Landauer's blow torch on the equilibration rate in a bistable potential 143
Mulugeta Bekele, S. Rajesh, G. Ananthakrishna, and N. Kumar
Thermodynamical behavior of aperiodic Ising models on hierarchical lattices 150
R. F. S. Andrade
Bose-Einstein condensation in arbitrarily shaped cavities 158
Klaus Kirsten and David J. Toms
Quantum gas in an external field: Exact grand canonical expressions and numerical treatment 168
P. N. Vorontsov-Velyaminov, S. D. Ivanov, and R. I. Gorbunov
Numerical analysis of the noisy Kuramoto-Sivashinsky equation in 2+1 dimensions 177
Jason T. Drotar, Y.-P. Zhao, T.-M. Lu, and G.-C. Wang

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 1** **JANUARY 1999**

Large-q expansion of the specific heat for the two-dimensional q-state Potts model 186
H. Arisue and K. Tabata
Evaporation and coarsening dynamics with open boundaries 189
A. M. Lacasta, F. Sagués, J. M. Sancho, and I. M. Sokolov
Directed Ising type dynamic preroughening transition in one-dimensional interfaces 194
Jae Dong Noh, Hyunggyu Park, and Marcel den Nijs
Multispecies asymmetric simple exclusion process and its relation to traffic flow 205
V. Karimipour
Phase-ordering dynamics with an order-parameter-dependent mobility: The large-n limit 213
C. L. Emmott and A. J. Bray
Nonequilibrium phase transition in the kinetic Ising model: Existence of a tricritical point and stochastic resonance 218
Muktish Acharyya
Yang-Lee zeros of one-dimensional quantum many-body systems 222
Xian-Zhi Wang and Jai Sam Kim
Quadratic fluctuation-dissipation theorem for multilayer plasmas 228
Kenneth I. Golden
Anomalous dynamic scaling of interfaces in disordered media 234
Ning-Ning Pang and Wen-Jer Tzeng
Derivation, properties, and simulation of a gas-kinetic-based, nonlocal traffic model 239
Martin Treiber, Ansgar Hennecke, and Dirk Helbing
Multiaffinity and entropy spectrum of self-affine fractal profiles 254
Hiroaki Katsuragi and Haruo Honjo
Phase separation in a simple model with dynamical asymmetry 263
Rajeev Ahluwalia
Influence functional from a bath of coupled time-dependent harmonic oscillators 269
Jiushu Shao and Nancy Makri
Thermodynamic depth of causal states: Objective complexity via minimal representations 275
James P. Crutchfield and Cosma Rohilla Shalizi

Chaos and nonlinear dynamical systems

Use of synchronization and adaptive control in parameter estimation from a time series 284
Anil Maybhate and R. E. Amritkar
Quantum weak chaos in a degenerate system 294
V. Ya. Demikhovskii, D. I. Kamenev, and G. A. Luna-Acosta
Classical and quantum chaos in the generalized parabolic lemon-shaped billiard 303
V. Lopac, I. Mrkonjić, and D. Radić
Synchronization of chaotic maps through a noisy coupling channel with application to digital communication . . . 312
Ali A. Minai and Tirunelveli Anand
Deformed Gaussian orthogonal ensemble and the statistical fluctuations in the spectra of the quartic oscillator . . . 321
C. I. Barbosa, C. L. Lima, M. S. Hussein, and M. P. Pato
Spectral correlations in the crossover transition from a superposition of harmonic oscillators to the Gaussian unitary ensemble 330
Thomas Guhr and Thomas Papenbrock
Fitting partial differential equations to space-time dynamics 337
Markus Bär, Rainer Hegger, and Holger Kantz
Mixed basin boundary structures of chaotic systems 343
Epaminondas Rosa Jr. and Edward Ott
Inertia effects on periodic synchronization in a system of coupled oscillators 353
H. Hong, M. Y. Choi, J. Yi, and K.-S. Soh

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 1** **JANUARY 1999**

Field driven thermostated systems: A nonlinear multibaker map 364
T. Gilbert, C. D. Ferguson, and J. R. Dorfman
Dynamics of a reaction-diffusion system with Brusselator kinetics under feedback control 372
Iasson Karafyllis, Panagiotis D. Christofides, and Prodromos Daoutidis
Role of aperiodic order for fluxon dynamics in Josephson junction arrays 381
Erik Lennholm and Michael Hörnquist
Semiclassical sum rules for matrix elements and response functions in chaotic and in integrable quantum billiards 390
B. Mehlig
Synchronization and directed percolation in coupled map lattices 409
Franco Bagnoli, Lucia Baroni, and Paolo Palmerini

Classical fluids

Temperature measured close to the interface of an evaporating liquid 417
G. Fang and C. A. Ward
Expression for predicting liquid evaporation flux: Statistical rate theory approach 429
C. A. Ward and G. Fang
Examination of the statistical rate theory expression for liquid evaporation rates 441
G. Fang and C. A. Ward
Simple lattice Boltzmann model for simulating flows with shock wave 454
Yan Guangwu, Chen Yaosong, and Hu Shouxin
Self-diffusion in an isotopic fluid 460
Raman Sharma, K. Tankeshwar, and K. C. Sharma
Curvature dependence of the surface tension of liquid and vapor nuclei 469
V. G. Baidakov and G. Sh. Boltachev
Dissolving interfaces in the presence of gravity 476
D. H. Vlad and J. V. Maher
Computer simulation study of the structure of the liquid-vapor interface of mercury at 20, 100, and 200 °C 479
Dmitriy S. Chekmarev, Meishan Zhao, and Stuart A. Rice
Diverging correlation lengths in electrolytes: Exact results at low densities 492
Stefan Bekiranov and Michael E. Fisher
Creep motion of a solidification front in a two-dimensional binary alloy 512
X. Feng, E. A. Brener, D. E. Temkin, Y. Saito, and H. Müller-Krumbhaar
Point defects of a three-dimensional vector order parameter 528
Yishi Duan, Hong Zhang, and Libin Fu

Liquid crystals

Role of side chains in phase equilibria of disklike mesogens 535
Maciej Wnek and Jozef K. Moscicki
Rotational bias of an antiferroelectric liquid crystal studied by polarized Fourier transform infrared spectroscopy .. 551
A. Kocot, R. Wrzalik, B. Orgasinska, T. Perova, J. K. Vij, and H. T. Nguyen
Corresponding states of fluid motion in nematic liquid crystals 556
M. Simões and A. A. Arroteia
Instability of radial hedgehog configurations in nematic liquid crystals under Landau–de Gennes free-energy models 563
E. C. Gartland Jr. and S. Mkaddem
Formation of disclination lines near a free nematic interface 568
Jordi Ignés-Mullol, Jean Baudry, Lubor Lejcek, and Patrick Oswald

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 1** **JANUARY 1999**

Measurements of anchoring energy of a nematic liquid crystal, 4-cyano-4′-*n*-pentylbiphenyl, on Langmuir-Blodgett films of dipalmitoyl phosphatidylcholine 578
U. Kühnau, A. G. Petrov, G. Klose, and H. Schmiedel
Pattern formation and chiral phase separation by compression: Racemic monolayer viewed as Bragg-Williams binary cholesterics 586
Mitsumasa Iwamoto, Chen-Xu Wu, and Ou-Yang Zhong-can
Interaction of foreign macrodroplets in a nematic liquid crystal and induced supermolecular structures 591
B. I. Lev and P. M. Tomchuk

PART B

Note to Reader i

Complex fluids, polymers, and granular materials

Dynamics of the phase behavior of a polymer blend under shear flow 603
Tao Sun, Anna C. Balazs, and David Jasnow
Experimental determination of the cooperative length scale of a glass-forming liquid near the glass transition temperature 612
A. K. Rizos and K. L. Ngai
Freezing of polydisperse hard spheres 618
David A. Kofke and Peter G. Bolhuis
Calculation of the coherent dynamic structure factor of polyisoprene from molecular dynamics simulations 623
Neil E. Moe and M. D. Ediger
Phase segregation in binary sandpiles on fractal bases 631
N. Vandewalle, R. D'hulst, and M. Ausloos
Alternative off-lattice model with continuous backbone mass for polymers 636
Gunther Schöppe and Dieter W. Heermann
Structure and dynamics of surfactant-stabilized aggregates of palladium nanoparticles under dilute and semidilute conditions: Static and dynamic x-ray scattering 642
T. Thurn-Albrecht, G. Meier, P. Müller-Buschbaum, A. Patkowski, W. Steffen, G. Grübel, D. L. Abernathy, O. Diat, M. Winter, M. G. Koch, and M. T. Reetz
Bond fluctuation method for a polymer undergoing gel electrophoresis 650
Ryuzo Azuma and Hajime Takayama
Kinetic description of a fluidized one-dimensional granular system 656
Rosa Ramírez and Patricio Cordero
Aggregation phenomena in a lecithin-based gel: Transient networks and diffusional dynamics 665
F. Aliotta, M. E. Fontanella, M. Pieruccini, and C. Vasi
Dendritic crystal growth for weak undercooling. II. Surface energy effects on nonlinear evolution 673
M. D. Kunka, M. R. Foster, and S. Tanveer
Permeability of periodic porous media 711
F. J. Alcocer, V. Kumar, and P. Singh
Emulsion glasses: A dynamic light-scattering study 715
Hu Gang, A. H. Krall, H. Z. Cummins, and D. A. Weitz
Complex terraced spreading of perfluoropolyalkylether films on carbon surfaces 722
X. Ma, J. Gui, L. Smoliar, K. Grannen, B. Marchon, C. L. Bauer, and M. S. Jhon
''Intrinsic'' profiles and capillary waves at homopolymer interfaces: A Monte Carlo study 728
A. Werner, F. Schmid, M. Müller, and K. Binder
Kinematics of a two-dimensional granular Couette experiment at the transition to shearing 739
C. T. Veje, Daniel W. Howell, and R. P. Behringer
Droplet spreading on heterogeneous substrates using molecular dynamics 746
M. H. Adão, M. de Ruijter, M. Voué, and J. De Coninck

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 1** **JANUARY 1999**

Magnetic-field-induced nonequilibrium structures in a ferrofluid emulsion 751
George A. Flores, Jing Liu, M. Mohebi, and N. Jamasbi
Phase separations and orientational ordering of polymers in liquid crystal solvents 763
Akihiko Matsuyama and Tadaya Kato
Molecular segregation in lyotropic complex fluids: A phenomenological approach 771
V. P. Dmitriev, P. Tolédano, A. M. Figueiredo Neto, and I. V. Lebedyuk[3]
Experimental study of a granular flow in a vertical pipe: A spatiotemporal analysis 778
Jean-Luc Aider, Nathalie Sommier, Tareck Raafat, and Jean-Pierre Hulin
Crystallization and vitrification of semiflexible living polymers: A lattice model 787
Gautam I. Menon and Rahul Pandit
Model for faceting in a kinetically controlled crystal growth 803
A. A. Golovin, S. H. Davis, and A. A. Nepomnyashchy
Kinetic growth of field-oriented chains in dipolar colloidal solutions 826
M.-Carmen Miguel and R. Pastor-Satorras
Temperature oscillations of hydrothermal waves in thermocapillary-buoyancy convection 835
Miguel Angel Pelacho and Javier Burguete
Smoluchowski hypernetted chain theory description of the dynamics of ions confined in charged micropores 841
Pedro J. Colmenares and Wilmer Olivares-Rivas
Nucleation of oscillons 850
Seong-Ok Jeong and Hie-Tae Moon
Probability density function modeling of dispersed two-phase turbulent flows 855
Jacek Pozorski and Jean-Pierre Minier
Wetting transitions of Ne 864
M. J. Bojan, G. Stan, S. Curtarolo, W. A. Steele, and M. W. Cole
Magnetic-resonance determination of the spatial dependence of the droplet size distribution in the cream layer of oil-in-water emulsions: Evidence for the effects of depletion flocculation 874
P. J. McDonald, E. Ciampi, J. L. Keddie, M. Heidenreich, and R. Kimmich
Chain confinement effects on interdiffusion in polymer multilayers 885
E. Sivaniah, M. Sferrazza, R. A. L. Jones, and D. G. Bucknall
Simulation of a two-dimensional shear cell 889
Steffen Schöllmann

Biological physics

Coupling of intramolecular and intermolecular linkage complexity of two DNAs 900
John F. Marko
Classification of microtubule histories 913
D. J. Bicout and R. J. Rubin
Small-angle scattering studies of the fully hydrated phospholipid DPPC 921
P. C. Mason, B. D. Gaulin, R. M. Epand, G. D. Wignall, and J. S. Lin
Nonlinear models for detecting epileptic spikes 929
L. Diambra and C. P. Malta
Scaling behavior of stochastic minimization algorithms in a perfect funnel landscape 938
K. Hamacher and W. Wenzel
New proteinlike properties of cubic lattice models 942
Georges Trinquier and Yves-Henri Sanejouand
Optimally adapted multistate neural networks trained with noise 947
R. Erichsen, Jr. and W. K. Theumann
Synthetic analysis of periodically stimulated excitable and oscillatory membrane models 956
K. Yoshino, T. Nomura, K. Pakdaman, and S. Sato

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 1** **JANUARY 1999**

Folding in two-dimensional off-lattice models of proteins 970
Mai Suan Li and Marek Cieplak
Statistical properties of contact maps 977
Michele Vendruscolo, Balakrishna Subramanian, Ido Kanter, Eytan Domany, and Joel Lebowitz
Optimal asymptotic learning rate: Macroscopic versus microscopic dynamics 985
Todd K. Leen, Bernhard Schottky, and David Saad
Recurrence quantification analysis as a tool for characterization of molecular dynamics simulations 992
Cesare Manetti, Marc-Antoine Ceruso, Alessandro Giuliani, Charles L. Webber, Jr., and Joseph P. Zbilut
Equation of state for polymer liquid crystals: Theory and experiment 999
H. H. Strey, V. A. Parsegian, and R. Podgornik
Pattern formation of a reaction-diffusion system with self-consistent flow in the amoeboid organism *Physarum* plasmodium 1009
Hiroyasu Yamada, Toshiyuki Nakagaki, and Masami Ito

Plasma physics

Dielectric properties of interacting storage ring plasmas 1015
A. Selchow and K. Morawetz
Pressure ionization in dense plasmas 1024
G. Chiu and A. Ng
Electromagnetically induced guiding of counterpropagating lasers in plasmas 1033
G. Shvets and A. Pukhov
Stimulated Brillouin backscattering from underdense expanding plasmas in a regime of strong filamentation 1038
A. Giulietti, A. Macchi, E. Schifano, V. Biancalana, C. Danson, D. Giulietti, L. A. Gizzi, and O. Willi
Instabilities in a dusty plasma with ion drag and ionization 1047
D. Samsonov and J. Goree
Experimental test of models of high-plasma-density, radio-frequency sheaths 1059
Mark A. Sobolewski
Electrical conductivity of dense metal plasmas 1073
Ronald Redmer
Nonparaxial propagation of ultrashort laser pulses in plasma channels 1082
E. Esarey and W. P. Leemans
Observation of nonthermal turbulent electric fields in a nanosecond plasma opening switch experiment 1096
A. Weingarten, S. Alexiou, Y. Maron, M. Sarfaty, Ya. E. Krasik, and A. S. Kingsep
Theory of magnetized, coupled, rf-driven plasma sheaths in one dimension 1111
Spilios Riyopoulos
Ultrahigh-intensity inverse bremsstrahlung 1122
I. Yu. Kostyukov and J.-M. Rax

Physics of beams

Superradiant, single-supermode and nonlinear regimes of short pulse free electron laser oscillators 1136
P. Chaix, N. Piovella, and G. Grégoire
Pulse propagation effects in a cyclotron resonance maser amplifier 1152
P. Aitken, B. W. J. McNeil, G. R. M. Robb, and A. D. R. Phelps
Head-tail effect due to lattice nonlinearities in storage rings 1167
Kazuhito Ohmi and Yukinori Kobayashi
Transient analysis of free-electron lasers with discrete radiators 1171
S. Krinsky

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 1 JANUARY 1999

Classical physics, including nonlinear media

Green's function of wave field in media with one-dimensional large-scale periodicity 1184
E. V. Aksenova, V. P. Romanov, and A. Yu. Val'kov
Coherence properties of multimode incoherent spatial solitons in noninstantaneous Kerr media 1193
M. I. Carvalho, T. H. Coskun, D. N. Christodoulides, M. Mitchell, and M. Segev
Decomposition of the point-dipole field into homogeneous and evanescent parts 1200
T. Setälä, M. Kaivola, and A. T. Friberg

Computational physics

Scattering solutions of the spinless Salpeter equation 1207
F. Brau and C. Semay
Class of Monte Carlo algorithms for dynamic problems leads to an adaptive method 1212
Erwan Adam, Luc Billard, and Frédéric Lançon
Vector difference calculus for physical lattice models 1217
W. Schwalm, B. Moritz, M. Giona, and M. Schwalm

BRIEF REPORTS

General methods of statistical physics

Energy relaxation in discrete nonlinear lattices 1234
A. Bikaki, N. K. Voulgarakis, S. Aubry, and G. P. Tsironis
Size distribution and the Hausdorff-Besicovitch dimension of two-scale Cantor dusts 1238
Avner Peleg and Baruch Meerson
Critical nature of ideal Bose-Einstein condensation: Similarity with Yang-Lee theory of phase transition 1242
Xian-Zhi Wang and Jai Sam Kim

Chaos and nonlinear dynamical systems

Chaos in coplanar classical collisions with particles interacting through r^{-2} forces 1246
Fabio Sattin and Luca Salasnich

Classical fluids

Stability of convection in a vertical binary fluid layer with an adverse density gradient 1250
M. M. Bou-Ali, O. Ecenarro, J. A. Madariaga, C. M. Santamaría, and J. J. Valencia
Derivation of the macroscopic continuum equations for multiphase flow 1253
Qisu Zou and Xiaoyi He

Complex fluids, polymers, and granular materials

High energy tail in the velocity distribution of a granular gas 1256
J. Javier Brey, D. Cubero, and M. J. Ruiz-Montero
Roughness-induced fluid interface fluctuations due to polar and apolar interactions 1259
G. Palasantzas and G. Backx

Physics of beams

Ultrashort electron beam generation from resonantly excited nonlinear laser wakefield 1263
K. Nagashima, Y. Kishimoto, and H. Takuma

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 1** **JANUARY 1999**

Classical physics, including nonlinear media

Bragg solitons and the nonlinear Schrödinger equation 1267
C. Martijn de Sterke and Benjamin J. Eggleton
Generation of light spatiotemporal solitons from asymmetric pulses in saturating nonlinear media 1270
V. Skarka, V. I. Berezhiani, and R. Miklaszewski

Computational physics

Numerical solutions of nonlinear wave equations 1274
D. J. Kouri, D. S. Zhang, G. W. Wei, T. Konshak, and D. K. Hoffman

COMMENTS

Comment on ''Universal formulas for percolation thresholds. II. Extension to anisotropic and aperiodic lattices'' 1278
F. Babalievski
Comment on ''Gas-liquid coexistence and demixing in systems with highly directional pair potentials'' 1280
P. I. C. Teixeira

ERRATA

Erratum: Crossover from Ising to mean-field critical behavior in an aqueous electrolyte solution [Phys. Rev. E **58**, 2188 (1998)] 1283
J. Jacob, A. Kumar, M. A. Anisimov, A. A. Povodyrev, and J. V. Sengers

Cumulative Author Index 1284
