Physical Review E Information for Contributors viii
Guidelines for Estimating Length xi

RAPID COMMUNICATIONS

General methods of statistical physics

Universal behavior of nonequilibrium fluctuations in free diffusion processes R1
Doriano Brogioli, Alberto Vailati, and Marzio Giglio

Multiscaling in inelastic collisions R5
E. Ben-Naim and P. L. Krapivsky

Dynamics of a penta-hepta defect in a hexagonal pattern R9
Tammy Tam, Darrick Ohata, and Mingming Wu

Large-q asymptotics of the random-bond Potts model R13
Jesper Lykke Jacobsen and Marco Picco

Chaos and nonlinear dynamical systems

Wave scattering through classically chaotic cavities in the presence of absorption: An information-theoretic model R17
Eugene Kogan, Pier A. Mello, and He Liqun

Classical fluids

Growth of Taylor vortices: A molecular dynamics study R21
D. Hirshfeld and D. C. Rapaport

Abnormal rolls and regular arrays of disclinations in homeotropic electroconvection R25
Axel G. Rossberg, Nándor Éber, Ágnes Buka, and Lorenz Kramer

Inverse energy cascade in two-dimensional turbulence: Deviations from Gaussian behavior R29
G. Boffetta, A. Celani, and M. Vergassola

Intermittency of temperature field in turbulent convection R33
Emily S. C. Ching

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 1** **JANUARY 2000**

Liquid crystals

Bilayer-by-bilayer antiferroelectric ordering in freely suspended films of an achiral polymer-monomer liquid crystal mixture R37
D. R. Link, N. A. Clark, B. I. Ostrovskii, and E. A. Soto Bustamante

Complex fluids, polymers, and granular materials

Apparent finite-size effects in the dynamics of supercooled liquids R41
Kang Kim and Ryoichi Yamamoto
Pumping liquids using asymmetric electrode arrays R45
Armand Ajdari
Velocity and shape selection of dendritic crystals in a forced flow R49
X. Tong, C. Beckermann, and A. Karma
Reductions of the glass transition temperature in thin polymer films: Probing the length scale of cooperative dynamics R53
James A. Forrest and Johan Mattsson

Biological physics

Phase separation and shape deformation of two-phase membranes R57
Y. Jiang, T. Lookman, and A. Saxena

ARTICLES

General methods of statistical physics

Path integrals for the quantum microcanonical ensemble 61
John W. Lawson
Collective modes in an open microwave billiard 66
P. Šeba, I. Rotter, M. Müller, E. Persson, and K. Pichugin
Optical properties of nonequilibrium low-dimensional systems 71
Sergio A. Hassan, Áurea R. Vasconcellos, Marcus V. Mesquita, and Roberto Luzzi
Roughening and preroughening transitions in crystal surfaces with double-height steps 77
Jae Dong Noh
Scaling of waves in the Bak-Tang-Wiesenfeld sandpile model 81
D. V. Ktitarev, S. Lübeck, P. Grassberger, and V. B. Priezzhev
Lévy scaling in random walks with fluctuating variance 93
P. Santini
Generation of compound non-Gaussian random processes with a given correlation function 100
S. Primak
Nonlinear measures for characterizing rough surface morphologies 104
Jané Kondev, Christopher L. Henley, and David G. Salinas
Crossover between a displacive and an order-disorder phase transition 126
A. N. Rubtsov, J. Hlinka, and T. Janssen
From continuous time random walks to the fractional Fokker-Planck equation 132
E. Barkai, R. Metzler, and J. Klafter
Ratchet driven by quasimonochromatic noise 139
M. Arrayás, R. Mannella, P. V. E. McClintock, A. J. McKane, and N. D. Stein
Correlation-length–exponent relation for the two-dimensional random Ising model 147
Péter Lajkó and Ferenc Iglói
Deterministic equations of motion and phase ordering dynamics 153
B. Zheng

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 1** **JANUARY 2000**

Stochastic resonance in vertical cavity surface emitting lasers 157
Sylvain Barbay, Giovanni Giacomelli, and Francesco Marin
Surface critical behavior in systems with nonequilibrium phase transitions 167
Martin Howard, Per Fröjdh, and Kent Bækgaard Lauritsen
Field-induced vacancy localization in a driven lattice gas: Scaling of steady states 184
M. Thies and B. Schmittmann
Spectrum of the Fokker-Planck operator representing diffusion in a random velocity field 196
J. T. Chalker and Z. Jane Wang
Moment analysis of the probability distribution of different sandpile models 204
S. Lübeck
Solvable kinetic Gaussian model in an external field 210
Jian-Yang Zhu and Z. R. Yang
Mixed-spin Ising model with one- and two-spin competing dynamics 218
M. Godoy and W. Figueiredo
Nonequilibrium phase transitions induced by multiplicative noise: Effects of self-correlation 223
Sergio E. Mangioni, Roberto R. Deza, Raúl Toral, and Horacio S. Wio
Stochastic resonance as dithering 233
Robert A. Wannamaker, Stanley P. Lipshitz, and John Vanderkooy
Event-by-event fluid dynamcis 237
L. P. Csernai, Zs. I. Lázár, I. A. Lázár, D. Molnár, J. Pipek, and D. D. Strottman
Effect of shear on phase-ordering dynamics with order-parameter-dependent mobility: The large-*n* limit 247
N. P. Rapapa
Universality classes for the ricepile model with absorbing properties 253
Mária Markošová
Distribution of escape times for a deterministically driven bistable system 261
José Manuel Casado and José Gómez-Ordóñez
Thermodynamic picture of the glassy state gained from exactly solvable models 267
Th. M. Nieuwenhuizen
Boundary spatiotemporal correlations in a self-organized critical model of punctuated equilibrium 293
Emma Montevecchi and Attilio L. Stella
Dynamical weight functions for a planar crack 298
A. A. Al-Falou, R. C. Ball, and H. Larralde
Drift ratchet 312
Christiane Kettner, Peter Reimann, Peter Hänggi, and Frank Müller
Diffusion in disordered lattices and related Heisenberg ferromagnets 324
M. D. Grynberg and R. B. Stinchcombe

Chaos and nonlinear dynamical systems

Scaling of Lyapunov exponents of coupled chaotic systems 332
Rüdiger Zillmer, Volker Ahlers, and Arkady Pikovsky
Homoclinic tangency and chaotic attractor disappearance in a dripping faucet experiment 342
Reynaldo D. Pinto and José C. Sartorelli
Dynamical control of systems near bifurcation points using time series 348
Zhao Hong, Liu Yaowen, Ping Huican, and Wang Yinghai
Dynamical system approach to phyllotaxis 354
F. d'Ovidio and E. Mosekilde
Autocorrelation function of level velocities for ray-splitting billiards 366
Y. Hlushchuk, A. Kohler, Sz. Bauch, L. Sirko, R. Blümel, M. Barth, and H.-J. Stöckmann
Synchronization in a system of globally coupled oscillators with time delay 371
M. Y. Choi, H. J. Kim, D. Kim, and H. Hong

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 1** **JANUARY 2000**

Quantum chaotic scattering with a mixed phase space: The three-disk billiard in a magnetic field 382
Markus Eichengrün, Walter Schirmacher, and Wolfgang Bregmann

Classical fluids

Stability analysis of plane wave solutions of the discrete Ginzburg-Landau equation 390
J. F. Ravoux, S. Le Dizès, and P. Le Gal
Molecular dynamics simulations of supercooled and amorphous $Co_{100-x}Zr_x$: Atomic mobilities and structural properties 394
U. K. Rößler and H. Teichler
Mie scattering and the physical mechanisms of sonoluminescence 403
C. Villarreal, R. Esquivel-Sirvent, and R. Jáuregui
Scaling structure of the velocity statistics in atmospheric boundary layers 407
Susan Kurien, Victor S. L'vov, Itamar Procaccia, and K. R. Sreenivasan
Density correlations in lattice gases in contact with a confining wall 422
J. Reinhard, W. Dieterich, P. Maass, and H. L. Frisch
Self-consistent derivation of subgrid stresses for large-scale fluid equations 429
Fernando O. Minotti
Spinodal decomposition of off-critical quenches with a viscous phase using dissipative particle dynamics in two and three spatial dimensions 435
Keir E. Novik and Peter V. Coveney
Dynamic properties of hydrogen-bonded networks in supercritical water 449
J. Martí
Nonlocal transport of passive scalars in turbulent penetrative convection 457
Mark S. Miesch, Axel Brandenburg, and Ellen G. Zweibel
Numerical studies of flames in wide tubes: Stability limits of curved stationary flames 468
O. Yu. Travnikov, V. V. Bychkov, and M. A. Liberman
Pattern formation in drying drops 475
Robert D. Deegan

Liquid crystals

Phase diagrams of lyotropic cholesteric fluids 486
Pierre Tolédano, A. M. Figueiredo Neto, and Z. A. de Sant'Ana
Layer dynamics of freely standing smectic-*A* films 493
Hsuan-Yi Chen and David Jasnow
Molecular simulation and theory of a liquid crystalline disclination core 504
Denis Andrienko and Michael P. Allen
Surface-induced ordering in thin uniaxial liquid crystal films 511
Hyunbum Jang and Malcolm J. Grimson
Multicritical behaviors and an induced twist grain boundary phase in a binary liquid crystalline mixture 519
M. Ismaïli, A. Anakkar, G. Joly, N. Isaert, and H. T. Nguyen

Complex fluids, polymers, and granular materials

Scaling behavior of the α relaxation in fragile glass-forming liquids under conditions of high compression 526
Marian Paluch, Stella Hensel-Bielówka, and Jerzy Zioło
Ellipsometric determination of universal critical adsorption scaling functions 532
J. H. Carpenter, J.-H. J. Cho, and B. M. Law
Dynamic scaling of the critical ultrasonic attenuation in binary liquids: Evidence from broadband spectrometry . . 542
S. Z. Mirzaev, T. Telgmann, and U. Kaatze

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 1** **JANUARY 2000**

Cluster-cluster aggregation in binary mixtures 550
A. AlSunaidi, M. Lach-hab, Agustín E. González, and Estela Blaisten-Barojas
Neutron scattering from aerosols: Intraparticle structure factor, Guinier analysis of particle speed, and crossed beam kinematics 557
Gerald Wilemski
Early stages of homopolymer collapse 565
A. Halperin and Paul M. Goldbart
Ionic condensation theories and the liquidlike structures observed in colloidal dispersions 574
M. Quesada-Pérez, J. Callejas-Fernández, and R. Hidalgo-Álvarez
Tracer dispersion in a percolation network with spatial correlations 583
Hernán A. Makse, José S. Andrade, Jr., and H. Eugene Stanley
Evolution of vibrational excitations in glassy systems 587
W. Götze and M. R. Mayr
In situ and interrupted-growth studies of the self-assembly of octadecyltrichlorosilane monolayers 607
A. G. Richter, C.-J. Yu, A. Datta, J. Kmetko, and P. Dutta
Hydraulic permeability of (un)bounded fibrous media using the lattice Boltzmann method 616
D. S. Clague, B. D. Kandhai, R. Zhang, and P. M. A. Sloot
Self-diffusion and sedimentation of tracer spheres in (semi)dilute dispersions of rigid colloidal rods 626
Sebastiaan G. J. M. Kluijtmans, Gijsberta H. Koenderink, and Albert P. Philipse
Effect of long-range forces on surface freezing 637
Prabir K. Mukherjee and Moshe Deutsch
Thermal and chemical diffusion in the rapid solidification of binary alloys 642
Massimo Conti
Absence of the liquid phase when the attraction is not pairwise additive 651
Richard P. Sear
Simple views on critical binary liquid mixtures in porous glass 656
L. Tremblay, S. M. Socol, and S. Lacelle
Nature of the transition from two- to three-dimensional ordering in a confined colloidal suspension 660
Ronen Zangi and Stuart A. Rice
Hexagonal to square lattice conversion in bilayer systems 671
Ronen Zangi and Stuart A. Rice
Adiabatic compressibility of AOT [sodium bis(2-ethylhexyl)sulfosuccinate] reverse micelles: Analysis of a simple model based on micellar size and volumetric measurements 682
A. Amararene, M. Gindre, J.-Y. Le Huérou, W. Urbach, D. Valdez, and M. Waks
Effect of the wall roughness on slip and rheological properties of hexadecane in molecular dynamics simulation of Couette shear flow between two sinusoidal walls 690
A. Jabbarzadeh, J. D. Atkinson, and R. I. Tanner
Instabilities of concentration stripe patterns in ferrocolloids 700
A. Cēbers
Diffusional mechanism of strong selection in Ostwald ripening 709
I. Rubinstein and B. Zaltzman

Biological physics

Responses of a Hodgkin-Huxley neuron to various types of spike-train inputs 718
Hideo Hasegawa
From local to global spatiotemporal chaos in a cardiac tissue model 727
Zhilin Qu, James N. Weiss, and Alan Garfinkel

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 1** **JANUARY 2000**

Short-term forecasting of life-threatening cardiac arrhythmias based on symbolic dynamics and finite-time growth rates 733
Niels Wessel, Christine Ziehmann, Jürgen Kurths, Udo Meyerfeldt, Alexander Schirdewan, and Andreas Voss
Coherence resonance and noise-induced synchronization in globally coupled Hodgkin-Huxley neurons 740
Yuqing Wang, David T. W. Chik, and Z. D. Wang
Elastic stability of DNA configurations. I. General theory 747
Irwin Tobias, David Swigon, and Bernard D. Coleman
Elastic stability of DNA configurations. II. Supercoiled plasmids with self-contact 759
Bernard D. Coleman, David Swigon, and Irwin Tobias
Different hierarchy of avalanches observed in the Bak-Sneppen evolution model 771
W. Li and X. Cai
Chaotic behavior in noninteger-order cellular neural networks 776
P. Arena, L. Fortuna, and D. Porto

Plasma physics

Surface waves in strongly irradiated dusty plasmas 782
K. N. Ostrikov, M. Y. Yu, and L. Stenflo
Transverse modulation of an electron beam generated in self-modulated laser wakefield accelerator experiments . . 788
C. I. Moore, K. Krushelnick, A. Ting, H. R. Burris, R. F. Hubbard, and P. Sprangle
Dipolar interaction in a colloidal plasma 793
D. P. Resendes
Analysis of the *M*-shell spectra emitted by a short-pulse laser-created tantalum plasma 801
M. Busquet, Z. Jiang, C. Y. Côté, J. C. Kieffer, M. Klapisch, A. Bar-Shalom, C. Bauche-Arnoult, and A. Bachelier
Nonlinear dust kinetic Alfvén waves 809
Chen Yinhua, Lu Wei, and M. Y. Yu
Proper orthogonal decomposition and Galerkin projection for a three-dimensional plasma dynamical system 813
P. Beyer, S. Benkadda, and X. Garbet
Force between charged particles with ion condensation 824
Peilong Chen and C.-Y. D. Lu
Hamiltonian dynamics of vortex and magnetic lines in hydrodynamic type systems 831
E. A. Kuznetsov and V. P. Ruban
Two-dimensional model of thermal smoothing of laser imprint in a double-pulse plasma 842
A. B. Iskakov, V. F. Tishkin, I. G. Lebo, J. Limpouch, K. Mašek, and K. Rohlena
Diffusion cooling in a magnetic field 848
R. E. Robson

Physics of beams

Particle-core study of halo dynamics in periodic-focusing channels 855
Tai-Sen F. Wang

Classical physics, including nonlinear media

Spatiotemporal structure of isodiffracting ultrashort electromagnetic pulses 862
Simin Feng and Herbert G. Winful
Soliton interaction with an external traveling wave 874
Gil Cohen
Optical solitons in resonant and nonresonant nonlinear media in the presence of perturbations 880
Mihai Piscureanu and Doina Manaila-Maximean

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 1** **JANUARY 2000**

Embedded solitons in a three-wave system 886
Alan R. Champneys and Boris A. Malomed
Regime of wave-packet self-action in a medium with normal dispersion of the group velocity 891
A. G. Litvak, V. A. Mironov, and E. M. Sher

Computational physics

Laser ray tracing and power deposition on an unstructured three-dimensional grid 895
Thomas B. Kaiser
Lattice-switch Monte Carlo method 906
A. D. Bruce, A. N. Jackson, G. J. Ackland, and N. B. Wilding
Complex absorbing potential and Chebyshev propagation scheme 920
S. Midgley and J. B. Wang

BRIEF REPORTS

General methods of statistical physics

Third-frequency-moment sum rule for electronic multilayers 926
Dexin Lu and Kenneth I. Golden
Repulsion of resonance states and exceptional points 929
W. D. Heiss
Ising cubes with enhanced surface couplings 933
M. Pleimling and W. Selke
Molecular ratchets: Verification of the principle of detailed balance and the second law of dynamics 937
K. L. Sebastian
Stochastic resonance at phase noise in signal transmission 940
François Chapeau-Blondeau
Universality classes in the random-storage sandpile model 944
Alexei Vázquez and Oscar Sotolongo-Costa

Chaos and nonlinear dynamical systems

Relaxation and Lyapunov time scales in a one-dimensional gravitating sheet system 948
Toshio Tsuchiya and Naoteru Gouda
Perturbative and nonperturbative parts of eigenstates and local spectral density of states: The Wigner-band random-matrix model 952
Wen-ge Wang

Classical fluids

Upper bound on the heat transport in a layer of fluid of infinite Prandtl number, rigid lower boundary, and stress-free upper boundary 956
Nikolay K. Vitanov

Complex fluids, polymers, and granular materials

Dynamics of critical fluctuations in a binary mixture of limited miscibility under a strong electric field 960
Sylwester J. Rzoska, Aleksandra Drozd-Rzoska, and Jerzy Zioło
Characterization of soliton damping in the granular chain under gravity 964
Jongbae Hong, Heekyung Kim, and Jeong-Pil Hwang

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 1** **JANUARY 2000**

Biological physics

Hysteresis studies in a noisy autoassociative neural network 968
Renuka Rai and Harjinder Singh

Physics of beams

Stochastic electron gas theory of coherence in laser-driven synchrotron radiation 972
F. V. Hartemann

Classical physics, including nonlinear media

Nonlinear short-wave propagation in ferrites 976
R. A. Kraenkel, M. A. Manna, and V. Merle

COMMENTS

Comment on ''Monte Carlo study of structural ordering in charged colloids using a long-range attractive interaction'' 980
David G. Grier and John C. Crocker

Reply to ''Comment on 'Monte Carlo study of structural ordering in charged colloids using a long-range attractive interaction' '' 983
B. V. R. Tata and Norio Ise

Selected Abstracts from other Physical Review Journals 986

Cumulative Author Index 987
