THIRD SERIES, VOLUME 61, NUMBER 6
PARTS A AND B

CONTENTS

JUNE 2000

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R6045–6654, and Part B pages 6655–7292.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Domain segregation in a two-dimensional system in the presence of drift R6045
J. Bragard, P. L. Ramazza, F. T. Arecchi, S. Boccaletti, and L. Kramer

Capillary-wave effects at critical wetting in type-I superconductors R6049
H. T. Dobbs and R. Blossey

Synchronized traffic flow from a modified Lighthill-Whitman model R6052
Paul Nelson

Simple deterministic self-organized critical system R6056
Maria de Sousa Vieira

Multiscaling of energy correlations in the random-bond Potts model R6060
Jesper Lykke Jacobsen

Chaos and nonlinear dynamical systems

Universal algebraic relaxation of velocity and phase in pulled fronts generating periodic or chaotic states R6063
Cornelis Storm, Willem Spruijt, Ute Ebert, and Wim van Saarloos

Classical fluids

Density expansion for particle-particle correlations in time-dependent physical clusters R6067
Luis A. Pugnaloni and Fernando Vericat

Scaling theory of three-dimensional spinodal turbulence R6071
V. M. Kendon

Large-scale coherent rotation and oscillation in turbulent thermal convection R6075
X.-L. Qiu, S. H. Yao, and P. Tong

Complex fluids, polymers, and granular materials

Generalizing the Debye-Hückel equation in terms of density functional integral R6079
H. Frusawa and R. Hayakawa

Colloid–liquid-crystal composites: An unusual soft solid R6083
S. P. Meeker, W. C. K. Poon, J. Crain, and E. M. Terentjev

Copyright 2000 by The American Physical Society

1063-651X(200006)61:6:A;1-Y

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 6** **JUNE 2000**

ARTICLES

General methods of statistical physics

High-temperature expansions of Bures and Fisher information priors 6087
Paul B. Slater
Langevin equations with multiplicative noise: Resolution of time discretization ambiguities for equilibrium systems 6091
Peter Arnold
Symmetric path integrals for stochastic equations with multiplicative noise 6099
Peter Arnold
Coherence and stochastic resonance in a two-state system 6103
Benjamin Lindner and Lutz Schimansky-Geier
Quantum tunneling fragmentation model 6111
Borko D. Stošić, M. A. F. Gomes, and Sadhan K. Adhikari
Dynamic fracture in a discrete model of a brittle elastic solid 6120
Teresa Martín, Pep Español, Miguel A. Rubio, and Ignacio Zúñiga
Random energy model at complex temperatures 6132
D. B. Saakian
Statistical characterization of random electrostatic potentials 6136
M. Aldana, H. Larralde, and G. Martínez-Mekler
Dynamic scaling in a ballistic deposition model for a binary system 6149
Hassan F. El-Nashar and Hilda A. Cerdeira
Excitations for lattice ferromagnetic classical spin systems at high temperature: Noneven single-spin distributions 6156
Ricardo S. Schor and Michael O'Carroll
Constrained systems and statistical distribution 6165
Simone Melchionna
Binary collision model for quantum Brownian motion 6171
Stefan Tsonchev and Philip Pechukas
Transport in two-dimensional scattering stochastic media: Simulations and models 6183
O. Haran, D. Shvarts, and R. Thieberger
Interfacial coarsening dynamics in epitaxial growth with slope selection 6190
Dorel Moldovan and Leonardo Golubovic
Experimental study of critical exponents of electrical conductivity in a two-dimensional continuum percolation system 6215
A. Okazaki, K. Horibe, K. Maruyama, and S. Miyazima
Dynamical decimation renormalization-group technique: Kinetic Gaussian model on nonbranching, branching, and multibranching Koch curves 6219
Jian-Yang Zhu and Z. R. Yang
Quantum phase transitions studied within the interacting boson model 6237
Pavel Cejnar and Jan Jolie
Continued fraction solution for the radiative transfer equation in three dimensions 6248
Marián Boguñá, Josep M. Porrà, and Jaume Masoliver
Thermodynamic properties of a solid exhibiting the energy spectrum given by the logistic map 6255
E. M. F. Curado and M. A. Rego-Monteiro
Learning strategies for the maximally stable diluted binary perceptron 6261
D. Malzahn
Thermodynamics of self-gravitating systems with softened potentials 6270
Eduardo Follana and Victor Laliena

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 6** **JUNE 2000**

Correlated random band matrices: Localization-delocalization transitions 6278
Martin Janssen and Krystian Pracz
Negative resistance and anomalous hysteresis in a collective molecular motor 6287
J. Buceta, J. M. Parrondo, C. Van den Broeck, and F. J. de la Rubia
Elastic moduli, dislocation core energy, and melting of hard disks in two dimensions 6294
Surajit Sengupta, Peter Nielaba, and K. Binder
Trapping by clusters of traps 6302
Yu. A. Makhnovskii, A. M. Berezhkovskii, D.-Y. Yang, S.-Y. Sheu, and S. H. Lin
Subdiffusive transport close to thermal equilibrium: From the Langevin equation to fractional diffusion 6308
Ralf Metzler and Joseph Klafter
Scaling of interfaces in brittle fracture and perfect plasticity 6312
Eira T. Seppälä, Vilho I. Räisänen, and Mikko J. Alava
Evaluation of the smallest nonvanishing eigenvalue of the Fokker-Planck equation for Brownian motion in a potential: The continued fraction approach 6320
Yu. P. Kalmykov
Critical behavior of a two-species reaction-diffusion problem 6330
J. E. de Freitas, L. S. Lucena, L. R. da Silva, and H. J. Hilhorst
Phase transition in the Takayasu model with desorption 6337
Satya N. Majumdar, Supriya Krishnamurthy, and Mustansir Barma
Long jumps in the strong-collision model 6344
R. Ferrando, F. Montalenti, R. Spadacini, and G. E. Tommei
Nonequilibrium statistical mechanics of drifting particles 6351
Eric Bringuier
Current reversals in ratchets driven by trichotomous noise 6359
Romi Mankin, Ain Ainsaar, and Eerik Reiter
Long-time tracer diffusion of nonspherical Brownian particles 6368
F. de J. Guevara-Rodríguez and M. Medina-Noyola
Cooling-rate effects in a model of glasses 6375
A. Lipowski and D. Johnston
Potts fully frustrated model: Thermodynamics, percolation, and dynamics in two dimensions 6383
Giancarlo Franzese
Semiclassical approximation to the partition function of a particle in *D* dimensions 6392
C. A. A. de Carvalho, R. M. Cavalcanti, E. S. Fraga, and S. E. Jorás
Correlated molecular-field theory for Ising models 6399
G. M. Wysin and J. Kaplan
Critical behavior of the annihilating random walk of two species with exclusion in one dimension 6404
Géza Ódor and Nóra Menyhárd
Floquet exponents of underdamped Josephson ladders: A comparison with predictions of the discrete sine-Gordon equation 6415
B. R. Trees and N. Hussain
Effective field theory of the zero-temperature triangular-lattice antiferromagnet: A Monte Carlo study 6426
Hui Yin, Bulbul Chakraborty, and Nicholas Gross

Chaos and nonlinear dynamical systems

Quantum algorithmic integrability: The metaphor of classical polygonal billiards 6434
Giorgio Mantica
Spectral properties of atoms in fields: A semiclassical analysis 6444
P. N. Walker and T. S. Monteiro
Spatiotemporal chaos and nonequilibrium transitions in a model excitable medium 6448
Ashwin Pande and Rahul Pandit

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 6** **JUNE 2000**

Dynamic algorithm for parameter estimation and its applications 6461
Anil Maybhate and R. E. Amritkar
Phase dynamics of nearly stationary patterns in activator-inhibitor systems 6471
Aric Hagberg, Ehud Meron, and Thierry Passot
Complete reduction of oscillators in resonance $p:q$ 6477
Antonio Elipe
Detecting unstable periodic orbits from transient chaotic time series 6485
Mukeshwar Dhamala, Ying-Cheng Lai, and Eric J. Kostelich
Distribution of interspike times in noise-driven excitable systems 6490
M. C. Eguia and G. B. Mindlin
Amplification of near-resonant signals via stochastic resonance in a chaotic CO_2 laser 6500
V. N. Chizhevsky, R. Vilaseca, and R. Corbalán
Chaos and fractals in geodesic motions around a nonrotating black hole with halos 6506
Alessandro P. S. de Moura and Patricio S. Letelier
Dynamic stabilization in the double-well Duffing oscillator 6517
Sang-Yoon Kim and Youngtae Kim
Quasiperiodicity and transition to chaos 6521
Junzhong Yang
Fredholm methods for billiard eigenfunctions in the coherent state representation 6527
Fernando P. Simonotti and Marcos Saraceno
Learning dynamics from nonstationary time series: Analysis of electroencephalograms 6538
Dmitrii Gribkov and Valentina Gribkova

Classical fluids

Theory of the lattice Boltzmann method: Dispersion, dissipation, isotropy, Galilean invariance, and stability 6546
Pierre Lallemand and Li-Shi Luo
Multiscale correlation functions in strong turbulence 6563
Jahanshah Davoudi and M. Reza Rahimi Tabar
Universality of probability distributions among two-dimensional turbulent flows 6568
Norbert Schorghofer
Energy spectra of steady two-dimensional turbulent flows 6572
Norbert Schorghofer
Effect of particle inertia on the viscous-convective subrange 6578
Christopher A. Jeffery
Persistence of small-scale anisotropies and anomalous scaling in a model of magnetohydrodynamics turbulence . . . 6586
N. V. Antonov, A. Lanotte, and A. Mazzino
Structure and particle transport in second-order Stokes flow 6606
Russell G. Keanini
Structure and rheology of binary mixtures in shear flow 6621
F. Corberi, G. Gonnella, and A. Lamura
Viscous fingering in liquid crystals: Anisotropy and morphological transitions 6632
R. Folch, J. Casademunt, and A. Hernández-Machado
Transition radiation and the origin of sonoluminescence 6639
Bjørn Jensen and Iver Brevik

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 6** **JUNE 2000**

Numerical renormalization group of vortex aggregation in two-dimensional decaying turbulence: The role of three-body interactions 6644
Clément Sire and Pierre-Henri Chavanis

PART B

Note to Reader i

Liquid crystals

Exact banded patterns from a Doi-Marrucci-Greco model of nematic liquid crystal polymers 6655
M. Gregory Forest, Qi Wang, and Hong Zhou
Magnetic-field-induced periodic deformations in planar nematic layers 6663
D. Krzyżański and G. Derfel
Analysis of compression-induced chiral phase separation in Langmuir monolayers 6669
Wei Zhao, Chen-Xu Wu, and Mitsumasa Iwamoto
Behavior of frustrated phase in ferroelectric and antiferroelectric liquid crystalline mixtures 6674
D. Pociecha, M. Glogarová, E. Gorecka, and J. Mieczkowski
Complex nonlinear behavior in optically excited nematic liquid crystals 6678
G. Demeter
Kinetics of layer-thinning transitions in overheated smectic films 6689
S. Pankratz, P. M. Johnson, A. Paulson, and C. C. Huang
Model for the planar-homeotropic anchoring transition induced by *trans-cis* isomerization 6696
G. Barbero and V. Popa-Nita
Optically guided mode study of nematic liquid crystal alignment on a zero-order grating 6699
B. T. Hallam and J. R. Sambles

Complex fluids, polymers, and granular materials

Phase-field modeling of eutectic growth 6705
François Drolet, K. R. Elder, Martin Grant, and J. M. Kosterlitz
Processes of microstructure coarsening at liquid phase sintering 6721
L. Anestiev and L. Froyen
Micromechanics of magnetorheological suspensions 6732
Eric M. Furst and Alice P. Gast
Binding of molecules to DNA and other semiflexible polymers 6740
Haim Diamant and David Andelman
Surface instability in windblown sand 6750
Douglas A. Kurtze, Joseph A. Both, and Daniel C. Hong
Nonhomogeneous textures and banded flow in a soft cubic phase under shear 6759
E. Eiser, F. Molino, G. Porte, and O. Diat
Avalanches at rough surfaces 6765
G. C. Barker and Anita Mehta
Morphological characterization of bicontinuous structures in polymer blends and microemulsions by the inverse-clipping method in the context of the clipped-random-wave model 6773
Hiroshi Jinnai, Yukihiro Nishikawa, Sow-Hsin Chen, Satoshi Koizumi, and Takeji Hashimoto
Colloidal aggregation with mobile impurities 6781
A. AlSunaidi, M. Lach-hab, Estela Blaisten-Barojas, and Agustín E. González
Probability distribution of the free energy of a directed polymer in a random medium 6789
Éric Brunet and Bernard Derrida
Geometric origin of mechanical properties of granular materials 6802
Jean-Noël Roux

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 6** **JUNE 2000**

Simulation of field-induced structural formation and transition in electromagnetorheological suspensions 6837
Zuowei Wang, Haiping Fang, Zhifang Lin, and Luwei Zhou
Solid-phase structures of the Dzugutov pair potential 6845
J. Roth and A. R. Denton
Multifractal behavior of linear polymers in disordered media 6858
Anke Ordemann, Markus Porto, H. Eduardo Roman, Shlomo Havlin, and Armin Bunde
Longer time kinetics of collapse transition of polymer-surfactant complexes at interfaces near to collapse temperatures 6866
Peng Wei Zhu and Donald H. Napper
Avoidance model for soft particles. II. Positional ordering of charged rods 6872
Eric M. Kramer and Judith Herzfeld
Molecular wall effects: Are conditions at a boundary ''boundary conditions''? 6879
Howard Brenner and Venkat Ganesan
Cooperativity and spatial correlations near the glass transition: Computer simulation results for hard spheres and disks 6898
B. Doliwa and A. Heuer
Long-range density fluctuations in orthoterphenyl as studied by means of ultrasmall-angle x-ray scattering 6909
A. Patkowski, Th. Thurn-Albrecht, E. Banachowicz, W. Steffen, P. Bösecke, T. Narayanan, and E. W. Fischer
Compaction of rods: Relaxation and ordering in vibrated, anisotropic granular material 6914
Fernando X. Villarruel, Benjamin E. Lauderdale, Daniel M. Mueth, and Heinrich M. Jaeger
Surprisingly short-ranged interactions in highly charged colloidal suspensions 6922
Richard V. Durand and Carl Franck
Reorientational relaxation of a linear probe molecule in a simple glassy liquid 6934
W. Götze, A. P. Singh, and Th. Voigtmann
Development and geometry of isotropic and directional shrinkage-crack patterns 6950
Kelly A. Shorlin, John R. de Bruyn, Malcolm Graham, and Stephen W. Morris

Biological physics

Descriptive parameter for photon trajectories in a turbid medium 6958
Amir H. Gandjbakhche and George H. Weiss
Decay and slowing down of the multiquanta Davydov-like solitons in molecular chains 6963
Zoran Ivić, Željko Pržulj, and Dragan Kostić
Unsupervised learning of binary vectors: A Gaussian scenario 6971
Mauro Copelli and Christian Van den Broeck
Modeling study on the validity of a possibly simplified representation of proteins 6981
Jun Wang and Wei Wang
Physics of the rhythmic applause 6987
Z. Néda, E. Ravasz, T. Vicsek, Y. Brechet, and A. L. Barabási
Simultaneous measurements of mobility, dispersion, and orientation of DNA during steady-field gel electrophoresis coupling a fluorescence recovery after photobleaching apparatus with a fluorescence detected linear dichroism setup 6993
B. Tinland, L. Meistermann, and G. Weill

Plasma physics

Multiscale recursion in dense hydrogen plasmas 6999
Stéphane Bagnier, Pierre Dallot, and Gilles Zérah
Nonlinear magnetic electron tripolar vortices in streaming plasmas 7009
J. Vranješ, G. Marić, and P. K. Shukla

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 6** **JUNE 2000**

Simulations of a meter-long plasma wakefield accelerator 7014
S. Lee, T. Katsouleas, R. Hemker, and W. B. Mori
Stopping power of ions in a magnetized two-temperature plasma 7022
H. B. Nersisyan, M. Walter, and G. Zwicknagel
Frequency modulation of the ion-acoustic instability 7034
H. Klostermann and Th. Pierre

Physics of beams

Resonant diffraction radiation from an ultrarelativistic particle moving close to a tilted grating 7039
A. P. Potylitsyn, P. V. Karataev, and G. A. Naumenko
Equilibrium orbit analysis in a free-electron laser with a coaxial wiggler 7046
B. Maraghechi, B. Farrokhi, J. E. Willett, and U.-H. Hwang
Pulse propagation and optical-klystron free-electron-laser devices 7052
G. Dattoli, L. Mezi, and L. Bucci
Optimization of Smith-Purcell radiation at very high energies 7057
Seth R. Trotz, J. H. Brownell, John E. Walsh, and George Doucas

Classical physics, including nonlinear media

Solitons in spiral polymeric macromolecules 7065
A. V. Savin and L. I. Manevitch
Role of pump diffraction on the stability of localized structures in degenerate optical parametric oscillators 7076
Víctor J. Sánchez-Morcillo and Kestutis Staliunas
Analytical estimate of stochasticity thresholds in Fermi-Pasta-Ulam and φ^4 models 7081
Antonio Ponno, Luigi Galgani, and Francesco Guerra
Material equations for electromagnetism with toroidal polarizations 7087
V. M. Dubovik, M. A. Martsenyuk, and Bijan Saha
Canonical perturbative approach to nonlinear systems with application to optical waves in layered Kerr media . . . 7098
T. A. Laine and A. T. Friberg
Transverse and longitudinal dynamics of nonlinear intramolecular excitations on multileg ladder lattices 7110
Oleksiy O. Vakhnenko and Michael J. Velgakis
Soliton interactions in perturbed nonlinear Schrödinger equations 7121
James A. Besley, Peter D. Miller, and Nail N. Akhmediev
Orthogonality relation for a three-dimensional scattering electromagnetic field in a dispersive medium 7134
Masahiro Agu and Jingbo Li
Three-dimensional spinning solitons in the cubic-quintic nonlinear medium 7142
D. Mihalache, D. Mazilu, L.-C. Crasovan, B. A. Malomed, and F. Lederer

Computational physics

Navier-Stokes simulation with constraint forces: Finite-difference method for particle-laden flows and complex geometries 7146
Kai Höfler and Stefan Schwarzer
Concepts in computation of preequilibrium neutron emission from heavy ion reactions 7161
P. K. Sarkar and Maitreyee Nandy
Computational method for general multicenter electronic structure calculations 7169
P. F. Batcho

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 6 JUNE 2000

BRIEF REPORTS

General methods of statistical physics

Nonlinearly coupled flows 7184
Martin Bier, Marcin Kostur, Imre Derényi, and R. Dean Astumian
Exact equilibrium statistical mechanics of two particles interacting via Lennard-Jones and Morse potentials 7188
I. H. Umirzakov
Cooperativity and resonances in periodically driven spin-boson systems 7192
Feng Shuang, Chen Yang, Houyu Zhang, and YiJing Yan
Detailed characterization of log-periodic oscillations for an aperiodic Ising model 7196
R. F. S. Andrade
Scaling transformation of random walk distributions in a lattice 7200
Fernando A. Oliveira, Bernardo A. Mello, and Isaac M. Xavier Jr.
Short-time critical dynamics for the transverse Ising model 7204
M. Santos
Origin of quasiperiodic dynamics in excitable media 7208
Ira B. Schwartz, Ioana Triandaf, Joseph M. Starobin, and Yuri B. Chernyak

Chaos and nonlinear dynamical systems

Phase transition in globally coupled Rössler oscillators 7212
Hidetsugu Sakaguchi
ac-driven phase-dependent directed diffusion 7215
Oleg Yevtushenko, Sergej Flach, and Klaus Richter
Controlling global stochasticity in the standard map 7219
Ying Zhang and Yugui Yao
Recovery of classically chaotic behavior in a noise-driven quantum system 7223
V. Milner, D. A. Steck, W. H. Oskay, and M. G. Raizen

Classical fluids

Transition from the Couette-Taylor system to the plane Couette system 7227
Holger Faisst and Bruno Eckhardt
Computer simulations of phase equilibrium for a fluid confined in a disordered porous structure 7231
L. Sarkisov and P. A. Monson

Liquid crystals

Coupling between molecular vibrations and liquid crystalline order parameters 7235
M. Nöllmann and P. Etchegoin

Complex fluids, polymers, and granular materials

Phase transition of *n*-alkane layers adsorbed on mica 7239
Nobuo Maeda, Mika M. Kohonen, and Hugo K. Christenson

Biological physics

Spatial-temporal correlations in the process to self-organized criticality 7243
C. B. Yang, X. Cai, and Z. M. Zhou

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 6** **JUNE 2000**

Plasma physics

Effect of a dipole moment on the wake potential of a dust grain in a flowing plasma 7246
Osamu Ishihara, S. V. Vladimirov, and N. F. Cramer
Dust acoustic wave in a thermal dusty plasma 7249
P. K. Shukla

Physics of beams

Laser-driven electron cyclotron autoresonance accelerator with production of an optically chopped electron beam 7252
J. L. Hirshfield and Changbiao Wang

COMMENTS

Comment on ''Photon transmission technique for studying multiple phase transitions in a liquid crystal'' 7256
P. Etchegoin and M. Nöllmann

ERRATA

Erratum: Aging of porous media following fluid invasion, freezing, and thawing [Phys. Rev. E **55**, R6348 (1997)] 7259
E. Salmon, M. Ausloos, and N. Vandewalle
Erratum: Experimental observations of non-Gaussian behavior and stringlike cooperative dynamics in concentrated quasi-two-dimensional colloidal liquids [Phys. Rev. E **60**, 5725 (1999)] 7260
Andrew H. Marcus, Jeremy Schofield, and Stuart Rice
Erratum: Dependence on the scattering angle of the electron temperature and electron density in Thomson-scattering measurements on an atmospheric-pressure plasma jet [Phys. Rev. E **61**, 1920 (2000)] 7261
S. C. Snyder, D. M. Crawford, and J. R. Fincke

Cumulative Author Index 7262
