THIRD SERIES, VOLUME 62, NUMBER 6
PARTS A AND B

CONTENTS

DECEMBER 2000

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R7563–8158, and Part B pages 8159–8890.

PART A

Announcement: New Sectioning Scheme i
Announcement: Electronic-First Publication and Article Numbers ii
Note to Reader iv

RAPID COMMUNICATIONS

General methods of statistical physics

Anomalous scaling in depinning transitions R7563
Onuttom Narayan

Glassy dynamics near zero temperature R7567
Federico Ricci-Tersenghi and Riccardo Zecchina

Chaos and nonlinear dynamical systems

Dynamical clustering in large populations of Rössler oscillators under the action of noise R7571
Damián H. Zanette and Alexander S. Mikhailov

Scaling near the quantum chaos border in interacting Fermi systems R7575
Pil Hun Song

Self-exciting chaos as a dynamic model for irregular neural spiking R7579
Gerold Baier, Gerardo J. Escalera Santos, Héctor Perales, M. Rivera, Markus Müller, Ron Leder, and P. Parmananda

Beyond the first recurrence in scar phenomena R7583
D. A. Wisniacki, F. Borondo, E. Vergini, and R. M. Benito

Classical fluids

Statistics of local temperature dissipation in high Rayleigh number convection R7587
Emily S. C. Ching and C. Y. Kwok

Finite-amplitude double-component convection due to different boundary conditions for two compensating horizontal gradients R7591
N. Tsitverblit

Intramolecular origin of the fast relaxations observed in the Brillouin light scattering spectra of molecular glass formers R7595
G. Monaco, S. Caponi, R. Di Leonardo, D. Fioretto, and G. Ruocco

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 6** **DECEMBER 2000**

Liquid crystals

Critical fluctuations at the untilted-tilted phase transition in chiral smectic liquid crystals R7599
Seiji Shibahara, Jun Yamamoto, Yoichi Takanishi, Ken Ishikawa, and Hideo Takezoe

Plasma physics

Tubular plasma generation with a high-power hollow Bessel beam R7603
J. Fan, E. Parra, I. Alexeev, K. Y. Kim, H. M. Milchberg, L. Ya. Margolin, and L. N. Pyatnitskii

Classical physics, including nonlinear media

Multistability and hysteresis phenomena in passive mode-locked lasers R7607
A. K. Komarov and K. P. Komarov

Computational physics

Towards better integrators for dissipative particle dynamics simulations R7611
Gerhard Besold, Ilpo Vattulainen, Mikko Karttunen, and James M. Polson
Taxonomy of stock market indices R7615
Giovanni Bonanno, Nicolas Vandewalle, and Rosario N. Mantegna

ARTICLES

General methods of statistical physics

Coarsening of a class of driven striped structures 7619
M. R. Evans, Y. Kafri, E. Levine, and D. Mukamel
Target waves in the complex Ginzburg-Landau equation 7627
Matthew Hendrey, Keeyeol Nam, Parvez Guzdar, and Edward Ott
Interface scaling in the contact process 7632
Ronald Dickman and Miguel A. Muñoz
Invasion percolation with temperature and the nature of self-organized criticality in real systems 7638
Andrea Gabrielli, Guido Caldarelli, and Luciano Pietronero
Path-integral formulation of stochastic processes for exclusive particle systems 7642
Su-Chan Park, Doochul Kim, and Jeong-Man Park
Equilibrium shapes and faceting for ionic crystals of body-centered-cubic type 7646
Enrico Carlon and Henk van Beijeren
Dimensionality effects in restricted bosonic and fermionic systems 7658
Dragoş-Victor Anghel
Biased diffusion in anisotropic disordered systems 7664
S. Bustingorry, E. R. Reyes, and Manuel O. Cáceres
Glassiness and constrained dynamics of a short-range nondisordered spin model 7670
Juan P. Garrahan and M. E. J. Newman
Growth of a driven interface in isotropic and anisotropic random media 7679
Kwangho Park, Hyun-Joo Kim, and In-mook Kim
Stochastic resonance and noise-enhanced order with spatiotemporal periodic signal 7683
A. Krawiecki, A. Sukiennicki, and R. A. Kosiński
Spin glasses without time-reversal symmetry and the absence of a genuine structural glass transition 7690
Barbara Drossel, Hemant Bokil, and M. A. Moore
Steady states of a Boltzmann equation for driven granular media 7700
J. A. Carrillo, C. Cercignani, and I. M. Gamba
Absolute versus convective instability of spiral waves 7708
Björn Sandstede and Arnd Scheel

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 6** **DECEMBER 2000**

Glass transition in the quenched and annealed version of the frustrated lattice gas model 7715
Annalisa Fierro, Antonio de Candia, and Antonio Coniglio
Dynamics of Lennard-Jones clusters: A characterization of the activation-relaxation technique 7723
Rachid Malek and Normand Mousseau
Anomalous diffusion of particles driven by correlated noise 7729
S. I. Denisov and Werner Horsthemke
Extremal paths on a random Cayley tree 7735
Satya N. Majumdar and P. L. Krapivsky
Analytic results for scaling function and moments for a different type of avalanche in the Bak-Sneppen evolution model 7743
W. Li and X. Cai
Random walk with an exponentially varying step 7748
A. C. de la Torre, A. Maltz, H. O. Mártin, P. Catuogno, and I. García-Mata
Persistence in higher dimensions: A finite size scaling study 7755
G. Manoj and P. Ray
Carnot's cycle for small systems: Irreversibility and cost of operations 7759
Ken Sekimoto, Fumiko Takagi, and Tsuyoshi Hondou
Landauer equation in three-dimensional amorphous materials 7769
Salvador Godoy
Tricritical behavior in deterministic aperiodic Ising systems 7773
T. A. S. Haddad, Angsula Ghosh, and S. R. Salinas
Nearest pattern interaction and global pattern formation 7778
Seong-Ok Jeong, Hie-Tae Moon, and Tae-Wook Ko
Phase diagram of an Ising model with long-range frustrating interactions: A theoretical analysis 7781
M. Grousson, G. Tarjus, and P. Viot
Free-volume kinetic models of granular matter 7793
Mauro Sellitto and Jeferson J. Arenzon
Nonconservative Abelian sandpile model with the Bak-Tang-Wiesenfeld toppling rule 7797
Alexei Vázquez
Emergence of approximate translation invariance in finite intervals as a speed selection mechanism for propagating fronts 7802
Stavros Theodorakis and Epameinondas Leontidis
Two scaling domains in multiple cracking phenomena 7807
U. A. Handge, Y. Leterrier, G. Rochat, I. M. Sokolov, and A. Blumen

Chaos and nonlinear dynamical systems

Asymptotic properties of Lévy flights in quenched random fields 7811
Juha Honkonen
Regular dendritic patterns induced by nonlocal time-periodic forcing 7817
T. Börzsönyi, T. Tóth-Katona, Á. Buka, and L. Gránásy
Experimental observation of dynamics near the torus-doubling terminal critical point 7828
Boris P. Bezruchko, Sergey P. Kuznetsov, and Yevgeniy P. Seleznev
Muonic helium atom as a classical three-body problem 7831
T. J. Stuchi, A. C. B. Antunes, and M. A. Andreu
Temporal modulation of the control parameter in electroconvection in the nematic liquid crystal $I52$ 7842
Michael Dennin
Local (in time) maximal Lyapunov exponents of fragmenting drops 7848
P. Balenzuela, C. A. Bonasera, and C. O. Dorso
Asymmetric unimodal maps: Some results from q-generalized bit cumulants 7857
Uğur Tirnakli

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 6** **DECEMBER 2000**

Chaos and coherence in the conservative three-mode decay interaction 7861
M. Frichembruder, R. Pakter, G. Gerhardt, and F. B. Rizzato
Semiclassical cross section correlations 7867
Bruno Eckhardt, Shmuel Fishman, and Imre Varga
Adaptive box-assisted algorithm for correlation-dimension estimation 7872
Angelo Corana
Generalized synchronization versus phase synchronization 7882
Zhigang Zheng and Gang Hu
Influence of noise on statistical properties of nonhyperbolic attractors 7886
Vadim S. Anishchenko, Andrey S. Kopeikin, Tatjana E. Vadivasova, Galina I. Strelkova, and Jürgen Kurths
Breaking conjugate pairing in thermostated billiards by a magnetic field 7894
M. Dolowschiák and Z. Kovács
Synchronization of hyperchaotic harmonics in time-delay systems and its application to secure communication 7898
Liu Yaowen, Ge Guangming, Zhao Hong, Wang Yinghai, and Gao Liang

Classical fluids

Entropy, dynamics, and instantaneous normal modes in a random energy model 7905
T. Keyes
Phase turbulence in Rayleigh-Bénard convection 7909
Hao-wen Xi, Xiao-jun Li, and J. D. Gunton
Causal implications of viscous damping in compressible fluid flows 7918
P. M. Jordan, Martin R. Meyer, and Ashok Puri
Kinetic theory of dense fluids of rigid biaxial ellipsoids 7927
G. S. Singh and B. Kumar
Rayleigh-Taylor instability with magnetic fluids: Experiment and theory 7941
G. Pacitto, C. Flament, J.-C. Bacri, and M. Widom
Dielectric response of a polarizable system with quenched disorder 7949
Xueyu Song and David Chandler
Absolute and convective instabilities of the natural convection in a vertical heated slot 7957
Jianjun Tao and Fenggan Zhuang
Mean-field fluid behavior of the Gaussian core model 7961
A. A. Louis, P. G. Bolhuis, and J. P. Hansen
Symbolic sequence statistical analysis for free liquid jets 7973
J. Godelle and C. Letellier
Stability of postulated, self-similar, hydrodynamic blowup solutions 7982
J. M. Greene and R. B. Pelz
Convective rolls and heat transfer in finite-length Rayleigh-Bénard convection: A two-dimensional numerical study 7987
S. Kenjereš and K. Hanjalić
Stabilization of the lattice Boltzmann method by the ***H*** theorem: **A** numerical test 7999
Santosh Ansumali and Iliya V. Karlin
Molecular mode-coupling theory applied to a liquid of diatomic molecules 8004
A. Winkler, A. Latz, R. Schilling, and C. Theis
Free energy surface of supercooled water 8016
A. Scala, F. W. Starr, E. La Nave, H. E. Stanley, and F. Sciortino
Kinetic equation for liquids with a multistep potential of interaction: Calculation of transport coefficients 8021
M. V. Tokarchuk, I. P. Omelyan, and A. E. Kobryn

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 6** **DECEMBER 2000**

Analytic calculation of the anomalous exponents in turbulence: Using the fusion rules to flush out a small parameter 8037
Victor S. L'vov and Itamar Procaccia
Fingering in a driven Hele-Shaw cell 8058
Steven N. Rauseo
Phase separation of binary mixtures in shear flow: A numerical study 8064
F. Corberi, G. Gonnella, and A. Lamura
Shear viscosity studies above and below the critical consolute point in a nitrobenzene-decane mixture 8071
Aleksandra Drozd-Rzoska
Permeability of self-affine rough fractures 8076
German Drazer and Joel Koplik
Effect of initial conditions on the mean energy dissipation rate and the scaling exponent 8086
R. A. Antonia and B. R. Pearson

Liquid crystals

Surface and flexoelectric polarization in a nematic liquid crystal directly measured by a pyroelectric technique . . . 8091
L. M. Blinov, M. I. Barnik, M. Ozaki, N. M. Shtykov, and K. Yoshino
Vogel-Fulcher dependence of relaxation rates in a nematic monomer and elastomer 8100
D. Shenoy, S. Filippov, F. Aliev, P. Keller, D. Thomsen, and B. Ratna
Ellipsometric studies of synclinic and anticlinic arrangements in liquid crystal films 8106
P. M. Johnson, D. A. Olson, S. Pankratz, Ch. Bahr, J. W. Goodby, and C. C. Huang
Three-dimensional pattern formation, multiple homogeneous soft modes, and nonlinear dielectric electroconvection 8114
Axel G. Rossberg
Edge dislocation in a vertical smectic-*A* film: Line tension versus temperature and film thickness near the nematic phase 8133
A. Zywocinski, F. Picano, P. Oswald, and J. C. Géminard
Effect of long range order on sheared liquid crystalline materials: Flow regimes, transitions, and rheological phase diagrams 8141
Tomohiro Tsuji and Alejandro D. Rey
Fréedericksz transition in an anticlinic liquid crystal 8152
Bing Wen, Shiyong Zhang, S. S. Keast, M. E. Neubert, P. L. Taylor, and Charles Rosenblatt

PART B

Note to Reader i

Complex fluids, polymers, and granular materials

Semimicroscopic theory of elasticity near the vulcanization transition 8159
Horacio E. Castillo and Paul M. Goldbart
Granule-by-granule reconstruction of a sandpile from x-ray microtomography data 8175
G. T. Seidler, G. Martinez, L. H. Seeley, K. H. Kim, E. A. Behne, S. Zaranek, B. D. Chapman, S. M. Heald, and D. L. Brewe
NMR study of translational and rotational dynamics in monoolein-water mesophases: Obstruction and hydration effects 8182
Thorsten Feiweier, Burkhard Geil, Eva-Maria Pospiech, Franz Fujara, and Roland Winter
Portevin–Le Chatelier effect 8195
Scott V. Franklin, F. Mertens, and M. Marder
Wetting-driven structure formation of a binary mixture in the presence of a mobile particle pinning potential 8207
Yu-qiang Ma

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 6** **DECEMBER 2000**

Effective viscosity of dense colloidal crystals 8212
J. M. A. Hofman, H. J. H. Clercx, and P. P. J. M. Schram
Scaled structures in late stages of microphase separation of binary paraffin mixtures 8234
Peng Wei Zhu, J. W. White, and J. E. Epperson
Stripes ordering in self-stratification experiments of binary and ternary granular mixtures 8241
N. Lecocq and N. Vandewalle
Structure and dynamics of fluorescently labeled complex fluids by Fourier imaging correlation spectroscopy 8245
Tyler J. Grassman, Michelle K. Knowles, and Andrew H. Marcus
Structure and dynamics of concentrated dispersions of polystyrene latex spheres in glycerol: Static and dynamic x-ray scattering 8258
D. Lumma, L. B. Lurio, M. A. Borthwick, P. Falus, and S. G. J. Mochrie
Flow between two sites on a percolation cluster 8270
José S. Andrade , Jr., Sergey V. Buldyrev, Nikolay V. Dokholyan, Shlomo Havlin, Peter R. King, Youngki Lee, Gerald Paul, and H. Eugene Stanley
Lattice-Boltzmann model for interacting amphiphilic fluids 8282
Maziar Nekovee, Peter V. Coveney, Hudong Chen, and Bruce M. Boghosian
Liquid-solid transition of hard spheres under gravity 8295
Paul V. Quinn and Daniel C. Hong
Dynamics of a grain on a sandpile model 8299
L. Quartier, B. Andreotti, S. Douady, and A. Daerr
Aging in a filled polymer: Coherent small angle x-ray and light scattering 8308
Erik Geissler, Anne-Marie Hecht, Cyrille Rochas, Françoise Bley, Frédéric Livet, and Mark Sutton
Pattern formation in a vibrated granular layer: The pattern selection issue 8314
E. Clément and L. Labous
Mean-field theory of acentric order of dipolar chromophores in polymeric electro-optic materials 8324
Yuriy V. Pereverzev and Oleg V. Prezhdo
Multiple contact kernel for diffusionlike aggregation 8335
A. Schmitt, G. Odriozola, A. Moncho-Jordá, J. Callejas-Fernández, R. Martínez-García, and R. Hidalgo-Álvarez
Spin-1 aggregation model in one dimension 8344
M. Girardi and W. Figueiredo
Frictional-collisional regime for granular suspension flows down an inclined channel 8349
Christophe Ancey and Pierre Evesque
Thermal diffusion and Soret feedback of gold-doped polyorganosiloxane nanospheres in toluene 8361
R. Spill, W. Köhler, G. Lindenblatt, and W. Schaertl
Microscopic and macroscopic effects of surface lubricant films in granular shear 8369
Robert G. Cain, Neil W. Page, and Simon Biggs

Biological physics

Kulback-Leibler and renormalized entropies: Applications to electroencephalograms of epilepsy patients 8380
R. Quian Quiroga, J. Arnhold, K. Lehnertz, and P. Grassberger
Optimal pruning in neural networks 8387
Daniela M. L. Barbato and Osame Kinouchi
Parity-violating effects in asymmetric chemical reactions: A theoretical study on the CHFClBr molecule 8395
Alessandro Soncini, Andrea Ligabue, Paolo Lazzeretti, and Riccardo Zanasi
Interaction of local anesthetics with phospholipids in Langmuir monolayers 8400
Suzanne Amador Kane and Samuel D. Floyd
Percolation with long-range correlations for epidemic spreading 8409
Zhi-Jie Tan, Xian-Wu Zou, and Zhun-Zhi Jin

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 6** **DECEMBER 2000**

Comparison of current-driven and conductance-driven neocortical model neurons with Hodgkin-Huxley voltage-gated channels 8413
P. H. E. Tiesinga, Jorge V. José, and Terrence J. Sejnowski
Excitable calcium wave propagation in the presence of localized stores 8420
C. S. Pencea and H. G. E. Hentschel
Effect of spatial extension on noise-enhanced phase locking in a leaky integrate-and-fire model of a neuron 8427
Roger Rodriguez and Petr Lánský
Similarities between principal components of protein dynamics and random diffusion 8438
Berk Hess
Putting proteins back into water 8449
Paolo De Los Rios and Guido Caldarelli
Thermodynamics and mechanics of bilayer membranes 8453
S. M. Oversteegen and F. A. M. Leermakers
Spatiotemporal pattern formation in neural systems with heterogeneous connection topologies 8462
V. K. Jirsa and J. A. S. Kelso
Mean-field stochastic theory for species-rich assembled communities 8466
Alan McKane, David Alonso, and Ricard V. Solé

Plasma physics

VUV absorption spectroscopy measurements of the role of fast neutral atoms in a high-power gap breakdown . . . 8485
A. B. Filuk, J. E. Bailey, M. E. Cuneo, P. W. Lake, T. J. Nash, D. D. Noack, and Y. Maron
Parametric excitation of Alfvén waves by gravitational radiation 8493
M. Servin, G. Brodin, M. Bradley, and M. Marklund
Dust acoustic waves in strongly coupled dissipative plasmas 8501
B. S. Xie and M. Y. Yu
Interactions of disparate scales in drift-wave turbulence 8508
John A. Krommes and Chang-Bae Kim
Sheath model for radio-frequency-biased, high-density plasmas valid for all ω/ω_i 8540
Mark A. Sobolewski
Equation of state of fully ionized electron-ion plasmas. II. Extension to relativistic densities and to the solid phase 8554
Alexander Y. Potekhin and Gilles Chabrier
Velocity space scattering coefficients with applications in antihydrogen recombination studies 8564
Yongbin Chang and C. A. Ordonez
Foam-induced smoothing studied through laser-driven shock waves 8573
Dimitri Batani, Wigen Nazarov, Tom Hall, Thorsten Löwer, Michel Koenig, Bernard Faral, Alessandra Benuzzi-Mounaix, and Nicolas Grandjouan

Physics of beams

Self-collimation in an atomic beam evaporated from a superfluid ^{4}He film 8583
H. H. Hjort and D. O. Edwards
Radio-frequency measurements of coherent transition and Cherenkov radiation: Implications for high-energy neutrino detection 8590
Peter W. Gorham, David P. Saltzberg, Paul Schoessow, Wei Gai, John G. Power, Richard Konecny, and M. E. Conde
Observation of coherent Čerenkov radiation from a solid dielectric with short bunches of electrons 8606
Toshiharu Takahashi, Yukio Shibata, Kimihiro Ishi, Mikihiko Ikezawa, Masayuki Oyamada, and Yasuhiro Kondo
Generation of very high-frequency waves by up-conversion in a plasma-loaded free-electron laser 8612
V. Petrillo and C. Maroli

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 6** **DECEMBER 2000**

Helically symmetric astrophysical jets 8616
Oleg I. Bogoyavlenskij

Classical physics, including nonlinear media

Propagation speed of evanescent modes 8628
A. Pablo L. Barbero, Hugo E. Hernández-Figueroa, and Erasmo Recami
Photonic Hall effect in absorbing media 8636
S. Wiebel, A. Sparenberg, G. L. J. A. Rikken, D. Lacoste, and B. A. van Tiggelen
Radiative corrections in symmetrized classical electrodynamics 8640
J. R. Van Meter, A. K. Kerman, P. Chen, and F. V. Hartemann
Shock wave dynamics in a discrete nonlinear Schrödinger equation with internal losses 8651
Mario Salerno, Boris A. Malomed, and Vladimir V. Konotop
Optical spatial shock waves in photorefractive media 8657
M. I. Carvalho, A. G. Grandpierre, D. N. Christodoulides, and M. Segev
Energy focusing inside a dynamical cavity 8663
K. Colanero and M.-C. Chu
Stability criterion for multicomponent solitary waves 8668
Dmitry E. Pelinovsky and Yuri S. Kivshar
Mode structure and ray dynamics of a parabolic dome microcavity 8677
Jens U. Nöckel, Guillaume Bourdon, Eric Le Ru, Richard Adams, Isabelle Robert, Jean-Marie Moison, and Izo Abram
Self-focusing of a single laser pulse in a photorefractive medium 8700
D. Wolfersberger, N. Fressengeas, J. Maufoy, and G. Kugel
Numerical solution of the time-dependent Maxwell's equations for random dielectric media 8705
W. Harshawardhan, Q. Su, and R. Grobe
Bragg-grating solitons in a semilinear dual-core system 8713
Javid Atai and Boris A. Malomed
Multisoliton solutions and integrability aspects of coupled higher-order nonlinear Schrödinger equations 8719
M. N. Vinoj and V. C. Kuriakose
Cavity solitons in semiconductor microresonators: Existence, stability, and dynamical properties 8726
T. Maggipinto, M. Brambilla, G. K. Harkness, and W. J. Firth

Computational physics

High-precision, variational, bound-state calculations in Coulomb three-body systems 8740
Alexei M. Frolov
Higher-order force gradient symplectic algorithms 8746
Siu A. Chin and Donald W. Kidwell
Effect of compression on the global optimization of atomic clusters 8753
Jonathan P. K. Doye
Enhanced sampling of rare events 8762
Simone Melchionna
Kinetic phase transitions in a contaminated monomer-dimer reaction model 8768
V. Bustos, R. O. Uñac, and G. Zgrablich
Fourier grid Hamiltonian method and Lagrange-mesh calculations 8777
Claude Semay
Replica-exchange algorithm and results for the three-dimensional random field Ising model 8782
J. Machta, M. E. J. Newman, and L. B. Chayes

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 6 DECEMBER 2000

Monte Carlo simulation of the mixed alkali effect with cooperative jumps 8790
Junko Habasaki and Yasuaki Hiwatari

BRIEF REPORTS

General methods of statistical physics

Power law distributions of burst duration and interburst interval in the solar wind: Turbulence or dissipative self-organized criticality? 8794
M. P. Freeman, N. W. Watkins, and D. J. Riley

Double-logarithmic finite-size scaling behavior of the specific heat does not necessarily imply its divergence 8798
Jae-Kwon Kim

Drift of spiral waves in the complex Ginzburg-Landau equation due to media inhomogeneities 8800
I. V. Biktasheva

Stochastic resonance without an external periodic drive in a simple prey-predator model 8804
Renuka Rai and Harjinder Singh

Positivity preserving non-Markovian master equations 8808
Joshua Wilkie

Aspect-ratio dependence of percolation probability in a rectangular system 8811
Shinsuke Tsubakihara

Lower bounds for the ground-state degeneracies of frustrated systems on fractal lattices 8814
Evaldo M. F. Curado and Fernando D. Nobre

Shock structures in time-averaged patterns for the Kuramoto-Sivashinsky equation 8817
Hidetsugu Sakaguchi

Symmetry breaking in one-dimensional diffusion 8820
M. Gitterman

Chaos and nonlinear dynamical systems

Discrete homoclinic orbits in a laser with feedback 8823
A. N. Pisarchik, R. Meucci, and F. T. Arecchi

Phase synchronization with type-II intermittency in chaotic oscillators 8826
Inbo Kim, Chil-Min Kim, Won-Ho Kye, and Young-Jai Park

Liquid crystals

Nematic liquid-crystal director configuration for general elastic coefficients 8830
Elsebeth Schröder

Biological physics

Stability properties of solitary waves and periodic wave trains in a two-dimensional network of spiking neurons 8834
Werner M. Kistler

Plasma physics

Experiments on radiative collapse in laser-produced plasmas relevant to astrophysical jets 8838
K. Shigemori, R. Kodama, D. R. Farley, T. Koase, K. G. Estabrook, B. A. Remington, D. D. Ryutov, Y. Ochi, H. Azechi, J. Stone, and N. Turner
