

Nonhydrogenic Rydberg atoms in a magnetic field: A rigorous semiclassical approach	744
Bruno Hüpfer, Jörg Main, and Günter Wunner	

Atomic and molecular collisions and interactions

3p-photoionization resonances of atomic Fe, Co, and Ni studied by the observation of singly and doubly charged photoions	760
H. Feist, M. Feldt, Ch. Gerth, M. Martins, P. Sladeczek, and P. Zimmermann	
<i>Ab initio</i> potential-energy surfaces and electron-spin-exchange cross sections for H-O ₂ interactions	766
James R. Stallcop, Harry Partridge, and Eugene Levin	
Radiationless resonant Raman scattering interpretation of argon photoion yields measured in coincidence with <i>K-LL</i> Auger decay	772
G. Bradley Armen, Jon C. Levin, and Ivan A. Sellin	
Energy-dependent rotational polarization in elementary rearrangement collisions	785
Nark Nyul Choi and Sung-Ho Suck Salk	
Bound-state methods for low-energy electron-ion scattering	791
Leonard Rosenberg	
Evidence for multielectron resonances at the Sr <i>K</i> edge	798
P. D'Angelo, H.-F. Nolting, and N. V. Pavel	
Electron excitation of optically-allowed transitions in CO ₂ , SF ₆ , CO, F ₂ , and SO ₂	806
I. W. Fomunung, Zhifan Chen, and A. Z. Msezane	
Galilean invariance of the Schrödinger equation in the adiabatic approximation: The central-field method	818
A. López-Castillo	
Multilevel effects on the balance of dipole-allowed to dipole-forbidden transitions in Rydberg atoms induced by a dipole interaction with slow charged projectiles	825
M. I. Syrkin	
Inversion of total and differential cross-section data for electron-methane scattering	831
D. R. Lun, K. Amos, and L. J. Allen	
Photodetachment of Li ⁻ from the Li 3s threshold to the Li 6s threshold	840
Cheng Pan, Anthony F. Starace, and Chris H. Greene	
Electron degradation and thermalization in H ₂ gas	853
Ken-ichi Kowari	
Continuum absorption spectra in the far wings of the Hg ¹ S ₀ → ³ P ₁ resonance line broadened by Ar	867
Y. Sato, T. Nakamura, M. Okunishi, K. Ohmori, H. Chiba, and K. Ueda	
Slow collisions between highly charged ions and C ₆₀ : Absolute ΔE values and cross sections	874
N. Selberg, A. Bárány, C. Biedermann, C. J. Setterlind, H. Cederquist, A. Langereis, M. O. Larsson, A. Wännström, and P. Hvelplund	

Electron, atom, and molecule interactions with solids and surfaces

Image acceleration of highly charged ions by metal surfaces	880
C. Lemell, H. P. Winter, F. Aumayr, J. Burgdörfer, and F. Meyer	
Spectra of secondary electrons induced by channeled and nonchanneled ions in Si and Al	886
P. F. A. Alkemade, L. Flinn, W. N. Lennard, and I. V. Mitchell	
Binary-electron emission in grazing ion-surface collisions	895
M. L. Martiarena, E. A. Sánchez, O. Grizzi, and V. H. Ponce
