CONTENTS

JUNE 1997

RAPID COMMUNICATIONS

Complete photofragmentation of the lithium atom	R3979
A. W. Malcherek, J. M. Rost, and J. S. Briggs	
Doubly differential electron emission for transfer ionization in 100-keV H^+ on Ar	R3983
G. Bernardi, P. Focke, and W. Meckbach	
Temperature and localization of atoms in three-dimensional optical lattices	R3987
M. Gatzke, G. Birkel, P. S. Jessen, A. Kastberg, S. L. Rolston, and W. D. Phillips	
Atom trapping in deeply bound states of a far-off-resonance optical lattice	R3991
D. L. Haycock, S. E. Hamann, G. Klose, and P. S. Jessen	
Stark wave packets viewed with half-cycle pulses	R3995
C. Raman, T. C. Weinacht, and P. H. Bucksbaum	
Direct measurement of fine-structure collisional losses from a Cs magneto-optical trap	R3999
A. Fioretti, J. H. Müller, P. Verkerk, M. Allegrini, E. Arimondo, and P. S. Julienne	
Above-threshold ionization in the tunneling regime	R4003
A. Lohr, M. Kleber, R. Kopold, and W. Becker	
Quantum evolution of classical nonlinear eigenmode in parametric interaction and realization in traps with ions ..	R4007
G. S. Agarwal and J. Banerji	
Controlling optical turbulence	R4011
D. Hochheiser, J. V. Moloney, and J. Lega	
Spontaneous emission in absorbing dielectrics: A microscopic approach	R4015
Gediminas Juzeliūnas	
Broadband spectral generation with refractive index control	R4019
S. E. Harris and A. V. Sokolov	

ARTICLES

Fundamental concepts

Relations of canonical and unitary transformations for a general time-dependent quadratic Hamiltonian system ...	4023
Kyu-Hwang Yeon, Duk-Hyeon Kim, Chung-In Um, Thomas F. George, and Lakshmi N. Pandey	
Information entropy and the space of decoherence functions in generalized quantum theory	4030
C. J. Isham and N. Linden	
Deconstructing decoherence	4041
J. R. Anglin, J. P. Paz, and W. H. Zurek	
Quantum stabilizer codes and classical linear codes	4054
Richard Cleve	
Causality in the excitation exchange between identical atoms	4060
P. R. Berman and B. Dubetsky	
Decoherence and initial correlations in quantum Brownian motion	4070
Luciana Dávila Romero and Juan Pablo Paz	

(Continued)

1050-2947(199706)55:6;1-J

Inverting a time-dependent harmonic oscillator potential by a unitary transformation and a class of exactly solvable oscillators	4084
Ali Mostafazadeh	
Quantum code words contradict local realism	4089
David P. DiVincenzo and Asher Peres	
Spin densities in pseudoclassical kinetic theory	4093
F. M. C. Witte	
Bound states and propagating modes in quantum wires with sharp bends and/or constrictions	4102
M. Razavy	
No-hidden-variables proof for two spin- $\frac{1}{2}$ particles preselected and postselected in unentangled states	4109
Adán Cabello	
Application of $U(2) \supset O(2)$ and $U(2) \supset U(1)$ dynamical symmetries to diatomic molecular vibrations	4112
Ian L. Cooper and Raj K. Gupta	
Probing the quantum state of a trapped atom	4120
Matthias Freyberger	
Testing the symmetrization postulate for photons using Rydberg atoms and cavity QED	4126
Christopher C. Gerry and Robert C. Hilborn	

Atomic and molecular structure and dynamics

Photophysical and electron attachment properties of ArF-excimer-laser irradiated H_2	4131
Panos G. Datskos, Lal A. Pinnaduwege, and John F. Kielkopf	
All-order relativistic many-body calculations for the electron affinities of Ca^- , Sr^- , Ba^- , and Yb^- negative ions	4143
Euripides N. Avgoustoglou and Donald R. Beck	
$4f^2/4f6p$ configuration interaction in $LiYF_4:Pr^{3+}$	4150
M. D. Faucher and O. K. Moune	
Self-consistent-field perturbation theory for the Schrödinger equation	4155
David Z. Goodson	
Non-Lorentzian line shapes for interfering rotational resonances in the predissociation of O_2	4164
B. R. Lewis, P. M. Dooley, J. P. England, S. T. Gibson, K. G. H. Baldwin, and L. W. Torop	
Nodal structures of intrashell states of three-valence-electron atoms	4168
C. G. Bao, Xiazhou Yang, and C. D. Lin	
Spin-orbit coupling in variational quantum Monte Carlo calculations	4183
Heinz-Jürgen Flad, Michael Dolg, and Alok Shukla	
Measurement of a magnetic-dipole transition probability in Xe^{32+} using an electron-beam ion trap	4196
F. G. Serpa, C. A. Morgan, E. S. Meyer, J. D. Gillaspay, E. Träbert, D. A. Church, and E. Takács	

Atomic and molecular collisions and interactions

Helium excitation by protons and highly-charged-ion impact	4201
V. D. Rodríguez, C. A. Ramírez, R. D. Rivarola, and J. E. Miraglia	
Multichannel Penning detachment of H^- from excited Li and Ca atoms	4209
F. Martín and R. S. Berry	
Equivalent-photon method study of differential cross sections for double ionization of helium by relativistic heavy-ion impact	4215
S. Keller, H. J. Lüdde, and R. M. Dreizler	
Ultrashort-lived non-Rydberg doubly excited resonances in diatomic molecules	4221
P. Erman, A. Karawajczyk, E. Rachlew-Källne, M. Stankiewicz, K. Yoshiki Franzén, P. Sannes, and L. Veseth	

Isotropic collision-induced light scattering by gaseous CF_4	4230
A. Elliasmine, J.-L. Godet, Y. Le Duff, and T. Bancewicz	
Generalization of the Hartree-Fock approach to collision processes	4238
Yukap Hahn	
Measurements of positron-methane differential scattering cross sections	4244
D. A. Przybyla, W. E. Kauppila, C. K. Kwan, Steven J. Smith, and T. S. Stein	
Detector-to-detector Compton backscattering in germanium at 59.5 keV	4248
S. Pašić and K. Ilakovac	
Making complex scaling work for long-range potentials	4253
T. N. Rescigno, M. Baertschy, D. Byrum, and C. W. McCurdy	
Three-particle breakup near threshold when the Wannier exponent diverges	4263
W. Ihra, F. Mota-Furtado, and P. F. O'Mahony	
Angular distributions of Auger transitions of N_2 to dissociative final states	4269
A. K. Edwards, Q. Zheng, R. M. Wood, and M. A. Mangan	
X-ray fluorescence and Auger-electron coincidence spectroscopy of vacancy cascades in atomic argon	4273
U. Arp, T. LeBrun, S. H. Southworth, M. A. MacDonald, and M. Jung	
Structure of $(Nlm)-(N+1,l+1,m)$ nonadiabatic couplings in (Z_1, e, Z_2) system and the Z_2/Z_1 range of Landau-Zener coupling	4285
R. K. Janev	
Extension of classical trajectory Monte Carlo calculations to ion-Rydberg-atom collisions in a magnetic field . . .	4290
S. Bradenbrink, E. Y. Sidky, Z. Roller-Lutz, H. Reihl, and H. O. Lutz	
Electron, atom, and molecule interactions with solids and surfaces	
Stopping in ion-surface collisions at high energies	4300
J. E. Miraglia and M. S. Gravielle	
Energy loss of highly charged argon ions at grazing incidence on a graphite surface	4310
S. Winecki, M. P. Stöckli, and C. L. Cocke	
Matter waves	
Quantum dynamics of an atomic Bose-Einstein condensate in a double-well potential	4318
G. J. Milburn, J. Corney, E. M. Wright, and D. F. Walls	
Semiclassical analysis of collective excitations in Bose-Einstein condensate	4325
Subhasis Sinha	
Relative phase of two Bose-Einstein condensates	4330
Yvan Castin and Jean Dalibard	
Solitary-wave solutions to nonlinear Schrödinger equations	4338
S. A. Morgan, R. J. Ballagh, and K. Burnett	
Trapped Fermi gases	4346
D. A. Butts and D. S. Rokhsar	
Atomic and molecular processes in electromagnetic fields	
Many-particle effects in laser cooling of one-dimensional optical molasses	4351
K. Ellinger and J. Cooper	
Sympathetic cooling of ^6Li atoms	4377
F. A. van Abeelen, B. J. Verhaar, and A. J. Moerdijk	
Pump-probe spectroscopy approach to Bragg scattering	4382
P. R. Berman and B. Bian	

Resonance fluorescence of an extended atomic wave packet	4386
Luis Pumares, Luis Santos, Luis Roso, and Kazimierz Rzążewski	
Strong laser-field effects in hydrogen: High-order above-threshold ionization and photoelectron angular distributions	4397
S. Dionissopoulou, Th. Mercouris, A. Lyras, and C. A. Nicolaides	
Optical suppression of hyperfine-changing collisions in a sample of ultracold sodium atoms	4407
S. R. Muniz, L. G. Marcassa, R. Napolitano, G. D. Telles, J. Weiner, S. C. Zilio, and V. S. Bagnato	
Quantum-nondemolition measurement of the vibrational energy of a trapped ion	4412
F. E. Harrison, A. S. Parkins, M. J. Collett, and D. F. Walls	
Population dynamics and phase effects in periodic level crossings	4418
B. M. Garraway and N. V. Vitanov	
Adiabatic scattering of atoms by a standing laser wave	4433
A. R. Kolovsky and H. J. Korsch	
Quantum-mechanical counterpart of nonlinear optics	4438
S. Wallentowitz and W. Vogel	

Quantum optics

Low pump limit of the bifurcation to periodic intensities in a semiconductor laser subject to external optical feedback	4443
G. Lythe, T. Erneux, A. Gavrielides, and V. Kovanis	
Application of Klyshko's criterion for nonclassical states to the micromaser pumped by ultracold atoms	4449
Ching Tsung Lee	
Quenching of spontaneous emission via quantum interference	4454
Hwang Lee, Pavel Polynkin, Marlan O. Scully, and Shi-Yao Zhu	
Resonant interaction between identical atoms including recoil	4466
P. R. Berman	
Linear theory for optimal control of molecular wave packets	4477
Jianshu Cao and Kent R. Wilson	
Quantum interference effects in spontaneous atomic emission: Dependence of the resonance fluorescence spectrum on the phase of the driving field	4483
M. A. G. Martinez, P. R. Herczfeld, C. Samuels, L. M. Narducci, and C. H. Keitel	
Quantum trajectory analysis of a thresholdlike transition in the microlaser	4492
Changhuei Yang and Kyungwon An	
Forward-scattered light: Spectral broadening and temporal coherence	4501
N. L. Swanson and D. H. Van Winkle	
Classical and quantum signatures of competing $\chi^{(2)}$ nonlinearities	4511
A. G. White, P. K. Lam, M. S. Taubman, M. A. M. Marte, S. Schiller, D. E. McClelland, and H.-A. Bachor	
Finite-size effects on squeezing in the self-pulsing regime of second harmonic generation	4516
Oliver Veits and Michael Fleischhauer	
Scattering of second-harmonic light from small spherical particles ordered in a crystalline lattice	4520
Jordi Martorell, R. Vilaseca, and R. Corbalán	
Fractional wave-function revivals in the infinite square well	4526
David L. Aronstein and C. R. Stroud Jr.	
Subhexagons and ultrahexagons as a result of a secondary instability	4538
Yu A. Logvin, T. Ackemann, and W. Lange	
Unified and standardized procedure to solve various nonlinear Jaynes-Cummings models	4545
Xiaoxue Yang, Ying Wu, and Yuanjie Li	

Strongly anticorrelated twin beams from symmetric low-Q cavity semiconductor lasers under constant-current operation	4552
Makoto Yamashita, Susumu Machida, and Takaaki Mukai	
Unstable-resonator diffraction losses and the excess-noise factor	4556
M. A. van Eijkelenborg, Å. M. Lindberg, M. S. Thijssen, and J. P. Woerdman	
Transverse excess noise factor in geometrically stable laser resonators	4563
Marc Brunel, Guy Ropars, Albert Le Floch, and Fabien Bretenaker	
Light amplification mechanisms in a coherently coupled atomic system	4568
Yifu Zhu	
Zeeman splitting in the Maxwell-Bloch theory of collisionally pumped lasers	4576
D. Benredjem, A. Sureau, and C. Möller	

BRIEF REPORTS

Generation of highly entangled field states in multiple micromaser cavities	4585
János A. Bergou and Mark Hillery	
Natural variables for density functionals	4589
Yan Alexander Wang	
Conditional generation of error syndromes in fault-tolerant error correction	4593
M. B. Plenio, V. Vedral, and P. L. Knight	
Investigation of the $b^1\Sigma_g^+(v=0) \leftarrow X^3\Sigma_g^-(v=0)$ magnetic-dipole transitions in $^{18}\text{O}_2$	4597
G. Gagliardi, L. Gianfrani, and G. M. Tino	
Numerical test of the sixth-order gradient expansion for the kinetic energy: Application to the monovacancy in jellium	4601
Zidan Yan, John P. Perdew, Timo Korhonen, and Paul Ziesche	
Analyzing the photodetachment cross section of H^- in electric and magnetic fields with arbitrary orientation	4605
Z. Y. Liu and D. H. Wang	
Classical examination of the Stark effect in hydrogen	4609
Andrew Hooker, Chris H. Greene, and William Clark	
Interference patterns in positron- H_2^+ collisions with the formation of positronium atoms	4613
O. A. Fojón, R. D. Rivarola, J. Hanssen, and M. A. Ourdane	
Differential cross sections in the ejected energy for an $L=0$ model of the electron-impact ionization of hydrogen	4617
M. S. Pindzola and F. Robicheaux	
Cooling mechanisms in the sodium type-II magneto-optical trap	4621
A. M. L. Oien, I. T. McKinnie, P. J. Manson, W. J. Sandle, and D. M. Warrington	
Sidelobes in multiphoton ionization of inert gases	4625
J. Z. Kamiński and F. Ehlotzky	
Tomographic reconstruction of completely unpolarized light	4629
Th. Richter	
Transition from a microcavity exciton polariton to a photon laser	4632
H. Cao, S. Pau, J. M. Jacobson, G. Björk, Y. Yamamoto, and A. Imamoglu	
Decay of an atom coupled strongly to a reservoir	4636
B. M. Garraway	

COMMENTS

Comment on "Cyclic quantum-evolution dependence on the Hamiltonian and geometric phase"	4640
Ali Mostafazadeh
