Guidelines for PRA Section Selection iii
Editorial Policies and Procedures of Physical Review A viii
General Information for Contributors xi
Guidelines for Estimating Length xv

RAPID COMMUNICATIONS

Quantum information

Qubit-qubit interaction in quantum computers R1
Julio Gea-Banacloche

Atomic and molecular collisions and interactions

Orientation-dependent dissociative charge transfer R5
W. Wu, M. H. Prior, and H. Bräuning
Oscillatory alignment phenomena in Rydberg-atom–rare-gas collisions R9
William A. Isaacs and Michael A. Morrison
Anomalous final-state distributions of electrons captured from directed Rydberg states R13
D. M. Homan, K. B. MacAdam, and M. J. Cavagnero

Atomic and molecular processes in electromagnetic fields

Control of photodetachment through a two-color low-frequency field R16
S. Bivona, R. Burlon, and C. Leone
CO_2-laser optical lattice with cold rubidium atoms R20
S. Friebel, C. D'Andrea, J. Walz, M. Weitz, and T. W. Hänsch
Phase change of a probe due to oscillation of cold atoms in an optical standing wave R24
M. Kozuma, K. Nakagawa, W. Jhe, and M. Ohtsu

Matter waves

Josephson effect between trapped Bose-Einstein condensates R28
Ivar Zapata, Fernando Sols, and Anthony J. Leggett
Collective excitations of Bose-Einstein-condensed gases at finite temperatures R32
R. J. Dodd, Mark Edwards, Charles W. Clark, and K. Burnett

Quantum optics, physics of lasers, nonlinear optics

Coherent spectroscopic effects in the propagation of ultrashort pulses through a two-level system R36
Jinendra K. Ranka, Robert W. Schirmer, and Alexander L. Gaeta

(Continued)

1050-2947(199801)57:1;1-Y

PHYSICAL REVIEW A THIRD SERIES, VOLUME 57, NUMBER 1 JANUARY 1998

ARTICLES

Fundamental concepts

Effects of zero-point energy in elementary-system interactions 40
I. R. Senitzky

Hyperspherical wave functions with orthogonal and permutational symmetry 48
Nir Barnea and Akiva Novoselsky

QED theory of the nuclear recoil effect in atoms 59
V. M. Shabaev

Solvable three-state model of a driven double-well potential and coherent destruction of tunneling 68
Laro Schatzer and Stefan Weigert

Nonadiabatic transitions in a two-level quantum system: Pulse-shape dependence of the transition probability for a two-level atom driven by a pulsed radiation field 79
P. R. Berman, Lixin Yan, Keng-Hwee Chiam, and Ruwang Sung

Reflectionless potentials for the one-dimensional Dirac equation: Pseudoscalar potentials 93
Y. Nogami and F. M. Toyama

Kinematics and hydrodynamics of spinning particles 98
Erasmo Recami and Giovanni Salesi

Generalized coherent states for the Pöschl-Teller potential and a classical limit 106
M. G. A. Crawford and E. R. Vrscay

Clauser-Horne-Shimony-Holt correlation and Clauser-Horne correlation do not lead to the largest violations of Bell's inequality 114
M. Ardehali

Quantum information

Quantum computation with quantum dots 120
Daniel Loss and David P. DiVincenzo

Theory of fault-tolerant quantum computation 127
Daniel Gottesman

Atomic and molecular structure and dynamics

Approximate relativistic optimized potential method 138
T. Kreibich, E. K. U. Gross, and E. Engel

Transition energy and lifetime for the ground-state hyperfine splitting of high-Z lithiumlike ions 149
V. M. Shabaev, M. B. Shabaeva, I. I. Tupitsyn, V. A. Yerokhin, A. N. Artemyev, T. Kühl, M. Tomaselli, and O. M. Zherebtsov

High-resolution carbon 1s photoelectron spectrum of ethene: *Ab initio* calculation of vibrational structure with dynamic localization of the core hole 157
J. Bozek, T. X. Carroll, J. Hahne, L. J. Sæthre,, J. True, and T. D. Thomas

Theoretical treatment of quasibound resonances in two-color resonant four-wave mixing spectroscopy 162
F. Di Teodoro and E. F. McCormack

Auger width of metastable states in antiprotonic helium 174
J. Révai and A. T. Kruppa

Measurements of the $1s2s\ ^1S_0-1s2p\ ^3P_{1,0}$ transitions in heliumlike nitrogen 180
J. K. Thompson, D. J. H. Howie, and E. G. Myers

(Continued)

PHYSICAL REVIEW A THIRD SERIES, VOLUME 57, NUMBER 1 JANUARY 1998

Exchange-correlation density functional beyond the gradient approximation 189
Michael Filatov and Walter Thiel

Atomic and molecular collisions and interactions

Velocity-dependent screening in metals 200
A. F. Lifschitz and N. R. Arista
Differential cross sections for rovibrational ($v'=0\rightarrow 1,2,3,4$) excitation of the electronic ground state of O_2 by electron impact 208
M. J. Brunger, A. G. Middleton, and P. J. O. Teubner
Projectile angular distribution in He single ionization by proton impact as a function of the ejected-electron energy 215
V. D. Rodríguez and R. O. Barrachina
State-selective electron-capture measurements for N^{4+}-H and N^{4+}-H_2 collisions 221
F. W. Bliek, G. R. Woestenenk, R. Hoekstra, and R. Morgenstern
Zeros in (inverse) bremsstrahlung matrix elements 227
C. David Shaffer, R. H. Pratt, and Sung Dahm Oh
Probabilities for M-shell ionization in intermediate-velocity collisions of medium-mass atoms with $^4He^{2+}$ ions . . 235
Ch. Herren, B. Boschung, J.-Cl. Dousse, B. Galley, J. Hoszowska, J. Kern, Ch. Rhême, M. Polasik, T. Ludziejewski, P. Rymuza, and Z. Sujkowski
Electron-impact ionization cross section of rubidium 246
Yong-Ki Kim, Jacek Migdałek, Wojciech Siegel, and Jacek Bieroń
Reverse energy pooling in a K-Na mixture 255
G. De Filippo, S. Guldberg-Kjær, S. Milošević, J. O. P. Pedersen, and M. Allegrini
Measurement of electron-impact excitation into the $3p^5 4p$ levels of argon using Fourier-transform spectroscopy 267
J. Ethan Chilton, John B. Boffard, R. Scott Schappe, and Chun C. Lin
Absolute cross sections for near-threshold electron-impact excitation of the $2s\ ^2S\rightarrow 2p\ ^2P$ transition in C^{3+} 278
M. E. Bannister, Y.-S. Chung, N. Djurić, B. Wallbank, O. Woitke, S. Zhou, G. H. Dunn, and A. C. H. Smith
Final ion-charge resolving electron spectroscopy for the investigation of atomic photoionization processes: Xe in the region of the $4d\rightarrow \epsilon f$ resonance 282
T. Luhmann, Ch. Gerth, M. Groen, M. Martins, B. Obst, M. Richter, and P. Zimmermann
Measurement of the ratio of differential cross sections for double and single ionization of He by (4–10)-MeV protons 292
W. R. DeHaven, C. Dilley, A. Landers, E. Y. Kamber, and C. L. Cocke
Comparative study of Si-$2p$ core-excitation spectra in the tetrahedral molecules SiX_4 (with X=H, D, F, Cl, Br, CH_3) 297
Ralph Püttner, Michael Domke, and Günter Kaindl
Truncated dipole series in the electron-hydrogen and positron-hydrogen systems 308
T. Purr, H. Friedrich, and A. T. Stelbovics
State-selective differential cross sections for double-electron capture in 0.25–0.75-MeV He^{2+}-He collisions 312
R. Dörner, V. Mergel, L. Spielberger, O. Jagutzki, J. Ullrich, and H. Schmidt-Böcking
Time-dependent close-coupling calculations of correlated photoionization processes in helium 318
M. S. Pindzola and F. Robicheaux
Electron-impact double ionization of magnesium 325
M. J. Ford, B. El-Marji, J. P. Doering, J. H. Moore, M. A. Coplan, and J. W. Cooper
Absolute differential and integral cross sections for charge transfer of keV O^+ with N_2 331
B. G. Lindsay, R. L. Merrill, H. C. Straub, K. A. Smith, and R. F. Stebbings

(Continued)

PHYSICAL REVIEW A THIRD SERIES, VOLUME 57, NUMBER 1 JANUARY 1998

Electron, atom, and molecule interactions with solids and surfaces

Extended classical over-barrier model for collisions of highly charged ions with conducting and insulating surfaces 338
Jens J. Ducrée, Fulvio Casali, and Uwe Thumm
Formation of negative ions in grazing scattering from insulator surfaces 351
C. Auth, A. Mertens, H. Winter, A. G. Borisov, and V. Sidis
Self-energy and stopping power of large energetic clusters in solids: Implications to Coulomb explosion 362
Z. L. Mišković, W.-K. Liu, and You-Nian Wang

Clusters (including fullerenes)

Explosion of atomic clusters heated by high-intensity femtosecond laser pulses 369
T. Ditmire, E. Springate, J. W. G. Tisch, Y. L. Shao, M. B. Mason, N. Hay, J. P. Marangos, and M. H. R. Hutchinson
Strong long-range forces between C_{60} and Na atoms and microclusters 383
Vitaly V. Kresin, V. Kasperovich, G. Tikhonov, and K. Wong

Atomic and molecular processes in electromagnetic fields

Motional wave-packet splitting and ion-trap interferometry 388
Heping Zeng
Generalized multiphoton-ionization cross sections of the rare gases for 500-fs, 248.6-nm pulses 392
C. J. G. J. Uiterwaal, D. Xenakis, D. Charalambidis, P. Maragakis, H. Schröder, and P. Lambropoulos
Atom cooling in one dimension with high-intensity laser light 401
M. R. Williams, M. J. Bellanca, L. Liu, C. Xie, W. F. Buell, T. H. Bergeman, and H. J. Metcalf
Double poles of the *S* matrix in laser-assisted electron-atom scattering 412
N. J. Kylstra and C. J. Joachain
Fabry-Pérot-like transmission spectrum of an atom through a two-Gaussian laser arrangement 432
Luis Santos and Luis Roso
Measurement of the Stark shift of the Cs hyperfine splitting in an atomic fountain 436
E. Simon, P. Laurent, and A. Clairon
Decay of oriented Rydberg wave packets excited with far-infrared radiation 440
G. M. Lankhuijzen, M. Drabbels, F. Robicheaux, and L. D. Noordam
Measurement of electronic radial probability distributions using time-resolved isolated core excitation 446
R. R. Jones
Time-dependent density-functional theory for strong-field multiphoton processes: Application to the study of the role of dynamical electron correlation in multiple high-order harmonic generation 452
Xiao-Min Tong and Shih-I Chu
Suppression of incoherent ionization in population transfer via continuum 462
R. G. Unanyan, N. V. Vitanov, and S. Stenholm
Three-dimensional relativistic calculation of strong-field photoionization by the phase-space-averaging method . . . 467
H. Schmitz, K. Boucke, and H.-J. Kull
Subharmonic resonances in the strong-field dissociation of homonuclear molecular ions 476
Peter Dietrich

Matter waves

Collective excitations of trapped binary mixtures of Bose-Einstein condensed gases 484
Robert Graham and Dan Walls
Strong-field driving of a dilute atomic Bose-Einstein condensate 488
Mirosław Brewczyk, Kazimierz Rzążewski, and Charles W. Clark

(Continued)

PHYSICAL REVIEW A THIRD SERIES, VOLUME 57, NUMBER 1 JANUARY 1998

Phase preparation by atom counting of Bose-Einstein condensates in mixed states 493
R. Graham, T. Wong, M. J. Collett, S. M. Tan, and D. F. Walls
Collapses and revivals of collective excitations in trapped Bose condensates 503
R. Graham, D. F. Walls, M. J. Collett, M. Fliesser, and E. M. Wright
Macroscopic superpositions of Bose-Einstein condensates 511
Janne Ruostekoski, M. J. Collett, Robert Graham, and Dan F. Walls
Sound propagation in a cylindrical Bose-condensed gas 518
E. Zaremba

Quantum optics, physics of lasers, nonlinear optics

Solitary attractors and low-order filamentation in anisotropic self-focusing media 522
A. A. Zozulya, D. Z. Anderson, A. V. Mamaev, and M. Saffman
Controlling instability and squeezing from a cascaded frequency doubler 535
K. V. Kheruntsyan, G. Yu. Kryuchkyan, N. T. Mouradyan, and K. G. Petrosyan
Mimicking a squeezed-bath interaction: Quantum-reservoir engineering with atoms 548
N. Lütkenhaus, J. I. Cirac, and P. Zoller
Dependence of transient dynamics in a class-C laser upon variation of inversion with time 559
J. T. Malos, D. Y. Tang, and N. R. Heckenberg
What we can learn about single photons in a two-photon interference experiment 567
D. V. Strekalov, T. B. Pittman, and Y. H. Shih
Threshold characteristics and intensity fluctuations of lasers with excess quantum noise 571
M. A. van Eijkelenborg, M. P. van Exter, and J. P. Woerdman
Role of symmetries in the transition to turbulence in optics 580
Jorge Farjas, Daniel Hennequin, Didier Dangoisse, and Pierre Glorieux
Anomalous resonance fluorescence and dressed-state inversion by squeezed light in a Fabry-Pérot microcavity . . . 585
W. S. Smyth, S. Swain, Z. Ficek, and M. Scott
Moving spatial solitons in active nonlinear-optical resonators 599
K. Staliunas, V. B. Taranenko, G. Slekys, R. Viselga, and C. O. Weiss
Pure states in a one-atom micromaser 605
N. Nayak
Few-cycle pulses in two-level media 609
Lee W. Casperson
Quantum theory of optical-pulse propagation through an amplifying slab 622
Maurizio Artoni and Rodney Loudon
Theoretical analysis of a bimode laser 629
V. Zehnlé
Radiative transitions of atomic systems in bubbles and sonoluminescence 644
R. Jáuregui, R. Esquivel-Sirvent, and C. Villarreal
Superposition-preserving photon-number amplifier 650
Gunnar Björk, Jonas Söderholm, and Anders Karlsson

BRIEF REPORTS

Fundamental concepts

Generalized probability for Hardy's nonlocality contradiction 659
José L. Cereceda

(Continued)

PHYSICAL REVIEW A **THIRD SERIES, VOLUME 57, NUMBER 1** **JANUARY 1998**

Atomic and molecular processes in electromagnetic fields

High-order multiphoton ionization at metal surfaces by laser fields of moderate power 663
S. Varró and F. Ehlotzky

Quantum optics, physics of lasers, nonlinear optics

Microcavity-induced modification of the dipole-dipole interaction 667
Girish S. Agarwal and S. Dutta Gupta

Quantum optics, physics of lasers, nonlinear optics

State reconstruction for a collection of two-level systems 671
G. S. Agarwal

ERRATA

Erratum: Defining the (atom) laser [Phys. Rev. A **56**, 2068 (1997)] 674
H. M. Wiseman

Cumulative Author Index 675
