THIRD SERIES, VOLUME 57, NUMBER 2

CONTENTS

FEBRUARY 1998

RAPID COMMUNICATIONS

Atomic and molecular structure and dynamics

- Uncoupling correlated calculations in atomic physics: Very high accuracy and ease R677
S. P. Goldman
- Microscopic lens effect in photoelectron imaging spectroscopy R681
C. Bordas and J. C. Pinaré
- Relativistic effects on the H^- resonances converging to the $H(n=2)$ threshold R685
E. Lindroth, A. Bùrgers, and N. Brandefelt
- Estimated valence-level Lamb shifts for group 1 and group 11 metal atoms R689
Pekka Pyykkö, Maria Tokman, and L. N. Labzowsky

Atomic and molecular collisions and interactions

- Mechanisms of double ionization of atoms by electron impact R693
C. Dal Cappello, R. El Mkhanter, and P. A. Hervieux

Clusters (including fullerenes)

- Dissociative electron attachment to NO molecules and NO clusters R697
Yannan Chu, Gilbert Senn, Paul Scheier, Alexander Stamatovic, Tilmann D. Märk, Frank Brüning,
Stefan Matejcek, and Eugen Illenberger

Atomic and molecular processes in external fields

- Intensity-resolved multiphoton ionization: Circumventing spatial averaging R701
M. A. Walker, P. Hansch, and L. D. Van Woerkom
- Enhanced laser cooling and state preparation in an optical lattice with a magnetic field R705
D. L. Haycock, S. E. Hamann, G. Klose, G. Raithel, and P. S. Jessen
- Eight- and nine-photon resonances in multiphoton ionization of xenon R709
P. Hansch, M. A. Walker, and L. D. Van Woerkom

Matter waves

- Measuring the quantum state of cold atoms using momentum-shearing interferometry R713
Ian A. Walmsley and Nicholas P. Bigelow

ARTICLES

Fundamental concepts

- Similarities between the radial Schrödinger-Coulomb wave function and the radial Dirac-Coulomb wave function
and an application to photoionization of hydrogen 717
Jwei-Jun Chang

(Continued)

1050-2947(199802)57:2;1-U

Casimir interaction between a microscopic dipole oscillator and a macroscopic solenoid	724
R. Blanco, K. Dechoum, H. M. França, and E. Santos	
Phase operator for two-state systems	731
A. Müller	
Reducing decoherence in quantum-computer memory with all quantum bits coupling to the same environment ...	737
Lu-Ming Duan and Guang-Can Guo	
Generalized coherent states are unique Bell states of quantum systems with Lie-group symmetries	742
C. Brif, A. Mann, and M. Revzen	
Global and local dynamical invariants and quasienergy states of time-periodic Hamiltonians	746
D. B. Monteoliva, B. Mirbach, and H. J. Korsch	
Invariant formulation and exact solutions for the relativistic charged Klein-Gordon field in a time-dependent spatially homogeneous electric field	753
Xiao-Chun Gao, Jian Fu, Xin-Hua Li, and Jun Gao	
Probability distribution of arrival times in quantum mechanics	762
V. Delgado	
Role that separatrices and stochastic webs play in quantum dynamics	771
Go. Torres-Vega, Klaus B. Møller, and A. Zúñiga-Segundo	
Anti-Zeno effect in parametric down-conversion	781
A. Luis and L. L. Sánchez-Soto	
Level-density fluctuations at the bottom of a potential	788
M. Brack, S. C. Creagh, and J. Law	
Quantum dissipation and decay in a medium	798
I. Joichi, Sh. Matsumoto, and M. Yoshimura	
Divergence property of Fourier and Ritz expansions	806
Marco A. Núñez and Eduardo Piña	
Classical and nonclassical interference	815
Krzysztof Wódkiewicz and G. H. Herling	
Quantum information	
Multiparticle generalization of entanglement swapping	822
S. Bose, V. Vedral, and P. L. Knight	
Quantum-channel capacity of very noisy channels	830
David P. DiVincenzo, Peter W. Shor, and John A. Smolin	
Bounds on decoherence and error	840
L. S. Schulman	
Atomic and molecular structure and dynamics	
K-shell excitation studied for H- and He-like bismuth ions in collisions with low-Z target atoms	845
Th. Stöhlker, D. C. Ionescu, P. Rymuza, F. Bosch, H. Geissel, C. Kozhuharov, T. Ludziejewski, P. H. Mokler, C. Scheidenberger, Z. Stachura, A. Warczak, and R. W. Dunford	
Relativistic density-functional theory with the optimized effective potential and self-interaction correction: Application to atomic structure calculations ($Z=2-106$)	855
Xiao-Min Tong and Shih-I Chu	
Assigning x-ray absorption spectra by means of soft-x-ray emission spectroscopy	864
K. Gunnelin, P. Glans, P. Skytt, J.-H. Guo, J. Nordgren, and H. Ågren	
X-ray-absorption features from multielectron excitations above Xe <i>L</i> edges	873
Yoshiaki Ito, Aurel M. Vlaicu, Tatsunori Tochio, Takeshi Mukoyama, Masao Takahashi, Shuichi Emura, and Yoshiro Azuma	

Nuclear magnetization distribution radii determined by hyperfine transitions in the 1s level of H-like ions $^{185}\text{Re}^{74+}$ and $^{187}\text{Re}^{74+}$	879
J. R. Crespo López-Urrutia, P. Beiersdorfer, K. Widmann, B. B. Birkett, A.-M. Mårtensson-Pendrill, and M. G. H. Gustavsson	
Polarization-dependent spectra of x-ray dielectronic satellite lines of Be-like Fe	888
A. S. Shlyaptseva, R. C. Mancini, P. Neill, P. Beiersdorfer, J. R. Crespo López-Urrutia, and K. Widmann	
Effect of exchange-correlation functionals and symmetry constraints of electronic structure on the trajectories of reactive molecular collisions	899
R. W. Warren and B. I. Dunlap	
Full three-body primitive semiclassical treatment of H_2^+	906
Karl Sohlberg, Robert E. Tuzun, Bobby G. Sumpter, and Donald W. Noid	
Electron affinity in density-functional theory in the local-spin-density approximation	914
Alessio Filippetti	
<i>Ab initio</i> Dirac-Hartree-Fock calculations of chemical properties and <i>PT</i> -odd effects in thallium fluoride	920
Harry M. Quiney, Jon K. Laerdahl, Knut Fægri, Jr., and Trond Saue	
Absolute wavelength measurement of the Lyman- α transitions of hydrogenic Mg^{11+}	945
G. Hölzer, E. Förster, D. Klöpfel, P. Beiersdorfer, G. V. Brown, J. R. Crespo López-Urrutia, and K. Widmann	
Line shapes and decay dynamics of dissociative resonances above the second dissociation limit of molecular hydrogen	949
C. H. Cheng, J. T. Kim, E. E. Eyler, and N. Melikechi	
Atomic and molecular collisions and interactions	
Associative ionization between two laser-excited sodium atoms: Theory compared to experiment	958
Boichanh Huynh, Olivier Dulieu, and Françoise Masnou-Seeuws	
Semiclassical treatment of electron-molecule scattering within the vibron model	976
M. S. Hussein and M. P. Pato	
Differential cross sections for target excitation and positronium formation in positron-helium scattering	984
Puspitapallab Chaudhuri and Sadhan K. Adhikari	
Multiple ionization of atoms and molecules in collisions with fast ions. II. Ion-molecule collisions	990
N. M. Kabachnik, V. N. Kondratyev, Z. Roller-Lutz, and H. O. Lutz	
Polarization effect on He doubly excited states below the $N=2$ threshold of He^+	997
Jun Yan, Yi-Zhi Qu, Lan Voky, and Jia-Ming Li	
Resonant dissociative photoionization of H_2 and D_2	1006
I. Sánchez and F. Martín	
Separable wave equation for three Coulomb interacting particles	1018
F. D. Colavecchia, G. Gasaneo, and C. R. Garibotti	
Non-Franck-Condon electron-impact dissociative-excitation cross sections of molecular hydrogen producing $\text{H}(1s) + \text{H}(2l)$ through $X\ ^1\Sigma_g^+(v=0) \rightarrow \{B\ ^1\Sigma_u^+, B'\ ^1\Sigma_u^+, C\ ^1\Pi_u\}$	1025
Itamar Borges, Jr., Ginette Jalbert, and Carlos Eduardo Bielschowsky	
Relativistic dielectronic recombination process: Electron and H-like ions	1033
Yi-Zhi Qu, Jian-Guo Wang, Jian-Kui Yuan, and Jia-Ming Li	
Time-dependent close-coupling calculations of positronium formation in positron-hydrogen collisions	1038
D. R. Plante and M. S. Pindzola	
Inner-shell photoionization of ground-state lithium: Theoretical calculation in the photon energy region below 130 eV including $1snln'l'$ Rydberg resonances series	1045
L. Vo Ky, P. Faucher, A. Hibbert, J.-M. Li, Y.-Z. Qu, J. Yan, J. C. Chang, and F. Bely-Dubau	
Detailed experimental and theoretical study of collision-induced dissociation of Na_2^+ ions on He and H_2 targets at keV energies	1058
J. A. Fayeton, M. Barat, J. C. Brenot, H. Dunet, Y. J. Picard, U. Saalman, and R. Schmidt	

Electron scattering by CH ₄ molecules at intermediate energies (400–5000 eV)	1069
G. García and F. Manero	
Photo-double-ionization of He: Fully differential and absolute electronic and ionic momentum distributions	1074
R. Dörner, H. Bräuning, J. M. Feagin, V. Mergel, O. Jagutzki, L. Spielberger, T. Vogt, H. Khemliche, M. H. Prior, J. Ullrich, C. L. Cocke, and H. Schmidt-Böcking	
Extension of the Temkin-Poet model to $L > 0$ partial waves: The generalized exchange approximation	1091
A. Temkin, J. Shertzer, and A. K. Bhatia	

Electron, atom, and molecule interactions with solids and surfaces

Inelastic energy loss in low-energy Ne ⁺ scattering from a Si surface	1096
F. Xu, G. Manicò, F. Ascione, A. Bonanno, A. Oliva, and R. A. Baragiola	
Unified treatment of some Casimir energies and Lamb shifts: A dielectric between two ideal conductors	1108
Martin Schaden, Larry Spruch, and Fei Zhou	
Resonant coherent excitation of surface channeled ions	1121
K. Kimura and M. Mannami	
Auger and radiative filling rates of highly charged ions below metal surfaces	1126
R. Díez Muiño, A. Salin, N. Stolterfoht, A. Arnau, and P. M. Echenique	

Atomic and molecular processes in external fields

Magneto-optical trapping of Fermionic potassium atoms	1136
F. S. Cataliotti, E. A. Cornell, C. Fort, M. Inguscio, F. Marin, M. Prevedelli, L. Ricci, and G. M. Tino	
Dynamical effects of the dipole-dipole interaction in three-dimensional optical lattices	1139
A. M. Guzmán and P. Meystre	
Hydrogen atom in combined electric and magnetic fields with arbitrary mutual orientations	1149
Jörg Main, Michael Schwacke, and Günter Wunner	
Coherent population transfer via a resonant intermediate state: The breakdown of adiabatic passage	1158
Mark N. Kobrak and Stuart A. Rice	
Non-Hermitian multichannel theory of ultracold collisions modified by intense light fields tuned to the red of the trapping transition	1164
R. Napolitano	
Electron-nuclear dynamics of multiphoton H ₂ ⁺ dissociative ionization in intense laser fields	1176
S. Chelkowski, C. Foisy, and A. D. Bandrauk	
Wave-packet propagation in diamagnetic Rydberg atoms	1186
W. Schweizer and W. Jans	

Matter waves

Excited states of a dilute Bose-Einstein condensate in a harmonic trap	1191
Alexander L. Fetter and Daniel Rokhsar	
Effects of motional states of a trapped atom on its interaction with nonresonant light	1202
Markus Cirone, Kazimierz Rzążewski, and Jan Mostowski	
Quantum superposition states of Bose-Einstein condensates	1208
J. I. Cirac, M. Lewenstein, K. Mølmer, and P. Zoller	
Nonreciprocal optical patterns due to symmetry breaking	1219
Yu. A. Logvin	
Dressed Bose-Einstein condensates in high-Q cavities	1223
Elena V. Goldstein, Ewan M. Wright, and P. Meystre	

Microscopic treatment of binary interactions in the nonequilibrium dynamics of partially Bose-condensed trapped gases	1230
N. P. Proukakis, K. Burnett, and H. T. C. Stoof	
Gravitational and collective effects in an output coupler for a Bose-Einstein condensate in an atomic trap	1248
Weiping Zhang and D. F. Walls	
Mesoscopic Fermi gas in a harmonic trap	1253
J. Schneider and H. Wallis	
Classical underpinnings of gravitationally induced quantum interference	1260
Philip D. Mannheim	
Low-lying excitations of double Bose-Einstein condensates	1265
B. D. Esry and Chris H. Greene	
Hartree-Fock treatment of the two-component Bose-Einstein condensate	1272
Patrik Öhberg and Stig Stenholm	
Excitations of a Bose-condensed gas in anisotropic traps	1280
D. A. W. Hutchinson and E. Zaremba	
 Quantum optics, physics of lasers, nonlinear optics	
Feedback control of laser intensity noise	1286
Ben C. Buchler, Elanor H. Huntington, Charles C. Harb, and Timothy C. Ralph	
Quantum trajectory simulations of the fluorescence intensity from a two-level atom driven by a multichromatic field	1295
S. F. Chien, M. R. B. Wahiddin, and Z. Ficek	
Simple analytical approximations for the gain and refractive index spectra in quantum-well lasers	1304
Salvador Balle	
Stability and dynamical properties of the coexisting attractors of an external-cavity semiconductor laser	1313
C. Masoller and N. B. Abraham	
Experimental observation of a coherently induced transparency on a blue probe in a Doppler-broadened mismatched V-type system	1323
J. R. Boon, E. Zekou, D. J. Fulton, and M. H. Dunn	
Time-resolved quantum measurements using active detectors	1329
Ole Steuernagel and Herschel Rabitz	
Collapse and revival of ultracold atoms in a microwave cavity and of photons in parametric down-conversion . . .	1333
Karl-Peter Marzlin and Jürgen Audretsch	
Electromagnetically induced grating: Homogeneously broadened medium	1338
Hong Yuan Ling, Yong-Qing Li, and Min Xiao	
Classical versus quantum harmonic-generation spectrum of a driven anharmonic oscillator in the high-frequency regime	1345
Vitali Averbukh and Nimrod Moiseyev	
Autler-Townes effect with mono- and bichromatic pump fields: Reservoir effects and Floquet-state treatment . . .	1355
M. Jakob and G. Yu. Kryuchkyan	
Control of quantized photon states with external dc bias in semiconductor superlattices	1367
Tsuyoshi Fukuo, Tetsuo Ogawa, and Katsuhiro Nakamura	
Quantum-state reconstruction in the one-atom maser	1371
C. T. Bodendorf, G. Antesberger, M. S. Kim, and H. Walther	
Quantum radiation in a plane cavity with moving mirrors	1379
D. F. Mundarain and P. A. Maia Neto	
Theoretical investigation of an ultrashort-pulse coherent x-ray source at 45 Å	1391
S. J. Moon and D. C. Eder	
Designs for a compact Ni-like-tungsten x-ray laser	1395
Chris D. Decker and Richard A. London	

Stochastic dynamics of a single impurity molecule from the viewpoint of continuous measurement theory	1400
S. Ya. Kilin, T. M. Maevskaya, A. P. Nizovtsev, V. N. Shatokhin, P. R. Berman, C. von Borczyskowski, J. Wrachtrup, and L. Fleury	
Exponential gain in resonant four-wave mixing via dressed inversions	1412
C. H. Keitel	
Coherent Raman scattering with incoherent light for a multiply resonant mixture: Theory	1417
Jason C. Kirkwood, Darin J. Ulness, Michael J. Stimson, and A. C. Albrecht	
Precision measurement of phase-dependent resonance fluorescence spectra	1427
H. Z. Zhao, Z. H. Lu, A. M. Bacon, L. J. Wang, and J. E. Thomas	

BRIEF REPORTS

Atomic and molecular collisions and interactions

He ⁰ +N ₂ collisions at 1.0 keV	1448
E. J. Quintana and E. Pollack	

Quantum optics, physics of lasers, nonlinear optics

Quantum phase distribution of thermal phase-squeezed states	1451
Ziad H. Musslimani and Y. Ben-Aryeh	
Spatial-localized structures in degenerate optical parametric oscillators	1454
K. Staliunas and Víctor J. Sánchez-Morcillo	
Photon correlations in the spectrum of a superradiant system in a strong cavity field	1458
H. M. Castro-Beltran, S. M. Chumakov, and J. J. Sanchez-Mondragon	

COMMENTS

Comment on “Corrections to $O(\alpha^7(\ln\alpha)mc^2)$ fine-structure splittings and $O(\alpha^6(\ln\alpha)mc^2)$ energy levels in helium”	1462
I. B. Khriplovich, A. I. Milstein, and A. S. Yelkhovsky	

ERRATA

Erratum: Bose-Einstein condensation in a trap: The case of a dense condensate [Phys. Rev. A 56 , 1438 (1997)] . .	1464
Klaus Ziegler and Alok Shukla	

Cumulative Author Index	1465
