Announcement i

RAPID COMMUNICATIONS

Fundamental concepts

Enhancement of parity and time invariance violation in the radium atom R2611
V. V. Flambaum

Irrelevance of photon events distinguishability in a class of Bell experiments R2614
Marek Żukowski, Dagomir Kaszlikowski, and Emilio Santos

Quantum eraser and the decoherence time of a measurement process R2618
Y. Abranyos, M. Jakob, and J. Bergou

Quantum information

Quantum cryptography using femtosecond-pulsed parametric down-conversion R2622
A. V. Sergienko, M. Atatüre, Z. Walton, G. Jaeger, B. E. A. Saleh, and M. C. Teich

Optimal manipulations with qubits: Universal-NOT gate R2626
V. Bužek, M. Hillery, and R. F. Werner

Atomic and molecular structure and dynamics

Dipole polarizability of the hydrogen molecular ion R2630
J. M. Taylor, A. Dalgarno, and J. F. Babb

Atomic and molecular collisions and interactions

Statistics of photodissociation spectra: Nonuniversal properties R2633
Oded Agam

Isotope shift in the oxygen electron affinity R2637
Michel R. Godefroid and Charlotte Froese Fischer

Validity of the independent-particle approximation in x-ray photoemission: The exception, not the rule R2641
D. L. Hansen, O. Hemmers, H. Wang, D. W. Lindle, P. Focke, I. A. Sellin, C. Heske, H. S. Chakraborty, P. C. Deshmukh, and S. T. Manson

Clusters (including fullerenes)

Doubly charged negative silicon-carbon clusters produced in sputtering R2645
Hubert Gnaser

Copyright 1999 by The American Physical Society

1050-2947(199910)60:4;1-Y

PHYSICAL REVIEW A THIRD SERIES, VOLUME 60, NUMBER 4 OCTOBER 1999

Atomic and molecular processes in external fields

Effects of core scattering on level statistics in helium atoms in scaled external fields R2649
K. Karremans, A. Kips, W. Vassen, and W. Hogervorst
Mean-field approach to dipole-dipole interaction in an optical lattice R2653
C. Menotti and H. Ritsch
Polarization-dependent Rabi frequency beats in the coherent response of Tm^{3+} in YAG R2657
C. Greiner, B. Boggs, T. Loftus, T. Wang, and T. W. Mossberg

Matter waves

Quantum dynamics of evaporatively cooled Bose-Einstein condensates R2661
P. D. Drummond and J. F. Corney
Stability of standing matter waves in a trap R2665
A. E. Muryshev, H. B. van Linden van den Heuvell, and G. V. Shlyapnikov
Wave-function monopoles in Bose-Einstein condensates R2669
Th. Busch and J. R. Anglin

Quantum optics, physics of lasers, nonlinear optics

Quantum analysis of the photonic blockade mechanism R2673
Klaus M. Gheri, Wieland Alge, and Philippe Grangier
Lasing on the self-photopumped nickel-like $4f\,^1P_1 \rightarrow 4d\,^1P_1$ x-ray transition R2677
Joseph Nilsen, James Dunn, Albert L. Osterheld, and Yuelin Li
Elimination of the band gap of a resonant optical material by electromagnetically induced transparency R2681
G. S. Agarwal and Robert W. Boyd

ARTICLES

Fundamental concepts

Experimental study of a subsystem in an entangled two-photon state 2685
Dmitry V. Strekalov, Yoon-Ho Kim, and Yanhua Shih
Operational time of arrival in quantum phase space 2689
Piotr Kochański and Krzysztof Wódkiewicz
Feedback control of quantum systems using continuous state estimation 2700
A. C. Doherty and K. Jacobs
Enhanced diffusion and the continuous spontaneous localization model 2712
L. F. Santos and C. O. Escobar
Heterodyne measurement of vibrational wave packets of diatomic molecules 2716
A. Zucchetti, W. Vogel, D.-G. Welsch, and I. A. Walmsley
Quantum correlations violate Einstein-Podolsky-Rosen assumptions 2726
Thomas F. Jordan
Hypersurface Bohm-Dirac models 2729
Detlef Dürr, Sheldon Goldstein, Karin Münch-Berndl, and Nino Zanghì

Quantum information

Multiparty quantum communication complexity 2737
Harry Buhrman, Wim van Dam, Peter Høyer, and Alain Tapp
Grover's quantum search algorithm for an arbitrary initial amplitude distribution 2742
Eli Biham, Ofer Biham, David Biron, Markus Grassl, and Daniel A. Lidar

(Continued)

PHYSICAL REVIEW A THIRD SERIES, VOLUME 60, NUMBER 4 OCTOBER 1999

Grover's quantum searching algorithm is optimal 2746
Christof Zalka
Confirming entanglement in continuous variable quantum teleportation 2752
Sze M. Tan
Teleportation of a zero- and one-photon running-wave state by projection synthesis 2759
C. J. Villas-Bôas, N. G. de Almeida, and M. H. Y. Moussa
Two-qubit copying machine for economical quantum eavesdropping 2764
Chi-Sheng Niu and Robert B. Griffiths
Generalized methods for the development of quantum logic gates for an NMR quantum information processor ... 2777
Mark D. Price, Shyamal S. Somaroo, Amy E. Dunlop, Timothy F. Havel, and David G. Cory

Atomic and molecular structure and dynamics

Electric-dipole amplitudes, lifetimes, and polarizabilities of the low-lying levels of atomic ytterbium 2781
S. G. Porsev, Yu. G. Rakhlina, and M. G. Kozlov
Generalized Franck-Condon principle for resonant photoemission 2786
Paweł Sałek, Faris Gel'mukhanov, Hans Ågren, Olle Björneholm, and Svante Svensson
Higher-order recoil corrections to energy levels of two-body systems 2792
Krzysztof Pachucki and Savely G. Karshenboim
Collision spectroscopy of $Ar^{8+}+H_2$ at low velocities ($v<1$ a.u.) 2799
S. Bliman, M. Cornille, B. A. Huber, H. Lebius, A. Langereis, J. Nordgren, and R. Bruch
Relativistic multireference many-body perturbation theory for quasidegenerate systems: Energy levels of ions of the oxygen isoelectronic sequence 2808
Marius J. Vilkas, Yasuyuki Ishikawa, and Konrad Koc
Relativistic coupled-cluster static dipole polarizabilities of the alkali metals from Li to element 119 2822
Ivan S. Lim, Markus Pernpointner, Michael Seth, Jon K. Laerdahl, Peter Schwerdtfeger, Pavel Neogrady, and Miroslav Urban
Measurement of the infrared $^2F_{7/2}$-$^2D_{5/2}$ transition in a single $^{171}Yb^+$ ion 2829
P. Taylor, M. Roberts, G. M. Macfarlane, G. P. Barwood, W. R. C. Rowley, and P. Gill
Bound-state properties of the positronium negative ion Ps^- 2834
Alexei M. Frolov
Optimization of Gaussian basis sets for density-functional calculations 2840
Dirk Porezag and Mark R. Pederson
Energy levels of triply ionized carbon (C IV): Polarization method 2848
A. K. Bhatia and Richard J. Drachman
Field dependence of the energy of a molecule in a magnetic field 2853
A. Holas and N. H. March
Measurement of the $^2S_{1/2}$-$^2D_{5/2}$ clock transition in a single $^{171}Yb^+$ ion 2867
M. Roberts, P. Taylor, S. V. Gateva-Kostova, R. B. M. Clarke, W. R. C. Rowley, and P. Gill

Atomic and molecular collisions and interactions

Associative detachment, dissociative attachment, and vibrational excitation of HCl by low-energy electrons 2873
M. Čížek, J. Horáček, and W. Domcke
Electron collisions with diatomic anions 2882
H. B. Pedersen, N. Djurić, M. J. Jensen, D. Kella, C. P. Safvan, H. T. Schmidt, L. Vejby-Christensen, and L. H. Andersen
Spherical many-center scattering systems 2900
Yuri F. Migal

(Continued)

PHYSICAL REVIEW A THIRD SERIES, VOLUME 60, NUMBER 4 OCTOBER 1999

State-selective electron capture in (0.5–50)-keV/u C^{5+}-He collisions studied by cold-target recoil-ion momentum spectroscopy 2907
E. Y. Kamber, M. A. Abdallah, C. L. Cocke, and M. Stöckli

Experimental study of single- and double-electron transfer in slow Ne^{8+}+He collisions using photon and electron spectroscopy 2917
A. Langereis, J. Nordgren, S. Bliman, M. Cornille, R. Bruch, R. A. Phaneuf, and D. Schneider

Rotational relaxation matrix for fast non-Markovian collisions 2931
Alexandre P. Kouzov

Double ionization of noble gases by positron impact 2940
J. Moxom, D. M. Schrader, G. Laricchia, Jun Xu, and L. D. Hulett

Initial- and final-state alignment and orientation effects in Ca energy pooling 2944
Harold V. Parks and Stephen R. Leone

Projectile Z dependence of Cu K-shell vacancy production in 10-MeV/amu ion-solid collisions 2959
R. L. Watson, J. M. Blackadar, and V. Horvat

Dissociative recombination and excitation of H_2O^+ and HDO^+ 2970
M. J. Jensen, R. C. Bilodeau, O. Heber, H. B. Pedersen, C. P. Safvan, X. Urbain, D. Zajfman, and L. H. Andersen

Experimental and theoretical determination of the triple differential cross section for Kr($4p$) electron-impact ionization 2977
S. J. Cavanagh, Birgit Lohmann, J. Rasch, Colm T. Whelan, and H. R. J. Walters

Dynamical Green's function and an exact optical potential for electron-molecule scattering including nuclear dynamics 2983
Joachim Brand, Lorenz S. Cederbaum, and Hans-Dieter Meyer

Gross ionization cross sections for rare-gas atoms and simple molecules in 6-MeV/amu fully stripped–ion impact 3000
T. Matsuo, T. Kohno, S. Makino, M. Mizutani, T. Tonuma, A. Kitagawa, T. Murakami, and H. Tawara

Multiplet effects on the shape of the $3p$ photoelectron spectrum of atomic Ni 3008
K. Tiedtke, Ch. Gerth, B. Kanngießer, B. Obst, P. Zimmermann, M. Martins, and A. Tutay

Fivefold differential cross section of fast (e,$2e$) ionization of H_2, D_2, and T_2 by a Franck-Condon approach 3013
P. Weck, B. Joulakian, and P. A. Hervieux

Contribution of bound-electron pair production to the dispersion relation for Delbrück scattering 3020
J. P. J. Carney and R. H. Pratt

State-selective electron capture by multicharged ions of carbon, nitrogen, and oxygen from ground-state atomic hydrogen 3025
M. Purkait, M. Das, and C. R. Mandal

Photon, electron, atom, and molecule interactions with solids and surfaces

Neutralization of hyperthermal multiply charged ions at surfaces: Comparison between the extended dynamical overbarrier model and experiment 3029
J. Ducrée, H. J. Andrä, and U. Thumm

Stopping power in the independent-particle model: Harmonic oscillator results 3044
R. Cabrera-Trujillo

Clusters (including fullerenes)

Monte Carlo computer simulation of copper clusters 3053
Şakir Erkoç and Riad Shaltaf

Many low-lying isomers of the cationic and neutral niobium trimer and tetramer 3058
Joseph E. Fowler, América García, and Jesus M. Ugalde

(Continued)

PHYSICAL REVIEW A THIRD SERIES, VOLUME 60, NUMBER 4 OCTOBER 1999

Polarization forces in collisions between low-energy electrons and sodium clusters 3071
V. Kasperovich, G. Tikhonov, K. Wong, P. Brockhaus, and V. V. Kresin
Measurements of ion energies from the explosion of large hydrogen iodide clusters irradiated by intense femtosecond laser pulses 3076
J. W. G. Tisch, N. Hay, E. Springate, E. T. Gumbrell, M. H. R. Hutchinson, and J. P. Marangos

Atomic and molecular processes in external fields

Optimal pulse sequences for population transfer in multilevel systems 3081
Ignacio R. Solá, Vladimir S. Malinovsky, and David J. Tannor
Field-dependent relaxation effects in a three-level system driven by a strong coherent field 3091
Olga Kocharovskaya, Y. V. Radeonychev, Paul Mandel, and M. O. Scully
Quantum theory of high harmonic generation as a three-step process 3111
M. Yu. Kuchiev and V. N. Ostrovsky
Numerical solution of time-dependent Schrödinger equation for multiphoton processes: A matrix iterative method 3125
M. Nurhuda and F. H. M. Faisal
Calculations of the helium atom in magnetic fields with *B*-spline-type functions 3134
Haoxue Qiao and Baiwen Li
Spatial deorientation of upper-Stark-state-selected supersonic beams of CH_3F, CH_3Cl, CH_3Br, and CH_3I 3138
Peter W. Harland, Wan-Ping Hu, Claire Vallance, and Philip R. Brooks
Large angular-momentum changing in a short half-cycle pulse interaction with a Rydberg atom 3144
I. Bersons and A. Kulsh
Two-photon laser-cooling mechanism in multilevel interaction schemes 3148
Soo Chang, Taeg Yong Kwon, Ho Seong Lee, and V. G. Minogin
High-order harmonic generation in magnetic and parallel magnetic and electric fields 3160
Dejan B. Milošević and Anthony F. Starace
Quasicontinuum modeling of photoassociation 3174
Matt Mackie and Juha Javanainen

Matter waves

Non-Markovian dynamics in pulsed- and continuous-wave atom lasers 3188
H. P. Breuer, D. Faller, B. Kappler, and F. Petruccione
Cold-cesium-atom spin-polarization interferometry 3197
É. Maréchal, R. Long, J.-L. Bossennec, R. Barbé, J.-C. Keller, and O. Gorceix
Time evolution of the condensed state of interacting bosons with reduced number fluctuation in a leaky box 3204
Akira Shimizu and Jun-ichi Inoue
Dissipative dynamics of a kink state in a Bose-condensed gas 3220
P. O. Fedichev, A. E. Muryshev, and G. V. Shlyapnikov

Quantum optics, physics of lasers, nonlinear optics

Quantum interference effects induced by interacting dark resonances 3225
M. D. Lukin, S. F. Yelin, M. Fleischhauer, and M. O. Scully
Quantum interference and atom-atom entanglement in a two-mode, two-cavity micromaser 3229
Metod Škarja, Norma Mankoč Borštnik, Markus Löffler, and Herbert Walther
High-order harmonic generation in relativistic ionization of magnetically dressed atoms 3233
R. E. Wagner, Q. Su, and R. Grobe
Enhanced generation of attosecond pulses in dispersion-controlled hollow-core fiber 3244
Ivan P. Christov

(Continued)

PHYSICAL REVIEW A THIRD SERIES, VOLUME 60, NUMBER 4 OCTOBER 1999

Pattern formation in singly resonant second-harmonic generation with competing parametric oscillation 3251
P. Lodahl and M. Saffman
Chaotic nature of the stored current in an electron storage ring detected by a two-photon correlator for soft-x-ray synchrotron radiation 3262
R. Z. Tai, Y. Takayama, N. Takaya, T. Miyahara, S. Yamamoto, H. Sugiyama, J. Urakawa, H. Hayano, and M. Ando
Photon statistics of a single atom laser 3267
Bobby Jones, Shohini Ghose, James P. Clemens, Perry R. Rice, and Leno M. Pedrotti
Forward and backscattered ultrahigh-intensity Compton spectra in a uniform magnetic field 3276
Y. I. Salamin
Quantum noise and polarization properties of vertical-cavity surface-emitting lasers 3284
Jean-Luc Vey, Christian Degen, Karsten Auen, and Wolfgang Elsäßer

BRIEF REPORTS

Fundamental concepts

Broadcasting of entanglement and universal quantum cloners 3296
Somshubhro Bandyopadhyay and Guruprasad Kar

Atomic and molecular structure and dynamics

Continued-fraction expansion of the Born-Oppenheimer potential-energy function for diatomic molecules 3300
Marcin Molski
Energy differences and magnetic dipole ($M1$) decay rates for the W^{52+} and Bi^{61+} members of the nearly-Z-independent $(3d_{3/2})^3 3d_{5/2}$ $J=3-J=2$ transition 3304
Donald R. Beck
Virtual annihilation contribution to orthopositronium decay rate 3306
Gregory S. Adkins, Kirill Melnikov, and Alexander Yelkhovsky

Atomic and molecular processes in external fields

Pulse-order invariance of the initial-state population in multistate chains driven by delayed laser pulses 3308
N. V. Vitanov
Multiphoton ionization of V, Cr, Y, La, and Ir through 0.5-ps ultraviolet laser pulses 3311
B. Witzel, N. A. Papadogiannis, C. J. G. J. Uiterwaal, H. Schröder, and D. Charalambidis

Matter waves

Instability of the nonvortex state toward a quantized vortex in a Bose-Einstein condensate under external rotation 3313
Tomoya Isoshima and Kazushige Machida
Fate of a Bose-Einstein condensate with an attractive interaction 3317
Masahito Ueda and Kerson Huang

Quantum optics, physics of lasers, nonlinear optics

Velocity selection for ultracold three-level atoms using two micromaser cavities 3321
Zhi-Ming Zhang, Sheng-Wu Xie, Ying-Li Chen, Yu-Xing Xia, and Shi-Kang Zhou

Cumulative Author Index 3324
