This paper was published on 16 October 2016 with an error in the third paragraph in the right-hand column. The paragraph should read “In the second step, the electrons will diffuse with the initial velocity and then experience three possible types of scattering: Electron-electron scattering, electron-hole scattering, and electron-phonon scattering. Here we did not consider the electron-hole recombination in electron transport.” The text has been corrected online as of 27 October 2016.
