PHYSICAL REVIEW B

THIRD SERIES, VOLUME 103, NUMBER 20

MAY 2021-15(II)

|                                                                                                                                                                            |         |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Evidence of interfacial asymmetric spin scattering at ferromagnet-Pt interfaces ( <i>6 pages</i> ) . . . . .                                                               | L201403 |
| Van Tuong Pham, Maxen Cosset-Chéneau, Ariel Brenac, Olivier Boulle, Alain Marty,<br>Jean-Philippe Attané, and Laurent Vila                                                 |         |
| Magnetization-induced optical rectification and inverse spin Hall effect for interfacial terahertz generation<br>in metallic heterostructures ( <i>6 pages</i> ) . . . . . | L201404 |
| Zehan Yao, Huarui Fu, Wanyi Du, Yuanyuan Huang, Zhen Lei, Caiyin You, and Xinlong Xu                                                                                       |         |
| Realization of semiconducting layered multiferroic heterojunctions via asymmetrical magnetoelectric<br>coupling ( <i>6 pages</i> ) . . . . .                               | L201405 |
| Baishun Yang, Bin Shao, Jianfeng Wang, Yang Li, ChiYung Yam, Shengbai Zhang, and Bing Huang                                                                                |         |
| Optically induced topological spin-valley Hall effect for exciton polaritons ( <i>7 pages</i> ) . . . . .                                                                  | L201406 |
| R. Banerjee, S. Mandal, and T. C. H. Liew                                                                                                                                  |         |
| Nonequilibrium phonon tuning and mapping in few-layer graphene with infrared nanoscopy ( <i>6 pages</i> ) . . . . .                                                        | L201407 |
| Jun Qian, Yilong Luan, Minsung Kim, Kai-Ming Ho, Yi Shi, Cai-Zhuang Wang, Yun Li, and Zhe Fei                                                                              |         |
| Impact of screening and relaxation on weakly coupled two-dimensional heterostructures ( <i>6 pages</i> ) . . . . .                                                         | L201408 |
| T. T. Nhung Nguyen, T. Sollfrank, C. Tegenkamp, E. Rauls, and U. Gerstmann                                                                                                 |         |

## ARTICLES

### Electronic structure and strongly correlated systems

|                                                                                                                                                                                            |        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Antiferromagnetic ordering and possible lattice response to dynamic uranium valence in $U_3O_8$ ( <i>12 pages</i> ) . . . . .                                                              | 205101 |
| Andrew Miskowiec, Tyler Spano, Z. E. Brubaker, J. L. Niedziela, D. L. Abernathy,<br>Rodney D. Hunt, and S. Finkeldei                                                                       |        |
| Removal of core hole distortion from ionization edges in electron energy loss spectroscopy ( <i>11 pages</i> ) . . . . .                                                                   | 205102 |
| B. G. Mendis and Q. M. Ramasse                                                                                                                                                             |        |
| Downfolding approaches to electron-ion coupling: Constrained density-functional perturbation theory<br>for molecules ( <i>11 pages</i> ) . . . . .                                         | 205103 |
| Erik G. C. P. van Loon, Jan Berges, and Tim O. Wehling                                                                                                                                     |        |
| Large anomalous Hall effect induced by gapped nodal lines in GdZn and GdCd ( <i>5 pages</i> ) . . . . .                                                                                    | 205104 |
| Ning-Ning Zhao, Kai Liu, and Zhong-Yi Lu                                                                                                                                                   |        |
| Compound-tunable embedding potential method and its application to calcium niobate crystal $CaNb_2O_6$<br>with point defects containing tantalum and uranium ( <i>13 pages</i> ) . . . . . | 205105 |
| D. A. Maltsev, Yu. V. Lomachuk, V. M. Shakhova, N. S. Mosyagin, L. V. Skripnikov, and A. V. Titov                                                                                          |        |
| Quantum tricritical point emerging in the spin-boson model with two dissipative spins<br>in staggered biases ( <i>7 pages</i> ) . . . . .                                                  | 205106 |
| Yan-Zhi Wang, Shu He, Liwei Duan, and Qing-Hu Chen                                                                                                                                         |        |
| Random sampling neural network for quantum many-body problems ( <i>10 pages</i> ) . . . . .                                                                                                | 205107 |
| Chen-Yu Liu and Daw-Wei Wang                                                                                                                                                               |        |
| Excitonic insulator emerging from semiconducting normal state in $1T$ -TiSe <sub>2</sub> ( <i>13 pages</i> ) . . . . .                                                                     | 205108 |
| Jin Mo Bok, Jungseek Hwang, and Han-Yong Choi                                                                                                                                              |        |

### Electronic structure and strongly correlated systems

- Topological Nernst effect, anomalous Nernst effect, and anomalous thermal Hall effect in the Dirac semimetal  $\text{Fe}_3\text{Sn}_2$  (7 pages) ..... L201101  
H. Zhang, C. Q. Xu, and X. Ke
- Koopmans' theorem as the mechanism of nearly gapless surface states in self-doped magnetic topological insulators (7 pages) ..... L201102  
Weizhao Chen, Yufei Zhao, Qiushi Yao, Jing Zhang, and Qihang Liu
- Many-body wavefunctions for quantum impurities out of equilibrium (5 pages) ..... L201103  
Adrian B. Culver and Natan Andrei
- Deformation of a graphene sheet: Interaction of fermions with phonons (5 pages) ..... L201104  
A. Sedrakyan, A. Sinner, and K. Ziegler
- Nonperturbative topological current in Weyl and Dirac semimetals in laser fields (6 pages) ..... L201105  
Renato M. A. Dantas, Zhe Wang, Piotr Surówka, and Takashi Oka
- Pseudogap metal induced by long-range Coulomb interactions (5 pages) ..... L201106  
K. Driscoll, A. Ralko, and S. Fratini
- Quantum thermal transport in the charged Sachdev-Ye-Kitaev model: Thermoelectric Coulomb blockade (7 pages) ..... L201107  
Andrei I. Pavlov and Mikhail N. Kiselev
- Operator growth in a quantum compass model on a Bethe lattice (4 pages) ..... L201108  
X. Zotos
- Evidence of a topological edge state in a superconducting nonsymmorphic nodal-line semimetal (7 pages) ..... L201109  
L. X. Xu, Y. Y. Y. Xia, S. Liu, Y. W. Li, L. Y. Wei, H. Y. Wang, C. W. Wang, H. F. Yang, A. J. Liang, K. Huang, T. Deng, W. Xia, X. Zhang, H. J. Zheng, Y. J. Chen, L. X. Yang, M. X. Wang, Y. F. Guo, G. Li, Z. K. Liu, and Y. L. Chen
- Induced anomalous Hall effect of massive Dirac fermions in  $\text{ZrTe}_5$  and  $\text{HfTe}_5$  thin flakes (6 pages) ..... L201110
