PHYSICAL REVIEW B

THIRD SERIES, VOLUME 53, NUMBER 1

1 JANUARY 1996-I

Equivalence of the antiferromagnetic Heisenberg ladder to a single $S=1$ chain	52
Steven R. White	
Superfluidity and superconductivity	
Near constancy of the pressure dependence of T_c across families of organic and fullerene superconductors	56
Vincent H. Crespi and Marvin L. Cohen	
Continuous Josephson media and vortices	59
J. Zagrozdziński	
Cylindrical Korteweg–de Vries solitons in the vortex dynamics of an ultraclean type-II superconductor	63
Mark W. Coffey	
Resonant macroscopic quantum tunneling in small Josephson junctions: Effect of temperature	67
P. Silvestrini, B. Ruggiero, Yu. N. Ovchinnikov, and A. Barone	
Disorder and superconductivity in Mo/Si multilayers	71
N. Ya. Fogel, E. I. Buchstab, A. S. Pokhila, A. I. Erenburg, and V. Langer	
Stability of multicharged vortices in a model of superflow	75
Igor Aranson and Victor Steinberg	
Influence of the critical current distribution on the remanent magnetization in thin $\text{YBa}_2\text{Cu}_3\text{O}_7$ films	79
E. V. Blinov, R. Laiho, E. Lähderanta, A. G. Lyublinsky, and K. B. Traito	
Magnetization jump and the vortex-lattice melting transition in $\text{YBa}_2\text{Cu}_3\text{O}_y$	82
Terukazu Nishizaki, Yasuaki Onodera, Norio Kobayashi, Hidehito Asaoka, and Humihiko Takei	
Overdoped regime of the high- T_c superconductor $\text{HgBa}_2\text{CuO}_{4+\delta}$ and the relation between normal and superconducting carrier densities	86
R. Puźniak, R. Usami, and H. Yamauchi	
Intrinsic high- T_c Josephson junctions in random-telegraph-noise fluctuators	90
G. Jung, B. Savo, A. Vecchione, M. Bonaldi, and S. Vitale	
Anisotropic pressure dependence of the resistivity in $\text{YBa}_2\text{Cu}_4\text{O}_8$	94
B. Bucher, J. Karpinski, E. Kaldis, and P. Wachter	

ARTICLES

Structure, structural phase transitions, mechanical properties, defects, etc.

Specific-heat critical behavior of the structural random-field system $\text{Dy}(\text{As}_x\text{V}_{1-x})\text{O}_4$	97
Z. Slanić, D. P. Belanger, J. Wang, and D. R. Taylor	
Metastable structures of solid hydrogen	102
G. W. Collins, W. G. Unites, E. R. Mapoles, and T. P. Bernat	
Pressure-induced phase transition of quartz-type GaPO_4	107
Vladimir V. Murashov	
High-pressure Brillouin scattering and elastic properties of liquid and solid methane	111
H. Shimizu, N. Nakashima, and S. Sasaki	
O^- holes associated with alkali acceptors in BaTiO_3	116
T. Varnhorst, O. F. Schirmer, H. Kröse, R. Scharfschwerdt, and Th. W. Kool	
Roughening and preroughening in the six-vertex model with an extended range of interaction	126
Paul J. M. Bastiaansen and Hubert J. F. Knops	
Polarization of a semi-infinite crystal by a point defect at the surface	136
L. N. Kantorovich and A. L. Shluger	
Equilibrium phase transitions in a porous medium	148
T. MacFarland, G. T. Barkema, and J. F. Marko	
Theoretical study of lithium intercalation in rutile and anatase	159
Arvids Stashans, Sten Lunell, Robert Bergström, Anders Hagfeldt, and Sten-Eric Lindquist
