PHYSICAL REVIEW B THIRD SERIES, VOLUME 53, NUMBER 3 15 JANUARY 1996-I

Quantization effects in the conductance of metallic contacts at room temperature 1022
C. J. Muller, J. M. Krans, T. N. Todorov, and M. A. Reed
Plasmons in a spatially modulated quasi-one-dimensional quantum wire 1026
Bernardo S. Mendoza, Marcelo del Castillo-Mussot, and W. Luis Mochán
Interface ordering in Si_m/Ge_n monolayer superlattices: A photoluminescence study 1030
M. Casalboni, N. Pinto, B. Izzi, I. Davoli, M. De Crescenzi, F. De Matteis, P. Prosposito, and R. Pizzoferrato
Tunneling spectroscopy of quantum charge fluctuations in the Coulomb blockade 1034
K. A. Matveev, L. I. Glazman, and H. U. Baranger
Electron effective mass and nonparabolicity in $Ga_{0.47}In_{0.53}As/InP$ quantum wells 1038
C. Wetzel, R. Winkler, M. Drechsler, B. K. Meyer, U. Rössler, J. Scriba, J. P. Kotthaus, V. Härle, and F. Scholz
Observation of conductance quantization of ballistic metallic point contacts at room temperature 1042
Zheng Gai, Yi He, Hongbin Yu, and W. S. Yang
Skyrmion excitations in quantum Hall systems 1046
X. C. Xie and Song He
Time-dependent resonant tunneling via two discrete states 1050
T. H. Stoof and Yu. V. Nazarov
Local far-infrared spectroscopy of edge states in the quantum Hall regime 1054
A. Lorke, J. P. Kotthaus, J. H. English, and A. C. Gossard
Ground-state wave function of the fractional quantum Hall effect 1058
Yu-Liang Liu
Composite-fermion wave functions in higher Landau levels 1061
X. G. Wu and J. K. Jain

Surface physics, low-dimensional systems, and related topics

Pendulating orbits in large metal clusters 1064
G. Lazzari, H. Nishioka, E. Vigezzi, and R. A. Broglia
Impurity-induced modulations in Pd_xNbSe_3 coupled to charge-density-wave formation 1068
Q. Xue, Y. Gong, D. L. Drake, J. Qian, and R. V. Coleman
Effects of electrode interactions observed in a mechanically controllable break junction 1072
J. Voets, R. J. P. Keijsers, O. I. Shklyarevskii, and H. van Kempen
Modifications of the electronic and magnetic properties of ultrathin Ni/Cu(100) films induced by stepwise oxidation 1076
F. May, M. Tischer, D. Arvanitis, M. Russo, J. Hunter Dunn, H. Henneken, H. Wende, R. Chauvistré, N. Mårtensson, and K. Baberschke
Structural study of the Si(100)2×2-In surface 1080
Hiroshi Sakama, Ken-ichi Murakami, Kazuaki Nishikata, and Akira Kawazu
Spin-reorientation transition in ultrathin Tb/Co films 1083
G. Garreau, E. Beaurepaire, K. Ounadjela, and M. Farle
Quantum vortex melting in Nb/CuMn multilayers 1087
C. Attanasio, C. Coccorese, L. Maritato, S. L. Prischepa, M. Salvato, B. Engel, and C. M. Falco
Experimental determination of the energy barrier for the Li_{26}^{2+} cluster 1091
C. Bréchignac, Ph. Cahuzac, M. de Frutos, P. Garnier, and N. Kebaïli
Ordering of a prototypical conjugated molecular system during monolayer growth on the (1×2)-Au(110) surface 1095
M. Buongiorno Nardelli, D. Cvetko, V. De Renzi, L. Floreano, R. Gotter, A. Morgante, M. Peloi, F. Tommasini, R. Danieli, S. Rossini, C. Taliani, and R. Zamboni
