

# PHYSICAL REVIEW B

## CONDENSED MATTER

THIRD SERIES, VOLUME 54, NUMBER 18

CONTENTS

1 NOVEMBER 1996-II

### RAPID COMMUNICATIONS

#### Structure, structural phase transitions, mechanical properties, defects, etc.

- Atypical extended electronic states in an infinite Vicsek fractal: An exact result ..... R12 625  
Arunava Chakrabarti and Bibhas Bhattacharyya
- Stacking characteristics of graphene shells in carbon nanotubes ..... R12 629  
X. Sun, C.-H. Kiang, M. Endo, K. Takeuchi, T. Furuta, and M. S. Dresselhaus
- Pressure and temperature diagram of polymerized fullerite ..... R12 633  
L. Marques, J.-L. Hodeau, M. Núñez-Regueiro, and M. Perroux

#### Inhomogeneous, disordered, and partially ordered systems

- Determination of the local molecular structure in amorphous polyaniline ..... R12 637  
M. J. Winokur and B. R. Mattes
- Time-domain observation of nuclear contributions to the optical nonlinearities of glasses ..... R12 641  
Inuk Kang, Sylvia Smolorz, Todd Krauss, Frank Wise, B. G. Aitken, and N. F. Borrelli

#### Dynamics, dynamical systems, lattice effects, quantum solids, etc.

- Coupled spin-boson systems far from equilibrium ..... R12 645  
M. I. Salkola, A. R. Bishop, V. M. Kenkre, and S. Raghavan

#### Magnetism

- Magnetization of  $\text{Cu}_2(\text{C}_5\text{H}_{12}\text{N}_2)_2\text{Cl}_4$ : A Heisenberg spin-ladder system ..... R12 649  
C. A. Hayward, D. Poilblanc, and L. P. Lévy
- Quasiparticle energy dispersion in doped two-dimensional quantum antiferromagnets ..... R12 653  
T. Xiang and J. M. Wheatley
- Some exact results for the multicomponent  $t$ - $J$  model ..... R12 657  
Antimo Angelucci and Sandro Sorella
- Long-range interactions and nonextensivity in ferromagnetic spin models ..... R12 661  
Sergio A. Cannas and Francisco A. Tamarit
- Intrinsic localized spin-wave modes in antiferromagnetic chains with single-ion easy-axis anisotropy ..... R12 665  
R. Lai, S. A. Kiselev, and A. J. Sievers
- Exact two-spinon dynamical correlation function of the one-dimensional Heisenberg model ..... R12 669  
A. H. Bougourzi, M. Couture, and M. Kacir
- Observation of magnetic circular dichroism in resonant inelastic x-ray scattering at the  $L_3$  edge of gadolinium metal ..... R12 673  
M. H. Krisch, F. Sette, U. Bergmann, C. Masciovecchio, R. Verbeni, J. Goulon, W. Caliebe, and C. C. Kao
- Noncollinear order contribution to the exchange coupling in Fe/Cr(001) superlattices ..... R12 677  
M. Freyss, D. Stoeffler, and H. Dreyssé
- Determination of spin direction in the spin-flop phase of  $\text{Cr}_2\text{O}_3$  ..... R12 681  
M. Fiebig, D. Fröhlich, and H.-J. Thiele
- Giant magnetoresistance: Comparison of band-structure and interfacial-roughness contributions ..... R12 685  
T. N. Todorov, E. Yu. Tsymbal, and D. G. Pettifor

1 NOVEMBER 1996-II

|                                                                                                                                                      |         |
|------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Crossover from charge-localized state to charge-ordered state in $\text{Pr}_{2/3}\text{Ca}_{1/3}\text{MnO}_3$ .....                                  | R12 689 |
| J. M. De Teresa, M. R. Ibarra, C. Marquina, P. A. Algarabel, and S. Oseroff                                                                          |         |
| <b>Superfluidity and superconductivity</b>                                                                                                           |         |
| Ginzburg-Landau equations for a mixed $s+d$ symmetry superconductor with nonmagnetic impurities .....                                                | R12 693 |
| Wang Xu, Wonkee Kim, Yong Ren, and C. S. Ting                                                                                                        |         |
| Quantum melting of a two-dimensional vortex lattice at zero temperature .....                                                                        | R12 697 |
| A. Rozhkov and D. Stroud                                                                                                                             |         |
| Nonlocal effects in mesoscopic superconducting aluminum structures .....                                                                             | R12 701 |
| C. Strunk, V. Bruyndoncx, V. V. Moshchalkov, C. Van Haesendonck, Y. Bruynseraede, and R. Jonckheere                                                  |         |
| Phase-dependent magnetoconductance fluctuations in a chaotic Josephson junction .....                                                                | R12 705 |
| P. W. Brouwer and C. W. J. Beenakker                                                                                                                 |         |
| Non-Fermi-liquid behavior due to short-range order .....                                                                                             | R12 709 |
| Ross H. McKenzie and David Scarratt                                                                                                                  |         |
| Signature of the $d$ -wave gap parameter in the field dependence of the electrothermal conductivity of high- $T_c$ superconductors up to $T_c$ ..... | R12 713 |
| M. Houssa, M. Ausloos, and M. Pekala                                                                                                                 |         |
| Flux pinning in $\text{YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ thin films with ordered arrays of columnar defects .....                                | R12 717 |
| J.-Y. Lin, M. Gurvitch, S. K. Tolpygo, A. Bourdillon, S. Y. Hou, and Julia M. Phillips                                                               |         |
| Effects of Zn doping on the anisotropic penetration depth of $\text{YBa}_2\text{Cu}_3\text{O}_7$ .....                                               | R12 721 |
| C. Panagopoulos, J. R. Cooper, N. Athanassopoulou, and J. Chrosch                                                                                    |         |
| Vortex localization in single crystals of $\text{Tl}_2\text{Ba}_2\text{CuO}_{6+\delta}$ with columnar defects .....                                  | R12 725 |
| E. R. Nowak, S. Anders, H. M. Jaeger, J. A. Fendrich, W. K. Kwok, R. Mogilevsky, and D. G. Hinks                                                     |         |

## ARTICLES

### Structure, structural phase transitions, mechanical properties, defects, etc.

|                                                                                                                                                          |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Observation of interference effects due to multiple reflection of fluorescent x rays in an organic thin film .....                                       | 12 729 |
| Yoshio Suzuki, Yuji C. Sasaki, and Yasushi Tomioka                                                                                                       |        |
| Microscopic theory of the rhombohedral phase and transition to the monoclinic phase of solid $\text{C}_{70}$ .....                                       | 12 733 |
| A. V. Nikolaev and K. H. Michel                                                                                                                          |        |
| Systematic search of materials with high-temperature structural phase transitions: Application to space group $P2_12_12_1$ .....                         | 12 744 |
| J. M. Igartua, M. I. Aroyo, and J. M. Perez-Mato                                                                                                         |        |
| Total-energy study of electronic structure and mechanical behavior of $\text{C15}$ Laves phase compounds: $\text{NbCr}_2$ and $\text{HfV}_2$ .....       | 12 753 |
| Alim Ormeci, F. Chu, John M. Wills, T. E. Mitchell, R. C. Albers, D. J. Thoma, and S. P. Chen                                                            |        |
| Localization transition in three dimensions: Monte Carlo simulation of a nonlinear $\sigma$ model .....                                                  | 12 763 |
| Thomas Dupré                                                                                                                                             |        |
| Mössbauer investigation of intermixing during ball milling of $\text{Fe}_{0.3}\text{Cr}_{0.7}$ and $\text{Fe}_{0.5}\text{W}_{0.5}$ powder mixtures ..... | 12 775 |
| G. Le Caër, P. Delcroix, T. D. Shen, and B. Malaman                                                                                                      |        |
| Mössbauer study of the Fe-Si phases produced by Fe implantation followed by ion-beam-induced epitaxial crystallization .....                             | 12 787 |
| J. Desimoni, F. H. Sánchez, M. B. Fernández van Raap, X. W. Lin, H. Bernas, and C. Clerc                                                                 |        |
