## CONDENSED MATTER

THIRD SERIES, VOLUME 54, NUMBER 8

CONTENTS

15 AUGUST 1996-II

### RAPID COMMUNICATIONS

#### Electronic structure: wide-band, narrow-band, and strongly correlated systems

- Photonic-band-structure effects for low-index-contrast two-dimensional lattices in the near-infrared ..... R5195  
A. Rosenberg, R. J. Tonucci, H.-B. Lin, and Eric L. Shirley
- Exact solution for the general Peierls-Fröhlich chain with disorder ..... R5199  
R. Hayn and J. Mertsching
- Spatial properties of nonlinear ac transport in a Luttinger liquid with an impurity ..... R5203  
Maura Sassetti and Bernhard Kramer
- Thermal conductivity of  $RB_6$  ( $R=\text{Ce, Pr, Nd, Sm, Gd}$ ) single crystals ..... R5207  
M. Sera, S. Kobayashi, M. Hiroi, N. Kobayashi, and S. Kunii

#### Semiconductors I: bulk

- Ultrafast coherent transients due to exciton-continuum scattering in bulk GaAs ..... R5211  
M. U. Wehner, D. Steinbach, and M. Wegener
- Impact of recombination centers on the spontaneous emission of semiconductors under steady-state and transient conditions ..... R5215  
Oliver Brandt, Hui Yang, and Klaus H. Ploog

#### Semiconductors II: surfaces, interfaces, microstructures, and related topics

- Smooth-disorder effects in ballistic microstructures ..... R5219  
Klaus Richter, Denis Ullmo, and Rodolfo A. Jalabert
- Manifestation of the Hofstadter butterfly in far-infrared absorption ..... R5223  
Vidar Gudmundsson and Rolf R. Gerhardt
- Effect of the reduction of dimensionality on the exchange parameters in semimagnetic semiconductors ..... R5227  
G. Mackh, W. Ossau, A. Waag, and G. Landwehr
- Observation of the ultrafast two-photon coherent biexciton oscillation in a  $\text{GaAs}/\text{Al}_x\text{Ga}_{1-x}\text{As}$  multiple quantum well ..... R5231  
K. B. Ferrio and D. G. Steel
- Rabi oscillations between Bloch bands ..... R5235  
Xian-Geng Zhao, G. A. Georgakis, and Qian Niu
- Tunneling through a barrier in a Tomonaga-Luttinger liquid connected to reservoirs ..... R5239  
Akira Furusaki and Naoto Nagaosa
- Phonon bottleneck in self-formed  $\text{In}_x\text{Ga}_{1-x}\text{As}/\text{GaAs}$  quantum dots by electroluminescence and time-resolved photoluminescence ..... R5243  
Kohki Mukai, Nobuyuki Ohtsuka, Hajime Shoji, and Mitsuru Sugawara
- Bistability and dynamic depopulation in transport through a system of weakly coupled quantum wires ..... R5247  
A. Messina, U. Meirav, Hadas Shtrikman, V. Umansky, and D. Mahalu
- Resonant  $\Gamma$ -X- $\Gamma$  magnetotunneling in  $\text{GaAs-AlAs-GaAs}$  heterostructures ..... R5251  
J. J. Finley, R. J. Teissier, M. S. Skolnick, J. W. Cockburn, R. Grey, G. Hill, and M. A. Pate
- Transport properties of a quantum dot with superconducting leads ..... R5255  
C. B. Whan and T. P. Orlando

|                                                                                                                          |       |
|--------------------------------------------------------------------------------------------------------------------------|-------|
| Fractional quantum Hall effect in bilayer two-dimensional hole-gas systems .....                                         | R5259 |
| A. R. Hamilton, M. Y. Simmons, F. M. Bolton, N. K. Patel, I. S. Millard, J. T. Nicholls, D. A. Ritchie,<br>and M. Pepper |       |
| Interface-induced conversion of infrared to visible light at semiconductor interfaces .....                              | R5263 |
| F. A. J. M. Driessen, H. M. Cheong, A. Mascarenhas, S. K. Deb, P. R. Hageman, G. J. Bauhuis,<br>and L. J. Giling         |       |
| Reversibility of the elementary mechanisms of atomic-layer epitaxy and sublimation of (001) CdTe .....                   | R5267 |
| M. B. Veron, A. Arnoult, B. Daudin, and S. Tatarenko                                                                     |       |

### Surface physics, low-dimensional systems, and related topics

|                                                                                                             |       |
|-------------------------------------------------------------------------------------------------------------|-------|
| Attenuation of low-energy ( $<10$ eV) $O^+$ ions in transmission through adsorbed alkali-metal layers ..... | R5271 |
| V. N. Ageev, N. D. Potekhina, B. V. Yakshinskii, M. Akbulut, and T. E. Madey                                |       |
| Segregation-induced subsurface restructuring of FeAl(100) .....                                             | R5275 |
| M. Kottcke, H. Graupner, D. M. Zehner, L. Hammer, and K. Heinz                                              |       |
| Local-field effects on photoemission of $C_{60}$ .....                                                      | R5279 |
| Eli Rotenberg, Christer Enkvist, Paul A. Brühwiler, Andrew J. Maxwell, and Nils Mårtensson                  |       |
| Local transport properties of thin bismuth films studied by scanning tunneling potentiometry .....          | R5283 |
| B. G. Briner, R. M. Feenstra, T. P. Chin, and J. M. Woodall                                                 |       |
| Influence of dimensionality on deep tunneling rates: A study based on the hydrogen-nickel system .....      | R5287 |
| Roi Baer, Yehuda Zeiri, and Ronnie Kosloff                                                                  |       |
| Electron localization in Co/Ni superlattices .....                                                          | R5291 |
| Sihong Kim, D. Lederman, J. M. Gallego, and Ivan K. Schuller                                                |       |
| Ultrafast dynamics of electrons in image-potential states on clean and Xe-covered Cu(111) .....             | R5295 |
| M. Wolf, E. Knoesel, and T. Hertel                                                                          |       |

## ARTICLES

### Electronic structure: wide-band, narrow-band, and strongly correlated systems

|                                                                                                                                                      |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Electron states in a nearly ideal random-network model of amorphous $SiO_2$ glass .....                                                              | 5299 |
| Ming-Zhu Huang and W. Y. Ching                                                                                                                       |      |
| Intermediate-spin state and properties of $LaCoO_3$ .....                                                                                            | 5309 |
| M. A. Korotin, S. Yu. Ezhov, I. V. Solovyev, V. I. Anisimov, D. I. Khomskii, and G. A. Sawatzky                                                      |      |
| Dynamical mean-field theory for perovskites .....                                                                                                    | 5317 |

|                                                                                                                                                                                                                                                                               |      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Subpicosecond photoconductivity of $\text{In}_{0.53}\text{Ga}_{0.47}\text{As}$ : Intervalley scattering rates observed via THz spectroscopy ...<br>Stephen E. Ralph, Yue Chen, Jerry Woodall, and Dave McInturff                                                              | 5568 |
| <b>Semiconductors II: surfaces, interfaces, microstructures, and related topics</b>                                                                                                                                                                                           |      |
| Kinetics of vacancy diffusion on Si(111) surfaces studied by scanning reflection electron microscopy .....<br>Heiji Watanabe and Masakazu Ichikawa                                                                                                                            | 5574 |
| Disordering of the low-temperature $c(4\times 2)$ structure of Ge(001) to the $(2\times 1)$ reconstruction: Evidence for a mean-field transition .....<br>J. Alvarez, V. H. Etgens, X. Torrelles, H. A. van der Vegt, P. Fajardo, and S. Ferrer                               | 5581 |
| First-principles study on energetics of $c$ -BN(001) reconstructed surfaces .....<br>Jun Yamauchi, Masaru Tsukada, Satoshi Watanabe, and Osamu Sugino                                                                                                                         | 5586 |
| Electronic structure and magneto-optics of self-assembled quantum dots .....<br>Arkadiusz Wojs, Pawel Hawrylak, Simon Fafard, and Lucjan Jacak                                                                                                                                | 5604 |
| Many-body effects, space-charge potential, and valence-band mixing on the optical gain in quantum-well structures .....<br>Akihisa Tomita                                                                                                                                     | 5609 |
| Intersubband transitions in strained $\text{In}_{0.07}\text{Ga}_{0.93}\text{As}/\text{Al}_{0.40}\text{Ga}_{0.60}\text{As}$ multiple quantum wells and their application to a two-colors photodetector .....<br>Danhong Huang and M. O. Manasreh                               | 5620 |
| Exciton capture by shallow quantum wells in separate confinement heterostructures .....<br>O. Heller and G. Bastard                                                                                                                                                           | 5629 |
| Coulomb blockade of tunneling through a double quantum dot .....<br>K. A. Matveev, L. I. Glazman, and H. U. Baranger                                                                                                                                                          | 5637 |
| Microscopic theory of coherent carrier dynamics and phase breaking in semiconductors .....<br>W. Pötz                                                                                                                                                                         | 5647 |
| Classical and quantum theory of a two-dimensional electron gas in time-dependent magnetic fields .....<br>Miguel Calvo                                                                                                                                                        | 5665 |
| Efficient, numerically stable multiband $\mathbf{k}\cdot\mathbf{p}$ treatment of quantum transport in semiconductor heterostructures .....<br>Y. X. Liu, D. Z.-Y. Ting, and T. C. McGill                                                                                      | 5675 |
| Thermopower and conductivity of InAs/GaSb crossed-gap heterostructures in a magnetic field .....<br>S. Cao, R. Fletcher, M. Lakrimi, N. J. Mason, R. J. Nicholas, and P. J. Walker                                                                                            | 5684 |
| Chemical and structural contributions to the valence-band offset at GaP/GaAs heterojunctions .....<br>M. Di Ventra, M. Peressi, and A. Baldereschi                                                                                                                            | 5691 |
| Mobility modulation in vertical transport of hot electrons in multi-quantum-well structures .....<br>S. Maimon, S. E. Schacham, G. Bahir, E. Finkman, and D. Ritter                                                                                                           | 5696 |
| Analytic solutions for the valence subband mixing at the zone center of a $\text{GaAs}/\text{Al}_x\text{Ga}_{1-x}\text{As}$ quantum well under uniaxial stress perpendicular to the growth direction .....<br>G. Rau, P. C. Klipstein, V. Nikos Nicopoulos, and N. F. Johnson | 5700 |
| Magnetobiexcitonic states in a quantum wire .....<br>A. Balandin and S. Bandyopadhyay                                                                                                                                                                                         | 5712 |
| Theoretical studies of the effects of a magnetic field on excitonic nonlinear optical properties of quantum wires ...<br>A. Balandin and S. Bandyopadhyay                                                                                                                     | 5721 |
| Parameters of the magnetic polaron state in diluted magnetic semiconductors Cd-Mn-Te with low manganese concentration .....<br>I. A. Merkulov, G. R. Pozina, D. Coquillat, N. Paganotto, J. Siviniant, J. P. Lascaray, and J. Cibert                                          | 5727 |
| Optical response of three-dimensional photonic lattices: Solutions of inhomogeneous Maxwell's equations and their applications .....<br>Kazuaki Sakoda and Kazuo Ohtaka                                                                                                       | 5732 |
| Sum-frequency generation in a two-dimensional photonic lattice .....<br>Kazuaki Sakoda and Kazuo Ohtaka                                                                                                                                                                       | 5742 |

| Fermi-edge singularity in nonequilibrium systems .....                                                                                  | 5814 |
| Tai-Kai Ng                                                                                                                              |      |
| Ballistic weak localization in regular and chaotic quantum-electron billiards .....                                                     | 5823 |
| I. V. Zozoulenko and K.-F. Berggren                                                                                                     |      |
| Quantum switching of polarization in mesoscopic ferroelectrics .....                                                                    | 5829 |
| C. A. R. Sá de Melo                                                                                                                     |      |
| Effective dielectric response of semiconductor composites .....                                                                         | 5844 |
| Mikhail I. Vasilevskiy and Enrique V. Anda                                                                                              |      |
| Heavy-light hole mixing at zinc-blende (001) interfaces under normal incidence .....                                                    | 5852 |
| E. L. Ivchenko, A. Yu. Kaminski, and U. Rössler                                                                                         |      |
| <b>Surface physics, low-dimensional systems, and related topics</b>                                                                     |      |
| Interfacial roughness and related growth mechanisms in sputtered W/Si multilayers .....                                                 | 5860 |
| T. Salditt, D. Lott, T. H. Metzger, J. Peisl, G. Vignaud, P. Høghøj, O. Schärpf, P. Hinze, and R. Lauer                                 |      |
| Four-state planar model of the Si(111) surface reconstruction .....                                                                     | 5873 |
| Makoto Itoh                                                                                                                             |      |
| Surface-scattering study of the interaction potential of He atoms with the step edges of the Cu(211) and Cu(511) vicinal surfaces ..... | 5881 |
| S. Miret-Artes, J. P. Toennies, and G. Witte                                                                                            |      |
| Electronic structure of high- and low-temperature $c(2\times 2)$ -Na/Al(001) phases from angle-scanned ultraviolet photoemission .....  | 5893 |
| R. Fasel, P. Aebi, R. G. Agostino, L. Schlapbach, and J. Osterwalder                                                                    |      |
| Coverage-dependent study of the Cs/Si(100) $2\times 1$ surface using photoelectron spectroscopy .....                                   | 5901 |
| Y.-C. Chao, L. S. O. Johansson, and R. I. G. Uhrberg                                                                                    |      |
| Molecular dynamics of place exchange of metal adatoms with fcc (100) surfaces during deposition .....                                   | 5908 |
| Todd J. Raeker, Leslie S. Perkins, and Liqui Yang                                                                                       |      |
| Kinetic Monte Carlo studies of early surface morphology in diamond film growth by chemical vapor deposition of methyl radical .....     | 5914 |
| M. M. Clark, L. M. Raff, and H. L. Scott                                                                                                |      |
| Bond length and adsorbate vibrations of $(2\times 3)$ N/Cu(110): a SEXAFS study .....                                                   | 5920 |
| H. Wende, D. Arvanitis, M. Tischer, R. Chauvistré, H. Henneken, F. May, and K. Baberschke                                               |      |
| Anisotropic electron-beam damage and the collapse of carbon nanotubes .....                                                             | 5927 |
| Vincent H. Crespi, Nasreen G. Chopra, Marvin L. Cohen, A. Zettl, and Steven G. Louie                                                    |      |
| Self-diffusion and dynamic behavior of atoms at step edges of iridium surfaces .....                                                    | 5932 |
| Tsu-Yi Fu, Yee-Ren Tzeng, and Tien T. Tsong                                                                                             |      |

PHYSICAL REVIEW B

THIRD SERIES, VOLUME 54, NUMBER 8

15 AUGUST 1996-II

|                                                                                                                                |      |
|--------------------------------------------------------------------------------------------------------------------------------|------|
| Relaxation of Al(001) and Al(110): Surface embedded Green function total-energy and force calculation . . . . .                | 5940 |
| G. A. Benesh and Daniel Gebreselasie                                                                                           |      |
| Monte Carlo simulations of ( $e,2e$ ) experiments on solids . . . . .                                                          | 5946 |
| M. Vos and M. Bottema                                                                                                          |      |
| Ground states of a one-dimensional lattice-gas model with an infinite-range nonconvex interaction. A numerical study . . . . . | 5955 |
| Cz. Oleksy and J. Lorenc                                                                                                       |      |
| Theoretical study of icosahedral Ni clusters within the embedded-atom method . . . . .                                         | 5961 |
| J. M. Montejano-Carrizales, M. P. $\tilde{\text{In}}\text{iguez}$ , J. A. Alonso, and M. J. L3pez                              |      |
| Properties of pure and compound clusters of Si, Ge, and Pb . . . . .                                                           | 5970 |
| A. M. Mazzone                                                                                                                  |      |
| Reaction dynamics of molecular hydrogen on silicon surfaces . . . . .                                                          | 5978 |
| P. Bratu, W. Brenig, A. Gro $\beta$ , M. Hartmann, U. H3fer, P. Kratzer, and R. Russ                                           |      |
| Cumulative Author Index . . . . .                                                                                              | 5992 |
