## BRIEF REPORTS

### Structure, structural phase transitions, mechanical properties, defects, etc.

|                                                                                                                                                        |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Equation of state of $\text{MgAl}_2\text{O}_4$ spinel to 65 GPa .....                                                                                  | 1  |
| M. B. Kruger, J. H. Nguyen, W. Caldwell, and R. Jeanloz                                                                                                |    |
| Structure and magnetism in $\text{CePt}_{2+x}$ .....                                                                                                   | 5  |
| J. M. Lawrence, Y.-C. Chen, G. H. Kwei, M. F. Hundley, and J. D. Thompson                                                                              |    |
| Inner-shell ionization cross sections and aperture size in electron energy-loss spectroscopy .....                                                     | 9  |
| L. J. Allen, D. C. Bell, T. W. Josefsson, A. E. C. Spargo, and S. L. Dudarev                                                                           |    |
| Theoretical treatment of the nonlinear anelastic internal friction peaks appearing in the cold-worked Al-based solid solutions .....                   | 12 |
| Q. F. Fang                                                                                                                                             |    |
| Near-surface tricritical behavior of $\text{V}_2\text{H}(010)$ at the $\beta_1$ - $\beta_2$ phase transition .....                                     | 16 |
| R. Paniago, T. H. Metzger, J. Trenkler, R. Hempelmann, H. Reichert, S. Schmid, P. C. Chow, S. C. Moss, and J. Peisl                                    |    |
| Stability of the bcc phase of Cu-Al-Mn shape-memory alloys .....                                                                                       | 20 |
| Eduard Obradó, Lluís Mañosa, and Antoni Planes                                                                                                         |    |
| Stochastic theory of optically detected single-spin coherent phenomena: Evidence for non-Markovian dephasing of pentacene in <i>p</i> -terphenyl ..... | 24 |
| S. Ya. Kilin, A. P. Nizovtsev, P. R. Berman, J. Wrachtrup, and C. von Borczyskowski                                                                    |    |

### Inhomogeneous, disordered, and partially ordered systems

|                                                                                           |    |
|-------------------------------------------------------------------------------------------|----|
| Localization and delocalization of light under oblique incidence .....                    | 28 |
| Xu Du, Dongxiang Zhang, Xiulan Zhang, Baohua Feng, and Daozhong Zhang                     |    |
| Low-temperature specific heat of different $\text{B}_2\text{O}_3$ glasses .....           | 32 |
| E. Pérez-Enciso, M. A. Ramos, and S. Vieira                                               |    |
| Lateral transport in disordered layered media studied by the transfer-matrix method ..... | 36 |
| Man-Chung Chan and Zhao-Qing Zhang                                                        |    |

### Dynamics, dynamical systems, lattice effects, quantum solids, etc.

|                                                                          |    |
|--------------------------------------------------------------------------|----|
| Cluster-size statistics of site-bond-correlated percolation models ..... | 40 |
| P. R. A. Campos, L. F. C. Pessoa, and F. G. Brady Moreira                |    |
| Anharmonic correlated Einstein-model Debye-Waller factors .....          | 43 |
| Nguyen Van Hung and J. J. Rehr                                           |    |
| <i>Ab initio</i> calculations of the self-interstitial in silicon .....  | 47 |
| S. J. Clark and G. J. Ackland                                            |    |
