PHYSICAL REVIEW B

THIRD SERIES, VOLUME 59, NUMBER 23

15 JUNE 1999-I

Effects of surface-bond saturation on the luminescence of silicon nanocrystals	14 876
Jian-Bai Xia and K. W. Cheah	
Electron-electron interactions between orbital pairs in quantum dots	14 880
S. Nagaraja, L. R. C. Fonseca, and J. P. Leburton	
Self-consistent approach to Coulombic effects on the quantum magnetotransport in a nondegenerate two-dimensional electron liquid	14 884
Yu. P. Monarkha, E. Teske, and P. Wyder	
Interlayer coherence in $\nu=1$ and $\nu=2$ bilayer quantum Hall states	14 888
A. Sawada, Z. F. Ezawa, H. Ohno, Y. Horikoshi, A. Urayama, Y. Ohno, S. Kishimoto, F. Matsukura, and N. Kumada	
Raman scattering in a two-dimensional electron gas: Boltzmann equation approach	14 892
E. G. Mishchenko	
Confinement effects in bulk samples derived from the Franz-Keldysh effect	14 896
H. J. Kolbe, C. Agert, W. Stolz, and G. Weiser	

Surface physics, low-dimensional systems, and related topics

Surface structure determination of CeO ₂ (001) by angle-resolved mass spectroscopy of recoiled ions	14 899
G. S. Herman	
Genetic-algorithm prediction of the magic-number structure of (C ₆₀) _N clusters with a first-principles interaction potential	14 903
You-Hua Luo, Jijun Zhao, Shutian Qiu, and Guanghou Wang	
Time-resolved reflection high-energy electron diffraction study of the Ge(111)-c(2×8)-(1×1) phase transition	14 907
Xinglin Zeng, Bo Lin, Ibrahim El-Kholy, and Hani E. Elsayed-Ali	
Crystallization of a classical two-dimensional electron system: Positional and orientational orders	14 911
Satoru Muto and Hideo Aoki	

ARTICLES

Electronic structure: wide-band, narrow-band, and strongly correlated systems

Wave-packet dynamics in slowly perturbed crystals: Gradient corrections and Berry-phase effects	14 915
Ganesh Sundaram and Qian Niu	
Heat capacities (1 to 108 K) and linear thermal expansivities (1 to 300 K) of LuH _{0.148} single crystals: Thermal relaxation effects and the pairing transition	14 926
C. A. Swenson	
Spectral function of the two-dimensional large- $\mathcal{N}$ t - J model	14 937
Marilyn F. Bishop, Zane P. Gibbs, and T. McMullen	
Collective-mode approximations in the two-dimensional large- $\mathcal{N}$ t - J model	14 969
Marilyn F. Bishop, Zane P. Gibbs, and T. McMullen	
Single-particle properties of a model for coexisting charge and spin quasycritical fluctuations coupled to electrons	14 980
S. Caprara, M. Sulpizi, A. Bianconi, C. Di Castro, and M. Grilli	
Correcting overbinding in local-density-approximation calculations	14 992
A. van de Walle and G. Ceder	
Electronic structure and properties of pure and doped ϵ -FeSi from <i>ab initio</i> local-density theory	15 002
T. Jarlborg	
Structural and electronic properties of Si _{1-x} C _x alloys and the band alignment in Si _{1-x} C _x /Si(001) heterostructure	15 013
S. H. Ke, T. Uda, and K. Terakura
