THIRD SERIES, VOLUME 59, NUMBER 5

CONTENTS

1 FEBRUARY 1999-I

## BRIEF REPORTS

### Structure, structural phase transitions, mechanical properties, defects, etc.

- $K\alpha_{1,2}$  x-ray emission and Doniach-Šunjić-type line shapes ..... 3265  
J. A. Leiro and M. H. Heinonen
- Low-frequency collective modes in the superionic phase of lead fluoride studied by quasielastic cold neutron scattering ..... 3270  
A. Radulescu, I. Padureanu, S. N. Raeanu, A. Beldiman, M. Ion, Zh. A. Kozlov, and V. A. Semenov
- Ab initio* calculation of the activation energy for Ni self-diffusion in  $D0_3$  Ni<sub>3</sub>Sb ..... 3274  
G. Bester, B. Meyer, and M. Fähnle
- Temperature-uniaxial pressure phase diagram of KH<sub>2</sub>PO<sub>4</sub> ..... 3276  
F. E. A. Melo, S. G. C. Moreira, A. S. Chaves, I. Guedes, P. T. C. Freire, and J. Mendes-Filho

### Inhomogeneous, disordered, and partially ordered systems

- Explanation for the configurational heat capacity of ordered phases ..... 3280  
Marcel Sluiter and Yoshiyuki Kawazoe

### Dynamics, dynamical systems, lattice effects, quantum solids, etc.

- Pattern of x-ray scattering by thermal phonons in Si ..... 3283  
Z. Wu, Hawoong Hong, R. Aburano, P. Zschack, P. Jemian, J. Tischler, Haydn Chen, D.-A. Luh, and T.-C. Chiang
- Pressure dependence of the external mode spectrum of solid C<sub>60</sub> ..... 3287  
H. Schober and B. Renker

### Magnetism

- Ferromagnetic ground state of an orbital degenerate electronic model for transition-metal oxides: Exact solution and physical mechanism ..... 3291  
Shun-Qing Shen and Z. D. Wang
- Electronic origin of magnetic and orbital ordering in insulating LaMnO<sub>3</sub> ..... 3295  
Louis Felix Feiner and Andrzej M. Oleś
- Mixed valency and charge ordering in  $\alpha'$ -NaV<sub>2</sub>O<sub>5</sub> ..... 3299  
Tetsuo Ohama, Hiroshi Yasuoka, Masahiko Isobe, and Yutaka Ueda
- Kosterlitz-Thouless transition in a quantum spin-1 Heisenberg chain ..... 3303  
J. P. Neirotti and M. J. de Oliveira

|                                                                                                                                                                  |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| X-ray magnetic circular dichroism probe of the Rh magnetic moment instability in $\text{Fe}_{1-x}\text{Rh}_x$ alloys near the equiatomic concentration .....     | 3306 |
| Jesús Chaboy, Fernando Bartolomé, M. R. Ibarra, C. I. Marquina, P. A. Algarabel, Andrei Rogalev, and Claus Neumann                                               |      |
| Effects of eddy currents on retarded modes of antiferromagnets .....                                                                                             | 3310 |
| Cheng Jia, Xuan-Zhang Wang, and Shu-Chen Lü                                                                                                                      |      |
| Density functional for noncollinear magnetic systems .....                                                                                                       | 3314 |
| Leonard Kleinman                                                                                                                                                 |      |
| Spin-polarized electron capture during ion impact on a ferromagnetic surface .....                                                                               | 3318 |
| T. Igel, R. Pfandzelter, and H. Winter                                                                                                                           |      |
| Ferrimagnetism in the organic polymeric Hubbard model: Quantum Monte Carlo simulation .....                                                                      | 3321 |
| Shi-Dong Liang, Z. D. Wang, Qianghua Wang, and Shun-Qing Shen                                                                                                    |      |
| Hysteresis in $\pm J$ Ising square lattices .....                                                                                                                | 3325 |
| E. E. Vogel, J. Cartes, P. Vargas, D. Altbir, S. Kobe, T. Klotz, and M. Nogala                                                                                   |      |
| Magnetic vortices in ultrathin films .....                                                                                                                       | 3329 |
| E. Yu. Vedmedenko, A. Ghazali, and J.-C. S. Lévy                                                                                                                 |      |
| Spin waves in exchange-biased $\text{Fe}/\text{FeF}_2$ .....                                                                                                     | 3333 |
| P. Miltényi, M. Gruyters, G. Güntherodt, J. Nogués, and Ivan K. Schuller                                                                                         |      |
| <b>Superfluidity and superconductivity</b>                                                                                                                       |      |
| Soliton dynamics in two coupled-ring Josephson junctions .....                                                                                                   | 3337 |
| E. N. Tsoy and D. F. Parker                                                                                                                                      |      |
| Scaling function for the critical specific heat in a confined geometry: Spherical limit .....                                                                    | 3341 |
| Saugata Bhattacharyya and J. K. Bhattacharjee                                                                                                                    |      |
| Excitations in thin $^3\text{He}$ - $^4\text{He}$ superfluid films .....                                                                                         | 3345 |
| R. H. Anderson, M. D. Miller, and R. B. Hallock                                                                                                                  |      |
| Superconducting critical temperature via a nonperturbative calculation of the vertex function .....                                                              | 3349 |
| F. Cosenza, L. De Cesare, and M. Fusco Girard                                                                                                                    |      |
| Lattice model for the broken-time-reversal-symmetry pairing state near a surface of $d$ -wave superconductors .....                                              | 3353 |
| Jian-Xin Zhu, B. Friedman, and C. S. Ting                                                                                                                        |      |
| Time-reversal symmetry-breaking superconductivity .....                                                                                                          | 3357 |
| Haranath Ghosh                                                                                                                                                   |      |
| Comparison of quasiparticle energy dispersions and shadow peaks of doped two-leg ladder systems between various models including an $SO(5)$ symmetry model ..... | 3361 |
| Seung-Pyo Hong and Sung-Ho Suck Salk                                                                                                                             |      |
| Intrinsic pinning, commensurability, and reentrant behavior on superconducting Mo/Si multilayers .....                                                           | 3365 |
| Nina Ya. Fogel, Mikhail Yu. Mikhailov, Yuri V. Bomze, and Olga I. Yuzepovich                                                                                     |      |
| Geometric barrier and current string in type-II superconductors obtained from continuum electrodynamics .....                                                    | 3369 |
| Ernst Helmut Brandt                                                                                                                                              |      |
| Integrable models of strongly correlated particles with correlated hopping .....                                                                                 | 3373 |
| F. C. Alcaraz and R. Z. Bariev                                                                                                                                   |      |
| Disorder and chain superconductivity in $\text{YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ .....                                                                       | 3377 |
| W. A. Atkinson                                                                                                                                                   |      |
| Effect of nickel and zinc substitutions on the electronic charge-density redistribution in a $\text{YBa}_2\text{Cu}_3\text{O}_7$ superconductor .....            | 3381 |
| Raju P. Gupta and Michèle Gupta                                                                                                                                  |      |

|                                                                                                                                  |      |
|----------------------------------------------------------------------------------------------------------------------------------|------|
| Pressure effect on quasi-one-dimensional charge transport in $\text{PrBa}_2\text{Cu}_4\text{O}_8$ : Magnetotransport study ..... | 3385 |
| J. Kikuchi, I. Terasaki, T. Machi, S. Tajima, N. Koshizuka, N. Seiji, S. Adachi, K. Tanabe, C. Murayama,<br>and N. Môri          |      |

## ARTICLES

**Structure, structural phase transitions, mechanical properties, defects, etc.**

|                                                                                                                                                                                                                            |      |

PHYSICAL REVIEW B

THIRD SERIES, VOLUME 59, NUMBER 5

1 FEBRUARY 1999-I

|                                                                                      |      |
|--------------------------------------------------------------------------------------|------|
| Pressure-induced bond buckling in $\text{YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ ..... | 3902 |
| A. Sahiner, E. D. Crozier, D. T. Jiang, and R. Ingalls                               |      |

COMMENTS

|                                                                                                                                                                 |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Comment on “Thermal conductivity of $\text{YBa}_2(\text{Cu}_{1-x}\text{Zn}_x)_3\text{O}_{7-\delta}$ : Relation between $x$ and $\delta$ ” .....                 | 3911 |
| G. V. M. Williams and J. L. Tallon                                                                                                                              |      |
| Reply to the “Comment on ‘Thermal conductivity of $\text{YBa}_2(\text{Cu}_{1-x}\text{Zn}_x)_3\text{O}_{7-\delta}$ : Relation between $x$ and $\delta$ ’ ” ..... | 3914 |
| M. Houssa, M. Ausloos, and R. Cloots                                                                                                                            |      |

Errata

|                                                                                                                                  |      |
|----------------------------------------------------------------------------------------------------------------------------------|------|
| Erratum: Phonon distribution in a model polariton system [Phys. Rev B <b>52</b> , 982 (1995)] .....                              | 3916 |
| Sharmishtha Ghoshal and Ashok Chatterjee                                                                                         |      |
| Erratum: Marshall’s sign rule and density-matrix renormalization-group acceleration [Phys. Rev. B <b>58</b> , 8194 (1998)] ..... | 3917 |
| Ulrich Schollwöck                                                                                                                |      |
