THIRD SERIES, VOLUME 60, NUMBER 21

CONTENTS

1 DECEMBER 1999-I

## BRIEF REPORTS

### Structure, structural phase transitions, mechanical properties, defects, etc.

- Theoretical high-pressure studies of silicon VI ..... 14 475  
R. Ahuja, O. Eriksson, and B. Johansson
- Stochastic treatment of charge states for ion stopping in solids ..... 14 478  
Z. L. Mišković, S. G. Davison, F. O. Goodman, and W.-K. Liu
- High-pressure twisting of tetrahedra and amorphization in  $\alpha$ -quartz ..... 14 481  
N. N. Ovsyuk and S. V. Goryainov
- Relative stability of  $\text{ZrO}_2$  and  $\text{HfO}_2$  structural phases ..... 14 485  
J. E. Lowther, J. K. Dewhurst, J. M. Leger, and J. Haines
- Quantum paraelectricity in the mean-field approximation ..... 14 489  
S. A. Prosandeev, W. Kleemann, B. Westwański, and J. Dec

### Inhomogeneous, disordered, and partially ordered systems

- Atomic defects in the ordered compound  $\text{B}_2\text{-CoAl}$ : A combination of *ab initio* electron theory and statistical mechanics ..... 14 492  
G. Bester, B. Meyer, and M. Fähnle

### Dynamics, dynamical systems, lattice effects, quantum solids, etc.

- Linear augmented-plane-wave frozen-phonon calculation, shell-model lattice dynamics, and specific-heat measurement of  $\text{SnO}$  ..... 14 496  
S. Koval, R. Burriel, M. G. Stachiotti, M. Castro, R. L. Migoni, M. S. Moreno, A. Varela, and C. O. Rodriguez
- Successful theory of anharmonicity in the classical limit ..... 14 500  
E. Roger Cowley and Ramesh C. Shukla
- Low-energy theory for the Bose-Hubbard model and the normal ground state of bosons ..... 14 503  
Igor F. Herbut
- Grüneisen parameters for silicon clathrates determined by Raman scattering ..... 14 507  
Y. Guyot, L. Grosvalet, B. Champagnon, E. Reny, C. Cros, and M. Pouchard

### Magnetism

- Magnetic and structural  $\alpha$ - $\epsilon$  phase transition in Fe monitored by x-ray emission spectroscopy ..... 14 510  
J. P. Rueff, M. Krisch, Y. Q. Cai, A. Kaprolat, M. Hanfland, M. Lorenzen, C. Masciovecchio, R. Verbeni, and F. Sette
- Hydrostatic-pressure-induced magnetic structure transformation in polycrystalline  $\text{La}_{0.5}\text{Ca}_{0.5}\text{MnO}_{3-\delta}$  ( $\delta \leq 0.01$ ) ... 14 513  
Ruiping Wang, Rajappan Mahesh, and Mitsuru Itoh

|                                                                                                                                                             |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Quantum spin ladder with dynamic phonons: Bound states of magnons and phonons .....                                                                         | 14 517 |
| O. P. Sushkov                                                                                                                                               |        |
| Susceptibility behavior of $\text{CuGeO}_3$ : Comparison between experiment and the quantum transfer-matrix approach ...                                    | 14 521 |
| G. Kamieniarz, M. Bieliński, and J.-P. Renard                                                                                                               |        |
| Decay of the metastable phase in $d=1$ and $d=2$ Ising models .....                                                                                         | 14 525 |
| S. B. Rutkevich                                                                                                                                             |        |
| Haldane gap for the $S=2$ antiferromagnetic Heisenberg chain revisited .....                                                                                | 14 529 |
| Xiaoqun Wang, Shaojing Qin, and Lu Yu                                                                                                                       |        |
| Tetragonal magnetic states of Fe and Mn .....                                                                                                               | 14 533 |
| S. L. Qiu and P. M. Marcus                                                                                                                                  |        |
| Scaling behavior in the Ce-based Kondo semiconductors: NQR/NMR measurements of $\text{CeRhSb}$ and $\text{CeNiSn}$ under high pressures .....               | 14 537 |
| K. Ikushima, H. Yasuoka, Y. Uwatoko, and Y. Isikawa                                                                                                         |        |
| Magnetic glass behavior and magnetoresistive properties of perovskite cobaltites $\text{La}_{0.7}\text{Sr}_{0.3}\text{Co}_{1-y}\text{Ga}_y\text{O}_3$ ..... | 14 541 |
| Zhi-Hong Wang, Xin Chen, Bao-Gen Shen, Yi-De Zhang, Jian-Wang Cai, Run-Wei Li, Jian-Gao Zhao, and Wen-Shan Zhan                                             |        |
| Phase separation in $\text{La}_{0.5}\text{Ca}_{0.5}\text{MnO}_3$ observed by $^{55}\text{Mn}$ and $^{139}\text{La}$ NMR .....                               | 14 545 |
| Joonghoe Dho, Ilryong Kim, and Soonchil Lee                                                                                                                 |        |
| Berry phase and its induced charge and spin currents in a ring of a double-exchange system .....                                                            | 14 549 |
| Shi-Dong Liang, Shun-Qing Shen, and Z. D. Wang                                                                                                              |        |
| Effects of the environment on nonadiabatic magnetization process in uniaxial molecular magnets at very low temperatures .....                               | 14 553 |
| Keiji Saito, Seiji Miyashita, and Hans De Raedt                                                                                                             |        |
| Time-dependent heat capacity of $\text{Mn}_{12}$ clusters .....                                                                                             | 14 557 |
| M. Sales, J. M. Hernandez, J. Tejada, and J. L. Martínez                                                                                                    |        |
| Spin-glass behavior in $\text{CoSt}_2$ Langmuir-Blodgett multilayer films .....                                                                             | 14 561 |
| E. Hatta, T. Maekawa, K. Mukasa, and Y. Shimoyama                                                                                                           |        |
| Magnetomechanical damping in a nanocrystalline two-phase composite .....                                                                                    | 14 565 |
| S. E. Urreta, H. Salva, A. Ghilarducci, O. V. Billoni, L. M. Fabietti, and H. R. Bertorello                                                                 |        |
| Spin-wave contributions to nuclear magnetic relaxation in magnetic metals .....                                                                             | 14 569 |
| V. Yu. Irkhin and M. I. Katsnelson                                                                                                                          |        |

**Superfluidity and superconductivity**

|                                                                                                                            |        |
|----------------------------------------------------------------------------------------------------------------------------|--------|
| Vortex in the charged Bose liquid .....                                                                                    | 14 573 |
| A. S. Alexandrov                                                                                                           |        |
| Vortex dynamics of a $d+is$ -wave superconductor .....                                                                     | 14 577 |
| Qunqing Li, Z. D. Wang, and Qiang-Hua Wang                                                                                 |        |
| Multiquantum vortices in superconductors: Electronic and scanning tunneling microscopy spectra .....                       | 14 581 |
| S. M. M. Virtanen and M. M. Salomaa                                                                                        |        |
| Spin-fluctuation exchange study of superconductivity in two- and three-dimensional single-band Hubbard models .....        | 14 585 |
| Ryotaro Arita, Kazuhiko Kuroki, and Hideo Aoki                                                                             |        |
| Low-energy quasiparticle transport through Andreev levels .....                                                            | 14 589 |
| A. Kadigrobov, L. Y. Gorelik, R. I. Shekhter, M. Jonson, R. Sh. Shaikhaidarov, V. T. Petrashov, P. Delsing, and T. Claeson |        |
| Resonant transmission of normal electrons through Andreev states in ferromagnets .....                                     | 14 593 |
| A. Kadigrobov, R. I. Shekhter, M. Jonson, and Z. G. Ivanov                                                                 |        |
| Vortex density of states and absorption in clean layered superconductors .....                                             | 14 597 |
| A. A. Koulakov and A. I. Larkin                                                                                            |        |

|                                                                                                                                                                                                       |        |
