PHYSICAL REVIEW B **THIRD SERIES, VOLUME 62, NUMBER 20** **15 NOVEMBER 2000-II**

Polarized spectroscopy of aligned single-wall carbon nanotubes R13 310
J. Hwang, H. H. Gommans, A. Ugawa, H. Tashiro, R. Haggenmueller, K. I. Winey, J. E. Fischer, D. B. Tanner, and A. G. Rinzler
Theoretical study of field emission by single-wall carbon nanotubes R13 314
Ch. Adessi and M. Devel

ARTICLES

Electronic structure: wide-band, narrow-band, and strongly correlated systems

Electronic and magnetic properties of layered colossal magnetoresistive oxides: $La_{1+2x}Sr_{2-2x}Mn_2O_7$ 13 318
X. Y. Huang, O. N. Mryasov, D. L. Novikov, and A. J. Freeman
Interplay of randomness, electron correlation, and dimensionality effects in quasi-one-dimensional conductors 13 323
Jun-ichiro Kishine and Kenji Yonemitsu
Relativistic modified augmented plane wave method and its application to the electronic structure of gold and platinum 13 338
V. Theileis and H. Bross
Pseudopotentials for correlated-electron calculations 13 347
Y. Lee, P. R. C. Kent, M. D. Towler, R. J. Needs, and G. Rajagopal
Neutral atoms in ionic lattices: Stability and ground-state properties of $KCl:Ag^0$ 13 356
J. A. Aramburu, M. Moreno, I. Cabria, M. T. Barriuso, C. Sousa, C. de Graaf, and F. Illas
Neutral atoms in ionic lattices: Excited states of $KCl:Ag^0$ 13 366
C. Sousa, C. de Graaf, F. Illas, M. T. Barriuso, J. A. Aramburu, and M. Moreno
Planar extrapolation of the correlation problem that permits pairing 13 376
D. Foerster
Approximation method for calculation of strongly correlated systems of electrons 13 383
Huaiyu Wang
Ab initio theory of valency in ytterbium compounds 13 394
A. Svane, W. M. Temmerman, Z. Szotek, L. Petit, P. Strange, and H. Winter
Bond-order and charge-density waves in the isotropic interacting two-dimensional quarter-filled band and the insulating state proximate to organic superconductivity 13 400
S. Mazumdar, R. T. Clay, and D. K. Campbell
$CaPd_3O_4$ as an excitonic insulator 13 426
Izumi Hase and Yoshikazu Nishihara
Transport in a one-dimensional chain with random fluctuating energies 13 430
D. Menashe and B. Laikhtman
Dispersive energy transport and relaxation in the hopping regime 13 440
O. Bleibaum, H. Böttger, V. V. Bryksin, and A. N. Samukhin
Strain-induced three-photon effects 13 455
Jae-Woo Jeong, Sung-Chul Shin, I. L. Lyubchanskii, and V. N. Varyukhin
Time-dependent screening of a positive charge distribution in metals: Excitons on an ultrashort time scale 13 464
Wolf-Dieter Schöne and Walter Ekardt
Thermal effects in the x-ray spectra of $La_{1-x}Ca_xMnO_3$ 13 472
Q. Qian, T. A. Tyson, C.-C. Kao, M. Croft, S.-W. Cheong, and M. Greenblatt
Fluorescence from a few electrons 13 482
Jacques Arnaud, Laurent Chusseau, and Fabrice Philippe
Effect of substitutional impurities on the electronic states and conductivity of crystals with a half-filled band 13 490
E. P. Nakhmedov, H. Feldmann, R. Oppermann, and M. Kumru
Electron transmission through one-dimensional chains of randomly spaced identical potentials 13 501
Ashot Zh. Khachatrian, Gerd Roepke, David H. Badalyan, and David. M. Sedrakian
