PHYSICAL REVIEW B THIRD SERIES, VOLUME 62, NUMBER 23 15 DECEMBER 2000-I

Influence of exchange scattering and dynamic screening on electron-electron scattering rates in semiconductor quantum wells 15 327
S.-C. Lee and I. Galbraith
High electric field transport in $In_{0.53}Ga_{0.47}As$ quantum wells under nonquantizing magnetic fields at low temperatures 15 331
S. K. Sarkar and D. Chattopadhyay
Hydrogenic impurity states at a semiconductor edge 15 334
Yosuke Kayanuma
Effects of surface roughness and alloy disorder on the density of states in semiconductor quantum wires 15 337
Doan Nhat Quang and Nguyen Huyen Tung
Surface polymerization of epitaxial Sb wires on Si(001) 15 341
S. Rogge, R. H. Timmerman, P. M. L. O. Scholte, L. J. Geerligs, and H. W. M. Salemink
Excitation of two-dimensional plasmons with cross-grating couplers 15 345
R. Krahne, M. Hochgräfe, Ch. Heyn, D. Heitmann, M. Hauser, and K. Eberl
Metal-insulator transitions in the cyclotron resonance of periodic semiconductor nanostructures due to avoided band crossings 15 348
L. Hufnagel, M. Weiss, A. Iomin, R. Ketzmerick, S. Fishman, and T. Geisel
Quantum ac transport through coupled quantum dots 15 352
Zhongshui Ma, Junren Shi, and X. C. Xie
Phase breaking and energy relaxation in open quantum-dot arrays 15 356
C. Prasad, D. K. Ferry, A. Shailos, M. Elhassan, J. P. Bird, L.-H. Lin, N. Aoki, Y. Ochiai, K. Ishibashi, and Y. Aoyagi
Derivation of the semicircle law from the law of corresponding states 15 359
C. P. Burgess, Rim Dib, and Brian P. Dolan
Phase diagram of the integer quantum Hall effect 15 363
D. N. Sheng and Z. Y. Weng
Magnetization and level statistics at the quantum Hall liquid-insulator transition in the lattice model 15 367
M. Niţă, A. Aldea, and J. Zittartz
Paired Hall states versus unidirectional CDW in a tilted field for $\nu=\frac{5}{2}$ 15 371
Yue Yu, Shi-Jie Yang, and Zhao-Bin Su
Confinement symmetry, mobility anisotropy, and metallic behavior in (311)*A* GaAs two-dimensional holes 15 375
S. J. Papadakis, E. P. De Poortere, and M. Shayegan
Electron-density-dependent variation of the relative strength of the dual polar optical modes in $Al_xGa_{1-x}As$ as detected by Raman scattering 15 379
L. Shifren, D. K. Ferry, and K. T. Tsen
Quasielastic light scattering in silicon 15 383
P. R. Stoddart and J. D. Comins
Coherent control and enhancement of refractive index in an asymmetric double quantum well 15 386
S. M. Sadeghi, H. M. van Driel, and J. M. Fraser
Onset of exciton absorption in modulation-doped GaAs quantum wells 15 390
G. Yusa, H. Shtrikman, and I. Bar-Joseph

Surface physics, low-dimensional systems, and related topics

Carbon clusters near the crossover to fullerene stability 15 394
P. R. C. Kent, M. D. Towler, R. J. Needs, and G. Rajagopal
Strain relief and island shape evolution in heteroepitaxial metal growth 15 398
V. S. Stepanyuk, D. I. Bazhanov, A. N. Baranov, W. Hergert, P. H. Dederichs, and J. Kirschner
Illuminating structural transformation of Ir(110): A high-temperature scanning tunneling microscopy study 15 402
J. J. Schulz, M. Sturmat, and R. Koch
