Announcement: Electronic-First Publication and Article Numbers ..... i

## BRIEF REPORTS

### Electronic structure: wide-band, narrow-band, and strongly correlated systems

- Second harmonic generation by charge-transfer excitons interacting with phonons (*4 pages*) ..... 233101  
P. Reineker and V. I. Yudson
- Final-state effects on photoemission line shapes at finite temperature (*4 pages*) ..... 233102  
Ch. Søndergaard, Ph. Hofmann, Ch. Schultz, M. S. Moreno, J. E. Gayone, M. A. Vicente Alvarez,  
G. Zampieri, S. Lizzit, and A. Baraldi
- Optical properties of  $RNi_2B_2C$  ( $R = Y, Tb, Er, Dy$ ) (*3 pages*) ..... 233103  
S. J. Lee, B. K. Cho, P. C. Canfield, and D. W. Lynch
- Hopping conductivity in dense hydrogen fluid (*4 pages*) ..... 233104  
Ronald Redmer, Gerd Röpke, Sandra Kuhlbrodt, and Heidi Reinholz
- Variational study of the stability of the Nagaoka state against single-spin flips in the two-dimensional  $t$ - $t'$   
Hubbard model (*4 pages*) ..... 233105  
M. Bajdich and R. Hlubina
- Na 1s excitations in vapor and solid sodium halides (*4 pages*) ..... 233106  
C. M. Teodorescu, A. El Afif, J. M. Esteva, and R. C. Karnatak
- Spinless fermions and charged stripes at the strong-coupling limit (*4 pages*) ..... 233107  
C. L. Henley and N.-G. Zhang
- Recursive analytical formula for the Green's function of a Hamiltonian having a sum of one-dimensional  
arbitrary delta-function potentials (*3 pages*) ..... 233108  
J. Besprosvany
- Properties of the density matrix from realistic calculations (*4 pages*) ..... 233109  
Xiaodong Zhang and D. A. Drabold

### Semiconductors I: bulk

- Correlation-induced phonon softening in low-density coupled bilayer systems (*4 pages*) ..... 233201  
E. H. Hwang and S. Das Sarma
- Tetrahedral  $Mn_{i4}$  cluster in silicon (*4 pages*) ..... 233202  
J. Wedekind, H. Vollmer, and R. Labusch
- Hopfield coefficients measured by inverse polariton series (*4 pages*) ..... 233203  
Eiji Tokunaga, A. L. Ivanov, Selvakumar V. Nair, and Yasuaki Masumoto
- Electronic band structure and intermolecular interaction in substituted thiophene polymorphs (*4 pages*) ..... 233204  
J. Widany, G. Daminelli, A. Di Carlo, P. Lugli, G. Jungnickel, M. Elstner, and Th. Frauenheim

|                                                                                                  |        |
|--------------------------------------------------------------------------------------------------|--------|
| Anomalous exchange interactions in III-V dilute magnetic semiconductors ( <i>4 pages</i> ) ..... | 233205 |
| Mark van Schilfgaarde and O. N. Mryasov                                                          |        |

**Semiconductors II: surfaces, interfaces, microstructures, and related topics**

|                                                                                                                                                       |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Photoluminescence polarization of single InP quantum dots ( <i>4 pages</i> ) .....                                                                    | 233301 |
| Valéry Zwiller, Linda Jarlskog, Mats-Erik Pistol, Craig Pryor, Pedro Castrillo, Werner Seifert, and Lars Samuelson                                    |        |
| Burstein-Moss shift of <i>n</i> -doped In <sub>0.53</sub> Ga <sub>0.47</sub> As/InP ( <i>3 pages</i> ) .....                                          | 233302 |
| Martín Muñoz, Fred H. Pollak, Mathias Kahn, Dan Ritter, Leeor Kronik, and Guy M. Cohen                                                                |        |
| Effect of off-stoichiometry on the transport properties of the Heusler-type Fe <sub>2</sub> VAl compound ( <i>4 pages</i> ) .....                     | 233303 |
| Y. Nishino, H. Kato, M. Kato, and U. Mizutani                                                                                                         |        |
| Photoluminescence of (111) In <sub>x</sub> Ga <sub>1-x</sub> As/GaAs strained-layer quantum wells under hydrostatic pressure ( <i>4 pages</i> ) ..... | 233304 |
| N. W. A. van Uden, J. R. Downes, and D. J. Dunstan                                                                                                    |        |
| Self-assembled rare-earth silicide nanowires on Si(001) ( <i>4 pages</i> ) .....                                                                      | 233305 |
| J. Nogami, B. Z. Liu, M. V. Katkov, C. Ohbuchi, and Norman O. Birge                                                                                   |        |
| Polarization of the interband optical dipole in InAs/GaAs self-organized quantum dots ( <i>4 pages</i> ) .....                                        | 233306 |
| S. Cortez, O. Krebs, P. Voisin, and J. M. Gérard                                                                                                      |        |
| Numerical replica limit for the density correlation of the random Dirac fermion ( <i>4 pages</i> ) .....                                              | 233307 |
| Shinsei Ryu and Yasuhiro Hatsugai                                                                                                                     |        |

**Surface physics, low-dimensional systems, and related topics**

|                                                                                                                                             |        |
|---------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Surface oscillatory thermal expansion: Mg(10 $\bar{1}0$ ) ( <i>4 pages</i> ) .....                                                          | 233401 |
| Ismail, E. W. Plummer, Michele Lazzeri, and Stefano de Gironcoli                                                                            |        |
| Raman scattering by electron-hole excitations in silver nanocrystals ( <i>4 pages</i> ) .....                                               | 233402 |
| H. Portales, E. Duval, L. Saviot, M. Fujii, M. Sumitomo, and S. Hayashi                                                                     |        |
| Overtone of H vibrations at Ni(111): Formation of delocalized states ( <i>4 pages</i> ) .....                                               | 233403 |
| H. Okuyama, T. Ueda, T. Aruga, and M. Nishijima                                                                                             |        |
| Direct evidence for the two-phonon bound states on the H/Ni(111) surface ( <i>4 pages</i> ) .....                                           | 233404 |
| H. Okuyama, T. Ueda, T. Aruga, and M. Nishijima                                                                                             |        |
| Friction and pinning of nitrogen films on lead substrates near the superconducting transition ( <i>4 pages</i> ) .....                      | 233405 |
| R. L. Renner, P. Taborek, and J. E. Rutledge                                                                                                |        |
| Electric-field-induced transport of protons in amorphous SiO <sub>2</sub> ( <i>4 pages</i> ) .....                                          | 233406 |
| R. A. B. Devine and G. V. Herrera                                                                                                           |        |
| Evidence for the existence of two breathinglike phonon modes in infinite bundles of single-walled carbon nanotubes ( <i>4 pages</i> ) ..... | 233407 |
| V. N. Popov and Luc Henrard                                                                                                                 |        |
| Ion-beam-directed self-organization of conducting nanowire arrays ( <i>4 pages</i> ) .....                                                  | 233408 |
| M. Batzill, F. Bardou, and K. J. Snowdon                                                                                                    |        |

| Surface structure of anatase $\text{TiO}_2(001)$ : Reconstruction, atomic steps, and domains (7 pages) .....                                  | 235402 |
| Yong Liang, Shupan Gan, Scott A. Chambers, and Eric I. Altman                                                                                 |        |
| Nonequilibrium dephasing in two-dimensional indium oxide films (14 pages) .....                                                               | 235403 |
| Z. Ovadyahu                                                                                                                                   |        |
| Theoretical insight in the energetics of Co adsorption on a reconstructed Au(111) substrate (5 pages) .....                                   | 235404 |
| C. Goyhenex and H. Bulou                                                                                                                      |        |
| Quantum size effects in metal films: Energies and charge densities of Pb(111) grown on Cu(111) (9 pages) .....                                | 235405 |
| Giuliana Materzanini, Peter Saalfrank, and Philip J. D. Lindan                                                                                |        |
| Burrowing of Co clusters on the Cu(001) surface: Atomic-scale calculations (5 pages) .....                                                    | 235406 |
| V. S. Stepanyuk, D. V. Tsivline, D. I. Bazhanov, W. Hergert, and A. A. Katsnelson                                                             |        |
| Size and composition effects in polymer-protected ultrafine bimetallic $\text{Pt}_x\text{Ru}_{1-x}$ ( $0 < x < 1$ ) particles (7 pages) ..... | 235407 |
| F. Dassenoy, M.-J. Casanove, P. Lecante, C. Pan, K. Philippot, C. Amiens, and B. Chaudret                                                     |        |
| Nucleation, adatom capture, and island size distributions: Unified scaling analysis for submonolayer deposition (15 pages) .....              | 235408 |
| J. W. Evans and M. C. Bartelt                                                                                                                 |        |
| Melting of sodium clusters in the extended Thomas-Fermi approximation (5 pages) .....                                                         | 235409 |
| P. Blaise and S. A. Blundell                                                                                                                  |        |

PHYSICAL REVIEW B

THIRD SERIES, VOLUME 63, NUMBER 23

15 JUNE 2001-I

|                                                                                                                                                          |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Noncanonical Wannier-Stark ladders and surface state quantization in finite crystals subjected to a homogeneous electric field ( <i>10 pages</i> ) ..... | 235410 |
| Alexander Onipko and Lyuba Malysheva                                                                                                                     |        |
| Measurement of the friction of thin films by means of a quartz microbalance in the presence of a finite vapor pressure ( <i>7 pages</i> ) .....          | 235411 |
| L. Bruschi and G. Mistura                                                                                                                                |        |
| Unoccupied electronic states of Au(113): Theory and experiment ( <i>6 pages</i> ) .....                                                                  | 235412 |
| Patricio Häberle, Wladimir Ibañez, Rolando Esparza, and Patricio Vargas                                                                                  |        |
| Force-velocity relation and density profiles for biased diffusion in an adsorbed monolayer ( <i>15 pages</i> ) .....                                     | 235413 |
| O. Bénichou, A. M. Cazabat, J. De Coninck, M. Moreau, and G. Oshanin                                                                                     |        |
| Toggling the local surface work function by pinning individual promoter atoms ( <i>5 pages</i> ) .....                                                   | 235414 |
| Gérald Dujardin, Franck Rose, and Andrew J. Mayne                                                                                                        |        |
| Variational quantum Monte Carlo calculations for solid surfaces ( <i>8 pages</i> ) .....                                                                 | 235415 |
| R. Bahnsen, H. Eckstein, W. Schattke, N. Fitzer, and R. Redmer                                                                                           |        |

## COMMENTS

|                                                                                                                                  |        |
|----------------------------------------------------------------------------------------------------------------------------------|--------|
| Comment on “Molecular-dynamics simulations of solid-phase epitaxy of Si: Growth mechanisms” ( <i>3 pages</i> ) .....             | 237401 |
| Manabu Ishimaru                                                                                                                  |        |
| Reply to “Comment on ‘Molecular-dynamics simulations of solid-phase epitaxy of Si: Growth mechanisms’ ” ( <i>2 pages</i> ) ..... | 237402 |
| Teruaki Motooka, Ken Nishihira, Shinji Munetoh, Koji Moriguchi, and Akira Shintani                                               |        |

## ERRATA

|                                                                                                                                                                               |           |
