THIRD SERIES, VOLUME 63, NUMBER 5

CONTENTS

1 FEBRUARY 2001-I

Announcement: Electronic-First Publication and Article Numbers ..... i

## BRIEF REPORTS

### Structure, structural phase transitions, mechanical properties, defects, etc.

- Experimental method to detect phase transitions via the chemical potential (3 pages) ..... 052101  
M. Matlak, M. Pietruszka, and E. Rówiński
- Resonant soft mode in Rochelle salt by inelastic neutron scattering (4 pages) ..... 052102  
J. Hlinka, J. Kulda, S. Kamba, and J. Petzelt
- Hydrogen desorption mechanism in MgH<sub>2</sub>-Nb nanocomposites (4 pages) ..... 052103  
J. F. Pelletier, J. Huot, M. Sutton, R. Schulz, A. R. Sandy, L. B. Lurio, and S. G. J. Mochrie

### Inhomogeneous, disordered, and partially ordered systems

- Pressure effects on irreversible and reversible contributions to the glass transition of Pd<sub>39</sub>Ni<sub>10</sub>Cu<sub>30</sub>P<sub>21</sub> bulk metallic glass (3 pages) ..... 052201  
Li Min Wang, W. H. Wang, L. L. Sun, J. Zhang, and W. K. Wang
- Observation of the interplay of microstructure and thermopower in the Al<sub>71</sub>Pd<sub>21</sub>Mn<sub>8-x</sub>Re<sub>x</sub> quasicrystalline system (4 pages) ..... 052202  
A. L. Pope, R. Schneidmiller, J. W. Kolis, Terry M. Tritt, R. Gagnon, J. Strom-Olsen, and S. Legault
- Epitactic textures of fcc Al on icosahedral Al-Pd-Mn quasicrystal (4 pages) ..... 052203  
B. Bolliger, V. E. Dmitrienko, M. Erbudak, R. Lüscher, H.-U. Nissen, and A. R. Kortan
- Characteristics of the glass transition and supercooled liquid state of the Zr<sub>41</sub>Ti<sub>14</sub>Cu<sub>12.5</sub>Ni<sub>10</sub>Be<sub>22.5</sub> bulk metallic glass (4 pages) ..... 052204  
Wei Hua Wang, Li Long Li, M. X. Pan, and Ru Ju Wang
- Conductivity of disordered solids: Resolution of discrepancies between micro- and macro-response models (4 pages) ..... 052205  
J. Ross Macdonald

### Dynamics, dynamical systems, lattice effects, quantum solids, etc.

- Phonon dispersion of indium along [111] (3 pages) ..... 052301  
A. S. Bakulin, A. W. Overhauser, H. Kaiser, S. A. Werner, J. A. Fernandez-Baca, and H. G. Smith

### Magnetism

- Strong exchange bias by a single layer of independent antiferromagnetic grains: The CoO/Co model system (4 pages) ..... 052401  
M. Gruyters and D. Riegel

|                                                                                                                                                                                                     |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Tailoring of paramagnetic (structurally ordered) nanometric grains separated by ferromagnetic (structurally disordered) grain boundaries: Isolating grain-boundary magnetic effects (4 pages) ..... | 052402 |
| X. Amils, J. Nogués, S. Surinach, J. S. Muñoz, M. D. Baró, A. Hernando, and J. P. Morniroli                                                                                                         |        |
| Electron-electron interaction and weak localization effects in badly metallic SrRuO <sub>3</sub> (4 pages) .....                                                                                    | 052403 |
| M. A. López de la Torre, Z. Sefrioui, D. Arias, M. Varela, J. E. Villegas, C. Ballesteros, C. León, and J. Santamaría                                                                               |        |
| Stray field fluctuations in soft-hard nanostructured materials: Its influence on the shift of minor hysteresis loops (3 pages) .....                                                                | 052404 |
| A. Hernando, D. X. Chen, M. Pardavi-Horvath, and J. M. González                                                                                                                                     |        |
| Ab initio calculation of phase boundaries in iron along the bcc-fcc transformation path and magnetism of iron overlayers (4 pages) .....                                                            | 052405 |
| M. Friák, M. Šob, and V. Vitek                                                                                                                                                                      |        |
| Coexistence of large and small polarons in manganites (4 pages) .....                                                                                                                               | 052406 |
| V. Cataudella, G. De Filippis, and G. Iadonisi                                                                                                                                                      |        |
| Transition in the two-dimensional step model: A Kosterlitz-Thouless transition in disguise (4 pages) .....                                                                                          | 052407 |
| Peter Olsson and Petter Holme                                                                                                                                                                       |        |
| Current-determined orbital magnetization in a metallic magnet (4 pages) .....                                                                                                                       | 052408 |
| M. Todorova, L. M. Sandratskii, and J. Kübler                                                                                                                                                       |        |
| Domain duplication in magnetic tunnel junctions studied by Kerr microscopy (4 pages) .....                                                                                                          | 052409 |
| O. Lenoble, M. Hehn, D. Lacour, A. Schuhl, D. Hrabovsky, J. F. Bobo, B. Diouf, and A. R. Fert                                                                                                       |        |
| Phase transitions in a magnetic field in V <sub>2-y</sub> O <sub>3</sub> (y = 0 and 0.04) (4 pages) .....                                                                                           | 052410 |
| Wei Bao, A. H. Lacerda, J. D. Thompson, J. M. Honig, and P. Metcalf                                                                                                                                 |        |
| Absence of small lattice polarons above the Curie temperature in magnetoresistive manganites (4 pages) .....                                                                                        | 052411 |
| Vladimir Chechersky, Amar Nath, I. Isaac, Jurgen P. Franck, Kartik Ghosh, and Richard L. Greene                                                                                                     |        |
| Magnetic localization and field-dependent variable-range hopping in disordered CuCr <sub>2</sub> S <sub>4</sub> (4 pages) .....                                                                     | 052412 |
| M. Muroi, R. Street, and P. G. McCormick                                                                                                                                                            |        |
| Numerical method to test a theoretical model of the quantum interference effect in layered manganites (4 pages) .....                                                                               | 052413 |
| Qing'An Li and K. E. Gray                                                                                                                                                                           |        |
| Breakdown of the perturbative renormalization group for S ≥ 1 random antiferromagnetic spin chains (4 pages) .....                                                                                  | 052414 |
| A. Saguia, Beatriz Boechat, M. A. Continentino, and O. F. de Alcantara Bonfim                                                                                                                       |        |
| <b>Superfluidity and superconductivity</b>                                                                                                                                                          |        |
| Spin-orbit scattering effect on the oscillatory T <sub>c</sub> of superconductive/magnetic multilayers (4 pages) .....                                                                              | 052501 |
| Sangjun Oh, Yong-Hyun Kim, D. Youm, and M. R. Beasley                                                                                                                                               |        |
| X-ray scattering study of two length scales in the critical fluctuations of CuGeO <sub>3</sub> (4 pages) .....                                                                                      | 052502 |
