PHYSICAL REVIEW B

THIRD SERIES, VOLUME 64, NUMBER 15

15 OCTOBER 2001-I

Forward scattering probe of edge-state coupling in the quantum Hall regime (4 pages)	153303
Yeong-Ah Soh, Frank M. Zimmermann, and Harold G. Craighead	
Electron transport through two-dimensional quantum wires with flanges (4 pages)	153304
S. Midgley and J. B. Wang	
Fermi-liquid theory for the Anderson model out of equilibrium (4 pages)	153305
Akira Oguri	
Kondo resonance in a multiprobe quantum dot (4 pages)	153306
Qing-feng Sun and Hong Guo	

Surface physics, low-dimensional systems, and related topics

Polygonization of single-wall carbon nanotube bundles under high pressure (4 pages)	153401
S. Rols, I. N. Goncharenko, R. Almairac, J. L. Sauvajol, and I. Mirebeau	
Electronic and structural evolution of Co_n clusters ($n = 1-108$) by photoelectron spectroscopy (4 pages)	153402
Shu-Rong Liu, Hua-Jin Zhai, and Lai-Sheng Wang	
Effects of nonorthogonality in the time-dependent current through tunnel junctions (4 pages)	153403
J. Fransson, O. Eriksson, and I. Sandalov	
Subband mixing rules in circumferentially perturbed carbon nanotubes: Effects of transverse electric fields (4 pages)	153404
Yong-Hyun Kim and K. J. Chang	
Intramolecular relaxation observed in the surface of the quasi-one-dimensional organic conductor β -(BEDT-TTF) $_2$ PF $_6$ (4 pages)	153405
Masahiko Ishida, Osamu Takeuchi, Takehiko Mori, and Hidemi Shigekawa	
Formation of a Si(100)c(8 $\times$ 2) surface phase using H-induced self-organization and H extraction (4 pages)	153406
O. Kubo, T. Kobayashi, N. Yamaoka, A. A. Saranin, A. V. Zotov, H. Ohnishi, M. Katayama, and K. Oura	
STM-induced reversible switching of local conductivity in thin Al $_2$ O $_3$ films (4 pages)	153407
O. Kurnosikov, F. C. de Nooij, P. LeClair, J. T. Kohlhepp, B. Koopmans, H. J. M. Swagten, and W. J. M. de Jonge	
Symmetry properties of single-walled boron nitride nanotubes (4 pages)	153408
Ofir E. Alon	
One-dimensional Ag-Cu superlattices on vicinal Cu(111) (4 pages)	153409
A. R. Bachmann, A. Mugarza, J. E. Ortega, and S. Speller	

ARTICLES

Electronic structure: wide-band, narrow-band, and strongly correlated systems

Exact renormalization group flow equations for nonrelativistic fermions: Scaling toward the Fermi surface (14 pages)	155101
Peter Kopietz and Tom Busche	
Short-range correlation in the uniform electron gas: Extended Overhauser model (8 pages)	155102
Paola Gori-Giorgi and John P. Perdew	
Composition-induced metal-semiconductor-metal crossover in half-Heusler Fe $_{1-x}$ Ni $_x$ TiSb (7 pages)	155103
J. Toboła, L. Jodin, P. Pecher, H. Scherrer, G. Venturini, B. Malaman, and S. Kaprzyk	
Control of electronic properties of α -(BEDT-TTF) $_2$ MHg(SCN) $_4$ ($M = \text{K}, \text{NH}_4$) by the uniaxial strain method (8 pages)	155104
M. Maesato, Y. Kaga, R. Kondo, and S. Kagoshima
