## BRIEF REPORTS

### Electronic structure: wide-band, narrow-band, and strongly correlated systems

- Charge-density waves in one-dimensional Hubbard superlattices (*4 pages*) ..... 153101  
Thereza Paiva and Raimundo R. dos Santos
- Analysis of the dynamical cluster approximation for the Hubbard model (*4 pages*) ..... 153102  
K. Aryanpour, M. H. Hettler, and M. Jarrell
- Formation energy of Cr/Al vacancies in spinel  $\text{MgCr}_2\text{O}_4$  and  $\text{MgAl}_2\text{O}_4$  by first-principles calculations  
(*4 pages*) ..... 153103  
Hiroki Moriwake, Isao Tanaka, Fumiyasu Oba, Yukinori Koyama, and Hirohiko Adachi
- Geometric phase current in solids: Derivation in a path-integral approach (*4 pages*) ..... 153104  
Hiroyasu Koizumi and Yasutami Takada
- Landau-Zener transitions in a linear chain (*4 pages*) ..... 153105  
V. L. Pokrovsky and N. A. Sinitsyn
- Electronic structure of alkali-metal-doped  $M_8\text{Si}_{46}$  ( $M = \text{Na}, \text{K}$ ) clathrates (*3 pages*) ..... 153106  
A. Moewes, E. Z. Kurmaev, J. S. Tse, M. Geshi, M. J. Ferguson, V. A. Trofimova, and  
Y. M. Yarmoshenko
- Dynamic screening and collective excitation of an electron gas under intense terahertz radiation (*4 pages*) .... 153107  
C. Zhang
- Analysis of the band structure of tetrahedral diamondlike crystals with valence bonds: Prediction of materials  
with superhigh hardness and negative electron affinity (*4 pages*) ..... 153108  
Vladimir Litovchenko
- Crossing points in specific-heat curves of the asymmetric Hubbard model (*3 pages*) ..... 153109  
C. A. Macedo and A. M. C. de Souza
- Lattice twist operators and vertex operators in sine-Gordon theory in one dimension (*4 pages*) ..... 153110  
Masaaki Nakamura and Johannes Voit

### Semiconductors I: bulk

- Collective magnetic excitations in mixed-valence  $\text{Sm}_{0.83}\text{Y}_{0.17}\text{S}$  (*4 pages*) ..... 153201  
P. A. Alekseev, J.-M. Mignot, A. Ochiai, E. V. Nefedova, I. P. Sadikov, E. S. Clementyev,  
V. N. Lazukov, M. Braden, and K. S. Nemkovski
- Magnetic-field-dependent band gaps in two-dimensional photonic crystals (*4 pages*) ..... 153202  
M. S. Kushwaha and G. Martinez
- Carrier-induced ferromagnetism in diluted magnetic semiconductors (*4 pages*) ..... 153203  
G. Bouzerar and T. P. Pareek

|                                                                                                               |        |
|---------------------------------------------------------------------------------------------------------------|--------|
| Fine structure of the $E_1 + \Delta_1$ critical point in GaAsN (4 pages) .....                                | 153204 |
| U. Tisch, E. Finkman, and J. Salzman                                                                          |        |
| First-principles calculations of the II-VI semiconductor $\beta$ -HgS: Metal or semiconductor (4 pages) ..... | 153205 |
| A. Delin                                                                                                      |        |

**Semiconductors II: surfaces, interfaces, microstructures, and related topics**

|                                                                                                                                          |        |
|------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Two-dimensional Dirac fermions with a random axial vector potential (4 pages) .....                                                      | 153301 |
| Takahiro Fukui, Hayato Emura, and Hiroki Yamada                                                                                          |        |
| Temporal evolution of the excitonic distribution function in GaAs/Al <sub>0.33</sub> Ga <sub>0.67</sub> As superlattices (4 pages) ..... | 153302 |
| I. Shtrichman, Amiram Ron, D. Gershoni, E. Ehrenfreund, K. D. Maranowski, and A. C. Gossard                                              |        |
| Effect of charge fluctuations on the persistent current through a quantum dot (4 pages) .....                                            | 153303 |
| Kicheon Kang, Sam Young Cho, and Ju-Jin Kim                                                                                              |        |
| Klein factors in multiple fractional quantum Hall edge tunneling (4 pages) .....                                                         | 153304 |
| R. Guyon, P. Devillard, T. Martin, and I. Safi                                                                                           |        |
| Effect of structural defects consisting of ternary mixed crystals on localized interface optical modes in superlattices (4 pages) .....  | 153305 |
| Ke-Qiu Chen, Xue-Hua Wang, and Ben-Yuan Gu                                                                                               |        |
| Alloying, elemental enrichment, and interdiffusion during the growth of Ge(Si)/Si(001) quantum dots (4 pages) .....                      | 153306 |
| X. Z. Liao, J. Zou, D. J. H. Cockayne, J. Wan, Z. M. Jiang, G. Jin, and Kang L. Wang                                                     |        |
| Skyrmion $\leftrightarrow$ pseudo-Skyrmion transition in bilayer quantum Hall states at $\nu=1$ (4 pages) .....                          | 153307 |
| Aiichi Iwazaki                                                                                                                           |        |
| Operation of the qubit based on photon-assisted tunneling in a coupled quantum-dot system and the influence of dephasing (4 pages) ..... | 153308 |
| Z. T. Jiang, J. Peng, J. Q. You, and H. Z. Zheng                                                                                         |        |
| Dephasing via stochastic absorption: A case study in Aharonov-Bohm oscillations (4 pages) .....                                          | 153309 |
| Colin Benjamin and A. M. Jayannavar                                                                                                      |        |
| Polariton lasing by exciton-electron scattering in semiconductor microcavities (4 pages) .....                                           | 153310 |
| G. Malpuech, A. Kavokin, A. Di Carlo, and J. J. Baumberg                                                                                 |        |
| Quantization of adiabatic pumped charge in the presence of superconducting lead (4 pages) .....                                          | 153311 |
| Jian Wang and Baigeng Wang                                                                                                               |        |
| <i>Ab initio</i> study on surface segregation of hydrogen from diamond C(100) surfaces (4 pages) .....                                   | 153312 |
| C. Kanai, Y. Shichibu, K. Watanabe, and Y. Takakuwa                                                                                      |        |
| Conductance and thermoelectric effect in a two-dimensional collisionless electron gas (3 pages) .....                                    | 153313 |
| V. L. Gurevich and A. Thellung                                                                                                           |        |
| Surface resonances at transition metal dichalcogenide heterostructures (4 pages) .....                                                   | 153314 |
| C. Kreis, S. Werth, R. Adelung, L. Kipp, M. Skibowski, D. Voß, P. Krüger, A. Mazur, and J. Pollmann                                      |        |
| Transmission of longitudinal optical phonons through a barrier in uniaxial crystals (4 pages) .....                                      | 153315 |
| B. C. Lee, SeGi Yu, K. W. Kim, M. A. Strosio, and M. Dutta                                                                               |        |

**Surface physics, low-dimensional systems, and related topics**

|                                                                                                                             |        |
|-----------------------------------------------------------------------------------------------------------------------------|--------|
| Electronic properties and ideal tensile strength of MoSe nanowires (4 pages) .....                                          | 153401 |
| Filipe J. Ribeiro, David J. Roundy, and Marvin L. Cohen                                                                     |        |
| Quantum conductance in silver nanowires: Correlation between atomic structure and transport properties (4 pages) .....      | 153402 |
| V. Rodrigues, J. Bettini, A. R. Rocha, L. G. C. Rego, and D. Ugarte                                                         |        |
| Origin of combination frequencies in quantum magnetization oscillations of two-dimensional multiband metals (4 pages) ..... | 153403 |
| Thierry Champel                                                                                                             |        |

|                                                                                                                                                                             |        |
