## BRIEF REPORTS

### Electronic structure: wide-band, narrow-band, and strongly correlated systems

|                                                                                                            |        |
|------------------------------------------------------------------------------------------------------------|--------|
| Dielectric relaxation in calcite by piezostimulated depolarization-current spectroscopy (3 pages) .....    | 033101 |
| J. Grammatikakis, M. Manolopoulos, and A. N. Papathanassiou                                                |        |
| Intrinsic localized states and nonlinear excitations of Bloch electrons in electric fields (4 pages) ..... | 033102 |
| W. M. Liu, J. Q. Liang, and S. T. Chui                                                                     |        |

### Semiconductors I: bulk

|                                                                                                                       |        |
|-----------------------------------------------------------------------------------------------------------------------|--------|
| Direct evidence of <i>p</i> -type SrTiO <sub>3</sub> by high-resolution x-ray absorption spectroscopy (4 pages) ..... | 033201 |
| T. Higuchi, T. Tsukamoto, K. Kobayashi, S. Yamaguchi, Y. Ishiwata, N. Sata, K. Hiramoto, M. Ishigame, and S. Shin     |        |
| 780-meV photoluminescence band in silver-doped silicon: Isotope effect and time-resolved spectroscopy (4 pages) ..... | 033202 |
| N. Q. Vinh, T. Gregorkiewicz, and K. Thonke                                                                           |        |
| Localized electronic states around stacking faults in silicon carbide (4 pages) .....                                 | 033203 |
| Hisao Iwata, Ulf Lindefelt, Sven Öberg, and Patrick R. Briddon                                                        |        |
| Band-gap and correlation effects in the organic semiconductor Alq <sub>3</sub> (4 pages) .....                        | 033204 |
| M. Knupfer, H. Peisert, and T. Schwieger                                                                              |        |
| Stacking fault effects in Mg-doped GaN (4 pages) .....                                                                | 033205 |
| T. M. Schmidt, R. H. Miwa, W. Orellana, and H. Chacham                                                                |        |

### Semiconductors II: surfaces, interfaces, microstructures, and related topics

|                                                                                                  |        |
|--------------------------------------------------------------------------------------------------|--------|
| Singular density of states of disordered Dirac fermions in chiral models (4 pages) .....         | 033301 |
| Shinsei Ryu and Yasuhiro Hatsugai                                                                |        |
| Mesoscopic Kondo resonance in a quantum dot connected to an Aharonov-Bohm ring (4 pages) .....   | 033302 |
| Kicheon Kang and Luis Craco                                                                      |        |
| Effective electro-optic constants of free-standing superlattices of any symmetry (4 pages) ..... | 033303 |
| B. Bêche and E. Gaviot                                                                           |        |
| Negative electron affinity material: LaS on InP (4 pages) .....                                  | 033304 |
| O. Eriksson, M. Cahay, and J. M. Wills                                                           |        |

|                                                                                                                                              |        |
|----------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Giant persistent currents in the open Aharonov-Bohm rings (4 pages) .....                                                                    | 033305 |
| J. Yi, J. H. Wei, Jongbae Hong, and Sung-Ik Lee                                                                                              |        |
| Energy structure of quantum rings in a magnetic field (4 pages) .....                                                                        | 033306 |
| J. Planelles, W. Jaskólski, and J. I. Aliaga                                                                                                 |        |
| Thermoelectric transport of composite fermions at $\nu = \frac{1}{2}$ and $\nu = \frac{3}{2}$ : A simple way of evaluating $p$ (4 pages) ... | 033307 |
| V. C. Karavolas and G. P. Triberis                                                                                                           |        |
| Influence of growth direction on order-disorder transition in $(\text{GaAs})_{1-x}(\text{Si}_2)_x$ alloys (4 pages) .....                    | 033308 |
| A. G. Rodriguez, H. Navarro-Contreras, and M. A. Vidal                                                                                       |        |
| Classical dynamics in a random magnetic field (4 pages) .....                                                                                | 033309 |
| Staffan Grundberg and Jørgen Rammer                                                                                                          |        |
| Effect of two-level systems on the spectral density of universal conductance fluctuations in doped Si (4 pages) .....                        | 033310 |
| Arindam Ghosh and A. K. Raychaudhuri                                                                                                         |        |
| Ab initio absorption spectra of CdSe clusters (4 pages) .....                                                                                | 033311 |
| M. Claudia Troparevsky, Leeor Kronik, and James R. Chelikowsky                                                                               |        |
| Surface roughening at the one-monolayer Sb/Si(100) interface (4 pages) .....                                                                 | 033312 |
| A. A. Saranin, A. V. Zotov, V. G. Kotlyar, V. G. Lifshits, O. Kubo, T. Harada, T. Kobayashi, N. Yamaoka, M. Katayama, and K. Oura            |        |
| Efficient acoustic phonon broadening in single self-assembled InAs/GaAs quantum dots (4 pages) .....                                         | 033313 |
| C. Kammerer, G. Cassaboïs, C. Voisin, C. Delalande, Ph. Roussignol, A. Lemaître, and J. M. Gérard                                            |        |
| Symmetry-forbidden Raman scattering from porous silicon quantum dots (4 pages) .....                                                         | 033314 |
| Md. N. Islam, R. N. Panda, A. Pradhan, and Satyendra Kumar                                                                                   |        |
| Conductivity of the classical two-dimensional electron gas (3 pages) .....                                                                   | 033315 |
| M. Hruska and B. Spivak                                                                                                                      |        |
| <b>Surface physics, low-dimensional systems, and related topics</b>                                                                          |        |
| Transmission studies of left-handed materials (4 pages) .....                                                                                | 033401 |
| P. Markoš and C. M. Soukoulis                                                                                                                |        |
| Weak localization and phase interference due to spin-orbit interaction in metal-doped carbon nanotubes (4 pages) .....                       | 033402 |
| Junji Haruyama, Izumi Takesue, and Tetsuro Hasegawa                                                                                          |        |
| Electric-field distribution near current contacts of anisotropic materials (3 pages) .....                                                   | 033403 |
| E. Slot, H. S. J. van der Zant, and R. E. Thorne                                                                                             |        |
| Direct observation of hindered eccentric rotation of an individual molecule: Cu-phthalocyanine on $\text{C}_{60}$ (4 pages) .....            | 033404 |
| M. Stöhr, Th. Wagner, M. Gabriel, B. Weyers, and R. Möller                                                                                   |        |
| Hot-complex-mediated abstraction and desorption of D adatoms by H on Si(100) (4 pages) .....                                                 | 033405 |
| E. Hayakawa, F. Khanom, T. Yoshifuku, S. Shimokawa, A. Namiki, and T. Ando                                                                   |        |
| Quantum treatment of H adsorbed on a Pt(111) surface (4 pages) .....                                                                         | 033406 |
| Gustav Källén and Göran Wahnström                                                                                                            |        |
| Spin-orbit splitting of the $L$ -gap surface state on Au(111) and Ag(111) (4 pages) .....                                                    | 033407 |
| G. Nicolay, F. Reinert, S. Hüfner, and P. Blaha                                                                                              |        |
| Superhard phase composed of single-wall carbon nanotubes (4 pages) .....                                                                     | 033408 |
| M. Popov, M. Kyotani, R. J. Nemanich, and Y. Koga                                                                                            |        |
| Role of molecular self-assembling in Langmuir-Blodgett film growth (4 pages) .....                                                           | 033409 |
