## BRIEF REPORTS

### Structure, structural phase transitions, mechanical properties, defects, etc.

|                                                                                                                                  |        |
|----------------------------------------------------------------------------------------------------------------------------------|--------|
| $^1\text{H}$ NMR– $^{75}\text{As}$ NQR cross relaxation study of the ferroelastic phase in $\text{TiH}_2\text{AsO}_4$ (3 pages)  | 012101 |
| Cheol Eui Lee, C. H. Lee, K. W. Lee, and E. M. Lee                                                                               |        |
| Mechanism of occurrence of soft mode at proper ferroelastic phase transitions (4 pages)                                          | 012102 |
| N. N. Ovsyuk and S. V. Goryainov                                                                                                 |        |
| First-principles calculation of the melting curve and Hugoniot of tin (4 pages)                                                  | 012103 |
| S. Bernard and J. B. Maillet                                                                                                     |        |
| Periodic hole structure in a spin-chain ladder material $\text{Sr}_{14}\text{Cu}_{24}\text{O}_{41}$ (4 pages)                    | 012104 |
| T. Fukuda, J. Mizuki, and M. Matsuda                                                                                             |        |
| <i>In situ</i> observation of a fluid amorphous phase formed in isolated nanometer-sized particles in the Sn-Bi system (4 pages) | 012105 |
| J. G. Lee, H. Mori, and H. Yasuda                                                                                                |        |
| Microstructural analysis of twinned $\beta\text{-Gd}_5\text{Si}_2\text{Ge}_2$ (3 pages)                                          | 012106 |
| John Meyers, Scott Chumbley, Wonyoung Choe, and Gordon J. Miller                                                                 |        |

### Inhomogeneous, disordered, and partially ordered systems

|                                                                                                                                                            |        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Low-temperature specific heat of amorphous, orientational glass, and crystal phases of ethanol (4 pages)                                                   | 012201 |
| C. Talón, M. A. Ramos, and S. Vieira                                                                                                                       |        |
| Fluctuations and scaling of inverse participation ratios in random binary resonant composites (4 pages)                                                    | 012202 |
| Y. Gu, K. W. Yu, and Z. R. Yang                                                                                                                            |        |
| Using Re-W $\sigma$ -phase first-principles results in the Bragg-Williams approximation to calculate finite-temperature thermodynamic properties (4 pages) | 012203 |
| Suzana G. Fries and Bo Sundman                                                                                                                             |        |
| Scaling of the localization length in linear electronic and vibrational systems with long-range correlated disorder (4 pages)                              | 012204 |
| Stefanie Russ                                                                                                                                              |        |
| Quantum percolation in a two-dimensional finite binary alloy: Interplay between the strength of disorder and alloy composition (4 pages)                   | 012205 |
| H. N. Nazareno, P. E. de Brito, and E. S. Rodrigues                                                                                                        |        |

|                                                                                                                                                                               |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Cauchy-like relation between elastic constants in amorphous materials ( <i>4 pages</i> ) .....                                                                                | 012206 |
| J. K. Krüger, J. Baller, T. Britz, A. le Coutre, R. Peter, R. Bactavatchalou, and J. Schreiber                                                                                |        |
| <b>Dynamics, dynamical systems, lattice effects, quantum solids, etc.</b>                                                                                                     |        |
| Correlation of relaxation dynamics and conductivity spectra with cation constriction in ion-conducting glasses ( <i>4 pages</i> ) .....                                       | 012301 |
| A. Pan and A. Ghosh                                                                                                                                                           |        |
| Raman scattering by spin excitations in $\alpha$ -MnSe ( <i>3 pages</i> ) .....                                                                                               | 012302 |
| A. Milutinović, N. Tomić, S. Dević, P. Milutinović, and Z. V. Popović                                                                                                         |        |
| Mass renormalization in the Su-Schrieffer-Heeger model ( <i>4 pages</i> ) .....                                                                                               | 012303 |
| Marco Zoli                                                                                                                                                                    |        |
| <b>Magnetism</b>                                                                                                                                                              |        |
| High-temperature magnetic behavior of FeCo-based nanocrystalline alloys ( <i>4 pages</i> ) .....                                                                              | 012401 |
| C. Gómez-Polo, J. I. Pérez-Landazabal, V. Recarte, J. Campo, P. Marín, M. López, A. Hernando, and M. Vázquez                                                                  |        |
| Curie temperature trends in (III,Mn)V ferromagnetic semiconductors ( <i>4 pages</i> ) .....                                                                                   | 012402 |
| T. Jungwirth, Jürgen König, Jairo Sinova, J. Kučera, and A. H. MacDonald                                                                                                      |        |
| Exact time autocorrelation function of the $N$ -spin classical Heisenberg equivalent neighbor model ( <i>4 pages</i> ) .....                                                  | 012403 |
| Richard A. Klemm and Marco Ameduri                                                                                                                                            |        |
| Ferromagnetism in the Hubbard model with a generalized type of hopping ( <i>4 pages</i> ) .....                                                                               | 012404 |
| Pavol Farkašovský                                                                                                                                                             |        |
| Thermodynamic properties of weakly anisotropic disordered magnetic chains in the large- $S$ limit ( <i>4 pages</i> ) ...                                                      | 012405 |
| I. Avgin and D. L. Huber                                                                                                                                                      |        |
| Surface half-metallicity of CrAs in the zinc-blende structure ( <i>4 pages</i> ) .....                                                                                        | 012406 |
| I. Galanakis                                                                                                                                                                  |        |
| Monte Carlo simulations of Ising-like phase transitions in the three-dimensional Ashkin-Teller model ( <i>4 pages</i> ) .....                                                 | 012407 |
| G. Musiał, L. Dębski, and G. Kamieniarz                                                                                                                                       |        |
| Saturated ferromagnetism and magnetization deficit in optimally annealed $\text{Ga}_{1-x}\text{Mn}_x\text{As}$ epilayers ( <i>4 pages</i> ) .....                             | 012408 |
| S. J. Potashnik, K. C. Ku, R. Mahendiran, S. H. Chun, R. F. Wang, N. Samarth, and P. Schiffer                                                                                 |        |
| Magnetic transition in $\text{Er}_{1-x}\text{Y}_x\text{Co}_2$ ( $x=0, 0.4$ ) single crystals probed by neutron scattering in magnetic fields ( <i>4 pages</i> ) .....         | 012409 |
| A. Podlesnyak, Th. Strässle, J. Schefer, A. Furrer, A. Mirmelstein, A. Pirogov, P. Markin, and N. Baranov                                                                     |        |
| Measurement of spin polarization of single crystals of $\text{La}_{0.7}\text{Sr}_{0.3}\text{MnO}_3$ and $\text{La}_{0.6}\text{Sr}_{0.4}\text{MnO}_3$ ( <i>4 pages</i> ) ..... | 012410 |
| Y. Ji, C. L. Chien, Y. Tomioka, and Y. Tokura                                                                                                                                 |        |
| Temperature-dependent magnetic Compton scattering study of spin moments in $\text{Ce}(\text{Fe}_{0.96}\text{Ru}_{0.04})_2$ ( <i>4 pages</i> ) ...                             | 012411 |

## ARTICLES

**Structure, structural phase transitions, mechanical properties, defects, etc.**

- Raman spectroscopy of  $\text{CaRuO}_3$  (4 pages) ..... 014101  
 N. Kolev, C. L. Chen, M. Gospodinov, R. P. Bontchev, V. N. Popov, A. P. Litvinchuk, M. V. Abrashev,  
 V. G. Hadjiev, and M. N. Iliev
- Ternary rare-earth nickel arsenides of  $\text{Sm}_{20}\text{Ni}_{42}\text{P}_{31}$ -type structure: Structural chemistry and physical  
 properties (11 pages) ..... 014102  
 V. Babizhetskyy, C. Le Sénéchal, R. Guérin, O. Isnard, and K. Hiebl
- Ortho-para conversion of hydrogen at high pressures (18 pages) ..... 014103  
 Mikhail A. Strzhemechny, Russell J. Hemley, Ho-kwang Mao, Alexander F. Goncharov, and  
 Jon H. Eggert
- Elastic softening due to polar clusters in  $\text{Pb}_{1-x}\text{Ca}_x\text{TiO}_3$  ferroelectric ceramics above the phase-transition  
 temperature (7 pages) ..... 014104  
 B. Jiménez and R. Jiménez
- Consequences of helium production from the radioactive decay of tritium on the properties of palladium tritide  
 (4 pages) ..... 014105  
 Raju P. Gupta and Michèle Gupta
- In situ* x-ray absorption studies of electrochemically induced phase changes in lithium-doped InSb  
 (12 pages) ..... 014106  
 H. Tostmann, A. J. Kropf, C. S. Johnson, J. T. Vaughey, and M. M. Thackeray
- Raman spectra of shocked diamond single crystals (9 pages) ..... 014107  
 J. Michael Boteler and Y. M. Gupta
- Shock-wave-induced optical emission from sapphire in the stress range 12 to 45 GPa: Images and spectra  
 (11 pages) ..... 014108  
 D. E. Hare, N. C. Holmes, and D. J. Webb
- F center in  $\text{BaF}_2$ : Diffuse excited state (8 pages) ..... 014109  
 J. M. Vail, W. A. Coish, H. He, and A. Yang
- Equation of state and the Hugoniot of laser shock-compressed deuterium: Demonstration of a basis-function-  
 free method for quantum calculations (4 pages) ..... 014110  
 M. W. C. Dharma-wardana and François Perrot
- Universal mechanism of discontinuity of commensurate-incommensurate transitions in three-dimensional  
 solids: Strain dependence of soliton self-energy (8 pages) ..... 014111  
 A. P. Levanyuk, S. A. Minyukov, and A. Cano
- Influence of defects on the *h*-BN to *c*-BN transformation (5 pages) ..... 014112  
 T. E. Mosuang and J. E. Lowther
- Influence of defects on the critical behavior at the 105 K structural phase transition of  $\text{SrTiO}_3$ : On the origin  
 of the two length scale critical fluctuations (14 pages) ..... 014113  
 H. Hünnefeld, T. Niemöller, J. R. Schneider, U. Rütt, S. Rodewald, J. Fleig, and G. Shirane

**Inhomogeneous, disordered, and partially ordered systems**

- Test of transferability of the evanescent core pseudopotential from solid state to liquid state (5 pages) ..... 014201  
 R. Albaki, J.-F. Wax, and J.-L. Bretonnet
- Structural disorder in liquid and solid CuI at high temperature probed by x-ray absorption spectroscopy  
 (11 pages) ..... 014202  
 Angela Trapananti, Andrea Di Cicco, and Marco Minicucci
- Dielectric response of CO and Ar condensed into mesoporous glass (7 pages) ..... 014203  
 D. Wallacher, V. P. Soprunyuk, A. V. Kityk, and K. Knorr
