THIRD SERIES, VOLUME 68, NUMBER 8

CONTENTS

AUGUST 2003-15(II)

## RAPID COMMUNICATIONS

### Electronic structure: wide-band, narrow-band, and strongly correlated systems

- Indications of coherence-incoherence crossover in layered metallic transport (*4 pages*) ..... 081101(R)  
Urban Lundin and Ross H. McKenzie

### Semiconductors I: bulk

- Effect of bulk inversion asymmetry on the Datta-Das transistor (*4 pages*) ..... 081201(R)  
A. Łusakowski, J. Wróbel, and T. Dietl
- Creation of supercooled exciton gas and transformation to electron-hole droplets in diamond (*4 pages*) ..... 081202(R)  
Masaya Nagai, Ryo Shimano, Kenji Horiuchi, and Makoto Kuwata-Gonokami
- Ferromagnetism in diluted magnetic semiconductors: A comparison between *ab initio* mean-field, RPA, and Monte Carlo treatments (*4 pages*) ..... 081203(R)  
G. Bouzerar, J. Kudrnovský, L. Bergqvist, and P. Bruno
- Charge transport in doped organic semiconductors (*4 pages*) ..... 081204(R)  
Yulong Shen, Kenneth Diest, Man Hoi Wong, Bing R. Hsieh, David H. Dunlap, and George G. Malliaras

### Semiconductors II: surfaces, interfaces, microstructures, and related topics

- Combined electron-hole dynamics at UV-irradiated ultrathin Si-SiO<sub>2</sub> interfaces probed by second harmonic generation (*4 pages*) ..... 081301(R)  
Vasiliy Fomenko and Eric Borguet
- Spin-galvanic effect due to optical spin orientation in *n*-type GaAs quantum well structures (*4 pages*) ..... 081302(R)  
S. D. Ganichev, Petra Schneider, V. V. Bel'kov, E. L. Ivchenko, S. A. Tarasenko, W. Wegscheider, D. Weiss, D. Schuh, B. N. Murdin, P. J. Phillips, C. R. Pidgeon, D. G. Clarke, M. Merrick, P. Murzyn, E. V. Bregulin, and W. Prettl
- Magnetic field in-plane quantization and tuning of population inversion in a THz superlattice quantum cascade laser (*4 pages*) ..... 081303(R)  
Jesse Alton, Stefano Barbieri, John Fowler, Harvey E. Beere, John Muscat, Edmund H. Linfield, David A. Ritchie, Giles Davies, Rüdiger Köhler, and Alessandro Tredicucci

## ARTICLES

### Electronic structure: wide-band, narrow-band, and strongly correlated systems

- Photoelectron spectroscopy study of PuN (*6 pages*) ..... 085101  
L. Havela, F. Wastin, J. Rebizant, and T. Gouder

|                                                                                                                                                                                            |        |

PHYSICAL REVIEW B

THIRD SERIES, VOLUME 68, NUMBER 8

AUGUST 2003-15(II)

|                                                                                                                                                                                                    |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Unambiguous optical characterization of nanocolloidal gold films (6 pages) .....                                                                                                                   | 085406 |
| Herbert Wormeester, E. Stefan Kooij, and Bene Poelsema                                                                                                                                             |        |
| Electronic evidence of asymmetry in the Si(111) $\sqrt{3} \times \sqrt{3}$ -Ag structure (5 pages) .....                                                                                           | 085407 |
| Iwao Matsuda, Harumo Morikawa, Canhua Liu, Satoru Ohuchi, Shuji Hasegawa, Taichi Okuda, Toyohiko Kinoshita, Carlo Ottaviani, Antonio Cricenti, Marie D'angelo, Patrick Soukiassian, and Guy Le Lay |        |
| Genetic-algorithms search for global minima of aluminum clusters using a Sutton-Chen potential (9 pages) .....                                                                                     | 085408 |
| Jan-Ole Joswig and Michael Springborg                                                                                                                                                              |        |
| Short-range wetting at liquid gallium-bismuth alloy surfaces: X-ray measurements and square-gradient theory (14 pages) .....                                                                       | 085409 |
| Patrick Huber, Oleg Shpyrko, Peter S. Pershan, Ben Ocko, Elaine DiMasi, and Moshe Deutsch                                                                                                          |        |
| Cluster expansion method for adsorption: Application to hydrogen chemisorption on graphene (7 pages) .....                                                                                         | 085410 |
| Marcel H. F. Sluiter and Yoshiyuki Kawazoe                                                                                                                                                         |        |
| Dynamics of vibrational excitation in the C <sub>60</sub> single-molecule transistor (6 pages) .....                                                                                               | 085411 |
| Aniruddha Chakraborty, Keshav Kumar, and K. L. Sebastian                                                                                                                                           |        |
| Thermodynamics of yield in boron nitride nanotubes (8 pages) .....                                                                                                                                 | 085412 |
| Traian Dumitrică, Holger F. Bettinger, Gustavo E. Scuseria, and Boris I. Yakobson                                                                                                                  |        |
| Dephasing of electrons in mesoscopic metal wires (15 pages) .....                                                                                                                                  | 085413 |
| F. Pierre, A. B. Gougam, A. Anthore, H. Pothier, D. Esteve, and Norman O. Birge                                                                                                                    |        |
| Electron excitations in the scattering of hydrogen and rare gas ions on Cu (9 pages) .....                                                                                                         | 085414 |
| O. Grizzi, E. A. Sánchez, S. Lacombe, and V. A. Esaulov                                                                                                                                            |        |
| Organic-template-directed nucleation of strontium fluoride and barium fluoride: Epitaxy and strain (6 pages) .....                                                                                 | 085415 |
| Jan Kmetko, Chungjong Yu, Guennadi Evmenenko, Sumit Kewalramani, and Pulak Dutta                                                                                                                   |        |
| CO adsorption on the CO-precovered Pt(111) surface characterized by density-functional theory (9 pages) .....                                                                                      | 085416 |
| J. A. Steckel, A. Eichler, and J. Hafner                                                                                                                                                           |        |
