THIRD SERIES, VOLUME 72, NUMBER 17

CONTENTS

NOVEMBER 2005-1(I)

## BRIEF REPORTS

### Structure, structural phase transitions, mechanical properties, defects

- Coercive field dependence of the grain size of ferroelectric films (3 pages) ..... 172101  
J. S. Liu, S. R. Zhang, H. Z. Zeng, C. T. Yang, and Y. Yuan
- Ab initio* calculation of elastic properties of solid He under pressure (4 pages) ..... 172102  
Z. Nabi, L. Vitos, B. Johansson, and R. Ahuja
- Ab initio* study of sodium ordering in  $\text{Na}_{0.75}\text{CoO}_2$  and its relation to  $\text{Co}^{3+}/\text{Co}^{4+}$  charge ordering (4 pages) ..... 172103  
Y. S. Meng, A. Van der Ven, M. K. Y. Chan, and G. Ceder
- Geometric isotope effect on hydrogen-bond structure: A semiquantal analysis (4 pages) ..... 172104  
Koji Ando
- Compressibility of highly coordinated metal oxynitrides: LDA calculations (4 pages) ..... 172105  
J. E. Lowther
- $\text{PbTiO}_3$  addition and internal dynamics in  $\text{Pb}(\text{Zn}_{1/3}\text{Nb}_{2/3})\text{O}_3$  crystal studied by Raman spectroscopy (4 pages) ..... 172106  
Oleksiy Svitelskiy, Duangmanee La-Orattapong, Jean Toulouse, W. Chen, and Z.-G. Ye
- Compositional changes of the first sharp diffraction peak in binary selenide glasses (4 pages) ..... 172107  
E. Bychkov, C. J. Benmore, and D. L. Price

### Inhomogeneous, disordered, and partially ordered systems

- Simulation of friction in nanoconfined fluids for an arbitrarily low shear rate (4 pages) ..... 172201  
Jerome Delhommelle and Peter T. Cummings

### Magnetism

- High-temperature anti-Invar behavior of  $\gamma$ -Fe precipitates in  $\text{Fe}_x\text{Cu}_{100-x}$  solid solutions: Ferromagnetic phases (4 pages) ..... 172401  
S. L. Palacios, R. Iglesias, D. Martínez-Blanco, P. Gorria, M. J. Pérez, J. A. Blanco, A. Hernando, and K. Schwarz
- Giant heat dissipation at the low-temperature reversible-irreversible transition in  $\text{Gd}_5\text{Ge}_4$  (4 pages) ..... 172402  
Fèlix Casanova, Amílcar Labarta, and Xavier Batlle
- Field-induced order-disorder transition in the quasi-one-dimensional anisotropic antiferromagnet  $\text{BaCo}_2\text{V}_2\text{O}_8$  (4 pages) ..... 172403  
Zhangzhen He, Tomoyasu Taniyama, Tôru Kyômen, and Mitsuru Itoh

|                                                                                                                                                                                           |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Exact ground states for spin-1 systems with spin-orbital coupling ( <i>4 pages</i> ) . . . . .                                                                                            | 172404 |
| Shu Chen and Yupeng Wang                                                                                                                                                                  |        |
| Persistent spin current in mesoscopic ferrimagnetic spin ring ( <i>4 pages</i> ) . . . . .                                                                                                | 172405 |
| Jing-Nuo Wu, Ming-Che Chang, and Min-Fong Yang                                                                                                                                            |        |
| Green's function method applied to the crossover of the one-dimensional quantum anisotropic Heisenberg ferromagnet ( <i>4 pages</i> ) . . . . .                                           | 172406 |
| Yuan Chen, Zhao-Ming Wang, and Ai-Yuan Hu                                                                                                                                                 |        |
| Temperature dependence of the optical phonons in SrMnO <sub>3</sub> manganite: Evidence of a low-temperature structural transition in the hexagonal compound ( <i>4 pages</i> ) . . . . . | 172407 |
| A. Sacchetti, M. Baldini, F. Crispoldi, P. Postorino, P. Dore, A. Nucara, C. Martin, and A. Maignan                                                                                       |        |
| High-order coupled cluster calculations via parallel processing: An illustration for CaV <sub>4</sub> O <sub>9</sub> ( <i>4 pages</i> ) . . . . .                                         | 172408 |
| D. J. J. Farnell, J. Schulenburg, J. Richter, and K. A. Gernoth                                                                                                                           |        |
| Scaling of excitations in dimerized and frustrated spin- $\frac{1}{2}$ chains ( <i>4 pages</i> ) . . . . .                                                                                | 172409 |
| D. Controzzi, C. Degli Esposti Boschi, F. Ortolani, and S. Pasini                                                                                                                         |        |
| Spin dynamics of magnetic nanoparticles: Beyond Brown's theory ( <i>4 pages</i> ) . . . . .                                                                                               | 172410 |
| U. Nowak, O. N. Mryasov, R. Wieser, K. Guslienko, and R. W. Chantrell                                                                                                                     |        |
| Domain-wall resonance induced by spin-polarized current in metal thin films with stripe structures ( <i>4 pages</i> ) . . . . .                                                           | 172411 |
| Peng-Bin He, X. C. Xie, and W. M. Liu                                                                                                                                                     |        |
| Coexistence of a nearly spin-singlet state and antiferromagnetic long-range order in quantum spin system Cu <sub>2</sub> CdB <sub>2</sub> O <sub>6</sub> ( <i>4 pages</i> ) . . . . .     | 172412 |
| Masashi Hase, Masanori Kohno, Hideaki Kitazawa, Osamu Suzuki, Kiyoshi Ozawa, Giyu Kido, Motoharu Imai, and Xiao Hu                                                                        |        |
| Field-dependent Hall effect in single-crystal heavy-fermion YbAgGe below 1 K ( <i>4 pages</i> ) . . . . .                                                                                 | 172413 |
| S. L. Bud'ko, V. Zapf, E. Morosan, and P. C. Canfield                                                                                                                                     |        |
| High-temperature series expansion of the Helmholtz free energy of the quantum spin- <i>S</i> XYZ chain ( <i>4 pages</i> ) . . . . .                                                       | 172414 |
| Onofre Rojas, S. M. de Souza, E. V. Corrêa Silva, and M. T. Thomaz                                                                                                                        |        |
| <b>Superfluidity and superconductivity</b>                                                                                                                                                |        |
| Magnetoelectric effect in dirty superconductors with broken mirror symmetry ( <i>4 pages</i> ) . . . . .                                                                                  | 172501 |
| Victor M. Edelstein                                                                                                                                                                       |        |
| Structural and elastic properties of MgB <sub>2</sub> under high pressure ( <i>4 pages</i> ) . . . . .                                                                                    | 172502 |
| Hai-Yan Wang, Xiang-Rong Chen, Wen-Jun Zhu, and Yan Cheng                                                                                                                                 |        |
| Dynamics of stripe patterns in type-I superconductors subject to a rotating field ( <i>4 pages</i> ) . . . . .                                                                            | 172503 |
| M. Menghini and R. J. Wijngaarden                                                                                                                                                         |        |
| Electrons and phonons in YbC <sub>6</sub> : Density functional calculations and angle-resolved photoemission measurements ( <i>4 pages</i> ) . . . . .                                    | 172504 |
| I. I. Mazin and S. L. Molodtsov                                                                                                                                                           |        |
| Vortex-phonon interaction ( <i>4 pages</i> ) . . . . .                                                                                                                                    | 172505 |
| Evgeny Kozik and Boris Svistunov                                                                                                                                                          |        |

|                                                                                                                         |        |
