PHYSICAL REVIEW B THIRD SERIES, VOLUME 77, NUMBER 3 JANUARY 2008-15(I)

Asymmetry of adsorption of oxygen at wurtzite AlN (0001) and $(000\bar{1})$ surfaces: First-principles calculations *(4 pages)* 033302
Honggang Ye, Guangde Chen, Youzhang Zhu, and Su-Huai Wei

Decoherence of a charge qubit embedded inside a suspended phonon cavity *(4 pages)* 033303
Y. Y. Liao, Y. N. Chen, W. C. Chou, and D. S. Chuu

Comparison of quantization of charge transport in periodic and open pumps *(3 pages)* 033304
G. M. Graf and G. Ortelli

Fano resonance in a two-level quantum dot side-coupled to leads *(4 pages)* 033305
W.-R. Lee, Jaeuk U. Kim, and H.-S. Sim

Exciton condensate at a total filling factor of one in Corbino two-dimensional electron bilayers *(4 pages)* 033306
L. Tiemann, J. G. S. Lok, W. Dietsche, K. von Klitzing, K. Muraki, D. Schuh, and W. Wegscheider

Surface physics, nanoscale physics, low-dimensional systems

Electron-phonon coupling and longitudinal mechanical-mode cooling in a metallic nanowire *(4 pages)* 033401
F. W. J. Hekking, A. O. Niskanen, and J. P. Pekola

Exploration of complex multilayer film growth morphologies: STM analysis and predictive atomistic modeling for Ag on Ag(111) *(4 pages)* 033402
Maozhi Li, P.-W. Chung, E. Cox, C. J. Jenks, P. A. Thiel, and J. W. Evans

Electronic flexoelectricity in low-dimensional systems *(4 pages)* 033403
Sergei V. Kalinin and Vincent Meunier

Inner-shell charging of multiwalled carbon nanotubes *(4 pages)* 033404
M. Zdrojek, T. Heim, D. Brunel, A. Mayer, and T. Mélin

First-principles study of interaction of molecular hydrogen with Li-doped carbon nanotube peapod structures *(4 pages)* 033405
Li Chen, Yiming Zhang, Nikhil Koratkar, Puru Jena, and Saroj K. Nayak

Exciton dephasing and multiexciton recombinations in a single carbon nanotube *(4 pages)* 033406
Kazunari Matsuda, Tadashi Inoue, Yoichi Murakami, Shigeo Maruyama, and Yoshihiko Kanemitsu

Origins of $1/f$ noise in individual semiconducting carbon nanotube field-effect transistors *(4 pages)* 033407
David Tobias, Masa Ishigami, Alexander Tselev, Paola Barbara, Ellen D. Williams, Christopher J. Lobb, and Michael S. Fuhrer

Interplay between magnetism and structure in atomic-size Pd contacts: *Ab initio* studies *(4 pages)* 033408
K. M. Smelova, D. I. Bazhanov, V. S. Stepanyuk, W. Hergert, A. M. Saletsky, and P. Bruno

Exact low-temperature results for transport properties of the interacting resonant level model *(4 pages)* 033409
E. Boulat and H. Saleur

Renormalization group approach to two-dimensional Coulomb interacting Dirac fermions with random gauge potential *(4 pages)* 033410
Oskar Vafek and Matthew J. Case

Aluminum nanowires: Influence of work hardening on conductance histograms *(4 pages)* 033411
I. K. Yanson, O. I. Shklyarevskii, J. M. van Ruitenbeek, and S. Speller

Defect-induced circulating thermal current in graphene with nanosized width *(4 pages)* 033412
Masahiro Morooka, Takahiro Yamamoto, and Kazuyuki Watanabe
