PHYSICAL REVIEW B

THIRD SERIES, VOLUME 78, NUMBER 11

SEPTEMBER 2008-15(I)

Efficient iterative method for calculations of dielectric matrices (4 pages)	113303
Hugh F. Wilson, François Gygi, and Giulia Galli	
Proposal for the direct optical detection of pure spin currents in semiconductors (4 pages)	113304
Jiang-Tao Liu and Kai Chang	
From insulator to quantum Hall liquid at low magnetic fields (4 pages)	113305
Tsai-Yu Huang, C.-T. Liang, Gil-Ho Kim, C. F. Huang, Chao-Ping Huang, Jyun-Ying Lin, Hsi-Sheng Goan, and D. A. Ritchie	
Tunable magnetic-field asymmetry of nonlinear mesoscopic transport: Field-effect controlled backscattering in a quantum wire (4 pages)	113306
D. Hartmann, L. Worschech, and A. Forchel	
Vibrational coherence in electron spin resonance in nanoscale oscillators (4 pages)	113307
J. Fransson and Jian-Xin Zhu	
Density functional study of ferromagnetism in Mn at GaN/Al _x Ga _{1-x} N interfaces (4 pages)	113308
P. Larson, Z. S. Popović, and S. Satpathy	
Spin memristive systems: Spin memory effects in semiconductor spintronics (4 pages)	113309
Yu. V. Pershin and M. Di Ventra	
Theory of diamagnetism in an asymmetrical vertical quantum dot molecule (4 pages)	113310
O. Voskoboynikov	
Surface physics, nanoscale physics, low-dimensional systems	
Atomically resolved force microscopy images of complex surface unit cells: Ultrathin alumina film on NiAl(110) (4 pages)	113401
G. H. Simon, T. König, M. Nilus, H.-P. Rust, M. Heyde, and H.-J. Freund	
Towards a theoretical description of molecular junctions in the Coulomb blockade regime based on density functional theory (4 pages)	113402
R. Stadler, V. Geskin, and J. Cornil	
Segregation of Cr impurities at bcc iron surfaces: First-principles calculations (4 pages)	113403
Adam Kiejna and Elwira Wachowicz	
Mechanism of fullerene hydrogenation by polyamines: <i>Ab initio</i> density functional calculations (4 pages)	113404
Eunja Kim, Philippe F. Weck, Savas Berber, and David Tománek	
Critical dimension where the macroscopic definition of refractive index can be applied at a nanometric scale (4 pages)	113405
Vincent LeBihan, Anne Pillonnet, David Amans, Gilles Ledoux, Olivier Marty, and Christophe Dujardin	
Growth of Co nanostructures on Cu(110): Atomic-scale simulations (4 pages)	113406
Oleg V. Stepanyuk, Nikolay N. Negulyaev, Alexander M. Saletsky, and Wolfram Hergert	
Raman spectra of misoriented bilayer graphene (4 pages)	113407
P. Poncharal, A. Ayari, T. Michel, and J.-L. Sauvajol	
Adsorbate hopping via vibrational-mode coupling induced by femtosecond laser pulses (4 pages)	113408
H. Ueba, M. Hayashi, M. Paulsson, and B. N. J. Persson	
Exciton energy transfer between the inner and outer tubes in double-walled carbon nanotubes (4 pages)	113409
Hideki Hirori, Kazunari Matsuda, and Yoshihiko Kanemitsu	

(Continued)
