

Semiconductors I: bulk

Vibrational mode shifts as a measure of local strain in the dilute nitride semiconductor alloy $\text{GaN}_x\text{As}_{1-x}$ (4 pages)	153201
J. Buckeridge, A. M. Teweldeberhan, and S. Fahy	
Spin-orbit coupling in singly charged π -conjugated polymers (4 pages)	153202
J. Rybicki and M. Wohlgenannt	
Pressure variation of the valence band width in Ge: A self-consistent GW study (4 pages)	153203
P. Modak, A. Svane, N. E. Christensen, T. Kotani, and M. van Schilfgaarde	

Semiconductors II: surfaces, interfaces, microstructures, and related topics

Optically induced energy and spin transfer in nonresonantly coupled pairs of self-assembled CdTe/ZnTe quantum dots (4 pages)	153301
T. Kazimierzczuk, J. Suffczyński, A. Golnik, J. A. Gaj, P. Kossacki, and P. Wojnar	
Real-time diagrammatic Monte Carlo for nonequilibrium quantum transport (4 pages)	153302
Marco Schiró and Michele Fabrizio	
Non-Kondo zero-bias anomaly in quantum wires (4 pages)	153303
T.-M. Chen, A. C. Graham, M. Pepper, I. Farrer, and D. A. Ritchie	
Thermal conductivity of semiconductor superlattices: Experimental study of interface scattering (4 pages)	153304
J.-Y. Duquesne	
Excitonic properties of strained triple quantum-ring molecules (4 pages)	153305
M. Tadić and F. M. Peeters	
Termination dependence of surface stacking at $4H\text{-SiC}(0001)\text{-}1\times 1$: Density functional theory calculations (4 pages)	153306
Hideyuki Hara, Yoshitada Morikawa, Yasuhisa Sano, and Kazuto Yamauchi	
Frequency doubling and memory effects in the spin Hall effect (4 pages)	153307
Yuriy V. Pershin and Massimiliano Di Ventra	
FeSb_2 : Prototype of huge electron-diffusion thermoelectricity (4 pages)	153308
Peijie Sun, Niels Oeschler, Simon Johnsen, Bo Brummerstedt Iversen, and Frank Steglich	

Surface physics, nanoscale physics, low-dimensional systems

Edge effects in bilayer graphene nanoribbons: <i>Ab initio</i> total-energy density functional theory calculations (4 pages)	153401
Matheus P. Lima, A. Fazzio, and Antônio J. R. da Silva	
Hydrogen adsorption configurations on Ge(001) probed with STM (4 pages)	153402
Amirmehdi Saeidi, Bene Poelsema, and Harold J. W. Zandvliet	
Eigenstate symmetries and information transfer in parabolic quantum reflectors (4 pages)	153403
C. Trallero-Giner, V. Lopez-Richard, S. E. Ulloa, and G. E. Marques	
Transmission resonance in a composite plasmonic structure (4 pages)	153404
Xiao-gang Yin, Cheng-ping Huang, Qian-jin Wang, and Yong-yuan Zhu	
Coupling between localized resonance and excitation of surface waves in metal hole arrays (4 pages)	153405
Fumiaki Miyamaru and Mitsuo Wada Takeda
