

Magnetic polaron bound to the positive muon in SmS: Exchange-driven formation of a mixed-valence state (4 pages)	193205
Vyacheslav G. Storchak, Jess H. Brewer, Donald J. Arseneau, Scott L. Stubbs, Oleg E. Parfenov, Dmitry G. Eshchenko, Elvezio Morenzoni, and Tel'man G. Aminov	
Semiconductors II: surfaces, interfaces, microstructures, and related topics	
Nanoelectromechanical spin injector with large current signal at room temperature (4 pages)	193301
Rui-Qiang Wang, L. Sheng, Baigeng Wang, and D. Y. Xing	
Diffraction refinement of localized antibonding at the Si(111) 7×7 surface (4 pages)	193302
J. Ciston, A. Subramanian, I. K. Robinson, and L. D. Marks	
Spin control in semiconductor quantum wires: Rashba and Dresselhaus interaction (4 pages)	193303
R. G. Nazmitdinov, K. N. Pichugin, and M. Valín-Rodríguez	
Dynamic nuclear polarization induced by breakdown of fractional quantum Hall effect (4 pages)	193304
M. Kawamura, M. Ono, Y. Hashimoto, S. Katsumoto, K. Hamaya, and T. Machida	
Resonance width oscillation in the biripple ballistic electron waveguide (4 pages)	193305
Hoshik Lee and L. E. Reichl	
Nucleation and initial growth in the semimetallic homoepitaxial system of Bi on Bi(111) (4 pages)	193306
G. Jnawali, Th. Wagner, H. Hattab, R. Möller, and M. Horn-von Hoegen	
Temperature-dependent electron Landé g factor and the interband matrix element of GaAs (4 pages)	193307
J. Hübner, S. Döhrmann, D. Hägele, and M. Oestreich	
Multiple beats of weakly confined excitons with inverted selection rule (4 pages)	193308
Hideki Yasuda and Hajime Ishihara	
Flux-induced semiconducting behavior of a quantum network (4 pages)	193309
Shreekantha Sil, Santanu K. Maiti, and Arunava Chakrabarti	
Inelastic scattering processes in reflection high-energy positron diffraction from a Si(111)- 7×7 surface (4 pages)	193310
Y. Fukaya, A. Kawasuso, and A. Ichimiya	
Sensitive detection of photoexcited carriers by resonant tunneling through a single quantum dot (4 pages)	193311
E. E. Vdovin, O. Makarovskiy, A. Patanè, L. Eaves, and Yu. N. Khanin	
Energy transfer between amorphous Si nanoclusters and Er^{3+} ions in a SiO_2 matrix (4 pages)	193312
D. Navarro-Urrios, A. Pitanti, N. Daldosso, F. Gourbilleau, R. Rizk, B. Garrido, and L. Pavesi	
Surface physics, nanoscale physics, low-dimensional systems	
Multiple configurations of the two excess $4f$ electrons on defective $\text{CeO}_2(111)$: Origin and implications (4 pages)	193401
Hui-Ying Li, Hai-Feng Wang, Xue-Qing Gong, Yang-Long Guo, Yun Guo, Guanzhong Lu, and P. Hu	
Electron beam excitation of left-handed surface electromagnetic waves at artificial interfaces (4 pages)	193402
Yu. O. Averkov, A. V. Kats, and V. M. Yakovenko	
Curvature effect on the interaction between folded graphitic surface and silver clusters (4 pages)	193403
A. F. Kemper, H-P. Cheng, N. Kébaïli, S. Benrezzak, M. Schmidt, A. Masson, and C. Bréchnignac
