## BRIEF REPORTS

### Structure, structural phase transitions, mechanical properties, defects

|                                                                                                                 |        |
|-----------------------------------------------------------------------------------------------------------------|--------|
| Intrinsic switching of polarization vortex in ferroelectric nanotubes ( <i>4 pages</i> ) .....                  | 012101 |
| Jie Wang and Marc Kamlah                                                                                        |        |
| Enhanced polarization fluctuation in KF-substituted BaTiO <sub>3</sub> single crystals ( <i>4 pages</i> ) ..... | 012102 |
| Shinya Tsukada, Yuuta Hiraki, Yukikuni Akishige, and Seiji Kojima                                               |        |
| First-principles modeling of hardness in transition-metal diborides ( <i>4 pages</i> ) .....                    | 012103 |
| Petr Lazar, Xing-Qiu Chen, and Raimund Podloucky                                                                |        |

### Inhomogeneous, disordered, and partially ordered systems

|                                                                                                     |        |
|-----------------------------------------------------------------------------------------------------|--------|
| Interface-driven conductance transition in nanostructured polymer networks ( <i>4 pages</i> ) ..... | 012201 |
| O. O. Adetunji, N.-R. Chiou, and A. J. Epstein                                                      |        |

### Dynamics, dynamical systems, lattice effects, quantum solids

|                                                                                       |        |
|---------------------------------------------------------------------------------------|--------|
| Phonon Hall thermal conductivity from the Green-Kubo formula ( <i>4 pages</i> ) ..... | 012301 |
| Jian-Sheng Wang and Lifa Zhang                                                        |        |

### Magnetism

|                                                                                                                                       |        |
|---------------------------------------------------------------------------------------------------------------------------------------|--------|
| Conservation and persistence of spin currents and their relation to the Lieb-Schulz-Mattis twist operators ( <i>4 pages</i> ) .....   | 012401 |
| N. Bray-Ali and Z. Nussinov                                                                                                           |        |
| Critical nucleation size of vortex core for domain wall transformation in soft magnetic thin film nanostrips ( <i>4 pages</i> ) ..... | 012402 |
| Youn-Seok Choi, Jun-Young Lee, Myoung-Woo Yoo, Ki-Suk Lee, Konstantin Yu. Guslienko, and Sang-Koog Kim                                |        |
| Effect of Jahn-Teller coupling on Curie temperature in the double-exchange model ( <i>4 pages</i> ) .....                             | 012403 |
| Vasil Michev and Naoum Karchev                                                                                                        |        |
