PHYSICAL REVIEW B THIRD SERIES, VOLUME 80, NUMBER 19 NOVEMBER 2009-15(I)

Electron spin decoherence in diluted magnetic quantum wells *(4 pages)* . . . . . 193205
P. M. Shmakov, A. P. Dmitriev, and V. Yu. Kachorovskii

**Semiconductors II: surfaces, interfaces, microstructures, and related topics**

Spin dynamics of electrons in the first excited subband of a high-mobility low-density two-dimensional electron system *(4 pages)* . . . . . 193301
Haihui Luo, Xuan Qian, Xuezhong Ruan, Yang Ji, and Vladimir Umansky

Interplay of dc current and microwaves in the magnetotransport of two-dimensional electron systems *(4 pages)* . . . . . 193302
Jesús Iñarrea

Electric-field induced modulation of the magneto-optical Kerr effect in a (Zn,Be,Mn)Se/GaAs spintronic device *(4 pages)* . . . . . 193303
J. H. Versluis, A. V. Kimel, A. Kirilyuk, P. Grabs, F. Lehmann, G. Schmidt, L. W. Molenkamp, and Th. Rasing

Quantum phase transition in Hall conductivity on an anisotropic kagome lattice *(4 pages)* . . . . . 193304
Shun-Li Yu, Jian-Xin Li, and Li Sheng

Effect of electron-electron scattering on magnetointersubband resistance oscillations of two-dimensional electrons in GaAs quantum wells *(4 pages)* . . . . . 193305
A. V. Goran, A. A. Bykov, A. I. Toropov, and S. A. Vitkalov

Statistics of quantum transfer of noninteracting fermions in multiterminal junctions *(3 pages)* . . . . . 193306
Dania Kambly and D. A. Ivanov

Adsorbate-mediated step transformations and terrace rearrangement of Si(100)-(2×1) *(4 pages)* . . . . . 193307
R. E. Butera, Yuji Suwa, Tomihiro Hashizume, and J. H. Weaver

**Surface physics, nanoscale physics, low-dimensional systems**

Coupling of graphene and surface plasmons *(4 pages)* . . . . . 193401
Norman J. Morgenstern Horing

Dithering-amplitude dependence of STM-regulated dynamic lateral force microscopy maps on Si(111)7×7 *(4 pages)* . . . . . 193402
Naruo Sasaki, Shigeki Kawai, and Hideki Kawakatsu

Electronic structure of H/Ge(111)1×1 studied by angle-resolved photoelectron spectroscopy *(4 pages)* . . . . . 193403
I. Razado-Colambo, H. M. Zhang, and R. I. G. Uhrberg

Spin-valve effect in zigzag graphene nanoribbons by defect engineering *(4 pages)* . . . . . 193404
Sankaran Lakshmi, Stephan Roche, and Gianaurelio Cuniberti

Trajectory fluctuations accompanying the manipulation of spherical nanoparticles *(4 pages)* . . . . . 193405
Akshata Rao, Marie-Luise Wille, Enrico Gnecco, Karine Mougin, and Ernst Meyer

Adhesion and peeling forces of carbon nanotubes on a substrate *(4 pages)* . . . . . 193406
Makoto Ishikawa, Ryuichi Harada, Naruo Sasaki, and Kouji Miura

Light-induced valley currents and magnetization in graphene rings *(4 pages)* . . . . . 193407
A. S. Moskalenko and J. Berakdar

Band-gap tunability of a (6,0) BN nanotube bundle under pressure: *Ab initio* calculations *(4 pages)* . . . . . 193408
S. S. Coutinho, V. Lemos, and S. Guerini

*(Continued)*

The editors and referees of PRB find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. B 77, 130001 (2008).
