PHYSICAL REVIEW B

THIRD SERIES, VOLUME 80, NUMBER 2

JULY 2009-1(II)

|                                                                                                                                                                                                                           |           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Hall effect in spinor condensates (4 pages) . . . . .                                                                                                                                                                     | 020407(R) |
| Mathieu Taillefumier, Eskil K. Dahl, Arne Brataas, and Walter Hofstetter                                                                                                                                                  |           |
| Perpendicular magnetic anisotropy associated with strain relaxation in Ru/Co/Ru(0001): Anomalous relation of atomic and magnetic structures (4 pages) . . . . .                                                           | 020408(R) |
| J. Miyawaki, D. Matsumura, H. Abe, T. Ohtsuki, E. Sakai, K. Amemiya, and T. Ohta                                                                                                                                          |           |
| Spin freezing and dynamics in $\text{Ca}_3\text{Co}_{2-x}\text{Mn}_x\text{O}_6$ ( $x \approx 0.95$ ) investigated with implanted muons: Disorder in the anisotropic next-nearest-neighbor Ising model (4 pages) . . . . . | 020409(R) |
| T. Lancaster, S. J. Blundell, P. J. Baker, H. J. Lewtas, W. Hayes, F. L. Pratt, H. T. Yi, and S.-W. Cheong                                                                                                                |           |
| <b>Superfluidity and superconductivity</b>                                                                                                                                                                                |           |
| Nonexponential London penetration depth of external magnetic fields in superconducting $\text{Ba}_{1-x}\text{K}_x\text{Fe}_2\text{As}_2$ single crystals (4 pages) . . . . .                                              | 020501(R) |
| C. Martin, R. T. Gordon, M. A. Tanatar, H. Kim, N. Ni, S. L. Bud'ko, P. C. Canfield, H. Luo, H. H. Wen, Z. Wang, A. B. Vorontsov, V. G. Kogan, and R. Prozorov                                                            |           |
| Stabilization of the in-phase fluxon state by geometrical confinement in small $\text{Bi}_2\text{Sr}_2\text{CaCu}_2\text{O}_{8+x}$ mesa structures (4 pages) . . . . .                                                    | 020502(R) |
| S. O. Katterwe and V. M. Krasnov                                                                                                                                                                                          |           |
| $0-\pi$ phase shifts in Josephson junctions as a signature for the $s_{\pm}$ -wave pairing state (4 pages) . . . . .                                                                                                      | 020503(R) |
| Jacob Linder, Iver B. Sperstad, and Asle Sudbø                                                                                                                                                                            |           |
| Structural and magnetic phase transitions in $\text{Na}_{1-\delta}\text{FeAs}$ (4 pages) . . . . .                                                                                                                        | 020504(R) |
| Shiliang Li, Clarina de la Cruz, Q. Huang, G. F. Chen, T.-L. Xia, J. L. Luo, N. L. Wang, and Pengcheng Dai                                                                                                                |           |
| $f$ -spin physics of rare-earth iron pnictides: Influence of $d$ -electron antiferromagnetic order on the heavy-fermion phase diagram (4 pages) . . . . .                                                                 | 020505(R) |
| Jianhui Dai, Jian-Xin Zhu, and Qimiao Si                                                                                                                                                                                  |           |
| Josephson junctions with a synthetic antiferromagnetic interlayer (4 pages) . . . . .                                                                                                                                     | 020506(R) |
| Mazin A. Khasawneh, W. P. Pratt, Jr., and Norman O. Birge                                                                                                                                                                 |           |

## ARTICLES

### Structure, structural phase transitions, mechanical properties, defects

|                                                                                                                                                      |        |
|------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| First-principles study of vacancy-hydrogen interaction in Pd (5 pages) . . . . .                                                                     | 024101 |
| O. Yu. Vekilova, D. I. Bazhanov, S. I. Simak, and I. A. Abrikosov                                                                                    |        |
| Formation of an anatase-like phase in silica under anisotropic stress: An <i>ab initio</i> constant-pressure study (5 pages) . . . . .               | 024102 |
| Murat Durandurdu                                                                                                                                     |        |
| Bayesian approach to cluster expansions (13 pages) . . . . .                                                                                         | 024103 |
| Tim Mueller and Gerbrand Ceder                                                                                                                       |        |
| Connections between the energy functional and interaction potentials for materials simulations (10 pages) . . .                                      | 024104 |
| Christopher D. Taylor                                                                                                                                |        |
| Influence of oxygen pressure on the ferroelectric properties of epitaxial $\text{BiFeO}_3$ thin films by pulsed laser deposition (5 pages) . . . . . | 024105 |
| Lu You, Ngeah Theng Chua, Kui Yao, Lang Chen, and Junling Wang                                                                                       |        |
