PHYSICAL REVIEW B

THIRD SERIES, VOLUME 86, NUMBER 24

DECEMBER 2012-15(II)

|                                                                                                                                      |        |
|--------------------------------------------------------------------------------------------------------------------------------------|--------|
| Reply to “Comment on ‘Charge-parity symmetry observed through Friedel oscillations in chiral charge-density waves’ ” (3 pages) ..... | 247102 |
| J. Ishioka, T. Fujii, K. Katono, K. Ichimura, T. Kurosawa, M. Oda, and S. Tanda                                                      |        |
| Comment on “Fermi surface reconstruction in hole-doped $t - J$ models without long-range antiferromagnetic order” (2 pages) .....    | 247103 |
| Alvaro Ferraz and Evgeny Kochetov                                                                                                    |        |

THIRD SERIES, VOLUME 86, NUMBER 24

DECEMBER 2012-15(II)

|                                                                                                                                                                      |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Magnetic properties of O <sub>2</sub> adsorbed on Cu(100): A spin-polarized metastable He beam study (6 pages) . . . . .                                             | 245421 |
| M. Kurahashi, X. Sun, and Y. Yamauchi                                                                                                                                |        |
| Tuning infrared emission from microstrip arrays (7 pages) . . . . .                                                                                                  | 245423 |
| W. L. Schaich and Irina Puscasu                                                                                                                                      |        |
| Fidelity susceptibility of one-dimensional models with twisted boundary conditions (11 pages) . . . . .                                                              | 245424 |
| Manisha Thakurathi, Diptiman Sen, and Amit Dutta                                                                                                                     |        |
| Design strategies to tailor the narrow plasmon-photonic resonances in arrays of metallic nanoparticles (5 pages) . . . . .                                           | 245425 |
| T. V. Teperik and A. Degiron                                                                                                                                         |        |
| Inelastic magnetic scattering effect on local density of states of topological insulators (10 pages) . . . . .                                                       | 245426 |
| Peter Thalmeier and Alireza Akbari                                                                                                                                   |        |
| Strong anisotropy in surface kinetic roughening: Analysis and experiments (8 pages) . . . . .                                                                        | 245427 |
| Eduardo Vivo, Matteo Nicoli, Martin Engler, Thomas Michely, Luis Vázquez, and Rodolfo Cuerno                                                                         |        |
| Cross-polarized excitons in double-wall carbon nanotubes (11 pages) . . . . .                                                                                        | 245428 |
| Yuh Tomio, Hidekatsu Suzuura, and Tsuneya Ando                                                                                                                       |        |
| <i>Ab initio</i> atomistic thermodynamics study of the early stages of Cu(100) oxidation (8 pages) . . . . .                                                         | 245429 |
| Wissam A. Saidi, Minyoung Lee, Liang Li, Guangwen Zhou, and Alan J. H. McGaughey                                                                                     |        |
| Electronic band structure of graphene from resonant soft x-ray spectroscopy: The role of core-hole effects (5 pages) . . . . .                                       | 245430 |
| L. Zhang, N. Schwertfager, T. Cheiwchanchamnangij, X. Lin, P.-A. Glans-Suzuki, L. F. J. Piper, S. Limpijumnong, Y. Luo, J. F. Zhu, W. R. L. Lambrecht, and J.-H. Guo |        |
| Effect of short-range interactions on the quantum critical behavior of spinless fermions on the honeycomb lattice (16 pages) . . . . .                               | 245431 |
| D. Mesterházy, J. Berges, and L. von Smekal                                                                                                                          |        |
| Long-range plasmon-assisted energy transfer over doped graphene (7 pages) . . . . .                                                                                  | 245432 |
| Kirill A. Velizhanin and Tigran V. Shahbazyan                                                                                                                        |        |
| Ionization potentials of (112) and (11 $\bar{2}$ ) facet surfaces of CuInSe <sub>2</sub> and CuGaSe <sub>2</sub> (7 pages) . . . . .                                 | 245433 |
| Yoyo Hinuma, Fumiyasu Oba, Yu Kumagai, and Isao Tanaka                                                                                                               |        |
| Potential energy surface for graphene on graphene: <i>Ab initio</i> derivation, analytical description, and microscopic interpretation (7 pages) . . . . .           | 245434 |
| M. Reguzzoni, A. Fasolino, E. Molinari, and M. C. Righi                                                                                                              |        |
| Objective quasicontinuum approach for rod problems (16 pages) . . . . .                                                                                              | 245435 |
| Ye. Hakobyan, E. B. Tadmor, and R. D. James                                                                                                                          |        |
| Finite-size energy gap in weak and strong topological insulators (15 pages) . . . . .                                                                                | 245436 |
| Ken-Ichiro Imura, Mayuko Okamoto, Yukinori Yoshimura, Yositate Takane, and Tomi Ohtsuki                                                                              |        |

## COMMENTS

|                                                                                                                             |        |

PHYSICAL REVIEW B

THIRD SERIES, VOLUME 86, NUMBER 24

DECEMBER 2012-15(II)

|                                                                                        |           |
|----------------------------------------------------------------------------------------|-----------|
| Topological flat band models with arbitrary Chern numbers ( <i>5 pages</i> ) . . . . . | 241112(R) |
| Shuo Yang, Zheng-Cheng Gu, Kai Sun, and S. Das Sarma                                   |           |

## Semiconductors I: bulk

|                                                                                                                                                                                                                                                       |           |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
|  Effects of confinement and environment on the electronic structure and exciton binding energy of MoS <sub>2</sub> from first principles ( <i>6 pages</i> ) . . . . . | 241201(R) |
| Hannu-Pekka Komsa and Arkady V. Krasheninnikov                                                                                                                                                                                                        |           |

## Semiconductors II: surfaces, interfaces, microstructures, and related topics

|                                                                                                                                   |           |
|-----------------------------------------------------------------------------------------------------------------------------------|-----------|
| Low-frequency Raman modes and electronic excitations in atomically thin MoS <sub>2</sub> films ( <i>5 pages</i> ) . . . . .       | 241301(R) |
| Hualing Zeng, Bairen Zhu, Kai Liu, Jiahe Fan, Xiaodong Cui, and Q. M. Zhang                                                       |           |
| Anisotropic Fermi contour of (001) GaAs holes in parallel magnetic fields ( <i>5 pages</i> ) . . . . .                            | 241302(R) |
| D. Kamburov, M. Shayegan, R. Winkler, L. N. Pfeiffer, K. W. West, and K. W. Baldwin                                               |           |
| Theory of the spin Hall effect, and its inverse, in a ferromagnetic metal near the Curie temperature ( <i>5 pages</i> ) . . . . . | 241303(R) |
| B. Gu, T. Ziman, and S. Maekawa                                                                                                   |           |
| Phonon-assisted incoherent excitation of a quantum dot and its emission properties ( <i>6 pages</i> ) . . . . .                   | 241304(R) |
| S. Weiler, A. Ulhaq, S. M. Ulrich, D. Richter, M. Jetter, P. Michler, C. Roy, and S. Hughes                                       |           |
| In-plane radiative recombination channel of a dark exciton in self-assembled quantum dots ( <i>5 pages</i> ) . . . . .            | 241305(R) |
| T. Smoleński, T. Kazimierzuk, M. Goryca, T. Jakubczyk, Ł. Kłopotowski, Ł. Cywiński, P. Wojnar, A. Golnik, and P. Kossacki         |           |
| Control of electron-hole pair generation by biharmonic voltage drive of a quantum point contact ( <i>5 pages</i> ) . . . . .      | 241306(R) |
| Mihajlo Vanević and Wolfgang Belzig                                                                                               |           |

## Surface physics, nanoscale physics, low-dimensional systems

|                                                                                                                                                   |           |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Effects of strain on band structure and effective masses in MoS <sub>2</sub> ( <i>5 pages</i> ) . . . . .                                         | 241401(R) |
| H. Peelaers and C. G. Van de Walle                                                                                                                |           |
| Evidence for longitudinal coherence in fast atom diffraction ( <i>4 pages</i> ) . . . . .                                                         | 241402(R) |
| M. Busch, J. Seifert, E. Meyer, and H. Winter                                                                                                     |           |
| Gold-platinum alloys and Vegard's law on the nanoscale ( <i>5 pages</i> ) . . . . .                                                               | 241403(R) |
| L. Leppert, R. Q. Albuquerque, and S. Kümmel                                                                                                      |           |
| Conventional and acoustic surface plasmons on noble metal surfaces: A time-dependent density functional theory study ( <i>5 pages</i> ) . . . . . | 241404(R) |
| Jun Yan, Karsten W. Jacobsen, and Kristian S. Thygesen                                                                                            |           |
| Designer reflectors using spoof surface plasmons in the terahertz range ( <i>4 pages</i> ) . . . . .                                              | 241405(R) |
| Jingbo Liu, Rajind Mendis, and Daniel M. Mittleman                                                                                                |           |
| <i>Ab initio</i> many-body study of cobalt adatoms adsorbed on graphene ( <i>5 pages</i> ) . . . . .                                              | 241406(R) |
| Yudistira Virgus, Wirawan Purwanto, Henry Krakauer, and Shiwei Zhang                                                                              |           |
