PHYSICAL REVIEW B

THIRD SERIES, VOLUME 92, NUMBER 20

NOVEMBER 2015-15(II)

|                                                                                                                             |        |
|-----------------------------------------------------------------------------------------------------------------------------|--------|
| Topological insulators are tunable waveguides for hyperbolic polaritons ( <i>12 pages</i> ) . . . . .                       | 205430 |
| Jhih-Sheng Wu (吳致盛), D. N. Basov, and M. M. Fogler                                                                          |        |
| Solvable four-state Landau-Zener model of two interacting qubits with path interference ( <i>8 pages</i> ) . . . . .        | 205431 |
| N. A. Sinitsyn                                                                                                              |        |
| Cooperative phenomenon in a rippled graphene: Chiral spin guide ( <i>8 pages</i> ) . . . . .                                | 205432 |
| M. Pudlak, K. N. Pichugin, and R. G. Nazmitdinov                                                                            |        |
| Tunable magnetic interaction in hydrogenated epitaxial graphene modulated by the SiC substrate ( <i>5 pages</i> ) . . . . . | 205433 |
| Pengcheng Chen, Yuanchang Li, and Wenhui Duan                                                                               |        |

PHYSICAL REVIEW B

THIRD SERIES, VOLUME 92, NUMBER 20

NOVEMBER 2015-15(II)

|                                                                                                                                                                                  |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Ruderman-Kittel-Kasuya-Yosida interaction at finite temperature: Graphene and bilayer graphene ( <i>12 pages</i> ) . . . . .                                                     | 205414 |
| N. Klier, S. Shallcross, S. Sharma, and O. Pankratov                                                                                                                             |        |
| Active magneto-optical control of spontaneous emission in graphene ( <i>9 pages</i> ) . . . . .                                                                                  | 205415 |
| W. J. M. Kort-Kamp, B. Amorim, G. Bastos, F. A. Pinheiro, F. S. S. Rosa, N. M. R. Peres, and C. Farina                                                                           |        |
| Conductance of a single electron transistor with a retarded dielectric layer in the gate capacitor ( <i>13 pages</i> ) . . . . .                                                 | 205416 |
| O. G. Udalov, N. M. Chtchelkatchev, S. A. Fedorov, and I. S. Beloborodov                                                                                                         |        |
| Solid-solid transitions in Pd-Pt nanoalloys ( <i>9 pages</i> ) . . . . .                                                                                                         | 205417 |
| Emanuele Panizon and Riccardo Ferrando                                                                                                                                           |        |
| Binding energies of exciton complexes in transition metal dichalcogenide monolayers and effect of dielectric environment ( <i>6 pages</i> ) . . . . .                            | 205418 |
| Ilkka Kylänpää and Hannu-Pekka Komsa                                                                                                                                             |        |
| Nontrivial magnetoresistive behavior of a single-wall carbon nanotube with an attached molecular magnet ( <i>12 pages</i> ) . . . . .                                            | 205419 |
| Anna Płomińska and Ireneusz Weymann                                                                                                                                              |        |
| Quantum dynamics of two quantum dots coupled through localized plasmons: An intuitive and accurate quantum optics approach using quasinormal modes ( <i>13 pages</i> ) . . . . . | 205420 |
| Rong-Chun Ge and Stephen Hughes                                                                                                                                                  |        |
| Photoemission footprints of extrinsic plasmarons ( <i>4 pages</i> ) . . . . .                                                                                                    | 205421 |
| B. Hellsing and V. M. Silkin                                                                                                                                                     |        |
| Majorana zero modes choose Euler numbers as revealed by full counting statistics ( <i>21 pages</i> ) . . . . .                                                                   | 205422 |
| Dong E. Liu, Alex Levchenko, and Roman M. Lutchyn                                                                                                                                |        |
| Tunable unconventional Kondo effect on topological insulator surfaces ( <i>14 pages</i> ) . . . . .                                                                              | 205423 |
| L. Isaev, G. Ortiz, and I. Vekhter                                                                                                                                               |        |
| Superconducting proximity effect in three-dimensional topological insulators in the presence of a magnetic field ( <i>14 pages</i> ) . . . . .                                   | 205424 |
| Pablo Burset, Bo Lu, Grigory Tkachov, Yukio Tanaka, Ewelina M. Hankiewicz, and Björn Trauzettel                                                                                  |        |
| Electronic structure of helicoidal graphene: Massless Dirac particles on a curved surface with a screw symmetry ( <i>9 pages</i> ) . . . . .                                     | 205425 |
| Masataka Watanabe, Hisato Komatsu, Naoto Tsuji, and Hideo Aoki                                                                                                                   |        |
| Excitations in a spin-polarized two-dimensional electron gas ( <i>7 pages</i> ) . . . . .                                                                                        | 205426 |
| Dominik Kreil, Raphael Hobbiger, Jürgen T. Drachta, and Helga M. Böhm                                                                                                            |        |
| Experimental and theoretical determination of $\sigma$ bands on (" $2\sqrt{3} \times 2\sqrt{3}$ ") silicene grown on Ag(111) ( <i>6 pages</i> ) . . . . .                        | 205427 |
| W. Wang, W. Olovsson, and R. I. G. Uhrberg                                                                                                                                       |        |
| Microscopic view on Landau level broadening mechanisms in graphene ( <i>11 pages</i> ) . . . . .                                                                                 | 205428 |
| Hannah Funk, Andreas Knorr, Florian Wendler, and Ermin Malic                                                                                                                     |        |
| Ferromagnetism and perfect spin filtering in transition-metal-doped graphyne nanoribbons ( <i>6 pages</i> ) . . . . .                                                            | 205429 |
| Jinbo Pan, Shixuan Du, Yuyang Zhang, Lida Pan, Yanfang Zhang, Hong-Jun Gao, and Sokrates T. Pantelides                                                                           |        |

PHYSICAL REVIEW B

THIRD SERIES, VOLUME 92, NUMBER 20

NOVEMBER 2015-15(II)

|   |                                                                                                                                                                                                                               |        |
|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| ☞ | Metallic quantum critical points with finite BCS couplings ( <i>11 pages</i> ) . . . . .                                                                                                                                      | 205104 |
|   | S. Raghu, Gonzalo Torroba, and Huajia Wang                                                                                                                                                                                    |        |
|   | Bound excitons and many-body effects in x-ray absorption spectra of azobenzene-functionalized self-assembled monolayers ( <i>7 pages</i> ) . . . . .                                                                          | 205105 |
|   | Caterina Cocchi and Claudia Draxl                                                                                                                                                                                             |        |
|   | U(1) symmetry of the spin-orbit coupled Hubbard model on the kagome lattice ( <i>5 pages</i> ) . . . . .                                                                                                                      | 205106 |
|   | Se Kwon Kim and Jiadong Zang                                                                                                                                                                                                  |        |
|   | Physical properties and electronic structure of $\text{Sr}_2\text{Cr}_3\text{As}_2\text{O}_2$ containing $\text{CrO}_2$ and $\text{Cr}_2\text{As}_2$ square-planar lattices ( <i>10 pages</i> ) . . . . .                     | 205107 |
|   | Hao Jiang, Jin-Ke Bao, Hui-Fei Zhai, Zhang-Tu Tang, Yun-Lei Sun, Yi Liu, Zhi-Cheng Wang, Hua Bai, Zhu-An Xu, and Guang-Han Cao                                                                                                |        |
| ☞ | <i>Ab initio</i> tight-binding Hamiltonian for transition metal dichalcogenides ( <i>15 pages</i> ) . . . . .                                                                                                                 | 205108 |
|   | Shiang Fang, Rodrick Kuate Defo, Sharmila N. Shirodkar, Simon Lieu, Georgios A. Tritsaris, and Efthimios Kaxiras                                                                                                              |        |
|   | Effects of stoichiometry and substitution in quasi-one-dimensional iron chalcogenide $\text{BaFe}_2\text{S}_3$ ( <i>7 pages</i> ) . . . . .                                                                                   | 205109 |
|   | Yasuyuki Hirata, Sachiko Maki, Jun-ichi Yamaura, Touru Yamauchi, and Kenya Ohgushi                                                                                                                                            |        |
|   | Study of multiband disordered systems using the typical medium dynamical cluster approximation ( <i>9 pages</i> ) . . . . .                                                                                                   | 205111 |
|   | Yi Zhang, Hanna Terletska, C. Moore, Chinedu Ekuma, Ka-Ming Tam, Tom Berlijn, Wei Ku, Juana Moreno, and Mark Jarrell                                                                                                          |        |
|   | Doping asymmetry and striping in a three-orbital $\text{CuO}_2$ Hubbard model ( <i>7 pages</i> ) . . . . .                                                                                                                    | 205112 |
|   | Steven R. White and D. J. Scalapino                                                                                                                                                                                           |        |
| ☞ | Transversal magnetoresistance in Weyl semimetals ( <i>18 pages</i> ) . . . . .                                                                                                                                                | 205113 |
|   | J. Klier, I. V. Gornyi, and A. D. Mirlin                                                                                                                                                                                      |        |
|   | Inverse order-disorder transition of charge stripes ( <i>7 pages</i> ) . . . . .                                                                                                                                              | 205114 |
|   | Shu-Han Lee, Yen-Chung Lai, Chao-Hung Du, Alexander F. Siegenfeld, Ying-Jer Kao, Peter D. Hatton, D. Prabhakaran, Yixi Su, and Di-Jing Huang                                                                                  |        |
|   | From flexoelectricity to absolute deformation potentials: The case of $\text{SrTiO}_3$ ( <i>7 pages</i> ) . . . . .                                                                                                           | 205115 |
|   | Massimiliano Stengel                                                                                                                                                                                                          |        |
|   | Localization and spin transport in honeycomb structures with spin-orbit coupling ( <i>7 pages</i> ) . . . . .                                                                                                                 | 205116 |
|   | S. L. A. de Queiroz                                                                                                                                                                                                           |        |
|   | Momentum-dependent sign inversion of orbital order in superconducting FeSe ( <i>5 pages</i> ) . . . . .                                                                                                                       | 205117 |
|   | Y. Suzuki, T. Shimojima, T. Sonobe, A. Nakamura, M. Sakano, H. Tsuji, J. Omachi, K. Yoshioka, M. Kuwata-Gonokami, T. Watashige, R. Kobayashi, S. Kasahara, T. Shibauchi, Y. Matsuda, Y. Yamakawa, H. Kontani, and K. Ishizaka |        |
|   | Converting normal insulators into topological insulators via tuning orbital levels ( <i>6 pages</i> ) . . . . .                                                                                                               | 205118 |
|   | Wu-Jun Shi, Junwei Liu, Yong Xu, Shi-Jie Xiong, Jian Wu, and Wenhui Duan                                                                                                                                                      |        |
|   | Theory of Curie temperature enhancement in electron-doped EuO ( <i>9 pages</i> ) . . . . .                                                                                                                                    | 205119 |

PHYSICAL REVIEW B

THIRD SERIES, VOLUME 92, NUMBER 20

NOVEMBER 2015-15(II)

Hybridization gaps and antiferromagnetic gap in the Kondo semiconductors  $\text{CeT}_2\text{Al}_{10}$  ( $T = \text{Fe}$  and  $\text{Os}$ ) observed by break-junction tunneling spectroscopy (5 pages) ..... 201113(R)  
J. Kawabata, T. Ekino, Y. Yamada, Y. Sakai, A. Sugimoto, Y. Muro, and T. Takabatake

Metal-insulator transition in a weakly interacting disordered electron system (5 pages) ..... 201114(R)  
C. E. Ekuma, S.-X. Yang, H. Terletska, K.-M. Tam, N. S. Vidhyadhiraja, J. Moreno, and M. Jarrell

## Semiconductors I: bulk

Deterministic coherent writing of a long-lived semiconductor spin qubit using one ultrafast optical pulse (5 pages) ..... 201201(R)  
I. Schwartz, D. Cogan, E. R. Schmidgall, L. Gantz, Y. Don, M. Zieliński, and D. Gershoni

Ultrahigh exciton diffusion in intrinsic diamond (5 pages) ..... 201202(R)  
Hikaru Morimoto, Yuji Hazama, Koichiro Tanaka, and Nobuko Naka

Spin-dependent direct gap emission in tensile-strained Ge films on Si substrates (6 pages) ..... 201203(R)  
E. Vitiello, M. Virgilio, A. Giorgioni, J. Frigerio, E. Gatti, S. De Cesari, E. Bonera, E. Grilli, G. Isella, and F. Pezzoli

Extended antisite defects in tetrahedrally bonded semiconductors (5 pages) ..... 201204(R)  
Paweł Zawadzki, Andriy Zakutayev, and Stephan Lany

 Anharmonic stabilization and band gap renormalization in the perovskite  $\text{CsSnI}_3$  (5 pages) ..... 201205(R)  
Christopher E. Patrick, Karsten W. Jacobsen, and Kristian S. Thygesen

## Semiconductors II: surfaces, interfaces, microstructures, and related topics

Multiple-frequency quantum beats of quantum confined exciton states (5 pages) ..... 201301(R)  
A. V. Trifonov, I. Ya. Gerlovin, I. V. Ignatiev, I. A. Yugova, R. V. Cherbunin, Yu. P. Efimov, S. A. Eliseev, V. V. Petrov, V. A. Lovtcus, and A. V. Kavokin

Influence of interface coupling on the electronic properties of the  $\text{Au}/\text{MoS}_2$  junction (5 pages) ..... 201302(R)  
Matt Cook, Robert Palandech, Keith Doore, Zhipeng Ye, Gaihua Ye, Rui He, and Andrew J. Stollenwerk

GdN thin film: Chern insulating state on square lattice (5 pages) ..... 201303(R)  
Zhi Li, Jinwoong Kim, Nicholas Kioussis, Shu-Yu Ning, Haibin Su, Toshiaki Iitaka, Takami Tohyama, Xinyu Yang, and Jiu-Xing Zhang

Coincidence of superparamagnetism and perfect quantization in the quantum anomalous Hall state (5 pages) .... 201304(R)  
S. Grauer, S. Schreyeck, M. Winnerlein, K. Brunner, C. Gould, and L. W. Molenkamp

Direct optical state preparation of the dark exciton in a quantum dot (5 pages) ..... 201305(R)  
S. Lüker, T. Kuhn, and D. E. Reiter

## Surface physics, nanoscale physics, low-dimensional systems

Spin-orbit coupling and operation of multivalley spin qubits (5 pages) ..... 201401(R)  
M. Veldhorst, R. Ruskov, C. H. Yang, J. C. C. Hwang, F. E. Hudson, M. E. Flatté, C. Tahan, K. M. Itoh, A. Morello, and A. S. Dzurak

Theory of intersubband resonance fluorescence (5 pages) ..... 201402(R)  
Nathan Shammah and Simone De Liberato

Theory of the Dirac half metal and quantum anomalous Hall effect in Mn-intercalated epitaxial graphene (5 pages) ..... 201403(R)  
Yuanchang Li, Damien West, Huaqing Huang, Jia Li, S. B. Zhang, and Wenhui Duan

## RAPID COMMUNICATIONS

### Electronic structure and strongly correlated systems

- Multicomponent fractional quantum Hall states with subband and spin degrees of freedom (*5 pages*) ..... 201101(R)  
Yang Liu, S. Hasdemir, J. Shabani, M. Shayegan, L. N. Pfeiffer, K. W. West, and K. W. Baldwin
- ☞ Towards the understanding of the origin of charge-current-induced spin voltage signals in the topological insulator  $\text{Bi}_2\text{Se}_3$  (*5 pages*) ..... 201102(R)  
E. K. de Vries, A. M. Kamerbeek, N. Koirala, M. Brahlek, M. Salehi, S. Oh, B. J. van Wees, and T. Banerjee
- Charge ordering geometries in uniaxially strained  $\text{NbSe}_2$  (*5 pages*) ..... 201103(R)  
Felix Flicker and Jasper van Wezel
- Exciton recombination in one-dimensional organic Mott insulators (*5 pages*) ..... 201104(R)  
Zala Lenarčič, Martin Eckstein, and Peter Prelovšek
- Variational Monte Carlo study of a gapless spin liquid in the spin- $\frac{1}{2}$  XXZ antiferromagnetic model on the kagome lattice (*5 pages*) ..... 201105(R)  
Wen-Jun Hu, Shou-Shu Gong, Federico Becca, and D. N. Sheng
- Non-Fermi-liquid scattering rates and anomalous band dispersion in ferropnictides (*6 pages*) ..... 201106(R)  
J. Fink, A. Charnukha, E. D. L. Rienks, Z. H. Liu, S. Thirupathaiah, I. Avigo, F. Roth, H. S. Jeevan, P. Gegenwart, M. Roslova, I. Morozov, S. Wurmehl, U. Bovensiepen, S. Borisenko, M. Vojta, and B. Büchner
- Spiraling Fermi arcs in Weyl materials (*5 pages*) ..... 201107(R)  
Songci Li and A. V. Andreev
- Anomalous charge and negative-charge-transfer insulating state in cuprate chain compound  $\text{KCuO}_2$  (*5 pages*) ... 201108(R)  
D. Choudhury, P. Rivero, D. Meyers, X. Liu, Y. Cao, S. Middey, M. J. Whitaker, S. Barraza-Lopez, J. W. Freeland, M. Greenblatt, and J. Chakhalian
- Ferromagnetic instability of interlayer floating electrons in the quasi-two-dimensional electride  $\text{Y}_2\text{C}$  (*4 pages*) ... 201109(R)  
Takeshi Inoshita, Noriaki Hamada, and Hideo Hosono
- Excitations and the tangent space of projected entangled-pair states (*5 pages*) ..... 201111(R)  
Laurens Vanderstraeten, Michaël Mariën, Frank Verstraete, and Jutho Haegeman
- Structure symmetry determination and magnetic evolution in  $\text{Sr}_2\text{Ir}_{1-x}\text{Rh}_x\text{O}_4$  (*5 pages*) ..... 201112(R)  
Feng Ye, Xiaoping Wang, Christina Hoffmann, Jinchun Wang, Songxue Chi, Masaaki Matsuda, Bryan C. Chakoumakos, Jaime A. Fernandez-Baca, and G. Cao
