

## RAPID COMMUNICATIONS

### Structure, structural phase transitions, mechanical properties, defects

- Structure of periodic crystals and quasicrystals in ultrathin films of Ba-Ti-O (4 pages) ..... 020101(R)  
Eric Cockayne, Marek Mihalkovič, and Christopher L. Henley
- Temperature-dependent high energy-resolution EELS of ferroelectric and paraelectric BaTiO<sub>3</sub> phases (5 pages) ..... 020102(R)  
Matthieu Bugnet, Guillaume Radtke, Steffi Y. Woo, Guo-zhen Zhu, and Gianluigi A. Botton
- Dissociation products and structures of solid H<sub>2</sub>S at strong compression (5 pages) ..... 020103(R)  
Yinwei Li, Lin Wang, Hanyu Liu, Yunwei Zhang, Jian Hao, Chris J. Pickard, Joseph R. Nelson, Richard J. Needs, Wentao Li, Yanwei Huang, Ion Errea, Matteo Calandra, Francesco Mauri, and Yanming Ma
- Titanium  $\alpha$ - $\omega$  phase transformation pathway and a predicted metastable structure (5 pages) ..... 020104(R)  
N. A. Zarkevich and D. D. Johnson

### Dynamics, dynamical systems, lattice effects:

- Effect of magnetism on lattice dynamics in SrFe<sub>2</sub>As<sub>2</sub> using high-resolution inelastic x-ray scattering (5 pages) ... 020301(R)  
N. Murai, T. Fukuda, T. Kobayashi, M. Nakajima, H. Uchiyama, D. Ishikawa, S. Tsutsui, H. Nakamura, M. Machida, S. Miyasaka, S. Tajima, and A. Q. R. Baron

### Magnetism

- Dzyaloshinskii-Moriya anisotropy in nanomagnets with in-plane magnetization (5 pages) ..... 020401(R)  
M. Cubukcu, J. Sampaio, K. Bouzehouane, D. Apalkov, A. V. Khvalkovskiy, V. Cros, and N. Reyren
- Thermally activated phase slips in superfluid spin transport in magnetic wires (4 pages) ..... 020402(R)  
Se Kwon Kim, So Takei, and Yaroslav Tserkovnyak
- Magnetic field dependence of the magnon spin diffusion length in the magnetic insulator yttrium iron garnet (5 pages) ..... 020403(R)  
L. J. Cornelissen and B. J. van Wees
- Skyrmions in chiral magnets with Rashba and Dresselhaus spin-orbit coupling (5 pages) ..... 020404(R)  
James Rowland, Sumilan Banerjee, and Mohit Randeria

PHYSICAL REVIEW B

THIRD SERIES, VOLUME 93, NUMBER 2

JANUARY 2016-1(II)

|                                                                                                                                                                                                                                                                                                                                                                                                                  |        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
|  Origin of negative density and modulus in acoustic metamaterials (14 pages) .....<br>Sam H. Lee and Oliver B. Wright                                                                                                                                                                                                            | 024302 |
| Exploring the impact of semicore level electronic relaxation on polaron dynamics: An adiabatic <i>ab initio</i> study of FePO <sub>4</sub> (10 pages) .....<br>Zi Wang and Kirk H. Bevan                                                                                                                                                                                                                         | 024303 |
| Ultrafast resonant soft x-ray diffraction dynamics of the charge density wave in TbTe <sub>3</sub> (9 pages) .....<br>R. G. Moore, W. S. Lee, P. S. Kirchman, Y. D. Chuang, A. F. Kemper, M. Trigo, L. Patthey, D. H. Lu, O. Krupin, M. Yi, D. A. Reis, D. Doering, P. Denes, W. F. Schlotter, J. J. Turner, G. Hays, P. Hering, T. Benson, J.-H. Chu, T. P. Devereaux, I. R. Fisher, Z. Hussain, and Z.-X. Shen | 024304 |
| Competition between electric field and magnetic field noise in the decoherence of a single spin in diamond (5 pages) .....<br>P. Jamonneau, M. Lesik, J. P. Tetienne, I. Alvizu, L. Mayer, A. Dréau, S. Kosen, J.-F. Roch, S. Pezzagna, J. Meijer, T. Teraji, Y. Kubo, P. Bertet, J. R. Maze, and V. Jacques                                                                                                     | 024305 |
| Electron-phonon thermalization in a scalable method for real-time quantum dynamics (7 pages) .....<br>Valerio Rizzi, Tchavdar N. Todorov, Jorge J. Kohanoff, and Alfredo A. Correa                                                                                                                                                                                                                               | 024306 |
| <i>Ab initio</i> studies on the lattice thermal conductivity of silicon clathrate frameworks II and VIII (11 pages) .....<br>Ville J. Härkönen and Antti J. Karttunen                                                                                                                                                                                                                                            | 024307 |
| <b>Magnetism</b>                                                                                                                                                                                                                                                                                                                                                                                                 |        |
| Phase diagram of the Kondo lattice model on the kagome lattice (14 pages) .....<br>Shivam Ghosh, Patrick O'Brien, Christopher L. Henley, and Michael J. Lawler                                                                                                                                                                                                                                                   | 024401 |
| Refrustration and competing orders in the prototypical Dy <sub>2</sub> Ti <sub>2</sub> O <sub>7</sub> spin ice material (23 pages) .....<br>P. Henelius, T. Lin, M. Enjalran, Z. Hao, J. G. Rau, J. Altosaar, F. Flicker, T. Yavors'kii, and M. J. P. Gingras                                                                                                                                                    | 024402 |
| Electronic states and molecular dynamics of single-component molecular conductors [M(tmtd) <sub>2</sub> ] (M = Ni, Pt) studied by <sup>13</sup> C and <sup>1</sup> H NMR (8 pages) .....<br>Rina Takagi, Kazuya Miyagawa, Masahide Yoshimura, Hiro Gangi, Kazushi Kanoda, Biao Zhou, Yuki Idobata, and Akiko Kobayashi                                                                                           | 024403 |
| Thickness-dependent magnetoelasticity and its effects on perpendicular magnetic anisotropy in Ta/CoFeB/MgO thin films (6 pages) .....<br>P. G. Gowtham, G. M. Stiehl, D. C. Ralph, and R. A. Buhrman                                                                                                                                                                                                             | 024404 |
| Isotropic and anisotropic regimes of the field-dependent spin dynamics in Sr <sub>2</sub> IrO <sub>4</sub> : Raman scattering studies (7 pages) .....<br>Y. Gim, A. Sethi, Q. Zhao, J. F. Mitchell, G. Cao, and S. L. Cooper                                                                                                                                                                                     | 024405 |
| Optical control of magnetism in manganite films (7 pages) .....<br>F. Li, C. Song, Y. Y. Wang, B. Cui, H. J. Mao, J. J. Peng, S. N. Li, and F. Pan                                                                                                                                                                                                                                                               | 024406 |
| Magnetic anisotropy and reduced neodymium magnetic moments in Nd <sub>3</sub> Ru <sub>4</sub> Al <sub>12</sub> (11 pages) .....<br>D. I. Gorbunov, M. S. Henriques, A. V. Andreev, V. Eigner, A. Gukasov, X. Fabrèges, Y. Skourski, V. Petříček, and J. Wosnitzer                                                                                                                                                | 024407 |
| Low-nonlinearity spin-torque oscillations driven by ferromagnetic nanocontacts (5 pages) .....<br>Muftah Al-Mahdawi, Yusuke Toda, Yohei Shiokawa, and Masashi Sashiki                                                                                                                                                                                                                                            | 024408 |
