On September 25th 2002, Bell Laboratories, Lucent Technologies, announced the findings of an independent committee it formed to investigate the validity of certain research reported from 1998 to 2002 by teams of Bell Labs and other scientists. In its report, the committee concludes that “based on the preponderance of the evidence, Hendrik Schön committed scientific misconduct as defined by the falsification or fabrication of data, such that the research is not accurately represented in the research record.”

As a result of this report, all of the authors of the above-mentioned manuscript have agreed to a complete retraction of the paper.
