There was a missing $c_\alpha$ in the first term of the expression of the BCS Hamiltonian on p. 3. The correct expression is

$$H = \sum_\alpha \varepsilon_\alpha c_\alpha^\dagger c_\alpha - \lambda \delta \sum_{\alpha,\alpha' > 0} c_\alpha^\dagger c_{-\alpha} c_{-\alpha'} c_\alpha'. $$

It was a typographical error and we emphasize that the rest of theoretical expressions in the manuscript are fine and hence does not affect the analysis and interpretation of the experimental data.
