THIRD SERIES, VOLUME 112, NUMBER 3

CONTENTS

SEPTEMBER 2025

## LETTERS

### Nucleon-Nucleon Interaction, Few-Body Systems

- Peak of sound velocity, scale symmetry, and nuclear force in baryonic matter (5 pages) . . . . . L031001  
Lu-Qi Zhang, Yao Ma, and Yong-Liang Ma
- Breakdown scale of pionless effective field theory in the three-nucleon sector (5 pages) . . . . . L031002  
Andreas Ekström and Lucas Platter

### Nuclear Structure

-  <sup>61</sup>Cr as a doorway to the  $N = 40$  island of inversion (6 pages) . . . . . L031301  
L. Lalanne, M. Athanasakis-Kaklamanakis, D. D. Dao, Á. Koszorús, Y. C. Liu, R. Mancheva,  
F. Nowacki, J. Reilly, C. Bernerd, K. Chrysalidis, T. E. Cocolios, R. P. de Groote, K. T. Flanagan,  
R. F. Garcia Ruiz, D. Hanstorp, R. Heinke, M. Heines, P. Lassegues, K. Mack, B. A. Marsh,  
A. McGlone, K. M. Lynch, G. Neyens, B. van den Borne, R. Van Duyse, X. F. Yang, and J. Wessolek  
(CERN, ISOLDE Collaboration, IS714)
- Sensitivity of nuclear clocks to new physics (7 pages) . . . . . L031302  
Andrea Caputo, Doron Gazit, Hans-Werner Hammer, Joachim Kopp, Gil Paz,  
Gilad Perez, and Konstantin Springmann
- $\alpha$ -particle monopole form factors within the *ab initio* no-core shell model (6 pages) . . . . . L031303  
P. Yin, A. M. Shirokov, H. Li, B. Zhou, X. Zhao, S. Bacca, and J. P. Vary

### Nuclear Reactions

- Concentrated valence nucleons transfer in heavy-ion collisions: Implications for the discovery of stable  
superheavy elements (7 pages) . . . . . L031601  
Zepeng Gao, Yinu Zhang, and Long Zhu

### Nuclear Astrophysics

- Self-consistent microscopic calculations for electron captures on nuclei in core-collapse supernovae (6 pages) . . . L032801  
A. Ravlić, S. Giraud, N. Paar, and R. G. T. Zegers
- Astrophysical significance of the isomer <sup>119m</sup>Ag demonstrated through a direct mass measurement (7 pages) . . . . . L032802  
F. Rivero, M. Brodeur, J. A. Clark, B. Liu, G. W. Misch, M. R. Mumpower, W. S. Porter, D. Ray,  
G. Savard, T. M. Sprouse, A. A. Valverde, D. P. Burdette, A. Cannon, A. T. Gallant, A. M. Houff,  
K. Kolos, F. G. Kondev, R. Orford, C. Quick, K. S. Sharma, and L. Varriano

## ARTICLES

### Nucleon-Nucleon Interaction, Few-Body Systems

- Perturbation theory for a systematic account of the bound-state motion (*10 pages*) ..... 034001  
 Alexander N. Kvinikhidze, Hagop Sazdjian, and Boris Blankleider
- Calculation of sharp-energy  $S$  matrices via time-dependent and time-independent wave packets (*13 pages*) ..... 034002  
 Zeki C. Kuruoğlu
- Deuteron-deuteron interaction and correlation function (*7 pages*) ..... 034003  
 Duo-Lun Ge, Zhi-Wei Liu, Jun-Xu Lu, and Li-Sheng Geng
- Chiral  $3\pi$ -exchange potential using the method of unitary transformation (*37 pages*) ..... 034004  
 Victor Springer, Hermann Krebs, and Evgeny Epelbaum

### Nuclear Structure

- Typical new spherical-like  $\gamma$ -soft spectra in  $^{104,106,108}\text{Pd}$  (*8 pages*) ..... 034301  
 Tao Wang
- Typical characteristics of the pseudospin partner bands in the particle rotor model (*11 pages*) ..... 034302  
 H. Zhang, B. Qi, S. Y. Wang, and H. Jia
- Experimental evidence of the molecular  $\text{H}_2\text{O}$  symmetry  $\text{C}_{2v}$  in the  $^{236}\text{U}$  nucleus: Model-independent point-group and combinatorial identification criteria (*19 pages*) ..... 034303  
 I. Dedes, J. Dudek, A. Baran, D. Curien, A. Góźdz, A. Maj, A. Pędrak, D. Rouvel, and J. Yang
- Charge radii and electromagnetic moments of  $^{214-218}\text{Bi}$ : Exploring the “southern” border of the  $Z > 82$  octupole-deformation region (*10 pages*) ..... 034304  
 A. Barzakh *et al.*
- Machine learning for correlations of electromagnetic properties in *ab initio* calculations (*11 pages*) ..... 034306  
 Marco Knöll, Marc L. Agel, Tobias Wolfgruber, Pieter Maris, and Robert Roth
- Extending the low- $Z$  “border” of the  $A = 100$  region of deformation with precision mass spectrometry of  $^{96-98}\text{Kr}$  (*11 pages*) ..... 034307  
 D. Lunney, V. Manea, M. Mougeot, L. Nies, N. A. Althubiti, D. Atanasov, K. Blaum, A. Herlert, W.-J. Huang, J. Kartheim, I. Kulikov, Yu. A. Litvinov, D. Neidherr, T. R. Rodríguez, M. Rosenbusch, L. Schweikhard, T. Steinsberger, A. Welker, F. Wienholtz, and R. N. Wolf
- Parameterizations of electron scattering form factors for elastic scattering and electroexcitation of nuclear states in  $^{27}\text{Al}$  and  $^{40}\text{Ca}$  (*12 pages*) ..... 034308  
 Arie Bodek, M. E. Christy, Zihao Lin, Bulugean Giulia-Maria, and Matamoros Delgado Amii Daniela
- $\alpha + {}^2n + {}^2n$  3-body cluster structures and dineutron breaking in  $^8\text{He}$  (*11 pages*) ..... 034309  
 Kosei Nakagawa and Yoshiko Kanada-En’yo
- Measurements of  $\beta$ -delayed proton emitters in the region of  $^{100}\text{Sn}$  (*18 pages*) ..... 034310  
 C. J. Appleton *et al.*
- Coulomb excitation of  $^{124}\text{Te}$ : Emerging collectivity and persisting seniority structure in the  $6_1^+$  level (*14 pages*) ..... 034311  
 M. Reece, B. J. Coombes, A. J. Mitchell, A. E. Stuchbery, G. J. Lane, A. Gargano, V. U. Bashu, L. J. Bignell, C. Gautam, L. J. McKie, N. J. Spinks, and J. A. Woodside

THIRD SERIES, VOLUME 112, NUMBER 3

SEPTEMBER 2025

|                                                                                                                                                                                                         |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Comparative study of a “moving orientation effect” in heavy-ion fusion reactions with prolate and oblate projectiles (7 pages) . . . . .                                                                | 034616 |
| Y. K. Gupta, K. Hagino, D. Patel, V. B. Katariya, H. Vyas, G. K. Prajapati, N. Sirswal, Pawan Singh, B. N. Joshi, B. K. Nayak, and U. Garg                                                              |        |
| <b>Relativistic Nuclear Collisions</b>                                                                                                                                                                  |        |
| Probing fluctuating protons using forward neutrons in soft and hard inelastic proton-nucleus scattering (9 pages) . . . . .                                                                             | 034901 |
| M. Alvioli, V. Guzey, and M. Strikman                                                                                                                                                                   |        |
| Measurements at forward rapidity of elliptic flow of charged hadrons and open-heavy-flavor muons in Au + Au collisions at $\sqrt{s_{NN}} = 200$ GeV (11 pages) . . . . .                                | 034902 |
| N. J. Abdulameer <i>et al.</i> (PHENIX Collaboration)                                                                                                                                                   |        |
| Multijet topology in high-energy nuclear collisions: Jet broadening (10 pages) . . . . .                                                                                                                | 034903 |
| Jin-Wen Kang, Lei Wang, Wei Dai, Sa Wang, and Ben-Wei Zhang                                                                                                                                             |        |
| Effects of quark gluon plasma droplet evolution on charge separation in small collision systems within a multiphase transport model (6 pages) . . . . .                                                 | 034904 |
| Yi Xu, Chen Gao, Shi-Xue Zhang, and Wei-Tian Deng                                                                                                                                                       |        |
| Effect of $\alpha$ clusters on particle production in O-O and p-O collisions at energies available at the CERN Large Hadron Collider (11 pages) . . . . .                                               | 034905 |
| Deependra Sharma, Arpit Singh, Md. Samsul Islam, Basanta Nandi, and Sadhana Dash                                                                                                                        |        |
| Extension of the integrated hydrokinetic model to nuclear collision energies relevant for the RHIC Beam-Energy Scan program and the research program at GSI-FAIR (17 pages) . . . . .                   | 034906 |
| Musfer Adzhymambetov and Yuri Sinyukov                                                                                                                                                                  |        |
| Production of multistrange hadrons in Pb+Pb collisions at energies available at the CERN Large Hadron Collider using the HYDJET++ model (13 pages) . . . . .                                            | 034907 |
| Gauri Devi and B. K. Singh                                                                                                                                                                              |        |
| Production of ${}^3_{\Lambda}\text{H}$ , ${}^4_{\Lambda}\text{H}$ , and ${}^4_{\Lambda}\text{He}$ in different coalescence channels in Au-Au collisions at $\sqrt{s_{NN}} = 3$ GeV (14 pages) . . . . . | 034908 |
| Rui-Qin Wang, Jun Song, Mao-Yan Wu, Huai-Tong Xue, and Feng-Lan Shao                                                                                                                                    |        |
| Effect of transverse momentum conservation and flow on symmetric cumulants $sc_{2,3}\{4\}$ and $sc_{2,3,4}\{6\}$ (26 pages) . . . . .                                                                   | 034909 |
| Jia-Lin Pei (裴家琳), Guo-Liang Ma (马国亮), and Adam Bzdak                                                                                                                                                   |        |
| Rescattering effects on spin-interference for $\rho^0$ photoproduction in heavy-ion collisions (8 pages) . . . . .                                                                                      | 034910 |
| Yusong Wang, Xinbai Li, Ziyang Li, Zebo Tang, Xin Wu, and Wangmei Zha                                                                                                                                   |        |
| Photonuclear tomography in ultraperipheral heavy-ion collisions (9 pages) . . . . .                                                                                                                     | 034911 |
| J. D. Baker, C. A. Bertulani, and Victor P. Gonçalves                                                                                                                                                   |        |
| High-order anisotropic flow and nonlinear hydrodynamic responses (9 pages) . . . . .                                                                                                                    | 034912 |
| Owen Horecny and Chun Shen                                                                                                                                                                              |        |
| <b>Hadronic Physics and QCD</b>                                                                                                                                                                         |        |
| Measurement of single- and double-polarization observables in the photoproduction of $\pi^+\pi^-$ meson pairs off the proton using CLAS at Jefferson Laboratory (21 pages) . . . . .                    | 035201 |
| P. Roy <i>et al.</i> (CLAS Collaboration)                                                                                                                                                               |        |
| Probing cold nuclear matter with energy correlators (11 pages) . . . . .                                                                                                                                | 035202 |
