Erratum: Possibility to form $Z = 120$ via the $^{64}Ni + ^{238}U$ reaction using the dynamical cluster-decay model [Phys. Rev. C 105, 014610 (2022)]

Sahila Chopra, Manoj K. Sharma, Peter Oto Hess, and Jasleen Bedi

(Received 27 June 2024; published 18 July 2024)

DOI: 10.1103/PhysRevC.110.019905

Table III of the original publication contains typographical mistakes in the mass numbers of the target and projectile. The target-projectile combination of the incoming channel must read $^{54}Cr + ^{248}Cm$ (not $^{48}Cr + ^{238}Cm$) in both the table caption and in the heading of the left column. The calculated cross sections in the table are correct and calculated from the $^{54}Cr + ^{248}Cm$ reaction only. The typographical mistake does not affect the results or conclusions.
