THIRD SERIES, VOLUME 103, NUMBER 9

CONTENTS

D1 MAY 2021

*The Table of Contents is a total listing of Parts A and B.*

*Part A consists of articles 091101–094515, and Part B articles 094516–099903(E)*

## LETTERS

- Determination of the  $\Lambda_c^+$  spin via the reaction  $e^+e^- \rightarrow \Lambda_c \bar{\Lambda}_c$  (9 pages) ..... L091101  
M. Ablikim *et al.* (BESIII Collaboration)
- Search for new decay modes of the  $\psi_2(3823)$  and the process  $e^+e^- \rightarrow \pi^0\pi^0\psi_2(3823)$  (9 pages) ..... L091102  
M. Ablikim *et al.* (BESIII Collaboration)
- Longitudinal double-spin asymmetry for inclusive jet and dijet production in polarized proton collisions at  $\sqrt{s} = 200$  GeV (9 pages) ..... L091103  
M. S. Abdallah *et al.* (STAR Collaboration)
- Physics reach of a low threshold scintillating argon bubble chamber in coherent elastic neutrino-nucleus scattering reactor experiments (8 pages) ..... L091301  
L. J. Flores, Eduardo Peinado, (CEzNS Theory Group at IF-UNAM) E. Alfonso-Pita, K. Allen, M. Baker, E. Behnke, M. Bressler, K. Clark, R. Coppejans, C. Cripe, M. Crisler, C. E. Dahl, A. de St. Croix, D. Durnford, P. Giampa, O. Harris, P. Hatch, H. Hawley-Herrera, C. M. Jackson, Y. Ko, C. B. Krauss, N. Lamb, M. Laurin, I. Levine, W. H. Lippincott, R. Neilson, S. Pal, M.-C. Piro, Z. Sheng, E. Vázquez-Jáuregui, T. J. Whitis, S. Windle, R. Zhang, and A. Zúñiga-Reyes (SBC Collaboration)
- $CP$  asymmetries and higher-order unitarity relations (7 pages) ..... L091302  
Tomáš Blažek and Peter Maták
- Extraction of the proton mass radius from the vector meson photoproductions near thresholds (5 pages) ..... L091501  
Rong Wang, Wei Kou, Ya-Ping Xie, and Xurong Chen
- Pseudogauge dependence of quantum fluctuations of the energy in a hot relativistic gas of fermions (7 pages) ..... L091502  
Arpan Das, Wojciech Florkowski, Radosław Ryblewski, and Rajeev Singh
- Toward the existence of the odderon as a three-gluon bound state (6 pages) ..... L091503  
Hua-Xing Chen, Wei Chen, and Shi-Lin Zhu

## ARTICLES

- Study of the reactions  $e^+e^- \rightarrow 2(\pi^+\pi^-)\pi^0\pi^0\pi^0$  and  $2(\pi^+\pi^-)\pi^0\pi^0\eta$  at center-of-mass energies from threshold to 4.5 GeV using initial-state radiation (21 pages) ..... 092001  
J. P. Lees *et al.* (BABAR Collaboration)
- Studies of quantum-mechanical coherency effects in neutrino-nucleus elastic scattering (11 pages) ..... 092002  
V. Sharma, L. Singh, H. T. Wong, M. Agartioglu, J.-W. Chen, M. Deniz, S. Kerman, H. B. Li, C.-P. Liu, K. Saraswat, M. K. Singh, and V. Singh (TEXONO Collaboration)
- Convolutional neural network for multiple particle identification in the MicroBooNE liquid argon time projection chamber (32 pages) ..... 092003  
P. Abratenko *et al.* (MicroBooNE Collaboration)

(Continued)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

By suggesting a few manuscripts each week, we hope to promote reading across fields. Please see our Announcement Phys. Rev. D **90**, 010001 (2014).

|                                                                                                                                                                                               |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Search for the decay $D_s^+ \rightarrow a_0(980)^0 e^+ \nu_e$ (10 pages) .....                                                                                                                | 092004 |
| M. Ablikim <i>et al.</i> (BESIII Collaboration)                                                                                                                                               |        |
| Measurement of the branching fraction of and search for a $CP$ -violating asymmetry in $\eta' \rightarrow \pi^+ \pi^- e^+ e^-$ at BESIII (11 pages) .....                                     | 092005 |
| M. Ablikim <i>et al.</i> (BESIII Collaboration)                                                                                                                                               |        |
| Amplitude analysis and branching-fraction measurement of $D_s^+ \rightarrow K_S^0 K^- \pi^+ \pi^+$ (14 pages) .....                                                                           | 092006 |
| M. Ablikim <i>et al.</i> (BESIII Collaboration)                                                                                                                                               |        |
| Unsupervised clustering for collider physics (12 pages) .....                                                                                                                                 | 092007 |
| Vinicius Mikuni and Florencia Canelli                                                                                                                                                         |        |
| Low background measurement in CANDLES-III for studying the neutrinoless double beta decay of $^{48}\text{Ca}$ (13 pages) .....                                                                | 092008 |
| S. Ajimura <i>et al.</i> (CANDLES Collaboration)                                                                                                                                              |        |
| Measurement of transverse single-spin asymmetries of $\pi^0$ and electromagnetic jets at forward rapidity in 200 and 500 GeV transversely polarized proton-proton collisions (14 pages) ..... | 092009 |
| J. Adam <i>et al.</i> (STAR Collaboration)                                                                                                                                                    |        |
| Form-factor-independent test of lepton universality in semileptonic heavy meson and baryon decays (12 pages) .....                                                                            | 093001 |
| Stefan Groote, Mikhail A. Ivanov, Jürgen G. Körner, Valery E. Lyubovitskij, Pietro Santorelli, and Chien-Thang Tran                                                                           |        |
| Tests of the Atomki anomaly in lepton pair decays of heavy mesons (7 pages) .....                                                                                                             | 093002 |
| G. López Castro and Néstor Quintero                                                                                                                                                           |        |
| Pole and screening masses of neutral pions in a hot and magnetized medium: A comprehensive study in the Nambu–Jona-Lasinio model (20 pages) .....                                             | 094001 |
| Bingkai Sheng, Yuanyuan Wang, Xinyang Wang, and Lang Yu                                                                                                                                       |        |
| Cross sections of inclusive $\psi(2S)$ and $X(3872)$ production from $b$ -hadron decays in $pp$ collisions and comparison with ATLAS, CMS, and LHCb data (6 pages) .....                      | 094002 |
| B. A. Kniehl, G. Kramer, I. Schienbein, and H. Spiesberger                                                                                                                                    |        |
| Relativistic corrections to decays of heavy baryons in the quark model (6 pages) .....                                                                                                        | 094003 |
| Ahmad Jafar Arifi, Daiki Suenaga, and Atsushi Hosaka                                                                                                                                          |        |
| Inclusive production of a heavy-light dijet system in hybrid high-energy and collinear factorization (17 pages) .....                                                                         | 094004 |
| A. D. Bolognino, F. G. Celiberto, M. Fucilla, D. Yu. Ivanov, and A. Papa                                                                                                                      |        |
| Energy-energy correlators in deep inelastic scattering (13 pages) .....                                                                                                                       | 094005 |
| Hai Tao Li, Yiannis Makris, and Ivan Vitev                                                                                                                                                    |        |
| Effects of a quark chemical potential on the analytic structure of the gluon propagator (18 pages) .....                                                                                      | 094006 |
| Yui Hayashi and Kei-Ichi Kondo                                                                                                                                                                |        |
| Theoretical study in the $\bar{B}^0 \rightarrow J/\psi \bar{K}^{*0} K^0$ and $\bar{B}^0 \rightarrow J/\psi f_1(1285)$ decays (8 pages) .....                                                  | 094007 |
| DaZhuang He, Xuan Luo, YiLing Xie, and Hao Sun                                                                                                                                                |        |
| Thermal quarks and gluon propagators in two-color dense QCD (10 pages) .....                                                                                                                  | 094008 |
| Toru Kojo and Daiki Suenaga                                                                                                                                                                   |        |
| Heavy quark transport in an anisotropic hot QCD medium: Collisional and radiative processes (11 pages) .....                                                                                  | 094009 |
| Jai Prakash, Manu Kurian, Santosh K. Das, and Vinod Chandra                                                                                                                                   |        |
| Nucleon mass radii and distribution: Holographic QCD, lattice QCD, and GlueX data (9 pages) .....                                                                                             | 094010 |
| Kiminad A. Mamo and Ismail Zahed                                                                                                                                                              |        |
| Mass spectra of $N\Omega$ dibaryons in the $^3S_1$ and $^5S_2$ channels (10 pages) .....                                                                                                      | 094011 |
| Xiao-Hui Chen, Qi-Nan Wang, Wei Chen, and Hua-Xing Chen                                                                                                                                       |        |
| Gauge invariance of transverse momentum dependent distributions at small $x$ (12 pages) .....                                                                                                 | 094012 |
| Renaud Boussarie and Yacine Mehtar-Tani                                                                                                                                                       |        |
| Fully coupled functional equations for the quark sector of QCD (25 pages) .....                                                                                                               | 094013 |
| Fei Gao, Joannis Papavassiliou, and Jan M. Pawłowski                                                                                                                                          |        |
| Top-quark pair production in association with a $W^\pm$ gauge boson in the POWHEG-BOX (27 pages) .....                                                                                        | 094014 |
| F. Febres Cordero, M. Kraus, and L. Reina                                                                                                                                                     |        |
| Phase diagram of helically imbalanced QCD matter (18 pages) .....                                                                                                                             | 094015 |
| M. N. Chernodub and Victor E. Ambrus                                                                                                                                                          |        |
