THIRD SERIES, VOLUME 105, NUMBER 2

CONTENTS

D15 JANUARY 2022

*The Table of Contents is a total listing of Parts A, B and C.  
Part A consists of articles 020001–023530, Part B articles 023531–024064,  
and Part C articles 024065–029902(E)*

### PART A

### EDITORIALS

Editorial: *Physical Review D* expands coverage of astrophysics and astronomy (2 pages) ..... 020001  
Mirjam Cvetič and Urs M. Heller

### LETTERS

No-go guide for the Hubble tension: Late-time solutions (11 pages) ..... L021301  
Rong-Gen Cai, Zong-Kuan Guo, Shao-Jiang Wang, Wang-Wei Yu, and Yong Zhou

Direct detection of light dark matter from evaporating primordial black holes (8 pages) ..... L021302  
Roberta Calabrese, Marco Chianese, Damiano F. G. Fiorillo, and Ninetta Saviano

Primordial black hole production during first-order phase transitions (6 pages) ..... L021303  
Jing Liu, Ligong Bian, Rong-Gen Cai, Zong-Kuan Guo, and Shao-Jiang Wang

New nonlinear instability for scalar fields (5 pages) ..... L021304  
Farbod Hassani, Pan Shi, Julian Adamek, Martin Kunz, and Peter Wittwer

Towards robust constraints on axion dark matter using PSR J1745-2900 (5 pages) ..... L021305  
R. A. Battye, J. Darling, J. I. McDonald, and S. Srinivasan

Note on the absence of the second clock effect in Weyl gauge theories of gravity (6 pages) ..... L021501  
M. P. Hobson and A. N. Lasenby

Noether charges in the geometrical trinity of gravity (6 pages) ..... L021502  
Jose Beltrán Jiménez and Tomi S. Koivisto

Holographic Abrikosov lattice: Vortex matter from black hole (6 pages) ..... L021901  
Chuan-Yin Xia, Hua-Bi Zeng, Yu Tian, Chiang-Mei Chen, and Jan Zaanen

Integrability and conformal bootstrap: One dimensional defect conformal field theory (7 pages) ..... L021902  
Andrea Cavaglià, Nikolay Gromov, Julius Julius, and Michelangelo Preti

Growth of the  $\frac{1}{16}$ -BPS index in 4d  $\mathcal{N} = 4$  supersymmetric Yang-Mills theory (6 pages) ..... L021903  
Sameer Murthy

### ARTICLES

Science with the TianQin Observatory: Preliminary results on stochastic gravitational-wave background (20 pages) .... 022001  
Zheng-Cheng Liang (梁正程), Yi-Ming Hu (胡一鸣), Yun Jiang (蒋贇), Jun Cheng (程俊),  
Jian-dong Zhang (张建东), and Jianwei Mei (梅健伟)

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

By suggesting a few manuscripts each week, we hope to promote reading across fields. Please see our Announcement Phys. Rev. D **90**, 020001 (2014).

|                                                                                                                                                                                                                           |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Search for continuous gravitational waves from 20 accreting millisecond x-ray pulsars in O3 LIGO data (42 pages)<br>R. Abbott <i>et al.</i> (LIGO Scientific Collaboration, Virgo Collaboration, and KAGRA Collaboration) | 022002 |
| Inherent nonlinearity of fluid motion and acoustic gravitational wave memory (10 pages) .....<br>Satadal Datta and Uwe R. Fischer                                                                                         | 022003 |
| Deep learning based event reconstruction for the Limadou High-Energy Particle Detector (14 pages) .....<br>S. Bartocci <i>et al.</i> (Limadou HEPD collaboration)                                                         | 022004 |
| Identification and removal of non-Gaussian noise transients for gravitational-wave searches (10 pages) .....<br>Benjamin Steltner, Maria Alessandra Papa, and Heinz-Bernd Eggenstein                                      | 022005 |
| BICEP/Keck XIV: Improved constraints on axionlike polarization oscillations in the cosmic microwave<br>background (12 pages) .....<br>P. A. R. Ade <i>et al.</i> BICEP/Keck Collaboration                                 | 022006 |
| Search of spin-dependent fifth forces with precision magnetometry (11 pages) .....<br>N. Crescini, G. Carugno, P. Falferi, A. Ortolan, G. Ruoso, and C. C. Speake                                                         | 022007 |
| Bosonic dark matter in neutron stars and its effect on gravitational wave signal (18 pages) .....<br>Davood Rafiei Karkevandi, Soroush Shakeri, Violetta Sagun, and Oleksii Ivanytskyi                                    | 023001 |
| Ultrahigh-energy diffuse gamma-ray emission from cosmic-ray interactions with the medium surrounding acceleration<br>sources (8 pages) .....<br>Pei-pei Zhang, Bing-qiang Qiao, Qiang Yuan, Shu-wang Cui, and Yi-qing Guo | 023002 |
| Constraining the orbital eccentricity of inspiralling compact binary systems with Advanced LIGO (31 pages) .....<br>Marc Favata, Chunglee Kim, K. G. Arun, JeongCho Kim, and Hyung Won Lee                                | 023003 |
| Merger rate density of stellar-mass binary black holes from young massive clusters, open clusters, and isolated binaries:<br>Comparisons with LIGO-Virgo-KAGRA results (20 pages) .....<br>Sambaran Banerjee              | 023004 |
| Unified model for orphan and multiwavelength blazar flares (19 pages) .....<br>Ze-Rui Wang, Ruo-Yu Liu, Maria Petropoulou, Foteini Oikonomou, Rui Xue, and Xiang-Yu Wang                                                  | 023005 |
| Refined ultralight scalar dark matter searches with compact atom gradiometers (15 pages) .....<br>Leonardo Badurina, Diego Blas, and Christopher McCabe                                                                   | 023006 |
| Gravitational wave asteroseismology on cooling neutron stars (10 pages) .....<br>Hajime Sotani and Akira Dohi                                                                                                             | 023007 |
| Dark matter component in hadronic models with short-range correlations (12 pages) .....<br>O. Lourenço, T. Frederico, and M. Dutra                                                                                        | 023008 |
| Time delay interferometry combinations as instrument noise monitors for LISA (13 pages) .....<br>Martina Muratore, Daniele Vetrugno, Stefano Vitale, and Olaf Hartwig                                                     | 023009 |
| Dynamical evolution of dark matter admixed neutron stars (14 pages) .....<br>Troy Gleason, Ben Brown, and Ben Kain                                                                                                        | 023010 |
| Triangulating black hole forming stellar collapses through neutrinos (13 pages) .....<br>Lila Sarfati, Rasmus S. L. Hansen, and Irene Tamborra                                                                            | 023011 |
| Accelerating composite dark matter discovery with nuclear recoils and the Migdal effect (23 pages) .....<br>Javier F. Acevedo, Joseph Bramante, and Alan Goodman                                                          | 023012 |
| Cylindrically symmetric radial accretion onto a Levi-Civita stringlike source (18 pages) .....<br>Łukasz Bratek, Joanna Jałocha, and Marek Kutschera                                                                      | 023013 |
| Nature of radio-wave radiation from particle cascades (12 pages) .....<br>Clancy W. James                                                                                                                                 | 023014 |
| Utilizing cosmic-ray positron and electron observations to probe the averaged properties of Milky Way pulsars (20 pages)<br>Ilias Cholis and Iason Krommydas                                                              | 023015 |
| Constraining self-interacting dark matter with dwarf spheroidal galaxies and high-resolution cosmological <i>N</i> -body<br>simulations (8 pages) .....<br>Toshihiro Ebisu, Tomoaki Ishiyama, and Kohei Hayashi           | 023016 |
| Relevance of photon-photon dispersion within the jet for blazar axionlike particle searches (15 pages) .....<br>James Davies, Manuel Meyer, and Garret Cotter                                                             | 023017 |
| Extreme matter meets extreme gravity: Ultraheavy neutron stars with phase transitions (27 pages) .....<br>Hung Tan, Travis Dore, Veronica Dexheimer, Jacquelyn Noronha-Hostler, and Nicolás Yunes                         | 023018 |

PHYSICAL REVIEW D

THIRD SERIES, VOLUME 105, NUMBER 2

D15 JANUARY 2022

|                                                                                                                                                           |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Stability criterion for white dwarfs in Palatini $f(R)$ gravity (12 pages) .....                                                                          | 024028 |
| Lupamudra Sarmah, Surajit Kalita, and Aneta Wojnar                                                                                                        |        |
| Newton, entanglement, and the graviton (17 pages) .....                                                                                                   | 024029 |
| Daniel Carney                                                                                                                                             |        |
| Curious case of the Buchdahl-Land-Sultana-Wyman-Ibañez-Sanz spacetime (12 pages) .....                                                                    | 024030 |
| Valerio Faraoni, Sonia Jose, and Alexandre Leblanc                                                                                                        |        |
| Photon escape in the extremal Kerr black hole spacetime (17 pages) .....                                                                                  | 024031 |
| Kota Ogasawara and Takahisa Igata                                                                                                                         |        |
| Thermodynamic geometry and Joule-Thomson expansion of black holes in modified theories of gravity (14 pages) .....                                        | 024032 |
| Shahid Chaudhary, Abdul Jawad, and Muhammad Yasir                                                                                                         |        |
| Quantum stability of a new Proca theory (8 pages) .....                                                                                                   | 024033 |
| Claudia de Rham, Lavinia Heisenberg, Ankip Kumar, and Jann Zosso                                                                                          |        |
| Unified discontinuous Galerkin scheme for a large class of elliptic equations (22 pages) .....                                                            | 024034 |
| Nils L. Fischer and Harald P. Pfeiffer                                                                                                                    |        |
| Constraints on the Nieh-Yan modified teleparallel gravity with gravitational waves (13 pages) .....                                                       | 024035 |
| Qiang Wu, Tao Zhu, Rui Niu, Wen Zhao, and Anzhong Wang                                                                                                    |        |
| Equatorially symmetric configurations of two Kerr-Newman black holes (12 pages) .....                                                                     | 024036 |
| V. S. Manko and E. Ruiz                                                                                                                                   |        |
| Revisiting timelike geodesics in the Fisher-Janis-Newman-Winicour-Wyman spacetime (15 pages) .....                                                        | 024037 |
| Keisuke Ota, Shinpei Kobayashi, and Keisuke Nakashi                                                                                                       |        |
| Planar black holes configurations and shear viscosity in arbitrary dimensions with shift and reflection symmetric scalar-tensor theories (12 pages) ..... | 024038 |
| Moisés Bravo-Gaete and M. M. Stetsko                                                                                                                      |        |
| Field excitation in fuzzy dark matter near a strong gravitational wave source (11 pages) .....                                                            | 024039 |
| Shreyansh S. Dave and Sanatan Digal                                                                                                                       |        |
| Light propagation in 2PN approximation in the monopole and quadrupole field of a body at rest: Initial value problem (44 pages) .....                     | 024040 |
| Sven Zschocke                                                                                                                                             |        |
| Spherically symmetric black holes in the limiting curvature theory of gravity (17 pages) .....                                                            | 024041 |
| Valeri P. Frolov and Andrei Zelnikov                                                                                                                      |        |
| Black holes in $f(Q)$ gravity (35 pages) .....                                                                                                            | 024042 |
| Fabio D'Ambrosio, Shaun D. B. Fell, Lavinia Heisenberg, and Simon Kuhn                                                                                    |        |
| Quantum Love numbers (10 pages) .....                                                                                                                     | 024043 |
| Ram Brustein and Yotam Sherf                                                                                                                              |        |
| Classical Love number for quantum black holes (11 pages) .....                                                                                            | 024044 |
| Ram Brustein and Yotam Sherf                                                                                                                              |        |
| Measuring binary black hole orbital-plane spin orientations (24 pages) .....                                                                              | 024045 |

PHYSICAL REVIEW D

THIRD SERIES, VOLUME 105, NUMBER 2

D15 JANUARY 2022

|                                                                                                              |        |
|--------------------------------------------------------------------------------------------------------------|--------|
| Mock modularity and surface defects in topological $\mathcal{N} = 2$ super Yang-Mills theory (5 pages) ..... | 026025 |
| Georgios Korpas                                                                                              |        |
| AdS/QCD oddball masses and the odderon Regge trajectory from a twist-five operator approach (10 pages) ..... | 026026 |
| Eduardo Folco Capossoli, J. P. Morais Graça, and Henrique Boschi-Filho                                       |        |
| Note about null dimensional reduction of M5-brane (12 pages) .....                                           | 026027 |
| Josef Kluson                                                                                                 |        |
| Nonadditive quantum gravitational interaction for three nonpointlike objects (8 pages) .....                 | 026028 |
| Yongshun Hu and Hongwei Yu                                                                                   |        |

## ERRATA

|                                                                                                                                                                                                                     |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Erratum: Constraints on dark matter-nucleon effective couplings in the presence of kinematically distinct halo substructures using the DEAP-3600 detector [Phys. Rev. D <b>102</b> , 082001 (2020)] (5 pages) ..... | 029901 |
| P. Adhikari <i>et al.</i> (DEAP Collaboration)                                                                                                                                                                      |        |
| Erratum: LISA for cosmologists: Calculating the signal-to-noise ratio for stochastic and deterministic sources [Phys. Rev. D <b>100</b> , 104055 (2019)] (2 pages) .....                                            | 029902 |
| Tristan L. Smith and Robert R. Caldwell                                                                                                                                                                             |        |

This paper was highlighted in the APS publication *Physics* (physics.aps.org).

By suggesting a few manuscripts each week, we hope to promote reading across fields. Please see our Announcement Phys. Rev. D **90**, 020001 (2014).
