|                                                                                                                                                                                                                                                                                                                         |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Searching for $CP$ violation through two-dimensional angular distributions in four-body decays of bottom and charmed baryons (8 pages) .....<br>Zhen-Hua Zhang                                                                                                                                                          | L011301 |
| Stronger $C$ -odd color charge correlations in the proton at higher energy (6 pages) .....<br>Adrian Dumitru, Heikki Mäntysaari, and Risto Paatelainen                                                                                                                                                                  | L011501 |
| Interpreting LHCb's $\Lambda_b \rightarrow \Lambda_c \tau \bar{\nu}$ measurement and puzzles in semileptonic $\Lambda_b$ decays (3 pages) .....<br>Florian U. Bernlochner, Zoltan Ligeti, Michele Papucci, and Dean J. Robinson                                                                                         | L011502 |
| Simulating rare kaon decays $K^+ \rightarrow \pi^+ \ell^+ \ell^-$ using domain wall lattice QCD with physical light quark masses (7 pages) .....<br>P. A. Boyle, F. Erben, J. M. Flynn, V. Gülpers, R. C. Hill, R. Hodgson, A. Jüttner, F. Ó hÓgáin,<br>A. Portelli, and C. T. Sachrajda (RBC and UKQCD Collaborations) | L011503 |
| $X$ and $Z_{cs}$ in $B^+ \rightarrow J/\psi \phi K^+$ as $s$ -wave threshold cusps and alternative spin-parity assignments to $X(4274)$<br>and $X(4500)$ (8 pages) .....<br>Xuan Luo and Satoshi X. Nakamura                                                                                                            | L011504 |
| $U$ -spin puzzle in $B$ decays (5 pages) .....<br>Bhubanjyoti Bhattacharya, Suman Kumbhakar, David London, and Nicolas Payot                                                                                                                                                                                            | L011505 |
| Fiducial Drell-Yan production at the LHC improved by transverse-momentum resummation at $N^4LL_p + N^3LO$ (8 pages) .....<br>Tobias Neumann and John Campbell                                                                                                                                                           | L011506 |

| Disentangling the high- and low-cutoff scales via the trilinear Higgs couplings in the type-I two-Higgs-doublet model (17 pages) ..... | 015025 |
| Sin Kyu Kang, Jinheung Kim, Soojin Lee, and Jeonghyeon Song                                                                            |        |
| Emergent new symmetry from the Higgs shadow (8 pages) .....                                                                            | 015026 |
| Waleed Abdallah, Anjan Kumar Barik, Santosh Kumar Rai, and Tousik Samui                                                                |        |
| Indirect upper limits on $\ell_i \rightarrow \ell_j \gamma \gamma$ from $\ell_i \rightarrow \ell_j \gamma$ (5 pages) .....             | 015027 |
| Fabiola Fortuna, Alejandro Ibarra, Xabier Marciano, Marcela Marín, and Pablo Roig                                                      |        |
| Dark matter and radiative neutrino masses in conversion-driven scotogenesis (11 pages) .....                                           | 015028 |
| Julian Heeck, Jan Heisig, and Anil Thapa                                                                                               |        |
| Exploring the cosmological dark matter coincidence using infrared fixed points (13 pages) .....                                        | 015029 |
| Alexander C. Ritter and Raymond R. Volkas                                                                                              |        |
| Probing intermediate scale Froggatt-Nielsen models at future gravitational wave observatories (21 pages) .....                         | 015030 |
| Dhruv Ringe                                                                                                                            |        |
| Light- and heavy-quark symmetries and the $Y(4230)$ , $Y(4360)$ , $Y(4500)$ , $Y(4620)$ , and $X(4630)$ resonances (22 pages) .....    | 016001 |
| Fang-Zheng Peng, Mao-Jun Yan, Mario Sánchez Sánchez, and Manuel Pavon Valderrama                                                       |        |
| Variational autoencoders for anomalous jet tagging (20 pages) .....                                                                    | 016002 |
| Taoli Cheng, Jean-François Arguin, Julien Leissner-Martin, Jacinthe Pilette, and Tobias Golling                                        |        |
| Production rates of $D_s^+ D_s^-$ and $D \bar{D}$ molecules in $B$ decays (7 pages) .....                                              | 016003 |
| Jia-Ming Xie, Ming-Zhu Liu, and Li-Sheng Geng                                                                                          |        |
| Near-horizon quantum dynamics of 4D Einstein gravity from 2D Jackiw-Teitelboim gravity (13 pages) .....                                | 016004 |
| Sergei Gukov, Vincent S. H. Lee, and Kathryn M. Zurek                                                                                  |        |
| New method for directly computing reduced density matrices (14 pages) .....                                                            | 016005 |
| Christian Käding and Mario Pitschmann                                                                                                  |        |
| $Q$ -balls in polynomial potentials (14 pages) .....                                                                                   | 016006 |
| Julian Heeck and Mikheil Sokhashvili                                                                                                   |        |
| Multiple Mellin-Barnes integrals with straight contours (12 pages) .....                                                               | 016007 |
| Sumit Banik and Samuel Friot                                                                                                           |        |
| Machine-enhanced $CP$ -asymmetries in the electroweak sector (11 pages) .....                                                          | 016008 |
| Noah Clarke Hall, Isaac Criddle, Archie Crossland, Christoph Englert, Patrick Forbes, Robert Hankache, and Andrew D. Pilkington        |        |
| Screened massive expansion of Schwinger-Dyson equations (12 pages) .....                                                               | 016009 |
| Fabio Siringo                                                                                                                          |        |

PHYSICAL REVIEW D

THIRD SERIES, VOLUME 107, NUMBER 1

D1 JANUARY 2023

|                                                                                                                                                     |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Propagation of spin channel waves (10 pages) .....                                                                                                  | 016010 |
| Jin Hu and Zhe Xu                                                                                                                                   |        |
| Superluminal propagation from IR physics (6 pages) .....                                                                                            | 016011 |
| Asuka Ito and Teruaki Suyama                                                                                                                        |        |
| Testing entanglement and Bell inequalities in $H \rightarrow ZZ$ (12 pages) .....                                                                   | 016012 |
| J. A. Aguilar-Saavedra, A. Bernal, J. A. Casas, and J. M. Moreno                                                                                    |        |
| Stringent constraint on $CPT$ violation with the synergy of T2K-II, NO $\nu$ A extension, and JUNO (10 pages) .....                                 | 016013 |
| T. V. Ngoc, S. Cao, N. T. Hong Van, and P. T. Quyen                                                                                                 |        |
| Vector boson fusion versus gluon-gluon fusion Higgs boson production with full-event deep learning: Toward a decay-agnostic tagger (17 pages) ..... | 016014 |
| Cheng-Wei Chiang, David Shih, and Shang-Fu Wei                                                                                                      |        |
| Thermodynamic properties of non-Hermitian Nambu–Jona-Lasinio models (26 pages) .....                                                                | 016015 |
| Alexander Felski, Alireza Beygi, and S. P. Klevansky                                                                                                |        |
| Forward inclusive jet productions in $pA$ collisions (30 pages) .....                                                                               | 016016 |
| Lei Wang, Lin Chen, Zhan Gao, Yu Shi, Shu-Yi Wei, and Bo-Wen Xiao                                                                                   |        |
| Parton shower generator based on the Gribov-Levin-Ryskin equation (10 pages) .....                                                                  | 016017 |
| Yu Shi, Shu-Yi Wei, and Jian Zhou                                                                                                                   |        |
| Shear viscosity coefficient of magnetized QCD medium near chiral phase transition (11 pages) .....                                                  | 016018 |
| Xueqiang Zhu and Sheng-Qin Feng                                                                                                                     |        |
| Resummation of the $\alpha$ expansion for nonlinear pair production by an electron in a strong electromagnetic field (16 pages) .....               | 016019 |
| Greger Torgmuss                                                                                                                                     |        |

## ERRATA

|                                                                                                                                                                                |        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Erratum: Exploring the spectrum of the hidden charm strange pentaquark in the SU(4) version of the flavor-spin model [Phys. Rev. D <b>101</b> , 094007 (2020)] (2 pages) ..... | 019901 |
| Fl. Stancu                                                                                                                                                                     |        |
| Erratum: Lattice simulations of a gauge theory with mixed adjoint-fundamental matter [Phys. Rev. D <b>103</b> , 014503 (2021)] (3 pages) .....                                 | 019902 |
| Georg Bergner and Stefano Piemonte                                                                                                                                             |        |
| Erratum: Constraints on long-range spin-gravity and monopole-dipole couplings of the proton [Phys. Rev. D <b>96</b> , 075004 (2017)] (2 pages) .....                           | 019903 |
| Derek F. Jackson Kimball, Jordan Dudley, Yan Li, Dilan Patel, and Julian Valdez                                                                                                |        |
| Erratum: Three-quark static potential in perturbation theory [Phys. Rev. D <b>81</b> , 054031 (2010)] (2 pages) .....                                                          | 019904 |
| Nora Brambilla, Jacopo Ghiglieri, and Antonio Vairo                                                                                                                            |        |
